Introduction to European Union Law - Walter Cairns
2002-01

This volume is intended to

provide a comprehensive yet digestible overview of the principal features of EU law. It does so in a way which is relevant to the world of business, which remains the principal area of Community law. To this end, it includes a chapter on the external customs law of the EU, which affects anyone involved in the import/export trade involving non-EU countries. Unlike other books in the area, the book also offers practical advice. This involves not only an extensive guide to the sources of EU materials, but also guidance on career and training opportunities for those whose studies have included Community law.

Blank Darkness - Christopher L. Miller 1985

"Blank Darkness: Africanist Discourse in French is a brilliant and altogether convincing analysis of the way in which Western writers, from Homer to the twentieth century have . . . imposed their language of desire on the least-known part of the world and have called it 'Africa.' There

are excellent readings here of writers ranging from Baudelaire, Rimbaud, Sade, and Céline to Conrad and Yambo Ouologuem, but even more impressive and important than these individual readings is Mr. Miller's wide-ranging, incisive, and exact analysis of 'Africanist' discourse, what it has been and what it has meant in the literature of the Western world."—James Olney,

The Science of Successful Living - Raymond Charles Barker 2018-12-01

"FEW PEOPLE think of life as a creative experiment. Most of us are so busy with routines that we take life for granted. We expect an endless routine of work, a hectic social life each weekend and two weeks' vacation each year. I trust that the readers of this book will derive from it a new interest in life, a zest for doing what needs to be done, and a technique to live with joyous enthusiasm. "Looking at life from an inspired viewpoint you can see those things which are on the side of greatness and

cease resisting the petty and the unimportant. Life is a process of intelligence. It always acts intelligently. Problems are the result of living life unintelligently. "The universe is actually a mental system. Its primary nature is the process of ideas becoming form. Every fact in your world is also an idea in your mind. To get new things in your world you must have new ideas in your consciousness. Few people do enough abstract thinking to create new ideas in their minds. They continually think about what they already know and have known for years. This explains the monotony of their lives. "Select the idea of some new experience you want and then think it without ceasing. Mind will deliver to you everything you need in order to accomplish your demonstration. This is far from being impossible. The great, the wise, and the true have proven this to be so. You have done it and so have your friends. You may not have thought of the process as being

either spiritual or psychological. You intuitively knew a new idea. Your thinking in terms of this idea caused something to happen in your experience. "This book has been written for that large section of today's population which is spiritually liberal and psychologically aware. Those bound by traditional beliefs will cast it aside. It is my desire that thousands will be helped and healed by reading these pages."—Raymond Charles Barker

Broadband Services - Imrich Chlamtac 2005-06-14

Access to the Internet is an increasing problem in many areas of the world. As the popularity and usefulness of the Internet increases on a daily basis, lack of access to the technology is putting many groups at a disadvantage in terms of better education, better jobs and even in terms of higher levels of civic participation. However, creating a network infrastructure to serve outlying communities and sectors of the population is not straightforward. This book brings together all the aspects of the problem - technical, regulatory and economic - into one volume to provide a comprehensive resource. It describes the latest technological advances that allow cost-effective network infrastructures to be built, and places them in the context of the applications and services that the infrastructure will deliver. A section on business models and case studies from North American and Europe demonstrate that the solutions are economically and practically viable. This book is

essential for anyone looking to gain an understanding of the issues and technology surrounding the access debate. It will be of particular relevance to network engineers/designers/planners at the incumbent operator companies charged with delivering broadband access to as yet unconnected regions. Governments and regulatory bodies will also find this a useful guide to the problems that they may face.

prepares students to become effective managers overseeing global marketing activities in an increasingly competitive environment. The text's guiding principle, as laid out concisely and methodically by authors Kotabe and Helsen, is that the realities of international marketing are more "multilateral." Suitable for all business majors, the text encourages students to learn how marketing managers work across business functions for effective corporate performance on a global basis and achievement of overall corporate goals. Global Marketing Management brings timely coverage in various economic and financial as well as marketing issues that arise from the acutely recessionary market environment.

Javatrekker - Dean Cycon
2007-10-17

In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and

remote areas around the world. In Javatrekker: Dispatches from the World of Fair Trade Coffee, a unique hybrid of Fair Trade business, adventure travel, and cultural anthropology, author Dean Cycon brings readers face-to-face with the real people who make our morning coffee ritual possible. Second only to oil in terms of its value, the coffee trade is complex with several levels of middlemen removing the 28 million growers in fifty distant countries far from you and your morning cup. And, according to Cycon, 99 percent of the people involved in the coffee economy have never been to a coffee village. They let advertising and images from the major coffee companies create their worldview. Cycon changes that in this compelling book, taking the reader on a tour of ten countries in nine chapters through his passionate eye and unique perspective. Cycon, who is himself an amalgam-equal parts entrepreneur, activist, and mischievous explorer-has traveled extensively

