A two years' cruise off Tierra del fuego, the Falkland islands, Patagonia and in the river Plate: A narrative of life in the Southern seas -
William Parker Snow 1857

Face Perception - Vicki Bruce 2013-01-11

Human faces are unique biological structures that convey a complex variety of important social messages. Even strangers can tell things from our faces - our feelings, our locus of attention, something of what we are saying, our age, sex and ethnic group, whether they find us attractive. In recent years there has been genuine progress in understanding how our brains derive all these different messages from faces and what can happen when one or other of the structures involved is damaged. *Face Perception* provides an up-to-date, integrative summary by two authors who have helped develop and shape the field over the past 30 years. It encompasses topics as diverse as the visual information our brains can exploit when we look at faces, whether prejudicial attitudes can affect how we see faces, and how people with neurodevelopmental disorders see faces. The material is digested and summarised in a way that is accessible to students, within a structure that focuses on the different things we can do with faces. It offers a compelling synthesis of behavioural, neuropsychological and cognitive neuroscience approaches to develop a distinctive point of view of the area. The book concludes by reviewing what is known about the development of face processing and re-examines the question of what makes faces 'special'. Written in a clear and accessible style, this is

invaluable reading for all students and researchers interested in studying face perception and social cognition.

The coming race. Falkland. Zicci. Pausanias the Spartan - Edward Bulwer Lytton Baron Lytton 1878

Falklands Gunner - Tom Martin 2017-05-30

The Royal Artillery played an absolutely vital, though often forgotten, part in the British armed forces successful operation to recapture the Falkland Islands in 1982. The actions of the artillery were recorded by one young officer in a journal which he kept before, during and after the conflict. Second Lieutenant Tom Martin was a Command Post Officer with 29 (Corunna) Field Battery RA which deployed to the South Atlantic in 1982 as part of the Task Force dispatched to retake the Falklands. With its six 105mm Light Guns making the journey on the MV Europic Ferry, the Battery sailed south on the MV Norland with 2 PARA, joining 3 Commando Brigade for the landings. The five gun batteries of the Royal Artillery, totaling thirty light field guns, fired a tremendous number of shells on the Argentine forces. For its part, 29 (Corunna) Field Battery fired the first Fire Mission of the conflict and continued to do so until the Argentinian surrender in the most testing environment and against the odds. Whilst in the South Atlantic, Martin sought to detail and record the action on the Battery's gun position. Supported by the recollections of some of those he served alongside, Martin's notes and diary entries form the basis of this book; a vivid, blow-by-blow account which provides a

comprehensive picture of the Royal Artillery and its pivotal role in the Falklands War.

The Scars of War - Hugh McManners 1993
War is by far the most traumatic "life event" that any human can experience - a damaging combination of danger, uncertainty and horror. This book looks at the experiences of combat - what the modern battlefield is really like and how soldiers, sailors and airmen, prepare for combat.

The Falklands War - Gordon Ramsey 2009-03-30
In 1982, Argentina rashly gambled that a full-scale invasion of the Falkland Islands — ownership of which had been disputed with Great Britain for over a century — would put an end to years of political wrangling. However Britain's response was to immediately dispatch a task force to recover the islands, by force if necessary. The 'conflict' which followed (a formal declaration of war was never given) lasted ten weeks from Argentine invasion to British liberation, the white heat of battle using 20th century technology contrasting with bitter hand-to-hand bayonet fighting in inhospitable conditions. Eyewitness accounts by the participants of both sides, and islanders, leave us in no doubt as to the ferocity of the combat on land, sea, and in the air. Comparison photography in color of all the battlefields, the crash sites of the aircraft shot down, the relics and the remains, together with portraits of those who lost their lives and the battlefield memorials, serve as a graphic testimony to their endeavors, 25 years after the battle. A Roll of Honour lists the casualties of both sides and, for the first time, the graves of all the British fallen — both on the islands and in the United Kingdom — have been visited and photographed as a lasting record of all those who made the supreme sacrifice.

