**The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design** - Jon Lang 2020-11-10

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years. The ideas and projects, hypothetical and built, range in scale from the city to the urban block level. The focus is on where the generic ideas originated, the projects that were designed following their precepts, the functions they address and/or afford, and what we can learn from them. The morphology of a city—its built environment—evolves unselfconsciously as private and governmental investors self-consciously erect buildings and infrastructure in a pragmatic, piecemeal manner to meet their own ends. Philosophers, novelists,

architects, and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez-faire attitude to urban development. Rationalist theorists dream of ideal futures based on assumptions about what is good; empiricists draw inspirations from what they perceive to be working well in existing situations. Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs. This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces, including architects, planners, urban historians, urban geographers, and urban morphologists.

Global Development and  
Human Rights - Paul J. Nelson  
2021-05-02

From 2000 to 2015 the  
Millennium Development Goals  
(MDGs) mobilized external aid  
to finance life-changing  
services in the global South.  
However, in doing so, the  
organization failed to meet the  
challenges often associated  
with human rights initiatives,  
which are to make  
underprivileged communities  
independently prosperous,  
equitable, and sustainable. In

Global Development and  
Human Rights, Paul Nelson  
assesses the current thirty-year  
effort to make transformative  
changes in the global South by  
exploring how this disconnect  
from human rights weakened  
the MDGs reputation as a  
successful aid organization. To  
overcome the failings of the  
MDGs, the Sustainable  
Development Goals (SDGs)  
were formed in 2016 with the  
intention of managing the  
issues fundamentally ignored  
by the MDGs. Drawing on  
twenty-five years of research  
on development goals, human  
rights, and the organizations  
that promote them, Nelson  
reasons that transformative  
change arises out of national  
and local movements, and  
shows how human rights can  
offer leverage and political  
support that help drive  
transformative national  
initiatives.

*Framing and Managing Lean Organizations in the New Economy* - Darina Lepadatu  
2020-02-18

This book examines the dominance and significance of lean organizing in the international economy.

Scholars from each discipline see lean production as positive or negative; the book blends theory with practice by sorting out these different academic views and revealing how lean is implemented in different ways. The first part synthesizes academic research from a range of disciplines—including, engineering, sociology, and management—to present the reader with an integrated understanding of the benefits and drawbacks of lean management. The second part links this theory to practice, with a set of case studies from companies like Apple, Google, Nike, Toyota, and Walmart that demonstrate how lean is implemented in a variety of settings. The book concludes with three models, explaining how Toyotism, Nikefication with offshoring, and Waltonism provide full or less complete models of lean production. It clearly presents the positive and negative aspects of lean and insights into the culture of lean organizations. With its rich interdisciplinary approach, *Framing and Managing Lean*

Organizations in the New Economy will benefit researchers and students across a range of classes from management, sociology, and public policy to engineering.

### **Advancing Women's Health Through Medical Education**

- Uta Landy 2021-07-31

Neither legalization of abortion nor scientific and political advances in contraception and abortion ensure that training and research in family planning are routinely integrated into medical education. Without integration, subsequent generations of healthcare professionals are not prepared to incorporate evidence-based family planning into their practices, teaching, or research. Omission of this crucial component prevents the cultural and professional normalization of an often stigmatized and embattled aspect of women's health. Taking the successful US-based Ryan and Family Planning Fellowship programs as templates for training, teaching, and academic leadership, this book describes

the integration of family planning and pregnancy termination into curricula with an international outlook. With an evidence- and systems-based approach, the book is a unique and practical guide to inspire and train the next generation of healthcare professionals.

**Office Lean** - Ken Eakin  
2019-09-26

Struggling to apply Lean effectively in your office environment? Office Lean is a book for anyone who wants to apply Lean better in contexts where the work is both intangible and complex. It explains in simple terms, what Lean is -- and what Lean isn't -- enabling office professionals to understand how it can be successfully applied to their complex office-based work environments. Contrary to popular opinion, Lean is not only for mass manufacturing or healthcare. It applies just as much to the digital world of "knowledge work" industries such as banking and financial services, software development, and government.

