Identity in Organizations - Paul C. Godfrey 1998-07-21
How do people identify with organizations? What role does organizational identity play in organizational strategy? Identity in Organizations investigates the fundamental character of organizational identity and individual identification with an organization. Through the use of an unconventional, conversational format the reader is drawn into a provocative discussion among key organizational scholars that focuses on three different paradigmatic views of identity: a functionalist perspective, an interpretive perspective, and a postmodern perspective. Similarities and distinctions among these ways of understanding are explored and numerous theoretical and practical insights are gained. This groundbreaking book concludes with a discussion of the relevance of identity as a construct in organizational study and observations on conversation and theory building. Many well-known scholars participate in the conversation, including Jay Barney, Denny Gioia, Mary Jo Hatch, Stuart Albert, Anne Huff, Judi McLean Parks, and Rod Kramer. Identity in Organizations will be of interest to professionals and students of organizational studies, human resource management, industrial psychology, sociology of work, psychology, and organizational communication.

Federal Service and the Constitution, Second Edition - David H.

Rosenbloom 2014-07-24
Now in a new, thoroughly revised and updated second edition, this legal-historical analysis reviews and enlarges its look at the constitutional rights of federal employees from the nation's founding to the present. Rosenbloom concludes that the current status of constitutional rights may reflect a shift to a model based on private sector practices. --Robert Vaughn, Professor of Law and A. Organizations and Communication Technology - Janet Fulk 1990-03-01
How do technology and organization interact to shape organizational structures and processes? What organizational, political and social processes constrain technological development? What forces shape the articulation of organizational and technological systems? Answering these and other pivotal questions, this volume centres on the role of theory for advancing our knowledge of communication technology in organizations at several levels - micro, group and macro. The distinguished contributors examine richly diverse topics, including telecommunications, communication networks and new media, the use of group decision support systems and discretionary databases.