Seal Fisheries of the Falkland Islands and Dependencies - Anthony B. Dickinson
2017-10-18

This study offers a chronological history of seal fishing in the Falkland Islands and Dependencies from the eighteenth century to the early twenty-first. It concerns the fluctuating seal population due to sealing; the Atlantic and global demand for seal fur and oil; the competition between American, British, and Canadian sealers over the territory's seal stocks; and the attempts by

various ruling governments to prioritise domestic sealing, maintain sufficient seal stocks, and continue to make profit. It is comprised of nine chapters, the first and last chapters of which serve as introduction and conclusion. The study also includes eight appendices presenting tabled statistics, and a select bibliography. The appendices concern seal skin imports into London; vessel details at Puerto Soledad; the value and amount of seal products exported from the Falklands; Canadian sealing vessels entering Port Stanley; seal catch and oil yield in South Georgia; South Georgian seal catch summaries; South Georgian commercial catches by sealing division; and marine mammal products landed in the Newfoundland fisheries region.

Ice Steel and Fire - Linda Parker 2013-07-19
The generation that reached maturity in the inter war years had grown up in the shadow of the heroic age of Polar exploration and the sacrifices of a generation in the Great War. Their own adventures were to prove as astonishing and heroic as those of a previous generation. The members of the British Arctic air route expedition to Greenland, including Martin Lindsay, Quintin Riley and Freddie Spencer Chapman, were to pioneer the weather research methods necessary for Trans-Atlantic Flight. The university expeditions to Spitsbergen led by George Binney in the 1920s and Sandy Glen in the 1930s traversed and surveyed unexplored ground and contributed to developments in polar flight and radar. Glen's expeditions added to the knowledge of Arctic conditions by overwintering. Other pre-war exploits of these adventurers included a voyage around the world the wrong way, and participation in the British Graham Land Antarctic expedition. Peter Fleming, brother to the creator of James Bond - Ian Fleming - spent the 1930s exploring Brazil, China and Tartary. Fleming's exploits are recounted in detail in this book. The character, skills and endurance obtained in these years set these adventurers and explorers apart as men who were to play a distinguished and heroic role in the Second World War. Their expertise in Arctic conditions, small boat handling, and exploring in all climatic conditions resulted in their participation in all aspects of warfare and arenas of battle, particularly as exponents of 'special operations', and as key members of

Britain's first special forces. Their war service took them from the fjords of Norway and Spitsbergen to the jungles of Burma and Malaya and the beaches of Normandy and Italy. They were involved in blockade running, covert operations in Yugoslavia, Corsica and France and took part in major initiatives such as Ian Fleming's Intelligence gathering force, No 30 Assault unit, and the raid on St Nazaire. Most of these men had known each other before war came in 1939. In some cases they ended up serving alongside one another in wartime. The intertwined stories of these characters in peace and war are examples of how the spirit of adventure shown by men in the inter war years contributed to Britain's outstanding role in the Second World War. Linda Parker has written an important study that is equally relevant to both the history of British exploration and the genesis and early days of Britain's special forces 1939-45 - a quite unique and hitherto unexamined relationship. Linda Parker combines teaching History on a part time basis with her writing, and is currently completing a PhD at Birmingham University. Her main areas of interest are 20th Century Military History, Church History and the History of Polar exploration. She is a member of the Western Front Association. She was born and educated in Wales, but now lives in Oxfordshire with her husband and their dog. She enjoys walking and travelling, ideally together, and her ambition is to visit Antarctica. Her first book published by Helion was *The Whole Armour of God: Anglican Army Chaplains in the Great War* (2009).

[Three Days In June](#) - James O'Connell
2021-06-03

*** 'If you only read one book about the Falklands make sure it's this one.' - Soldier magazine 'An extraordinarily detailed account of the bloodiest battle of the Falklands war.' - Major General Jonathan Shaw CB CBE When 3 Para began their assault under cover of darkness on Mount Longdon in June 1982, nobody knew what to expect. The three platoons of B Company each approached the mountain silently, treading carefully through a series of defensive minefields. But following an explosion, fighting quickly escalated with shocking speed and severity, resulting in some of the bloodiest close hand fighting, terrible injuries, and

shocking loss of life experienced by British troops since the Korean war. Recreating 3 Para's bloody Falklands battle from multiple angles, James O'Connell - who fought there and was seriously injured himself - has written a gut-wrenching 360 degree classic. Frustrated by highly inaccurate books about the battle, O'Connell decided to set the record straight. What he did next was extraordinary - he revisited the Falkland's five times with comrades and Argentine soldiers and literally walked through the battle with them, step-by-step, creating an unprecedented masterpiece of immersive military publishing. Combined with rare access to the Battalion's records and radio logs, the resulting book is the last word on Mount Longdon, and might be the most harrowingly realistic description of modern warfare you will ever read.

