Outsiders - Howard S. Becker 2008-06-30

One of the most groundbreaking sociology texts of the mid-20th century, Howard S. Becker's Outsiders is a thorough exploration of social deviance and how it can be addressed in an understanding and helpful manner. A compulsively readable and thoroughly researched exploration

of social deviance and the application of what is known as "labeling theory" to the studies of deviance. With particular research into drug culture, *Outsiders* analyzes unconventional individuals and their place in normal society.

Composito - Nancy Flowers 2007-01-01

Living among other people, in their families and communities, children become aware from a very early age of questions related to justice, and they search for the meaning of the world. By fostering an understanding of human rights, shaping opinion and developing attitudes, human rights education strongly supports this natural interest and learning process. This is what human rights education is about and this is what 'Composito manual on human rights education for children' is for. 'Composito' is a starting point for educators, teachers and trainers who are ready to deal with human rights education with children of 7-13 years. The book covers the key concepts of human rights and children's rights, and provides substantial theoretical background to 13 key human rights issues, such as democracy, citizenship, gender equality, environment, media, poverty, and violence. The 42 practical activities serve to engage and motivate children to recognise human rights issues in their own environment. They help children to develop critical thinking, responsibility and a sense of justice, and help them learn how to take action to contribute to the betterment of their school or community. The manual also gives practical tips on how it can be used in various formal and non-formal educational settings.

Science in the Kitchen and the Art of Eating Well - Pellegrino Artusi
2003-12-27

First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte*

di mangiar bene has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor - humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

Barking - Turid Rugaas 2008

Barking is more than just noise. Barking is natural and almost all dogs bark. It is one of the many ways dogs communicate with each other as well as with humans. In this book, author Turid Rugaas, well known for her work on identifying and utilizing canine calming signals, turns her attention to understanding and managing barking behavior. Think of barking as your dog's language. By learning to identify what your dog is expressing when he barks, you can take steps to minimize their negative effects.

The Dust of 100 Dogs - A.S. King 2017-10-03

The first book from LA Times Book Prize and Printz Honor winner A.S. King--a witty, snarky tale of love and family, revenge and reincarnation, and pirates. In the late seventeenth century, famed teenage pirate Emer Morrisey was on the cusp of escaping the pirate life with her one true love and unfathomable riches when she was slain and cursed with "the dust of one hundred dogs," dooming her to one hundred lives as a dog before returning to a human body-with her memories intact. Now she's a contemporary American teenager and all she needs to escape her no-good family and establish a luxurious life of her own is a shovel and a ride to Jamaica...

My Dog Pulls. What Do I Do? - Turid Rugaas 2005

Is walking your dog a tug-of-war? At last, a simple way to teach your dog to walk on a leash without pulling your arm off! Norwegian dog trainer, Turid Rugaas, internationally known for her ground-breaking work on canine body language and author of *On Talking Terms with Dogs: Calming Signals*, turns her attention to the common problem of dogs that pull while on a leash. In *My Dog Pulls. What Do I Do?* you will learn Turid's quick and easy method to train any age, size or breed of dog to walk calmly and quietly on a loose leash. Her approach is humane and based on a solid understanding of why dogs pull and how to work with the dog's nature and the environment to overcome the problem. City, town or country walking will become more relaxed, reducing stress for dog and owner. *My Dog Pulls* explains: Why dogs develop pulling problems. Simple steps to retraining even a vigorous puller. How to rehabilitate the puller with clear, helpful photographs. Correct use of leashes, collars and harnesses. What works, what doesn't. Troubleshooting problems that arise in training.

