**Human Factors
Considerations of
Undergrounds in
Insurgencies** - Us Army
Special Operations Command
2017-08-31

From the preface: "The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on

World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtria  lirimtare e Kosov s (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al'Is  miyyah (Islamic Resistance Movement,

or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region. Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in

psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines".

Infinite Awareness - Marjorie Hines Woollacott 2015-10-08 Book Award of the Parapsychological Association, 2017 Winner of the Eric Hoffer Book Awards 2017 (Spiritual) First Place, Nautilus Book Awards 2017 (Science, Cosmology and Expanding Consciousness) First Place, International Excellence Mind, Body Spirit Book Awards, 2017 (Human Consciousness) Bronze Medal, Feathered Quill Book Awards, 2017 (Best Religious/Spiritual) First Place, Great Northwest Book Festival, 2017 (Spiritual Books) First Place, New England Book Festival, 2016 (Spiritual Books)

As a neuroscientist, Marjorie Woollacott had no doubts that the brain was a purely physical entity controlled by chemicals and electrical pulses. When she

experimented with meditation for the first time, however, her entire world changed.

Woollacott's journey through years of meditation has made her question the reality she built her career upon and has forced her to ask what human consciousness really is. Infinite Awareness pairs Woollacott's research as a neuroscientist with her self-revelations about the mind's spiritual power. Between the scientific and spiritual worlds, she breaks open the definition of human consciousness to investigate the existence of a non-physical and infinitely powerful mind.

Recovering Agency - Luna Lindsey 2014-07-16

In 2012, Mormon General Authority Marlin K. Jensen acknowledged that members are leaving the Church of Jesus Christ of Latter-day Saints "in droves." Access to the internet is often credited and blamed for this mass exodus, where members learn about problematic doctrines and cover-ups of LDS history. Many are happy as Mormons. And many are not. Those who leave, and those doubters who stay, face struggles that few others can understand. Much of this

suffering is caused by manipulative and controlling techniques pervasive throughout LDS doctrines and culture. Understanding these techniques will help recovering Mormons overcome the effects of belonging to a high-demand group. As a former Mormon, Luna Lindsey experienced this coercive persuasion firsthand. Recovering Agency presents years of research into social psychology and the science of cult dynamics, to describe 31 mind control techniques, alongside examples of their use in Mormon scripture, lessons, and from the pulpit. Even if you have never been Mormon, chances are that coercive influence techniques have been used to manipulate you at some point. Turn the pages and learn the answers to longstanding questions about this unique American religion and about the human mind.

The Repressed Memory Epidemic - Mark Pendergrast 2017-10-13

This book offers a comprehensive overview of the concept of repressed

memories. It provides a history and context that documents key events that have had an effect on the way that modern psychology and psychotherapy have developed. Chapters provide an overview of how human memory functions and works and examine facets of the misguided theories behind repressed memory. The book also examines the science of the brain, the reconstructive nature of human memory, and studies of suggestibility. It traces the present-day resurgence of a belief in repressed memories in the general public as well as among many clinical psychologists, psychiatrists, social workers, "body workers," and others who offer counseling. It concludes with legal and professional recommendations and advice for individuals who deal with or have dealt with the psychotherapeutic practice of repressed memory therapy. Topics featured in this text include: The modern diagnosis of Dissociative Identity Disorder (DID) (once called

MPD) The "Satanic Panic" of the 1980s and its relation to repressed memory therapy. The McMartin Preschool Case and the "Day Care Sex Panic." A historical overview from the Great Witch Craze to Sigmund Freud's theories, spanning the 16th to 19th centuries. An exploration of the cultural context that produced the repressed memory epidemic of the 1990s. The repressed memory movement as a religious sect or cult. The Repressed Memory Epidemic will be of interest to researchers and clinicians as well as undergraduate and graduate students in the fields of psychology, sociology, cultural studies, religion, and anthropology.

[The Beauty Myth](#) - Naomi Wolf
2009-03-17

The bestselling classic that redefined our view of the relationship between beauty and female identity. In today's world, women have more power, legal recognition, and professional success than ever before. Alongside the evident progress of the women's

movement, however, writer and journalist Naomi Wolf is troubled by a different kind of social control, which, she argues, may prove just as restrictive as the traditional image of homemaker and wife. It's the beauty myth, an obsession with physical perfection that traps the modern woman in an endless spiral of hope, self-consciousness, and self-hatred as she tries to fulfill society's impossible definition of "the flawless beauty."