The New Power of Children and Young People - David Cohen 2022-08-24

In a rapidly changing world, children have more of a voice than ever before. In *The New Power of Children and Young People*, David Cohen explores how this has happened, what the consequences might be and how we can best engage with our young people. David Cohen considers the social, political and psychological issues involved in children and young people's influence, and how it impacts the balance of power between children and parents and other adults in their lives. It examines crucial topics including the role of high-profile young people such as Malala Yousafzai and Greta Thunberg; their knowledge of and anxieties around global issues such as climate change; children's relationships with technology and social media; their changing relationships with parents and guardians; how children develop a sense of justice; sex and relationships; how children are depicted in TV and film; young people's experience of education; and shines a light on their growing political confidence and engagement. Young people should be interested as well as parents, teachers, social workers, politicians and other key professionals involved in children and young people's lives. This thought-provoking book offers insight to help us understand young people's lives.

Bringing War to Book - Rachel Woodward
2018-05-04

This book explores how military memoirs come to be written and published. Looking at the journeys through which soldiers and other military personnel become writers, the authors draw on over 250 military memoirs published since 1980 about service with the British armed forces, and on interviews with published military memoirists who talk in detail about the writing and production of their books. A range of themes are explored including: the nature of the military memoir; motivations for writing; authors' reflections on their readerships; inclusions and exclusions within the text; the memories and materials that authors draw on; the collaborations that make the production and publication of military memoirs possible; and the issues around the design of military memoirs' distinctive covers. Written by two leading commentators on the sociology of the military, *Bringing War to Book* offers a new and original argument about the representations of war and the military experience as a process of social production. The book will be of interest to students and scholars across a range of disciplines including sociology, history, and cultural studies.

The Falklands War - Martin Middlebrook
2012-04-19

With the sudden Argentine invasion of the remote Falkland Islands on 2 April 1982 the United Kingdom found itself at war. Due to the resolve of a determined Prime Minister and the resourcefulness of the Armed Forces, a Task Force, code named Operation CORPORATE, was quickly dispatched. Remarkably just over two months later, the Islands were liberated and the invaders defeated. By any standards this was a remarkable feat of all arms cooperation made possible by political resolve, sound planning, strong leadership and the courage and determination of the combatants. Martin Middlebrook, one of the most skillful historians of the 20th Century, has weaved the many strands of this extraordinary military achievement into a fascinating, thorough and highly readable account of the Campaign. For a full understanding of what it took to win this war there will be no better account to read than this.

The history of a voyage to the Malouine, or Falkland, islands, made in 1763 and 1764, under the command of m. de Bougainville ...

Falklands War - Get STUFT - I H Milburn
2012-03-22

A sailor's diary from the Falklands War 1982, telling the truth with tongue-in-cheek humour. The book charts the voyage taken by the RMS St. Helena (a ship taken up from trade - STUFT). She supported HMS Brecon and HMS Ledbury in minehunting/sweeping, and other ordnance clearance, including diving on the wrecks of sunken warships.