Forks Over Knives - Gene Stone 2011-06-28

The #1 New York Times bestseller answers: What if one simple change could save you from heart disease, diabetes, and cancer? For decades, that question has fascinated a small circle of impassioned doctors and researchers—and now, their life-changing research is making headlines in the hit documentary *Forks Over Knives*. Their answer? Eat a whole-foods, plant-based diet—it could save your life. It may overturn most of the diet advice you've heard—but the experts behind *Forks Over Knives* aren't afraid to make waves. In his book *Prevent and Reverse Heart Disease*, Dr. Caldwell Esselstyn explained that eating meat, dairy, and oils injures the lining of our blood vessels, causing heart disease, heart attack, or stroke. In *The China Study*, Dr. Colin Campbell revealed how cancer and other diseases skyrocket when eating meat and dairy is the norm—and plummet when a traditional plant-based diet persists. And more and more experts are adding their voices to the cause: There is nothing else you can do for your health that can match the benefits of a plant-based diet. Now, as *Forks Over Knives* is introducing more people than ever before to the plant-based way to health, this accessible guide provides the information you need to adopt and maintain a plant-based diet. Features include: Insights from the luminaries behind the film—Dr. Neal Barnard, Dr. John McDougall, *The Engine 2 Diet* author Rip Esselstyn, and many others. Success stories from converts to plant-based eating—like San'Dera Prude, who no longer needs to medicate her diabetes, has lost weight, and feels great! The many benefits of a whole-foods, plant-based diet—for you, for animals and the environment, and for our future. A helpful primer on crafting a healthy diet rich in unprocessed fruits, vegetables, legumes, and whole grains, including tips on transitioning and essential kitchen tools. 125 recipes from 25 champions of plant-based dining—from Blueberry Oat Breakfast Muffins and Sunny Orange Yam Bisque to Garlic Rosemary Polenta and Raspberry-Pear Crisp—delicious, healthy, and for every meal, every day. *Withrow and MacEwen's Small Animal Clinical Oncology* - E-Book -

Stephen J. Withrow 2013-08-07

With a unique focus on the most effective interventional techniques, Withrow & MacEwen's Small Animal Clinical Oncology, 5th Edition tells the full story of cancer in dogs and cats — what it is, how to diagnose it, and how to treat many of the most common cancers encountered in clinical practice. Nearly 500 color photographs, diagrams, x-rays, and gross views depict the clinical manifestations of various cancers. This edition covers the latest advances in clinical oncology, including chemotherapy, surgical oncology, and diagnostic techniques. With contributions from 65 veterinary oncology experts, this authoritative reference is a must-have for current, evidence-based therapeutic strategies on canine and feline oncology. "I really love this book. If you are interested in veterinary oncology, have a flick through this book online or at a conference when you get the chance. I hope that you agree with me that this is the definitive oncology reference source for the early 21st century and that you feel compelled to buy it. Your patients will thank you for it." Reviewed by: Gerry Polton MA VetMB MSc(Clin Onc) DipECVIM-CA(Onc) MRCVS, UK Date: July 2014 Cutting-edge information on the complications of cancer, pain management, and the latest treatment modalities prepares you to diagnose and treat pets with cancer rather than refer cases to a specialist. A consistent format for chapters on body system tumors includes coverage of incidence and risk factors, pathology, natural behavior of tumors, history and clinical signs, diagnostic techniques and workup, treatment options, and prognosis for specific malignancies. A systems approach to the diagnosis and management of cancer facilitates access to information about the many malignancies affecting small animal patients. Nearly 500 color images provide accurate depictions of specific diseases and procedures. Helpful drug formularies provide quick access to information on indications, toxicities, and recommended dosages for chemotherapeutic and analgesic drugs used in cancer treatment. Expert contributors provide in-depth coverage of the most current information in his or her

respective specialty in veterinary oncology. Chemotherapy protocols are included when case studies prove clinical efficacy. Discussion of compassion and supportive care for the management of pain, nutritional needs, and grief includes methods for handling the pet's pain and nutritional complications as well as the pet owner's grief when treatment is not successful. Thoroughly UPDATED chapters cover the most recent changes in the clinical management of melanoma, mast cell tumors, tumors of the skeletal system, tumors of the endocrine system, tumors of the mammary gland, urinary cancers, nervous system cancers, lymphoma, and histiocytic diseases. NEW Clinical Trials and Developmental Therapeutics chapter discusses the various phases of clinical trials as well as current challenges and opportunities in oncology drug development. NEW! A focus on the best recommended treatment options highlights therapeutic strategies that have been vetted by veterinary oncology experts. NEW co-author Dr. Rodney L. Page adds his valuable perspective, expertise, and research experience.