throughout the world's tropical coffeelands, and shows readers places and people that few if any outsiders have ever seen. Along the way, readers come to realize the promise and hope offered by sustainable business principles and the products derived from cooperation, fair pricing, and profit sharing. Cycon introduces us to the Mamos of Colombia-holy men who believe they are literally holding the world together-despite the severe effects of climate change caused by us, their "younger brothers." He takes us on a trip through an ancient forest in Ethiopia where many believe that coffee was first discovered 1,500 years ago by the goatherd Kaldi and his animals. And readers learn of Mexico's infamous Death Train, which transported countless immigrants from Central America northward to the U.S. border, but took a horrifying toll in lost lives and limbs. Rich with stories of people, landscapes, and customs, Javatrekker offers a deep appreciation and

understanding of the global trade and culture of coffee. In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. What is Fair Trade Coffee? Coffee prices paid to the farmer are based on the international commodity price for coffee (the "C" price) and the quality premium each farmer negotiates. Fair Trade provides an internationally determined minimum floor price when the C plus premium sinks below \$1.26 per pound for conventional and \$1.41 for organics (that's us!). As important as price, Fair Trade works with small farmers to create democratic cooperatives that insure fair dealing, accountability and transparency in trade transactions. In an industry where the farmer is traditionally ripped off by a host of middlemen, this is tremendously important.

Cooperatives are examined by the Fairtrade Labeling Organization (FLO), or the International Fair Trade Association (IFAT), European NGOs, for democratic process and transparency. Those that pass are listed on the FLO Registry or become IFAT members. Cooperatives provide important resources and organization to small farmers in the form of technical assistance for crop and harvest improvement, efficiencies in processing and shipping, strength in negotiation and an array of needed social services, such as health care and credit. Fair Trade also requires pre-financing of up to sixty percent of the value of the contract, if the farmers ask for it. Several groups, such as Ecologic and Green Development Fund have created funds for pre-finance lending.

Early Childhood Inclusion -

Michael J. Guralnick 2001

This book comprehensively evaluates early childhood inclusion over the past 25 years. Based on their research and extensive experience, the

authors examine benefits and drawbacks of inclusion, leading influences on inclusion, and issues that face children in different environments with different developmental challenges. The book shows professionals, instructors, and students in early intervention and early childhood education where inclusion is today and what they need to do to keep the field moving forward. The final chapter presents a national in-scope agenda for change - a framework of ideas for meeting challenges and achieving an agreed-upon set of principles and practices - in order to create optimal educational environments for all children.

Tiger Country - Nina Raine
2014-12-11

Nina Raine's Tiger Country is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of

Tribes. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. Tiger Country was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.

Toward a Translation Criticism
- Antoine Berman 2009
Françoise Massardier-
Kenney's translation of Antoine
Berman's *Toward a Translation
Criticism* makes available for
the first time in the English-
speaking world one of the
twentieth-century's
foundational texts in
translation studies. Berman's
book, published posthumously
in France, develops an original
concept of "criticism of
translation" and a methodology
to anchor the practice of this
criticism. He demonstrates how
the work of translation is a
critical process as well as a
creative one. Moving away

from nonsystematic evaluative
approaches that focus on the
shortcomings of translations or
the normative approaches that
study the cultural and literary
systems into which the
translations are inserted,
Berman applies the notion of
ethics he developed in his
earlier works, calling for a
translation that is
nonethnocentric and
stipulating that the creativity
required by translation be
focused on the re-creation of
the original in the other
language without being over-
determined by the personal
poetics of the writer-translator.
Berman achieves a rare
combination of hermeneutic
and stylistic analysis, of
commentary on the original
and analysis of its translations,
giving the reader access both
"to the language of the
original--to the way in which
poetry and thought are
deployed--and to the actual
work of translation." *Toward a
Translation Criticism* is divided
into two separate but
interlinked parts, each focused
on one element of the ethics of

translation: theory (reflection) and practice (experience). In the first part Berman presents what he calls a general "productive criticism," while in the second part he applies the general theoretical principles of this criticism to the analysis of the translations of John Donne's work into French and Spanish. The translation of Berman's text is accompanied by an introduction placing Berman's thought in its intellectual context and by supplementary notes that complete the bibliographic material presented in the French-language version. This study is essential reading for translation studies scholars, readers interested in the creative literary process, in the nature of literary criticism, and in the philosophy of language. It will also be of interest to John Donne specialists.

Magical Logic, Globalization, Conspiracy Theory, and the Shoah - Mark Weitzman 2008
Discusses the role of antisemitism in right-wing extremism, focusing on

American neo-Nazis like David Duke. Antisemitism is at the center of the extreme right's critique of the modern world. Among the latest propagandistic themes are anti-globalism, ecology, and anti-Americanism, and the Jews are blamed for all the associated problems. The neo-Nazis have formed an alliance with radical Islamists against the USA and its alleged controller, Israel. They espouse Holocaust denial, as exemplified by Iran's hosting of a conference in 2006 on that topic. The Internet is a very effective propaganda tool for such institutions as the Institute for Historical Review, which has shifted its emphasis from Holocaust denial to the theme of Jewish/Zionist world domination. Radical leftists have also been attracted to the anti-Zionism of Islamists and rightists. Extremist Internet sites have increased from only one in 1995 to 8,500 to date, and they use their mainstream status to increase social acceptability for antisemitism. Advocates using 21st-century

tools, like the Internet, to fight 21st-century antisemitism.