But the fundamental concepts, straight from the factory floor, need a fair amount of translation to be effectively applied in cube farms.

Overturning the common perception that Lean is about imposing rigid rules, or simply eliminating waste in the name of "efficiency", Eakin presents Lean as a dynamic, flexible, people-centric philosophy that delivers outstanding business results by improving employee engagement and customer experience. Office Lean helps Lean practitioners (leaders/managers and coaches/consultants) working in professional office environments access the amazing, transformative results Lean can bring to their specific domains. It combines clear explanations of the core concepts of the Lean philosophy with relevant, practical examples from the fields of accounting, finance, insurance, IT and government.

**Race Brokers** - Elizabeth Korver-Glenn 2021-04-08

"Race Brokers examines how housing market professionals—including housing developers, real estate agents, mortgage lenders, and appraisers—construct 21st century urban housing markets in ways that contribute to or undermine racial segregation. Drawing on extensive ethnographic and interview data collected in Houston, Texas, Race Brokers shows that housing market professionals play a key role in connecting people-or refusing to connect people-to housing resources and opportunities. They make these brokering decisions through reference to racist or anti-racist ideas. Typically, housing market professionals draw from racist ideas that rank-order people and neighborhoods according to their perceived economic and cultural housing market value, entwining racism with their housing market activities and interactions. Racialized housing market routines encourage this entwinement by naturalizing racism as a professional tool. Race Brokers tracks how professionals

broker racism across the housing exchange process-from the home's construction, to real estate brokerage, mortgage lending, home appraisals, and the home sale closing. In doing so, it shows that professionals make housing exchange a racialized process that contributes to neighbourhood inequality and racial segregation. However, in contrast to the racialized status-quo, a small number of housing market professionals draw on anti-racist ideas and strategies to extend equal opportunities to individuals and neighborhoods, de-naturalizing housing market racism. Race Brokers highlights the imperative to interrupt the racism that pervades housing market professionals' work, dismantle the racialized routines that underwrite such racism, and cultivate a truly fair housing market"--

**Urban Landscapes in High-Density Cities** - Bianca Maria Rinaldi 2019-06-04

The positive effects of urban green spaces are well-known, ranging from the promotion of

health, support of biodiversity to climate regulation. However, the practical implementation of urban landscapes is less discussed. How can we make these spaces functional, economically feasible and inclusive, especially as cities become more diverse? The publication explores strategies to reconcile the various demands, such as food production, resilience and nature conservation. Indeed, urban landscapes have to be restorative, ecological and aesthetically pleasing at the same time. This is a particular challenge in high-density cities like Singapore, Seoul or New York where space is a scarce commodity. The continuing growth of the worldwide urban population imbues the topic with a special urgency.

**An Alternative Development Agenda for India** - Sanjay Kaul 2022-11-30

This book provides a revamped, transformative, and fiscally sustainable developmental agenda for India to radically improve the well-being and

livelihoods of its citizens. Grounded in a 'people first' approach, this alternative agenda focuses on seven vital development and inter-connected areas, including health, education, food and nutrition, child development, gender, livelihood and jobs, and urbanization. The volume highlights the systemic issues plaguing these sectors and offers pragmatic and implementable solutions to address them. The author takes cognizance of the COVID-19 pandemic and draws attention to the limitations of the current public policies and suggests cost-effective interventions and strategies that focus on the poor. The volume discusses crucial themes of universalizing healthcare, battling malnutrition and food insecurity, ensuring quality schooling, unshackling gendered mindsets, enhancing livelihoods and improving the urban quality of life to spell out a pragmatic and workable development agenda for India. Accessible and reader-friendly, the book will be an essential

read for scholars and researchers of development studies, economics, public policy, governance, development policy, public administration, political studies, South Asia studies. It will also be of interest to professionals in the development sector.

