Traditional Western Herbalism and Pulse Evaluation: A Conversation - Matthew Wood
2015-01-09

Pulse Evaluation is a pacesetter in the field of herbal and holistic medicine. It sheds new light on herbalism, holistic evaluation, and the age-old art of pulse-reading. "This is a monumental work, and an amazing contribution to our literature. I am always and adamantly of the mind that one's personal experience is of paramount importance, so there was a lot that I would not dream of contesting in your work. As you rightly state, nothing means anything divorced from the context of the patient's whole gestalt. There are many qualities you describe that I will be looking for in the future, or have felt and will reconsider the interpretation. Time will confirm or correct the three of you as the conversation unfolds. I am very pleased to meet Dr. Floyer and invite others to do the same." Brandt Stickley, L. Ac. Assistant Professor of Classical Chinese Medicine, National College of

The Earthwise Herbal, Volume I - Matthew Wood
2008-06-03

The first part in a comprehensive two-volume guide on the use of medicinal plants in Western herbal medicine—from an author who has almost forty years of clinical experience. The first in a two-volume set, *The Earthwise Herbal* profiles Old World plants (volume two will treat American plants). Organized alphabetically, the book encompasses all the major, and many of the secondary, herbs of traditional and modern Western herbalism. Author Matthew Wood describes characteristic symptoms and conditions in which each plant has proved useful

in the clinic, often illustrated with appropriate case histories. He also takes a historical view based on his extensive study of ancient and traditional herbal literature. Written in an easy, engaging, non-technical style, *The Earthwise Herbal* offers insight into the “logic” of the plant: how it works; in what areas of the body it works; how it has been used in the past; what its pharmacological constituents indicate about its use; and how all these different factors hang together to produce a portrait of the plant as a whole entity. Ideal for beginners, serious students, or advanced practitioners, *The Earthwise Herbal* is also useful for homeopaths and flower essence practitioners as it bridges these fields in its treatment of herbal medicines.

The Earthwise Herbal Repertory - Matthew Wood 2016-11-01

Discover the healing applications of a wide variety of medicinal plants with this first comprehensive herbal repertory from an

internationally known herbalist Expert herbalist Matthew Wood takes the guesswork out of the application of medicinal plants. Here, he provides an invaluable cross-reference of constitutional types, energetic categories, and specific systems—so herbalists can more easily identify the right remedies for a specific condition. Unlike many reference books in which medicinal plants are defined simply by condition or disease name, this book offers tools for differentiating between remedies and analyzing each case in a holistic fashion. While this system of cross-referencing is well known to homeopaths, it is less frequently used by herbalists. The Earthwise Herbal Repertory seeks to bridge the gap between different healing systems, incorporating knowledge from ancient Greek and traditional Native American medicine, nineteenth-century botanical medicine, homeopathy, and modern biomedical research. This definitive repertory proves useful for homeopaths and herbalists, professionals and

home practitioners alike.

The Earthwise Herbal, Volume II - Matthew

Wood 2009-04-28

In this companion volume to *The Earthwise Herbal: A Complete Guide to Old World Medicinal Plants*, Matthew Wood, an expert herbalist who has used medicinal herbs with tens of thousands of patients over a twenty-five-year career, provides detailed descriptions of New World (North American) herbs and their uses. Organized as a materia medica (names and descriptions of herbs/plants are listed alphabetically), the book explains the use of the whole plant (not just “active ingredients”) in the treatment of the whole person and describes symptoms and conditions that the plants have been successful in treating—from digestive ailments, headaches, and high blood pressure to asthma, skin rashes, and allergies, to name a few. Wood, who has systematically studied ancient and traditional herbal literature, takes a historical view and presents information in a thoughtful, engaging, nontechnical style. In addition, he provides remarkable case studies as

well as insight into the “logic” of each plant—its current and past usage, pharmacological constituents, and other elements that together produce a comprehensive portrait of each herb. Holistic Medicine and the Extracellular Matrix - Matthew Wood 2021-09-28