Deep Trance Identification -

Shawn Carson 2015-08-11

The Deep Trance Identification Companion is designed to help you streamline your DTI modeling project. The Companion consists of detailed worksheets and step-by-step processes to assist you in modeling excellence. This book represents the core principles of the DTI process as laid out by Carson, Marion, and Overdurf in "Deep Trance Identification." It is recommended that you begin with that book before using the manual.

Object-Oriented Feminism -

Katherine Behar 2016-11-01

The essays in Object-Oriented Feminism explore OOF: a feminist intervention into recent philosophical discourses—like speculative realism, object-oriented ontology (OOO), and new materialism—that take objects, things, stuff, and matter as primary. Object-oriented feminism approaches all objects from the inside-out position of being an object too, with all of its accompanying political and ethical potentials. This volume places OOF thought in a long history of ongoing feminist work in multiple disciplines. In particular, object-oriented feminism foregrounds three significant aspects of feminist thinking in the philosophy of things: politics, engaging with histories of treating certain humans (women, people of color, and the poor) as objects; erotics, employing humor to foment unseemly entanglements between things; and ethics, refusing to make grand philosophical truth

claims, instead staking a modest ethical position that arrives at being “in the right” by being “wrong.” Seeking not to define object-oriented feminism but rather to enact it, the volume is interdisciplinary in approach, with contributors from a variety of fields, including sociology, anthropology, English, art, and philosophy. Topics are frequently provocative, engaging a wide range of theorists from Heidegger and Levinas to Irigaray and Haraway, and an intriguing diverse array of objects, including the female body as fetish object in Lolita subculture; birds made queer by endocrine disruptors; and truth claims arising in material relations in indigenous fiction and film. Intentionally, each essay can be seen as an “object” in relation to others in this collection. Contributors: Irina Aristarkhova, University of Michigan; Karen Gregory, University of Edinburgh; Marina Gržinić, Slovenian Academy of Science and Arts; Frenchy Lunning, Minneapolis

College of Art and Design; Timothy Morton, Rice University; Anne Pollock, Georgia Tech; Elizabeth A. Povinelli, Columbia University; R. Joshua Scannell, CUNY Graduate Center; Adam Zaretsky, VASTAL.

Anti-Semitism and Psychiatry - H. Steven Moffic
2020-02-25

Following World War II and the exposure of the concentration camps, psychiatry turned its attention to a vast range of cultural concerns with results that seemed to indicate a decline of stigma over time. However, it is now clear that whatever drives prejudices, especially in the case of anti-Semitism, was just dormant and perhaps not fully understood. Hate crimes and anti-Semitism broad recently re-emerged in Europe, and the United States followed shortly thereafter. The US Federal Bureau of investigation reports that New York City, which is still considered the most

Jewish-friendly region in the US, experienced a 22% spike in anti-Semitic hate crimes in 2018 alone, with more extremes in other regions of the country. Neo-Nazi groups have grown stronger in the United States and abroad, often resulting in organized acts of violence. The recent Tree of Life synagogue shooting in Pittsburgh, PA demonstrated that these acts are not limited to one-on-one interactions, but sometimes as prolific, large-scale act. The medical community is not immune from biases either. The Cleveland Clinic recently fired a young doctor after she publicly declared her wishes to inject Jewish patients with lethal substances, which is only one of many hateful comments she made on social media over the course of several years. Psychiatrists in particular grapple with this as they try to serve patients of both Jewish and non-Jewish descent who struggle to process these acts of hate. Despite all of this, there is no training and no resource to guide medical

professionals through these challenges. The editors of the recent Springer book, *Islamophobia and Psychiatry*, recognize this gap in the literature and seek to develop another high-quality text to meet this need. Written by expert clinicians in global regions where these incidents are most prevalent, the book seeks to be neither political nor opinion-based; instead, the text takes an innovative cross-cultural psychiatric interaction, similar to what was done with Springer's new *Islamophobia* book. Coverage will range from foci on the social psychiatric aspects of anti-Semitism to how it may in turn infuse clinical encounters between patients and clinicians. Written by experts in this area, the insight and expertise of psychiatrists from a variety of cultural and religious backgrounds will focus on what psychiatrists need to know to combat the negative mental health impact that increasingly rise out of this particular phenomenon. Such a multi-cultural psychiatric approach

has never been taken before for this topic. This discourse is the foundation for the primary goal of this book: to develop the tools needed to improve clinical outcomes for patients. Hence, this book aims to present an updated, comprehensive bio-psychosocial perspective on anti-Semitism at the interface of clinical psychiatry.