City of Man - Michael Gerson
2010-10-01

An era has ended. The political expression that most galvanized evangelicals during the past quarter-century, the Religious Right, is fading. What's ahead is unclear. Millions of faith-based voters still exist, and they continue to care deeply about hot-button issues like abortion and gay marriage, but the shape of their future political engagement remains to be formed. Into this uncertainty, former White House insiders Michael Gerson and Peter Wehner seek to call evangelicals toward a new kind of political engagement -- a kind that is better both for the church and the country, a kind that cannot be co-opted by either political party, a kind that avoids the historic mistakes of both the Religious Left and the Religious Right. Incisive, bold, and marked equally by pragmatism and idealism, Gerson and Wehner's new book has the potential to

chart a new political future not just for values voters, but for the nation as a whole.

MCSE est l'outil de base d'une méthode qui comprend un environnement numérique en développement permanent. C'est un "paperbook", c'est-à-dire qu'au livre est associé un site web en accès libre qui permet d'effectuer des exercices directement corrélés au livre (des exercices, un programme pour faire une évaluation réaliste de son niveau, des versions audio pour s'entraîner, un répéteur lexical pour une révision du vocabulaire scientifique, etc.). D'autres outils sont également proposés pour mieux comprendre et mieux s'exprimer oralement. MCSE est la porte d'entrée de tout cet environnement.

The Job - Douglas Kennedy
2011-11-03

'A furiously paced, compulsive thriller' The Times Ned Allen is young, smart, and upwardly mobile. Several years into his career as an ad salesman for a successful computer magazine,

Ned's finally left his small-town roots behind, and is certain that the sophisticated Manhattan world he covets is his forever. His wife Lizzie is also a rising star of a prestigious PR firm. It seems that Ned's made it. But then what appeared to be a career break shows its true colours. Ned's forced to make some tough calls, among them a question of ethics and the small matter of whether to lie to his wife - and when the tough calls just keep getting tougher he finds himself on the brink of losing everything ... Readers say: 'Classic Kennedy. Brilliant plot, wonderful dialogue and characters. You are bowled over by the pace.' 'Excellent five star read from the first to the last page' 'If you haven't read any of Douglas Kennedy books please do'

published the third volume of its Education on the Move series, a series dedicated to the analysis of key trends in education with the hope of inspiring dialogue among policy makers, educators and other key stakeholders on the challenges of education for tomorrow. The latest publication, entitled **Unleashing the Potential: Transforming Technical and Vocational Education and Training** is focused entirely on issues related to technical and vocational education and training (TVET). It takes stock of the steadily increasing demands and expectations on TVET systems around the globe and presents recent policy trends in the field of TVET. In their analysis, the authors provide insights into what it takes to unleash the potential of TVET systems around the world. They propose an integrated analytical approach that takes into consideration such factors as economic growth, social equity and issues related to sustainability so that TVET can contribute

more effectively to contemporary policy issues such as youth unemployment, gender disparities and climate change. Overall, the book calls for a transformation of TVET systems to enable them to respond to the demands of their contexts. This transformation should enable TVET systems to acquire agility to stay current and responsive to the rapidly changing demands of the twenty-first century."--Publisher's website.

Night and Fog - Sylvie Lindeperg 2014

François Truffaut called *Night and Fog* "the greatest film ever made." But when Alain Resnais finished his documentary, with its depiction of Nazi atrocities, the resistance of the French censors was fierce. A mere decade had passed since the end of the war, and the French public was unprepared to confront the horrors shown in the film—let alone the possibility of French complicity. In fact it would be through *Night and Fog* that many viewers first learned, as film critic Serge Daney put it,

“that the worst had only just taken place.” An engrossing account of the genesis, production, and legacy of Resnais's incomparable film, this book documents in extraordinary detail how a film that began as a cinematic spin-off of an educational exhibition on “resistance, liberation, and deportation” went on to become a significant step in the building of a collective consciousness of the tragedy of World War II. Sylvie Lindeperg frames her investigation with the story of historian Olga Wormser-Migot, who played an integral role in the research and writing of *Night and Fog*—and whose slight error on one point gave purchase to the film's detractors and revisionists and Holocaust deniers. Lindeperg follows the travails of Resnais, Wormser-Migot, and their collaborators in a pan-European search for footage, photographs, and other documentation. She uncovers creative use of liberation footage to stand in for daily life of the camps featured to such shocking

effect in the film—a finding that raises hotly debated questions about reenactment and witnessing even as it enhances our understanding of the film's provenance and impact. A microhistory of a film that altered the culture it reflected, *Night and Fog* offers a unique interpretation of the interworking of biography, history, politics, and film in one epoch-making cultural moment.
