Call of the Wild - Jack London

Part St. Bernard, part Scotch shepherd, Buck is a sturdy crossbreed canine accustomed to a comfortable life as a family dog -- until he's seized from his pampered surroundings and shipped to Alaska to be a sled dog. There, the forbidding landscape is as harsh as life itself during the gold rush of the 1890s. Forced to function in a climate where every day is a savage struggle for survival, Buck adapts quickly. Traces of his earlier existence are

obliterated and he reverts to his dormant primeval instincts, encountering danger and adventure as he becomes the leader of a wolf pack and undertakes a journey of nearly mythical proportions. Superb details, taken from Jack London's firsthand knowledge of Alaskan frontier life, make this classic tale of endurance as gripping today as it was over a century ago. One of literature's most popular and exciting adventure stories, The Call of the Wild will enrich the reading experience of youngsters, and rekindle fond memories of a favorite among older generations.

In an increasingly polarized world where trauma is often publicly renegotiated, our nervous systems are on high alert. From skyrocketing rates of depression and anxiety to physical illnesses such as autoimmune diseases and digestive disorders, many women today find themselves living out of alignment with their bodies. Kimberly Johnson is a somatic practitioner, birth doula, and postpartum educator who specializes in helping women recover from all forms of trauma. In her work, she's seen the same themes play out time and again. In a culture that prioritizes executive function and "mind over matter," many women are suffering from

deeply unresolved pain that causes mental and physical stagnation and illness. In *Call of the Wild*, Johnson offers an eye-opening look at this epidemic as well as an informative view of the human nervous system and how it responds to difficult events. From the “small t” traumas of getting ghosted, experiencing a fall-out with a close friend, or swerving to avoid a car accident to the “capital T” traumas of sexual assault, an impending natural disaster, or a life-threatening illness—Johnson explains how the nervous system both protects us from immediate harm and creates reverberations that ripple through a lifetime. In this practical, empowering guide, Johnson shows readers how to metabolize these nervous system responses, allowing everyone to come home to their deepest, most intuitive and whole selves. Following her supportive advice, readers will learn how to move from wholeness, tapping into the innate wisdom of their senses,

soothing frayed nerves and reconnecting with their “animal selves.” While we cannot cure the painful cultural rifts inflicting our society, there is a path forward—through our bodies.

The Call of the Wild and White Fang - Jack London 2004

Presented together in one volume, these are two of the greatest and most popular animal stories ever written. Even to designate them as "animal stories" seems to undervalue them, because these tremendous works are so much more than mere children's tales, although they are admittedly still greatly loved by the young. Penned by Jack London at the beginning of the twentieth century, the

first, *The Call of the Wild*, tells the story of Buck, a domestic dog who is kidnapped from his home in California and forced to pull sleds in the Arctic wastes. In the second, *White Fang*, a cross-breed that is three-quarters wolf and one quarter dog, endures considerable suffering in the Arctic before being tamed by a white American and taken to live in California. The two narratives are remarkable for the vividness of their descriptions and the success with which London imagines life from a nonhuman perspective.
