Strategic Management - Tienie Ehlers 2019

"Today, more than ever before, South Africa's business climate is confronted with various challenges as a result of external environmental forces as well as internal nuances within the southern African context. The environment is characterised by change, turbulence and competitiveness, and therefore strategy is of the utmost importance for any organisation to survive and thrive. Many people's lives and jobs are affected by strategic decisions and far too often, top management develops a strategy that is neither communicated to, nor fully understood by, other levels of management and employees, and may not even be relevant to the continued existence of the organisation. Strategic management explains the principles and application of the strategic management process, vital to sustaining the success of every organisation. Real southern African case studies are included to support these principles and applications. This is the fourth edition of Strategic management, the first specifically southern African textbook on this subject. It emphasises the important role of corporate governance, with specific reference to the King IV Report. Appropriate southern African examples and case studies are used to illustrate the latest trends, particularly the history, development and strategy of Shoprite Checkers, which is used as a cohesion case study throughout this textbook. Key terms, summary questions and answers, relevant websites and recommended reading lists are also provided. Strategic management: southern African concepts and cases will be invaluable not only to students of business management but also to organisations, from corporate companies with management training programmes to small business ventures struggling to hold their ground in a competitive environment."--Publisher's description.

The text is meant to be a useful guide for strategists facing new situations from the beginning of their organization careers. From the Preface: "Strategy is no longer the exclusive concern of generals. It is not something you wait to think about until you are the president of an organization. You need to understand strategic thinking right now, as a graduate entering the workforce, a newly appointed supervisor, or a mid-level manager. Corporations, small businesses, non-profits, and public agencies - organizations of all kinds - are discovering how important it is for employees to understand why the organization interacts the way it does with customers, competitors, and other actors. Many then ask their employees to help strengthen current connections and invent new ones."