- Examines the function of the extracellular matrix, the inner ocean that unifies all our cells and controls them in a coordinated and integrated fashion
- Explores how the extracellular matrix builds and repairs itself and how holistic therapy can be applied based on this knowledge
- Introduces new and old holistic and herbal protocols for treatment of the matrix

The cells in our bodies are not independent units. They do not control their own feeding, elimination, migration, or reproduction; they are controlled by signals from the extracellular matrix (ECM) that surrounds them. This all-encompassing inner ocean unifies all our cells and controls them in a coordinated and integrated fashion. Revealing the stunning

implications of the extracellular matrix, Matthew Wood shows how it clearly explains the actions and efficacy of holistic therapies. He explores the ground-breaking research of Alfred Pischinger, who discovered the ECM in 1975, as well as the role of the matrix in transmitting and enacting the genetic code, including the roles of the mitochondria, the nucleus, and ribosomes. He explores how the matrix builds and repairs itself and investigates the complex processes and components involved in the self-healing of wounds and traumas. Wood explains how modern drugs, directed at specific receptors on the cell membrane, interfere with bodily self-regulation. He details how holistic therapies modify the environment of the cell and strengthen the whole, bringing the body back to homeostasis and consequently offering true healing. He sheds new light on how herbs are utilized in the body based on the matrix and discusses the actions of several common herbs in this regard. Wood shows how, even before the

discovery of the ECM, many holistic practitioners had already intuited its existence and were acting with advanced understanding of the interconnectedness of the internal cellular terrain. Offering a cutting-edge understanding of the extracellular matrix, Wood reveals the importance of the ECM in treating the whole individual, the basis not only of medical herbalism but of all holistic medicine.

The Language of Plants - Julia Graves 2012-05

"A powerful and unique book, *The Language of Plants* is without doubt the most in-depth discussion of plant signatures available to us today. A brilliant medical herbalist, Julia has drawn from ancient and modern sources and blended this knowledge with her own rich experience and personal wisdom to create a marvelous resource, designed to take us deeply into the healing energetics of plants. While reading it, I felt a modern alchemist at work." -- Rosemary Gladstar, herbalist and author of *Rosemary Gladstar's Herbal Recipes for Vibrant*

Health and The Herbalist's Way It is only in the age of technology that human beings have lost a sense of nature being alive. Throughout history, people spoke to nature, and nature communicated with them. During the Middle Ages, reading the "book of nature" was called the doctrine of signatures, which had always been an important part of interacting with nature for traditional healers and herbalists. "As a child, I just knew which plant to pick up and hold to my head for a headache to go away. Once I heard about the concept of a 'doctrine of signatures,' I would just stand silently, in awe of nature talking to me, talking and talking in her silent, direct speech. The book of nature seemed so obviously spelled out, and in oddest contrast to what I learned in medical school. My professors seemed never to have heard of nature being vibrant and alive and brimming with patterns of energy that are right there for us to understand and use.... This direct and primordial experience of being part of nature's

omnipresent, cyclic course taught me more in the realm of no-words than any university ever could have." --Julia Graves The Language of Plants covers all aspects of the doctrine of signatures in an easily accessible format, so that everyone, whether nature lovers or healers, can learn to read the language of plants in connection with healing. Read more by the author about this unique book. More than 200 color and b/w images.

2020-05-05

A never-before-translated occult classic that brings the science of herbal medicine back to its Hermetic roots • Includes a large collection of recipes for spagyric medicines and quintessences, with detailed step-by-step instructions, adapted from celebrated spagyrist such as Paracelsus, Pseudo-Lull, Philipp Ulstad, and Nicaise Le Fèvre • Provides botanical and medicinal classifications of over 600 plant species along with their astral natures,

