The Smallest Tadpole's War in the Land of Mysterious Waters - Diane Swearingen

2015-10-21

In the 1860's a Northern newspaper referred to Florida as the "smallest tadpole in the dirty pool of secession." Political power in the state was held largely by wealthy white planters. In early 1861, Florida was a rural frontier state that had

joined the Union just fifteen years before. Its population of 140,000 was by far the smallest of any of the states that formed the Confederacy. Nearly 63,000 of the population were African Americans, most of whom were slaves working in an agricultural-based economy. The majority of the white population was relatively poor and rural, with a smaller number of tradespeople and their families living in small towns. This work of historical fiction tells the story of one Florida family in the 1860s.

Will they find the answers to their mystery? Or discover their problem was more about growing than shrinking?

And the Bullfrogs Sing - David L. Harrison
2019-05-21

Rumm . . . rumm . . . rumm. A male bullfrog

sings. A female bullfrog likes his song. And a life cycle begins. Eggs hatch and become tadpoles. The tadpoles nibble plants. They grow legs and start to breathe. Now they are little bullfrogs. They eat flies, fish, and spiders. In the winter they hibernate. And after three years, they are adult bullfrogs. Rumm . . . rumm . . . rumm. Lyrical prose and elegant art depict the life cycle of a bullfrog in this nonfiction picture book by an award-winning poet-biologist. A Bank Street Best Book of the Year

The Sports Gene - David Epstein 2014-04-29
The New York Times bestseller - with a new afterword about early specialization in youth sports - from the author of *Range: Why Generalists Triumph in a Specialized World*. The debate is as old as physical competition. Are stars like Usain Bolt, Michael Phelps, and Serena Williams genetic freaks put on Earth to dominate their respective sports? Or are they simply normal people who overcame their biological limits through sheer force of will and

obsessive training? In this controversial and engaging exploration of athletic success and the so-called 10,000-hour rule, David Epstein tackles the great nature vs. nurture debate and traces how far science has come in solving it. Through on-the-ground reporting from below the equator and above the Arctic Circle, revealing conversations with leading scientists and Olympic champions, and interviews with athletes who have rare genetic mutations or physical traits, Epstein forces us to rethink the very nature of athleticism.