[What Does it Mean to be Human? Life, Death, Personhood and the Transhumanist Movement](#) - D. John Doyle 2018-09-01
This book is a critical examination of the philosophical and moral issues in relation to human enhancement and the various related medical developments that are now rapidly moving from the laboratory into the clinical realm. In the book, the author critically examines technologies such as genetic engineering, neural implants, pharmacologic enhancement, and cryonic suspension from

transhumanist and bioconservative positions, focusing primarily on moral issues and what it means to be a human in a setting where technological interventions sometimes impact strongly on our humanity. The author also introduces the notion that death is a process rather than an event, as well as identifies philosophical and clinical limitations in the contemporary determination of brain death as a precursor to organ procurement for transplantation. The discussion on what exactly it means to be dead is later applied to explore philosophical and clinical issues germane to the cryonics movement. Written by a physician/ scientist and heavily referenced to the peer-reviewed medical and scientific literature, the book is aimed at advanced students and academics but should be readable by any intelligent reader willing to carry out some side-reading. No prior knowledge of moral philosophy is assumed, as the various key approaches to moral

philosophy are outlined early in the book.

Fanged Noumena - Nick Land
2011-04-01

A dizzying trip through the mind(s) of the provocative and influential thinker Nick Land. During the 1990s British philosopher Nick Land's unique work, variously described as "rabid nihilism," "mad black delezianism," and "cybergothic," developed perhaps the only rigorous and culturally-engaged escape route out of the malaise of

"continental philosophy" —a route that was implacably blocked by the academy. However, Land's work has continued to exert an influence, both through the British "speculative realist" philosophers who studied with him, and through the many cultural producers—writers, artists, musicians, filmmakers—who have been invigorated by his uncompromising and abrasive philosophical vision. Beginning with Land's early radical rereadings of Heidegger, Nietzsche, Kant and Bataille, the volume collects together the papers, talks and articles of the mid-90s—long the subject of rumour and vague legend (including some work which has never previously appeared in print)—in which Land developed his futuristic theory-fiction of cybercapitalism gone amok; and ends with his enigmatic later writings in which Ballardian fictions, poetics, cryptography, anthropology, grammatology and the occult are smeared into unrecognisable hybrids.

Fanged Noumena gives a dizzying perspective on the entire trajectory of this provocative and influential thinker's work, and has introduced his unique voice to a new generation of readers.

Anthropocosmic Theatre -

Nichos Nunez 2005-06-28

First published in 1997.

Routledge is an imprint of Taylor & Francis, an informa company.

Cybersexualities - Jenny

Wolmark 1999

Cyberspace, the cyborg and cyberpunk have given feminists new imaginative possibilities for thinking about embodiment and identity in relation to technology. This is the first anthology of the key essays on these potent metaphors.

Divided into three sections (Technology, Embodiment and Cyberspace; Cybersubjects: Cyborgs and Cyberpunks; Cyborg Futures), the book addresses different aspects of the human-technology interface. The extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in

relation to current critical theory and indicates the context for the specific essays. This is an invaluable guide for students studying any aspects of contemporary theory and culture.* Brings together in a unique collection the work of key authors in feminist and cyber theory* Demonstrates the wide range of contemporary critical work* Challenges constructions of gender, race and class* An extensive introduction surveys the ways cyborg and cyberspace metaphors have been used in relation to current critical theory* Brief section introductions indicate the context for the specific essays

Inside Scientology - Robert Kaufman 1972

Psycho-Cybernetics - Maxwell Maltz 1989-08-15

Previously published Wiltshire, 1967. Guide to personal health and success

Enchanted Feminism - Jone Salomonsen 2002

The first major study of the famous Reclaiming community of witches, founded in 1979 in

San Francisco. Examines gendered and religious identities and the communal and ritual processes of Reclaiming.

Prophet's Daughter - Erin Prophet 2008-09-24

In early 1990, in response to apocalyptic prophecies given by her mother, Elizabeth Clare Prophet, Erin Prophet entered a network of underground bunkers in Montana along with members of her mother's Church Universal and Triumphant, a controversial New Age sect. Emerging to find the world still intact, Erin was forced into a radical reassessment of her life and her beliefs. She had spent her adolescence watching her mother vilified as a dangerous cult leader even while attempting to meet her expectations by becoming a "prophet" herself. *Prophet's Daughter* describes Erin's search for her mother's origins and motivations. With the craft of a storyteller, she describes the combination of health crises and external pressure that drove her mother's ever-

more dire prophecies. She reveals how the allure of infallibility led her mother to a conspicuous downfall, and how her mother's rapidly progressing Alzheimer's disease truncated any hope of resolution. A remarkable memoir with implications for the dialog about power, group behavior and the future of religion.

