

Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies

Getting the books **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** now is not type of challenging means. You could not abandoned going later than book collection or library or borrowing from your associates to admission them. This is an certainly easy means to specifically get guide by on-line. This online broadcast **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** can be one of the options to accompany you taking into consideration having new time.

It will not waste your time. say you will me, the e-book will extremely freshen you extra situation to read. Just invest little period to door this on-line pronouncement **Assessing Maritime Power In The Asia Pacific The Impact Of American Strategic Re Balance Corbett Centre For Maritime Policy Studies** as well as review them wherever you are now.

Australia and Asia-Pacific Regional Security - Peter Jennings 1992

Asia-Pacific Regional Security Assessment 2020 - The International Institute for Strategic Studies (IISS) 2020-06-03

The Asia-Pacific Regional Security Assessment provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are: the deteriorating US-China relationship and great-power competition; US alliances and security partnerships; the collapse of the Intermediate-range Nuclear Forces Treaty; diplomatic gridlock on the Korean Peninsula; Japan's role in Indo-Pacific security; the breakdown in Japan-South Korea relations; Indonesian policy towards the South China Sea; Australia's defence and security outlook; the European security role in Asia. Authors include leading regional analysts and academics Douglas Barrie, William Choong, Aaron Connelly, Andrew

Davies, Michael Elleman, Bonnie S. Glaser, Euan Graham, Christopher W. Hughes, Meia Nouwens, Brendan Taylor and William Tow. *Foundations of National Power in the Asia-Pacific* - Ashley J. Tellis 2015

The Remaking of Asia's Geopolitics - Paul Dibb 1998

Korean Sea Power and the Pacific Era - Dalchoong Kim 1990

Security Politics in the Asia-Pacific - William T. Tow 2009-10-15

Asia is experiencing major changes in its security relations. This book brings together respected experts to assess both the theoretical and empirical dimensions of the Asian security debate. Building on the latest research on Asia's regional security politics, it focuses on the 'regional-global nexus' as a way to understand the dynamics of Asian security politics and its

intersection with global security. Contributors to the volume offer diverse but complementary perspectives on which issues and factors are most important in explaining how security politics in Asia can be interpreted at both the regional and global levels of analysis. Issues addressed include power balancing and alliances, governance and democracy, maritime and energy security, the relationship between economics and security, 'human security', terrorism, nuclear non-proliferation, climate change and pandemics. This work will serve as a standard reference on the evolution of key issues in Asian security.

Red Star over the Pacific, Revised Edition - Toshi Yoshihara 2018-12-15

This is an assessment of how the rise of Chinese seapower will affect U.S. maritimes strategy in Asia.

Assessing the Asia-Pacific Rebalance - David J. Berteau 2014-12-22

This report seeks to clarify the stated objectives

of the US rebalance strategy, reviewing regional responses, and assessing the status of the rebalance, which is critical to reinforcing regional stability by strengthening US relationships, presence, and capabilities.

Red Star Over the Pacific - Toshi Yoshihara 2010

Two associate professors of strategy at the Naval War College assess how the rise of Chinese sea power will affect the United States maritime strategy in Asia and discuss the sea-power theories of Alfred Thayer Mahan, now popular in China.

Environmental Assessment for a Launch Operator License for Sea Launch Limited Partnership - 2001

Maritime Challenges and Priorities in Asia - Joshua Ho 2012

Maritime issues are particularly important for Asian countries, where there is a high reliance on shipping routes for international trade, many

difficult disputes over maritime boundaries, and the prospect of increasing tensions where maritime power might play a significant role. This book uses contributions by 17 experts to build a comprehensive survey of the maritime issues affecting Asia. It discusses the issues overall, goes on to examine the issues from the perspective of each of 14 key countries, and concludes by assessing the prospects for resolving common problems in order to preserve good order at sea.

Maritime Security in the Indo-Pacific - Mohan Malik 2014-09-24

"Maritime Security in the Indo-Pacific opens by introducing the Indo-Pacific and outlining the roles of China, India, and the United States in various maritime issues in the region. This volume develops common approaches by focusing on geopolitical challenges, transnational security concerns, and multilateral institution-building and cooperation"--Provided by publisher.

Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021)
Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will

increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Asian Maritime Strategies - Bernard Cole
2013-10-15

This book is concerned with both the national security concerns of Asian maritime nations and the security of the Asian maritime commons. These are defined as the Pacific and Indian Oceans and associated seas, bays, and gulfs, with their included sea lines of communication (SLOCs). The most useful geographical designation for maritime Asia is the "Indo-Pacific." Bernard Cole provides both a survey of the maritime strategies of the primary nations of the Indo-Pacific region and an evaluation of the domestic and international politics that drive

those strategies. The United States, Canada, Russia, Japan, North Korea, South Korea, China, the Philippines, Brunei, Indonesia, Vietnam, Singapore, Malaysia, Myanmar, India, Pakistan, Iran, the smaller Indian Ocean and Persian Gulf states are all surveyed and analyzed. The United States, Japan, China, and India not surprisingly draw the most attention, given their large modern navies and distant strategic reach. The author concludes that the United States remains the dominant maritime power in this huge region, stretching from Canada to the Persian Gulf, despite its lack of a traditionally strong merchant marine. U.S. maritime power remains paramount, due primarily to its dominant navy. The Chinese naval modernization program deservedly receives a good deal of public attention, but Cole argues that on a day-to-day basis the Japanese Maritime Self-Defense Force, as its navy is named, is the most powerful maritime force in Far Eastern waters, while the modernizing Indian Navy potentially dominates

the Indian Ocean. In fact, a focus of this work is the exemplary description of all the region's navies, with the author noting the naval arms race that is underway, particularly in the area of submarine acquisition. Cole is careful to couch this phenomenon in the regional concerns about Chinese naval expansion and the desire to ensure a continued, massive U.S. naval presence. The current naval developments in the region evince elements of a naval arms race, but lack the coherent maritime strategies to make naval developments dangerous to regional peace and security. Most telling will be whether United States power and focus remain on the region, while adjusting to continued Chinese maritime power in a way acceptable to both nations. No other current or recent work provides such a complete description of the Indo-Pacific region's navies and maritime strategies, while analyzing the current and future impact of those forces.

Assessing Maritime Power in the Asia-Pacific - Greg Kennedy 2016-03-09

Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'pivot' or 're-balance' strategy, and the 'Air-Sea Battle' operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

China's Global Engagement - Jacques deLisle
2017-05-30

Assessing China's rapidly changing role on the international stage China is again undergoing a period of significant transition. Internally, China's leaders are addressing challenges to the economy and other domestic issues after three decades of dramatic growth and reforms. President Xi Jinping and other leaders also are refashioning foreign policy to better fit what

they see as China's place in the world. This has included a more proactive approach to trade and related international economic affairs, a more vigorous approach to security matters, and a more focused engagement on international cultural and educational affairs. In this volume, China specialists from around the world explore key issues raised by a changing China's interaction with a changing world. They chronicle China's emergence as a more capable actor whose engagement is reshaping international affairs in many dimensions. These include: global currency and trading systems; patterns of cooperation and competition in technological innovation; economic and political trends in the developing world; the American-led security order in the Asia-Pacific region; the practice of international military and humanitarian intervention; the use of naval power; the role of international law in persistent territorial and maritime disputes in the East and South China Seas; the international human

rights regime; the circulation of Chinese talent trained abroad; a more globalized film industry; and programs to reshape global cultural awareness about China through educational initiatives. Across these diverse areas, China's capacity—and desire—to influence events and outcomes have risen markedly. The results so far are mixed, and the future trajectory remains uncertain. But across the wide range of issues addressed in this book, China has become a major and likely an enduring participant.

Assessing China's Naval Power - Sarah Kirchberger 2015-06-23

This book analyzes the rise of China's naval power and its possible strategic consequences from a wide variety of perspectives - technological, economic, and geostrategic - while employing a historical-comparative approach throughout. Since naval development requires huge financial resources and mostly takes place within the context of transnational industrial partnerships, this study also

consciously adopts an industry perspective. The systemic problems involved in warship production and the associated material, financial, technological, and political requirements currently remain overlooked aspects in the case of China. Drawing on first-hand working experience in the naval shipbuilding industry, the author provides transparent criteria for the evaluation of different naval technologies' strategic value, which other researchers can draw upon as a basis for further research in such diverse fields as International Security Studies, Naval Warfare Studies, Chinese Studies, and International Relations.

Power and the Maritime Domain - Greg Kennedy 2022-10-28

This book offers a multi-disciplinary and multi-national approach to defining key elements required to define power within the maritime domain. The volume engages with the concept that the maritime domain is a multi-dimensional

space embracing oceans, seas, waterways, including all elements of maritime power, related activities, infrastructure, resources and assets. It illustrates the complexity and interconnectivity of the factors that contribute to the appreciation, creation, and application of maritime power. In practical terms, the book highlights that the maritime domain is a continuum that interconnects countries, cultures, politics, economics, trade, environment, knowledge, and technological power globally. Perhaps most importantly, the maritime domain generates power of its own volition, as well as acting as a critical enabler for the creation of other types of nations power: economic, political, military, technological, intelligence and fiscal power, in particular. The book not only brings those various factors to the reader's attention but, in the synthesis, also clarifies the connections between the various elements in creating a greater maritime whole. This book will be of great interest to students of

maritime security, strategic studies and International Relations.

