*Land Law* - Rebecca Kelly 2017-07-14

Problem-Based Learning is a way of learning that presents a practical problem scenario in the context of which learning is conducted. Normally students are taught law through the transmission of information about legal principles and not presented with problems until they have accumulated enough information to solve them. In PBL, discussion and analysis of the problem starts the process of learning, rather than acting as an end point. As a curriculum concept, it is becoming increasingly

common in law schools as the use of problem scenarios helps to trigger awareness of legal issues and to engage interest by highlighting the real-world ramifications. This new textbook creates a fresh approach to learning land law through the use of scenarios found in real-life which bring what is often perceived to be a dry and difficult subject to life. This helps both to engage the student and make the subject more accessible as well as demonstrating to students how land law actually operates in the real world. Land Law is often seen as an esoteric subject with lots of technicalities and complex vocabulary and students often forget the context in which it operates. With *Land Law: A Problem-Based Approach*, context is placed at the heart of learning. Students are learning through application rather than via an abstract set of rules and can therefore gain a deeper understanding of how land law works, not just what it is. Unlike other textbooks, *Land Law: A Problem-Based Approach* integrates a thorough

exposition of the law with practice, facilitating a more active learning approach and helping students to engage directly with the key cases and statutes to develop key skills of analysis, problem-solving and application. Written in a clear and concise style but without sacrificing detail or analysis, the book guides the reader towards a deeper understanding of the land law curriculum. Key features include:

- An introductory chapter outlining the problem-based learning approach and how to use the book.
- Content overviews at the start of each chapter which provide a useful outline of the chapter's content and the key principles
- PBL scenarios at the start of each chapter which provide the real-life context to each topic and help to familiarise readers with the legal language and style they will encounter. Together with the relevant supporting documents, these scenarios are referenced and integrated throughout the chapter
- 'let's put this into context' boxes which require students to apply

the law that they have learnt back to the problem scenario and offer opportunities to reflect and consolidate on the content covered

- Essential Cases and Essential Statutes boxes reinforce the essential role of cases and legislation in the development and application of land law and help students identify key cases and legislation for revision purposes
- Understanding Terminology boxes and an online glossary help students to get to grips with the technical terms and vocabulary unique to land law
- Tables and diagrams explain difficult concepts and rules, ideal for visual learners
- Tips and notes highlight key issues and make links between different aspects of the law without interrupting the flow of the text.
- Specimen exam-style questions are ideal for revision and help to provide opportunities to apply learning and practice exam technique

*Free Roll* - Brandt Tobler 2017-05-22

Have you ever wondered: What it's like to daily bet hundreds of thousands of dollars working for some of the largest professional gamblers in Las Vegas? ... How to spend a summer house sitting one of the biggest stars in the world's 11,000 square-foot mansion - without an invitation from it's celebrity owner ... Whether the life of crime - specifically, running a shoplifting ring in a middle American mall - pays? ... What causes a son to finally say enough is enough ... and decide "Today is the day I am going to kill my dad." Comedian Brandt Tobler has the answers in this funny, touching and sometimes downright unbelievable memoir of a small town Wyoming-kid turned "mall-fia" don, turned nationally touring comic. Brand tells his life story with candor, detailing the many pit stops, wrong turns, crazy connections and lucky breaks he

experienced along the way to his comedy career, all while trying to balance a toxic relationship with his unreliable jailbird dad. In these pages Brandt will make you laugh (he better - it's his job!) and believe as he does that, when it comes to defining family, blood isn't always thicker than water. -- back cover.

Back to Venice - Michael Grant 2011-05-26  
Imagine what it would be like to go back in time to the 15th century Venice. And imagine what it would be like to meet your lifelong hero, Michelangelo. And imagine what it would be like if, on first meeting, you spill a tray of pasta and wine on that very same hero. Well, that's what happens to serious young artist Mark Breen. As the result of a drunken bet, Mark knocks out a painting of a toilet bowl. Much to his amazement, he sells it. In short order he's hailed as the new Andy Warhol and becomes an overnight sensation-and a very wealthy man. Soon, images of his toilet bowls are on more t-shirts, mugs, and calendars than Edvard

Munch's The Scream. His friend and mentor, Hugh Connelly, afraid that Mark is in danger of losing his "artistic soul," advises him to go back to Italy and reacquaint himself with the "old masters." In Venice, Mark falls in love with Alexandra, a beautiful art restorer, but it's a one-sided affair. One night, hoping to win her over, he climbs up on a roof to find out who painted her favorite fresco. He falls off the roof and wakes up in 15th century Venice where he meets an innkeeper named Francesca, who looks exactly like Alexandra. And it gets curiuser and curiuser from there. During his stay-which is sometimes zany and sometimes frightening-he meet his hero, Michelangelo, who teaches him the true meaning of art.