The Falklands War - There and Back Again - Mike Norman 2018-03-30

On 1 April 1982 Major Mike Norman, commander of Naval Party 8901, was looking forward to a peaceful yearlong tour of duty on the Falkland Islands. But events turned out differently, for the next day the Argentines invaded and he and his forty-three Royal Marines found themselves fighting for their lives. They took up defensive positions around Government House and on the approach to Stanley from Cape Pembroke to protect the Governor Rex Hunt and delay the advance to Stanley. They were prepared to die executing his orders. After a desperate battle in the gardens and even inside the house against superior numbers Rex Hunt ordered them to lay down their arms. As the surrender took place, an Argentine told a marine: The islands are ours now. The response was simple: We will be back. They were, and this is their story. The Royal Marines of Naval Party 8901 as well as some members of the previous detachment volunteered to join the Task Force and, some seventy-five days later, the men who witnessed the raising of the Argentine flag over the islands on 2 April saw the triumphant return of the Union Jack. Mike Norman's dramatic account draws on his own vivid recollections, the log recording the defense of Government House, the testimony of the marines under his command and newly released files from government archives. It is a powerful and moving tribute to the marines who confronted the Argentines when they invaded and then fought to force them out.

UFO Case Files Of Scotland (Volume 1):
Amazing Real Life Alien Encounters - Malcolm
Robinson 2017-06-21

The subject of UFOs has been hotly debated. Are UFOs space vehicles from another world? Are they top-secret military aircraft of some kind? Or are they simply a figment of our imagination? Malcolm Robinson is a UFO & Paranormal Researcher with over 40 year's expertise and has had 'hands on' experience with each of the cases contained in this book. The full story regarding the wave of UFO sightings over the town of Bonnybridge is given here, as is the full story of Scotland's first 'reported' UFO abduction (the A70 Incident) This book presents the most fascinating UFO cases that Scotland has to offer and clearly shows that Scotland as a country has been touched by the UFO presence. This book will leave you with little doubt that mankind is dealing with a very real and bona fide phenomenon, as the witnesses in this book can clearly testify to.

Living with Disfigurement in Early Medieval Europe - Patricia Skinner 2016-12-21

This book is open access under a CC-BY 4.0 license. This book examines social and medical responses to the disfigured face in early medieval Europe, arguing that the study of head and facial injuries can offer a new contribution to the history of early medieval medicine and culture, as well as exploring the language of violence and social interactions. Despite the prevalence of warfare and conflict in early medieval society, and a veritable industry of medieval historians studying it, there has in fact been very little attention paid to the subject of head wounds and facial damage in the course of war and/or punitive justice. The impact of acquired disfigurement—for the individual, and for her or his family and community—is barely registered, and only recently has there been any attempt to explore the question of how damaged tissue and bone might be treated medically or surgically. In the wake of new work on disability and the emotions in the medieval period, this study documents how acquired disfigurement is recorded across different geographical and chronological contexts in the period.

The History of a Voyage to the Malouine (or Falkland) Islands - Antoine-Joseph Pernety
2013-06-27

This journal, translated into English in 1771, is an account of the 1763-4 French expedition to the Falkland Islands.

Never Leave a Man Behind - Mick Dawson
2020-06-25

'Mick Dawson's gripping Never Leave A Man Behind, effectively two adventure stories for the price of one, can be justifiably described as "unputdownable". Dawson is a man you would want on your side, whether in battle or tackling waves as high as houses should you ever consider rowing the Pacific.' Sports Book of the Month 'An excellent read, it puts you in the boat, understanding what it's like to be in an extremely challenging environment while maintaining composure, cheerfulness and respect for your fellow men. I cannot recommend it highly enough' Keith M. Breslauer, Trustee of The Royal Marines Charity 'Breathtaking - builds tension from the very start with life-and-death challenges throughout. Courage and comradeship at their very best, showing how mental and physical disabilities cannot and are not allowed to define or undermine the human self. Leaves you in awe and respect for one man determined to help his muckers win their battles whatever it takes - at great personal cost' Jonathan Ball, Director, The Royal Marines Charity The stories of two veterans - one traumatised, one blind - who rediscover themselves with the help of a friend in the course of two epic ocean adventures, kayaking around the Falklands and rowing across the Pacific. Mick Dawson tells the story of kayaking around the Falkland Islands with friend and fellow Royal Marines veteran Steve Grenham, who was struggling to cope with the effects of Post-Traumatic Stress Disorder (PTSD), and the extraordinary tale of his 2,500-mile voyage in a rowing boat with his friend and former Royal Marine Commando Steve 'Sparky' Sparkes, who was not only a rowing novice, but also blind. Sparky and Mick succeeded in rowing across the finish line after a truly epic voyage of over 2,500 miles from Monterey Bay in California to Waikiki, Hawaii. They'd hoped to break the record for a two-man rowboat and finish in less than fifty-five days, but a hurricane interfered with their plans. It took them eighty-two days, sixteen hours and fifty-four minutes to complete the race, but it was an even greater

achievement for that, and Sparky became the first visually impaired person to row across the Pacific. The race with Sparky was the second expedition of an organisation Mick had set up a few years earlier, The Cockleshell Endeavour, designed to help another former Royal Marine and friend, Steve Grenham, by kayaking with him around the Falklands, where both former commandos served during the 1982 conflict with Argentina.