**Holding Together** - John Shattuck 2022-05-31

A bold new assessment of the

multipronged attack on rights in the United States, and how to push back An overwhelming majority of Americans agree that rights are essential to their freedom, and that rights today are severely threatened. The promise of rights has been reimagined at pivotal moments in American history—from the American Revolution to the Civil War to the Civil Rights Movement. Can today become another time of

transformation? Holding

Together is about the promise of rights as a source of American identity, the struggle to realize rights by countless Americans to whom the promise has been denied or not fulfilled, the hijacking of rights by politicians who seek power by dividing and polarizing, and the way forward in which rights can bring Americans together instead of tearing them apart. Drawing on a series of town hall meetings with representative groups of citizens across the country discussing their concerns over rights, new national opinion polls from all demographic

groups and political perspectives conducted in 2020 and 2021, and extensive research, *Holding Together* is a road map for an American rights revival. John Shattuck, Sushma Raman, and Mathias Risse present a comprehensive account of the current state of rights in the United States—and concrete recommendations to policy makers and citizens on how to reclaim them.

**Foreign Judges in the Pacific** - Anna Dziedzic  
2021-11-04

This book explores the use of foreign judges on courts of

constitutional jurisdiction in 9 Pacific states: Fiji, Kiribati, Nauru, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu and Vanuatu. We often assume that the judges sitting on domestic courts will be citizens. However across the island states of the Pacific, over three-quarters of all judges are foreign judges who regularly hear cases of constitutional, legal and social importance. This has implications for constitutional adjudication, judicial independence and the representative qualities of judges and judiciaries. Drawing together detailed empirical research, legal analysis and constitutional theory, it traces how foreign judges bring different dimensions of knowledge to bear on adjudication, face distinctive burdens on their independence, and hold only an attenuated connection to the state and its people. It shows how foreign judges have come to be understood as representatives of a transnational profession, with

its own transferrable judicial skills and values. Foreign Judges in the Pacific sheds light on the widespread but often unarticulated assumptions about the significance of nationality to the functions and qualities of constitutional judges. It shows how the nationality of judges matters, not only for the legitimacy and effectiveness of the Pacific courts that use foreign judges, but for legal and theoretical scholarship on courts and judging.

### **Applied Research Methods in Urban and Regional Planning** - Yanmei Li 2022

This book introduces the fundamentals of research methods and how they apply to the discipline of urban and regional planning. Written at a level appropriate for upper-level undergraduate and beginning master's level students, the text fills a gap in the literature for textbooks on urban planning. Additionally, the book can be used as a reference for planning practitioners and researchers when analyzing quantitative

and qualitative data in urban and regional planning and related fields. The volume does not assume advanced knowledge of mathematical formulas. Rather, it begins with the essentials of research methods, such as the identification of the research problems in planning, the literature review, data collection and presentation, descriptive data analysis, and report of findings. Its discipline-specific topics include field research methods, qualitative data analysis, economic and demographic analysis, evaluation research, and methods in sub-disciplines such as land use planning, transportation planning, environmental planning, and housing analysis. Designed with instruction in mind, this book features downloadable materials, including learning outcomes, chapter highlights, chapter review questions, datasets, and certain Excel models. Students will be able to download review questions to enhance the learning process and datasets to

practice methods.

### **A Review of Pharmaceutical Science. Support for Viva and Job Interviews** - Abdul

Kader Mohiuddin 2020-07-28

Academic Paper from the year 2020 in the subject

Pharmacology, grade: 12.0, , language: English, abstract:

The study helps to highlight the pharmacists' roles and responsibilities along with basic pharmacy education, with the most recent information obtained from publications in several journals, books, bulletins, newsletters, magazines. Also, many of the prospective viva and interview questions are solved along with a few chapter outlines, covering many of the pharmacy courses. However, it is very important to remember that no study aid can help do well in a viva session or job interview unless a knowledge base is kept sharpen. This study aims to support a pharmacy student or professional to give an accelerated mental support when books are not feasible to carry before an interview and viva session. The expanded role

of pharmacists uplifts them to patient care, industrial marketing, regulatory affairs from dispensing and manufacturing of drugs. The sector is emerging in both developed and under-developed countries.