elemental qualities, and planetary and zodiacal signatures • Explores advanced methods and techniques and shares the author's secret formula for a universal circulatum First published in French in 1911, this practical guide to the art of spagyrics begins by outlining the ancient yet often forgotten Hermetic foundations of herbalism. Author Jean Mavéric provides botanical and medicinal classifications of over 600 plant species along with an in-depth study of their astral natures, elemental qualities, and planetary and zodiacal signatures as well as practical advice on the appropriate times to harvest plants and administer herbal remedies and quintessences. Reviewing the general principles and procedures of premodern chemistry, Mavéric then explores the secret doctrines and operations of the spagyric art. He offers a large collection of recipes for spagyric herbal preparations adapted from celebrated spagyricists such as Paracelsus, Pseudo-Lull, Philipp Ulstad, Jan Baptist van Helmont, Oswald

Croll, and Nicaise Le Fèvre, providing detailed step-by-step instructions for a veritable pharmacopeia of spagyric extracts, tinctures, elixirs, liquors, oils, unguents, salts, aquae vitae, and quintessences. Mavéric also shares his intricate theory of astral medicine and advocates a seasonal "Hermetic diet" designed to keep the humors of the body in equilibrium and prevent the onset of illness. In the final section of the book, Mavéric focuses on the more advanced methods and techniques of Paracelsus, Helmont, and George Starkey, unraveling the mysteries of manufacturing alkalis, alkahests, and menstrua and divulging his own secret formula for a universal circulatum. Available now for the first time in English, this occult classic unveils the art of extracting spagyric essences to a modern audience while also bringing the science of herbal medicine back to its Hermetic roots. The Practice of Traditional Western Herbalism - Matthew Wood 2013-04-02

The Practice of Traditional Western Herbalism

places the function of western herbs in their true historical context, apart from homeopathy, traditional Chinese medicine, and Ayurveda. Recently there has been a revival of interest in western herbalism, but practitioners haven't been able to explore its benefits due to a void of information on the topic—the system of medicine the herbs fit into had all but disappeared. To remedy the situation, herbalist Matthew Wood has researched the old-time practices and reconstructed them for modern use. In resuscitating western herbal medicine and bringing it up to date, he gives his readers a powerful tool for holistic theory and treatment. Wood makes the point that plant medicines, because they are made from a broad range of chemical components, are naturally suited for the treatment of general patterns in the body. He argues against the biomedical model of standardization, in which herbs are refined and advertised as if they were drugs suited to an exact disease or condition.

Hailed as a “classic” by leading herbalist Rosemary Gladstar, this botanical compendium provides a wide-ranging history of herbalism and useful guidance for healing with herbs. Matthew Wood is one of the United States’ most renowned herbalists and the author of *Seven Herbs: Plants as Healers*, a watershed book in teaching herbal healing as a part of total wellness. With *The Book of Herbal Wisdom*, he continues and expands this study, creating a must-read guide for anyone who works in the natural health field or is interested in self-healing with herbs. Wood creates a vast and sweeping history of herbalism, drawing on Western botanical knowledge, homeopathy,

Traditional Chinese medicine, and Native American shamanic botany. Detailing the history and use of more than forty plants, he shows how each tradition views a plant, as well as its use in cases drawn from his own herbal and homeopathic practice. An initial section describes signatures, similar, and patterns in these traditions, and elements, temperaments, and constitutions. Wood has two objectives: to demonstrate how herbal medicines are agents of healing and wisdom, and to give the reader a useful catalog of plants for medicinal uses. His clinical observations of his patients bear the wry wisdom of the country doctor; his love of plants is evident in lush botanical descriptions, which show the connection between remedies—whether homeopathic, Chinese, or Native American—and the plants from which they are derived. An introduction to centuries of lore about healing from indigenous traditions, *The Book of Herbal Wisdom* integrates and describes North American Indian medicine,

homeopathy, Traditional Chinese Medicine, and Western herbalism like no other contemporary botanical compendium.

The text aims to teach via example, helping clinicians develop their own intuition and ability to create effective herbal formulas. Volume 2 (Circulation and Respiration) is also available, and Volume 3 (Endocrinology) will be published in May 2019.