Transactions of the Royal Historical Society - Andrew Spicer 2017-06-29

A collection of major articles representing some of the best historical research by some of the world's most distinguished historians.

Falklands or Malvinas - Manuel Pedro Peña 2017-11-20

Historical analysis with the intention of providing the reader with judicial arguments and facts necessary to determine, through an objective analysis, who are the rightful owners of the Falkland Islands, regardless of the current state of occupation.

A Two Years' Cruise Off Tierra Del Fuego, the Falkland Islands, Patagonia, and in the River Plate - William Parker Snow 2013-10-31

This two-volume work of 1857 is a first-hand account of wide-ranging service for the South American Missionary Society.

A Falkland Islands Story a Doctor on Horseback - Tom Hopwood 2007-07-01

Dr Hopwood tells how as a newly qualified and newly married doctor in 1944 he becomes a Medical Officer in the Falklands Islands. There were then no roads or even tracks outside Port Stanley. On the West Falklands the tenderfoot doctor has to learn to ride as well as make the most of his limited medical knowledge. This story records what happens over the next three years

The Royal Navy and Falklands War - David Brown 1987-07-13

Soldiers and journalists alike wasted no time in telling the story of the campaign to recapture the Falkland Islands after the Argentinian invasion in April, 1982. Almost without exception, however, they are concerned largely on the role of the Army, for it was the part they played which particularly fired the public

imagination, and it may be said that the role of the Royal and Merchant Navies, the abiding images of which are for many the pictures of the exploding frigate *Antelope*, and the burning Atlantic Conveyor, has hitherto been overshadowed by the yomping of the Marines and the exploits of certain gentleman of the press. Yet none of them would have been there at all had the Royal Navy not provided the necessary transport, not to mention air cover and bombardment support. In the book David Brown, head of what was formally the Naval Historical Branch at the Ministry of Defence, tells in full for the first time the extraordinary story of how the fleet was assembled; of how merchant-ships from luxury liners such as the *Canberra* to cargo-carriers of every description were 'Taken Up From Trade' and, in a staggeringly short time, converted to their new role. He describes the stupendous problems presented by the assembling, and stowing, of the thousands of tons of stores and equipment needed by the Expeditionary Forces and the way in which these problems were dealt with.

The Official History of the Falklands Campaign: The origins of the Falklands war - Lawrence Freedman 2005

Covering the origins of the 1982 war, this book describes the long history of the dispute between Argentina and Britain over the sovereignty of the islands, and the difficulties faced by governments in finding a way to reconcile the dispute.

The Sovereignty Dispute Over the Falkland (Malvinas) Islands - Lowell S. Gustafson 1988

The complex question of the sovereignty of the Falkland Islands remains far from resolved, even after the military and political events that took place from April to June 1982. The first scholarly work of its kind, this broad and dispassionate study of the causes of the South Atlantic war between Britain and Argentina addresses the larger issues raised by the Falkland crisis and untangles a web of events and attitudes that stretch back over the past century. The book begins with a close evaluation of the two pivotal arguments: Argentina's stance that international law supports their historical right to the islands, and Britain's position that the length of their occupation of the Falklands, together with the principles of self-determination, legalized their

de facto control. Gustafson then discusses how potential off-shore oil reserves, diplomacy, domestic politics, and the use of force entered into the sovereignty dispute; analyzes the effects of war on international relations; and considers possible future approaches to handling the dispute.