Furthermore, pharmacy teaching institutions need to revise and update their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in healthcare arena.

**National Health Expenditure (NHE)** - Barry Leonard  
2011-03

These projections show that in 2009, the NHE is projected to have reached \$2.5 trillion and grown 5.7%, up from 4.4% in 2008, while the overall economy, still in recession, is anticipated to have fallen 1.1%. The expected acceleration in growth for 2009 was due in part to projected faster growth in the use of services as many sought treatment for the H1N1 virus and in part to expected increases in subsidized coverage provided through the COBRA. By 2019, national health spending is expected to reach \$4.5 trillion and comprise 19.3% of GDP. As a result of more rapid growth in public spending, the public share of total health care spending is expected to rise from 47% in 2008, exceed 50% by 2012, and then reach 52% by 2019. A print on demand report.

**Child and Adolescent Behavioral Health** - Edilma L. Yearwood 2021-02-23

Research has shown that a range of adult psychiatric disorders and mental health problems originate at an early age, yet the psychiatric symptoms of an increasing number of children and adolescents are going unrecognized and untreated—there are simply not enough child psychiatric providers to meet this steadily rising demand. It is vital that advanced practice registered nurses (APRNs) and primary care practitioners take active roles in assessing behavioral health presentations and work collaboratively with families and other healthcare professionals to ensure that all children and adolescents receive appropriate treatment. *Child and Adolescent Behavioral Health* helps APRNs address the mental health needs of this vulnerable population, providing practical guidance on assessment guidelines, intervention and treatment strategies, indications for consultation, collaboration, referral, and more. Now in its second

edition, this comprehensive and timely resource has been fully updated to include DSM-5 criteria and the latest guidance on assessing, diagnosing, and treating the most common behavioral health issues facing young people. New and expanded chapters cover topics including eating disorders, bullying and victimization, LGBTQ identity issues, and conducting research with high-risk children and adolescents. Edited and written by a team of accomplished child psychiatric and primary care practitioners, this authoritative volume: Provides state-of-the-art knowledge about specific psychiatric and behavioral health issues in multiple care settings Reviews the clinical manifestation and etiology of behavioral disorders, risk and management issues, and implications for practice, research, and education Offers approaches for interviewing children and adolescents, and strategies for integrating physical and psychiatric screening Discusses special topics such as legal and ethical

issues, cultural influences, the needs of immigrant children, and child and adolescent mental health policy Features a new companion website containing clinical case studies to apply concepts from the chapters Designed to specifically address the issues faced by APRNs, Child and Adolescent Behavioral Health is essential reading for nurse practitioners and clinical nurse specialists, particularly those working in family, pediatric, community health, psychiatric, and mental health settings.

### **Advances in Carbon Management Technologies -**

Subhas K. Sikdar 2021-02-01  
Volume 2 of Advances in Carbon Management Technologies has 21 chapters. It presents the introductory chapter again, for framing the challenges that confront the proposed solutions discussed in this volume. Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low-carbon footprint of the generation of power, heat and co-products, and of recovery

and reuse of biomass wastes for beneficial purposes. Section 5 provides potential carbon management solutions in urban and manufacturing environments. This section also provides state-of-the-art of battery technologies for the transportation sector. The chapters in section 6 deals with electricity and the grid, and how decarbonization can be practiced in the electricity sector. The overall topic of advances in carbon management is too broad to be covered in a book of this size. It was not intended to cover every possible aspect that is relevant to the topic. Attempts were made, however, to highlight the most important issues of decarbonization from technological viewpoints. Over the years carbon intensity of products and processes has decreased, but the proportion of energy derived from fossil fuels has been stubbornly stuck at about 80%. This has occurred despite very rapid development of renewable fuels, because at the same time the use of fossil fuels has also

increased. Thus, the challenges are truly daunting. It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve. While policy decisions are the driving forces for technology development, the book was not designed to cover policy solutions.
