**EPA 608 Study Guide** - Hvac  
Training 101 2019-12-06  
HVAC Training 101 is a site  
visited by over 100,000  
enthusiasts monthly, who are  
interested in becoming HVAC  
technicians. The site initially  
began as the passion project of  
a retired HVAC technician. The  
site quickly gained popularity,  
building a strong community of  
aspiring HVAC technicians.  
Currently, it is managed by a  
team of ex-HVAC technicians  
with decades of experience in  
the industry. Head over to  
HVACTraining101.Com to  
learn more. We began by  
writing about how to become  
certified as an HVAC  
technician. With rules and  
certifications varying for each  
state, it was a challenging task.  
We had a few friends in other

states help us out, but for some  
states, we had to dig really  
deep to find the information  
needed. Our audience at the  
time was very happy with the  
information we provided. At  
this point, we started getting  
many questions about EPA 608  
certification. Once you get the  
education and experience  
needed to become a technician,  
prospective employers will ask  
for certification to handle  
refrigerants. When we started  
writing about how to become  
certified, viewers again  
requested we write a study  
guide to help them prepare for  
the 608 exams. The study  
guides out there were dense  
and had much more  
information than was needed to  
pass the test. This inspired us  
to embark on a journey to write  
the simplest study guide for the  
EPA 608 exam, which would  
still cover all the necessary  
information. We hope we have  
achieved our intended  
objective. The journey to  
becoming an HVAC technician  
can be long and arduous. We  
congratulate you on taking this  
path and wish you the best in

cracking the EPA 608 exam.

**Guardians of Empire** - Brian McAllister Linn 1997

In a comprehensive study of four decades of military policy, Brian McAllister Linn offers the first detailed history of the U.S. Army in Hawaii and the Philippines between 1902 and 1940. Most accounts focus on the months preceding the Japanese attack on Pearl Harbor. By examining the years prior to the outbreak of war, Linn provides a new perspective on the complex evolution of events in the Pacific. Exhaustively researched, *Guardians of Empire* traces the development of U.S. defense policy in the region, concentrating on strategy, tactics, internal security, relations with local communities, and military technology. Linn challenges earlier studies which argue

that army officers either ignored or denigrated the Japanese threat and remained unprepared for war. He demonstrates instead that from 1907 onward military commanders in both Washington and the Pacific were vividly aware of the danger, that they developed a series of plans to avert it, and that they in fact identified even if they could not solve many of the problems that would become tragically apparent on 7 December 1941.