Falklands Facts and Fallacies - Graham Pascoe
2022-10-13

Falklands Facts and Fallacies is a pioneer work and an essential contribution to an understanding of the history and legal status of the Falkland Islands. It presents abundant evidence from documents (some never printed before) in archives in Buenos Aires, La Plata, Montevideo, London, Cambridge, Stanley, Paris, Munich and Washington DC, and provides the facts to correct the fallacies and distortions in accounts by earlier authors. It reveals persuasive evidence that the Falklands were discovered by a Portuguese expedition at the latest around 1518-19, and not by Vespucci or Magellan. It demonstrates conclusively that the Anglo-Spanish agreement of 1771 did not contain a reservation of Spanish rights, that Britain did not make a secret promise to abandon the islands, and that the Nootka Sound Convention of 1790 did not restrict Britain's rights in the Falklands, but greatly extended them at the expense of Spain. For the first time ever, extracts from the despairing letters from the Falklands written in German in 1824 to Louis Vernet by his brother Emilio are printed here in translation, revealing the total chaos of the abortive 1824 Argentine expedition to the islands. This book reveals how tiny the Argentine settlement in the islands was in 1826-33. In April 1829 there were only 52 people, and there was a constant turnover of population; many people stayed only a few months, and the population reached its maximum of 128 only for a few weeks in mid-1831 before declining to 37 people at the beginning of 1833. This work also refutes the falsehood that Britain expelled an Argentine population from the Falklands in 1833. That myth has been Argentina's principal propaganda weapon since the 1960s in its attempts to undermine Falkland Islanders' right to self-determination. In fact Britain encouraged the residents to stay, and only a handful left the islands. A crucial document printed here is the

1850 Convention of Peace between Argentina and Britain. At Argentina's insistence, this was a comprehensive peace treaty which restored "perfect friendship" between the two countries. Critical exchanges between the Argentine and British negotiators are printed here for the first time, which show that Argentina dropped its claim to the Falklands and accepted that the islands are British. That, and the many later acts by Argentina described here, definitively ended any Argentine title to the islands. The legal status of the Falklands is analysed here by extensive reference to legal works, to United Nations resolutions on decolonisation, and to rulings by the International Court of Justice, which together demonstrate conclusively that the islands are British territory in international law and that the Falkland Islanders, who have now (2022) lived in their country for over 180 years and for nine generations, are a unique people who are holders of territorial sovereignty with the full right of external self-determination. This book completely refutes the argumentation presented by Professor Marcelo Kohen and Facundo Rodríguez in their work *Las Malvinas entre el Derecho y la Historia*, Buenos Aires, 2015 (and its English version: *The Malvinas/Falklands Between History and Law*), which repeats many of the untruths and distortions that have been presented for over half a century by Argentine authors - and by Argentine governments at the United Nations. This second edition has been thoroughly revised and updated; in cases of difference it supersedes the first edition published in March 2020.

Godolphin and Falkland - Lytton Bulwer (Edward) 1842

MV Norland, Secret Weapon of the Falklands War - Reg Kemp 2021-08-20

In 1982, North Sea ferry MV Norland transported passengers and vehicles between Hull and Rotterdam. Requisitioned as a troop ship to take the 2nd Battalion, Parachute Regiment to the Falklands, the 'volunteer' merchant navy crew were told they would only go as far as the Ascension Island and that they should think of it as an extended North Sea booze-cruise run. However, without notice Norland's role was changed and it became the first vessel to enter San Carlos Water, ending up

a sitting duck in 'Bomb Alley' air raids while disembarking troops and carrying out resupply runs. Narrowly escaping sinking, the ship was used as a shelter for survivors and for collecting the Gurkhas from the QE2 in South Georgia, ready for disembarking in San Carlos Bay, before repatriating Argentine POWs. Long after the surrender, MV Norland provided a ferry service between the Falklands and Ascension Island. While many in the war served an average of 100 days, for the crew of the Norland it was ten months; indeed, they were considered the first in and the last out. This is a gripping account of non-combatant volunteers railroaded into serving in a war they hadn't signed up for. *1982 Uncovered: The Falklands War Mapping Project* - Timothy Clack 2022-11-03

War and its legacy are traumatic to individuals, communities, and landscapes. The impacts last long beyond the events themselves and shape lives and generations. Archaeology has a part to play in the recording of, and recovery from, such trauma. This volume delivers the first intensive archaeological survey of the battlefields of the Falklands War.