Maritime and Territorial Disputes in the South China Sea - Yih-Jye Hwang 2021-03-10

This edited volume rethinks the relationship between power and law in the age of China's rise by examining recent developments in the South China Sea (SCS). The contributors explore different interpretations of international law on the legal status of the contested islands and rocks and provide detailed analyses of the contested concepts and provisions, the 2016 ruling by the SCS arbitration tribunal, as well as the environmental, economic, and political impacts of the ruling. This book facilitates a more meaningful and productive dialogue over the intersection, interaction, and interdependence between power and law in the context of the SCS. Assessing the interactions between political, legal, and normative forces, it provides insights into the specific dynamics of the dispute and the shifting security landscape

in the region, but also offers a basis for thinking more deeply about the broader rise of China.

This book will appeal to both students and scholars of IR, International Law, and Asian Studies and those engaged in research on the SCS disputes, the rise of China, and with a theoretical interest in law and power in international affairs.

Focusing the CSBM Agenda in the Asia/Pacific Region - Paul Dibb 1992

Assessing Maritime Power in the Asia-Pacific - Professor Greg Kennedy 2015-11-28
Leading academics from around the world, who specialize in analysing maritime strategic issues, deliberate the impact of the American 'Pivot' or 'Re-Balance' strategy, and the 'Air-Sea Battle' Operational concept, on the maritime power and posture of a number of selected states. Intending to strengthen US economic, diplomatic, and security engagement throughout the Asia-Pacific, both bilaterally and multilaterally, the

re-balance stands out as one of the Obama administration's most far-sighted and ambitious foreign policy initiatives.

Taiwan's New Role in the Asia-Pacific Region - Gary Klintworth 1992

Burma's Order of Battle - Andrew Selth 2000

India in the Indo-Pacific - Aditi Malhotra
2022-06-13

In view of the fast-changing world order, emerging countries are increasingly influencing the dynamics of regional securities. This timely and in-depth book examines India's reorienting strategic posture and describes how New Delhi's security policy in the Indo-Pacific region has evolved and expanded over the past two decades. The author argues that India's quest to leverage its geostrategic location to emerge as an Indo-Pacific actor faces multiple challenges, which create a clear divide between the country's political rhetoric and action on the

ground. The author critically examines these contradictions to better situate India's security role in an increasingly fluid Indo-Pacific region. *An Australian Perspective on Maritime CSBMs in the Asia-Pacific Region* - Desmond Ball 1991

The Evolving Maritime Balance of Power in the Asia-Pacific - Lawrence W. Prabhakar 2006

The Asia-Pacific region has emerged as the hub of global geo-political, geo-economic and geo-strategic significance in the post-Cold War period. The rise of China and the resurgence of India will be the hallmark for the next 50 years. How this surge in power is accommodated by the incumbent powers like the United States and Japan, and how the new regional powers like China and India manage the power politics that emerge will be the key determinants of regional stability. This volume examines the national maritime doctrines as well as the nuclear weapons developments at sea of the four major powers in the Asia-Pacific, namely, China, India,

Japan and the United States, to see if the evolving dynamic is a cooperative or a competitive one. In particular, the volume looks at the evolving paradigms of maritime transformation in strategy and technology; the emergent new maritime doctrines and evolving force postures in the naval orders of battle; the role and operations of nuclear navies in the Asia-Pacific; and the implications and impact of nuclear weapons, ballistic missiles and sea-based missile defence responses in the region.

Chinese Grand Strategy and Maritime Power - Thomas M. Kane 2002

Thomas Kane's study examines the formulation of naval strategy in the People's Republic of China and reveals the obstacles and challenges that planners face in their path towards a truly powerful and globally-influential, deep-sea navy. *Russia and the Asia-Pacific Region* - Leszek Buszynski 1992

Strategic Assessment ... -

The Influence of Sea Power Upon History, 1660-1783 - Alfred Thayer Mahan 1918

Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting

influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.

Indian Ocean Region - Manoj Gupta

2010-08-09

It is a privilege to introduce the reader to this book, as I believe that it will make a significant contribution to, given the difficulties in the knowledge of the Indian Ocean, developing cooperation in the Indian Ocean region. There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean. As a result of the land-based orientation of the people in the region, the importance for countries to develop the power to govern the sea has largely been ignored. The maritime

approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the potential for regional cooperation and ocean governance. The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean. This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations, economic well-being of the people and health of the Indian Ocean cannot be divested from one another. All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the power to govern the sea.

