CRC Handbook of Chromatography - Ram N. Gupta 2018-04-17

These volumes provide a reference source of different gas chromatographic, liquid chromatographic, or thin-layer chromatographic techniques for the qualitative determination of various therapeutic agents,

including antibiotics, vitamins and hormones, drugs of abuse in body fluids, dosage forms, or food stuffs. Over 5000 publications were reviewed to prepare tables of chromatographic data for 800 compounds, arranged alphabetically by generic drug name or by drug groups. A detailed summary of the extraction procedure described in each publication included in the table of a particular drug is also provided. This easy-to-read handbook is useful for selecting an appropriate chromatographic procedure for the determination of a given compound according to the available facilities.

This handbook is intended to serve as a working manual and reference book for carbohydrate chemists and biochemists using the chromatographic methods that are indispensable in this field. Emphasis is on newer methods, such as high-performance liquid chromatography (HPLC) and other automated liquid chromatography systems; and the material included was compiled mainly from literature published during the years 1970 to 1978. Data appearing in Volumes I and II of the Handbook of Chromatography are not repeated here, but references to relevant tables in Volumes I and II are given at the start of corresponding sections of this handbook. In some cases material published before 1970 that was omitted from Volumes I and II of the series is included here: this applies particularly to the sections dealing with paper chromatography and electrophoresis.