A New Land Law - Peter Sparkes 2003-08-05  
Peter Sparkes' path-breaking text on land law

has been rewritten with two aims in mind: to incorporate the seismic changes introduced by the Land Registration Act 2002, along with commonholds, the explosion of human rights jurisprudence, and the unremitting advance of judicial exposition; and to accommodate the author's developing thinking on the structural aspects of the subject. The book opens with a series of shorter chapters each exploring a fundamental building block: registration; houses flats and commonholds; land, ownership and its transactional powers; social controls balanced by human rights to property; fragmentation by time (the doctrine of estates), divisions of ownership and proprietary rights. In terms of substantive chapters the book opens with discussion of the new transfer system -- paper-based transfer alongside the evolution towards electronic conveyancing -- and the consequent changes to the proof of registered titles and to the registration curtain. The new approach to adverse possession against registered titles has

called for extended discussion, as has the authoritative elucidation of the concept of adverse possession in Pye. In terms of proprietary interests the fundamentals are seen as rights to transfer, beneficial interests under trusts which are overreachable, burdens which are enduring, leases, money charges such as mortgages which are redeemable, and the obligations enforceable within the neighbour principle -- easements, covenants and positive covenants being treated as a semi-coherent whole. An attempt has been made to assist students by moving some of the more arcane learning later into the book or into separate chapters where these matters might be more readily ignored by a candidate concerned primarily to prepare for an examination. "A massive amount of research and scholarship has gone into the book, with impressive citation of cases, articles and case-notes, and of other text-books. This newcomer on the scene is a considerable addition to the ranks of serious

text-books on land law and the author is to be congratulated." The New Law Journal "The scope of this work is ambitious...it is a bold attempt to take the study of land law forward...much more than a basic land law text book...it would be a pleasure to be able to teach a course requiring students to cover the substance or the bulk of it whether in one or more modules...a difficult blend of background and history, massive referencing, discussion of statute and case law, all wrapped up in a text that is not too difficult to absorb." The Law Teacher "A most interesting and ground breaking book" Michael Cardwell, University of Leeds "At last, a brilliant land law book! I think the approach is marvellous and will strongly recommend it to my students" Keith Gompertz, University of Central England. "... takes a more modern approach to the area...I am very impressed with the style, layout and format. It will be a good teaching tool and I am looking forward to using it." Alison Dunn, Newcastle

Law School. "...not baffling in the way land law texts tend to be" Helen Taylor, University of Teesside "Excellent." Professor Edward Burn, City University.

The rules of land law are numerous, complex, and in some cases baffling to students. The study of land law is also often portrayed as dull. Too frequently those who find success in working out how the law operates in other areas find themselves defeated by land law. Even the great jurist Blackstone, while maintaining that 'there is nothing which so generally strikes the imagination, and engages the affections of mankind, as the right of property', also concluded that the study of land law 'afforded the student less amusement and pleasure in the pursuit' than the study of crime and tort. This

book tries to help with that problem. It aims to tell the rules' story: to talk about them in terms of the work they do, in a way that will allow readers to understand and engage with them. And through the example it offers, it aims also to give students the confidence, spur and tools to go on to develop such perspectives for themselves. The book covers the main points of land law found in the syllabuses of law schools in England and Wales. While it is not intended as a comprehensive textbook on the topic, it offers sufficient detail for anyone reading it to gain an overview of the subject, and for those seeking more the footnotes offer plenty of pointers. As well as bringing the coverage up to date, this new edition adds chapters about two especially challenging aspects of the subject: the human rights dimension, and the nature of 'ownership'. As one reader of the first edition commented, 'it shone light where none had shone before, and lit a clear path to understanding'. 'Well written and clear. A great introduction.' Mika Oldham, Jesus

College, Cambridge 'An excellent introduction. Many students will no doubt buy it.' Matthew Conaglen, Trinity Hall, Cambridge 'A very clear and interesting way into a complex subject.' David Gregory, Kingston University