Asia-Pacific - David Lai 2013

Dr. David Lai provides a timely assessment of the geostrategic significance of Asia-Pacific. His monograph is also a thought-provoking analysis of the U.S. strategic shift toward the region and its implications. Dr. Lai judiciously offers the following key points. First, Asia-Pacific, which

covers China, Northeast Asia, and Southeast Asia, is a region with complex currents. On the one hand, there is an unabated region-wide drive for economic development that has been pushing Asia-Pacific forward for decades. On the other, this region is troubled with, aside from many other conflicts, unsettled maritime disputes that have the potential to trigger wars between and among Asia-Pacific nations. Second, on top of these mixed currents, China and the United States compete intensely over a wide range of vital interests in this region. For better or for worse, the U.S.-China relationship is becoming a defining factor in the relations among the Asia-Pacific nations. Third, the U.S. strategic shift toward Asia-Pacific is, as President Obama puts it, not a choice but a necessity. Although conflicts elsewhere, especially the ones in the Middle East, continue to draw U.S. attention and consume U.S. foreign policy resources, the United States is turning its focus toward China and Asia-Pacific. Fourth, in the mid-2000s, the

United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition. Fifth, at this time of U.S. strategic reorientation and military rebalancing toward Asia-Pacific, the most dangerous consideration is that Asia-Pacific nations having disputes with China can misread U.S. strategic intentions and overplay the 'U.S. card' to pursue their territorial interests and challenge China. Finally, territorial dispute is becoming an urgent issue in the Asia-Pacific.

Strategic Assessment 1999 - 1999

Rivalry and Response - Jonathan R. Stromseth
2021-02-16

Southeast Asia has become a hotbed of strategic rivalry between China and the United States. China is asserting its influence in the region through economic statecraft and far-reaching efforts to secure its sovereignty claims in the South China Sea, while the United States has

promoted a Free and Open Indo-Pacific strategy that explicitly challenges China's expanding influence—warning other countries that Beijing is practicing predatory economics and advancing governance concepts associated with rising authoritarianism in the region. In this timely volume, leading experts from Southeast Asia, Australia, and the United States assess these great power dynamics by examining the strategic landscape, domestic governance trends, and economic challenges in Southeast Asia, with the latter focusing especially on infrastructure. Among other findings, the authors express concern that U.S. policy has become too concentrated on defense and security, to the detriment of diplomacy and development, allowing China to fill the soft power vacuum and capture the narrative through its signature Belt and Road Initiative. The COVID-19 pandemic has only increased the policy challenges for Washington as China recovers faster from the outbreak, reinforcing its

already advantaged economic position and advancing its strategic goals as a result. As the Biden administration begins to formulate its strategy for the region, it would do well to consider these findings and the related policy recommendations that appear in this volume. Much is at stake for U.S. foreign policy and American interests. Southeast Asia includes two U.S. allies—Thailand and the Philippines—important security partners like Singapore, and key emerging partners such as Vietnam and Indonesia. Almost 42,000 U.S. companies export to the 10 countries that comprise the Association of Southeast Asian Nations (ASEAN), supporting about 600,000 jobs in the United States, but America's economic standing is increasingly at risk.

The Council for Security Cooperation in the Asia Pacific (CSCAP) - Desmond Ball 2000

India and Japan - Rajesh Basrur 2018-03-21
This volume focuses on the rapidly expanding

strategic relationship between India and Japan, expanding on the hitherto under-analyzed concept of “strategic partnership,” tracing the history of the interaction, and gauging its current and future trajectories. The rise of China and its challenge to U.S. dominance of the global system is the setting in which the partnership has assumed a major profile, incorporating both defence and economic cooperation on an unprecedented scale. The increasing congruence of Indian and Japanese interests is juxtaposed with the inherent limitations of the partnership to portray a complex picture of a kind of strategic relationship that has become a staple of contemporary international politics.

Building Up the Buildup - J. Marshall Beier
2000

[Asia-Pacific Regional Security Assessment 2021](#) -
The International Institute for Strategic Studies
(IISS) 2021-06-08
The Asia-Pacific Regional Security Assessment

2021 provides insight into key regional strategic, geopolitical, economic, military and security topics. Among the topics explored are:

US–China decoupling and its regional security implications; Japan’s security policy and China; India’s emerging grand strategy; Southeast Asia amid rising great-power rivalry; Australia’s new regional security posture; NATO’s evolving approach to China; The United Kingdom’s ‘tilt’ to the Indo-Pacific; and Emerging technologies and future conflict in the Asia-Pacific. Authors include leading regional analysts and academics Kanti Bajpai, Gordon Flake, Franz-Stefan Gady, Prashanth Parameswaran, Alessio Patalano, Samir Puri, Sarah Raine, Tan See Seng, Drew Thompson, Ashley Townshend, Joanne Wallis and Robert Ward.

India as an Asia Pacific Power - David
Brewster 2012-03-12

"This book provides a comprehensive assessment of India's international relations in the Asia Pacific region. It charts the

development of India's increasingly important role as a major world power, discusses India's international relations strategy and examines India's relationship with each of the major countries of East and Southeast Asia."--

Publisher's description

Asian Maritime Power in the 21st Century -

Vijay Sakhuja 2011-01

Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations. This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates, exponential expansion of science, technology and industrial growth.