Remembering the Falklands War - Sarah Maltby 2016-06-23

This book offers an empirically informed understanding of how identity and agency become wholly embedded within practices of media-remembering. It draws upon data collected from the British military, the BBC and Falkland Islanders during the 30th Anniversary of the Falklands war to uniquely offer multiple perspectives on a single 'remembering' phenomenon. The study offers an analysis of the convergence, interconnectedness and interdependence of media and remembering, specifically the production, interpretation and negotiation of remembering in the media ecology. In so doing it not only examines the role of media in the formation and sustaining of collective memory but also the ways those who remember or are remembered in media texts become implicated in these processes.

With 3 Para to the Falklands - Graham Colbeck

2017-11-30

On Friday, April 9, 1982, a British task force set sail for the Falkland Islands. Three months later, after a short but brutal campaign, it had successfully completed its mission of ejecting the Argentinean occupying forces from the islands. With 3 Para to the Falklands is the full story of that dramatic struggle from the point of view of a sergeant in the Third Battalion, Parachute Regiment (3 Para). This elite battle group played a significant part in the campaign, marching from Port San Carlos to Port Stanley and fighting in one of its most crucial, yet often-neglected battles the night assault on Mount Longdon. Graham Colbeck was there every step of the way and his vivid account reveals the stark realities of fighting in this stubbornly contested conflict. His narrative brings to the fore the chilling nature of the combat, the challenge of the harsh conditions met on the Falklands, the training and techniques of an elite force, and the comradeship of troops in battle.

Exocet Falklands - Ewen Southby-Tailyour 2014-04-02

"A fascinating account of three SAS missions to counter the Exocet missile . . . from ill-thought out ideas to near suicidal one-way trips onto enemy soil."—Soldier Magazine This is a revelatory account of three un-tabulated special forces operations, PLUM DUFF, MIKADO and KETTLEDROM, that were tasked to destroy Argentina's Exocet missiles during the 1982 Falkland's campaign. Interviews with the SAS officer commanding Operation PLUM DUFF, members of the reconnaissance patrol for Operation MIKADO, plus the navigator of the helicopter that flew eight troopers into Tierra del Fuego, has allowed the author to describe the tortuous events that led, instead, to a significant survival story. The RAF pilots ordered to conduct an "assault-landing" of two Hercules onto Rio Grande air base during Operation MIKADO have spoken of the extraordinary procedures they developed: so have the commander of the SBS and the captain of the British submarine involved in Operation KETTLEDROM. The Super Étendard pilots who sank HMS Sheffield and MV Atlantic Conveyor

and then “attacked” HMS Invincible, plus a key member of the Argentine special forces and the brigadier defending Rio Grande, add credence, depth and gravitas to the saga: as does an equally revealing interview with the SIS (MI6) officer who led the world-wide search for Exocets on the black market. Disturbing over-confidence by commanders at home was finely counter-balanced by stirring accounts of inspiring physical and moral courage across the South Atlantic. Exocet Falklands is a groundbreaking work of investigative military history from which many salutary lessons can be learned. “Between politics, diplomacy and barbouzeries, this well-documented work will lead you in the arcane of what should have changed the course of this war.”—Air Fan

Amphibious Assault Falklands - Michael Clapp 2012-08-24

A British Naval commander’s eyewitness account of the 1982 war in the South Atlantic. Since he was in charge of the amphibious operations in the Falklands War, it goes without saying that there is no one better qualified to tell the story of that aspect of the campaign than

Commodore Michael Clapp. Here he describes, with considerable candor, some of the problems met in a Navy racing to war and finding it necessary to recreate a largely abandoned operational technique in a somewhat ad hoc fashion. During the time it took to “go south,” some sense of order was imposed and a not very well defined command structure evolved, this was not done without generating a certain amount of friction. He tells of why San Carlos Water was chosen for the assault and the subsequent inshore operations. Michael Clapp and his small staff made their stand and can claim a major role in the defeat of the Argentine Air and Land Forces.