The Art of Hypnosis - C. Roy Hunter 2004-09

When Doctors Kill - Joshua A. Perper 2010-06-14

It would come as no surprise that many readers may be shocked and intrigued by the title of our book. Some (especially our medical colleagues) may wonder why it is even worthwhile to raise the issue of killing by doctors. Killing is clearly unethical to the Art and Science of Medicine, which is geared toward easing pain and suffering and to saving lives rather than smothering them. Doctors should be a source of comfort rather than a cause for alarm. Nevertheless, although

they often don't want to admit it, doctors are people too. Physicians have the same genetic library of both endearing qualities and character defects as the rest of us but their vocation places them in a position to intimately interject themselves into the lives of other people. In most cases, fortunately, the positive traits are dominant and doctors do more good than harm. While physicists and mathematicians paved the road to the stars and deciphered the mysteries of the atom, they simultaneously unleashed destructive powers that may one day bring about the annihilation of our planet. Concurrently, doctors and allied scientists have delved into the deep secrets of the body and mind, mastering the anatomy and physiology of the human body, even mapping the very molecules that make us who we are. But make no mistake, a person is not simply an elegant biological machine to be marveled at then dissected.

Deep Trance Identification -
Shawn Carson 2014-08-13

"This book by Carson, Marion, and Overdurf is an excellent exploration of the extraordinary trance process of deep trance identification. It is thorough, practical, and clear thereby providing an excellent guide for those seeking far-reaching transformational change. I highly recommend it"
Stephen Gilligan Ph.D
Generative Trance. Deep Trance Identification (DTI) has captivated the imagination of hypnotists since the mid 20th century. DTI has been used by countless modelers to master hypnosis skills, musical and acting abilities, emotional transformation, and so much more. Historically very little is written about DTI despite it being at the heart of all unconscious learning and transformation. For the first time DTI is presented here in a practical and easily understandable way. Shawn Carson, Jess Marion, and John Overdurf have dedicated years to studying and using DTI and in this book they share their discoveries. They present the art and neuroscience of this

hypnotic phenomenon and explain how you can use this modality to change your life and the lives of your clients. Deep Trance Identification presents an elegant model for using DTI and outlines comprehensive techniques that make the DTI experience deeply transformative.

Trance Formation of America - Cathy O'Brien 1995

This is the documented autobiography of a victim of government mind control. Cathy O'Brien is the only vocal and recovered survivor of the Central Intelligence Agency's MK-Ultra Project Monarch mind control operation. Chiseled deep into the white stone of the CIA's Langley, Virginia headquarters is a partial verse lifted from the Holy Bible and writings of Saint John... ""and the truth shall set you free." This statement, like the agency, is total reality. The building that it is engraved upon houses the world's most successful manufacturer of lies to facilitate psychological warfare. The "Company" uses

truth and technology as their raw materials to produce "pure" lies for control of you and America's allies.

Religion in America Since 1945 - Patrick Allitt 2003
Discusses the Cold War, communism, Eisenhower, the civil rights movement, African-Americans and religion, Mormons, Vietnam, Catholics, feminism, cults, creationism and evolution, American Islam, home schooling, abortion, homosexuality and religion, and the Christian Right.

Our Father Who Art in Hell - James Reston, Jr. 2000-12-01
This is the definitive work on the Guyana tragedy when on November 18, 1978, one thousand members of the People's Temple cult killed themselves in a Guyana jungle by drinking poison-laced Kool-Aid. Through the Freedom of Information Act, the author obtained more than 800 hours of tape recordings made in the jungle. Reston chronicles the descent into madness of the cult leader, the Reverend Jim Jones. "Reston's eye is novelistic....His larger purpose

is to make the terribly irrational somehow understandable....He does so with the good judgment of a writer willing to avoid certain faddish modes of analysis."

—Robert Coles, Washington Post Book Review

THEE PSYCHICK BIBLE -

Genesis Breyer P-Orridge
2010-11-09

Thee Temple ov Psychick Youth (TOPY) will be remembered for its crucial influence on youth culture throughout the 1980s, popularizing tattooing, body piercing, "acid house" raves, and other ahead-of-the-curve cultic flirtations and investigations. Its leader was Genesis P-Orridge, co-founder of Psychick TV and Throbbing Gristle, the band that created the industrial music genre. The limited signed cloth edition of *Thee Psychick Bible* quickly sold out, creating demand for any edition of this 544-page book, which will be available in a handsome Smyth-sewn paperback edition with flaps and ribbon. According to author Genesis Breyer P-Orridge, "this is the most profound new manual on practical magick, taking it from its Crowleyan empowerment of the Individual to a next level of realization to evolve our species."
