One Two Three - Laurie Frankel 2021-06-08
From Laurie Frankel, the New York Times bestselling author of *This Is How It Always Is*, a Reese's Book Club x Hello Sunshine Book Pick, comes *One Two Three*, a timely, topical novel about love and family that will make you laugh

and cry...and laugh again. In a town where nothing ever changes, suddenly everything does... Everyone knows everyone in the tiny town of Bourne, but the Mitchell triplets are especially beloved. Mirabel is the smartest person anyone knows, and no one doubts it just because she can't speak. Monday is the town's purveyor of books now that the library's closed—tell her the book you think you want, and she'll pull the one you actually do from the microwave or her sock drawer. Mab's job is hardest of all: get good grades, get into college, get out of Bourne. For a few weeks seventeen years ago, Bourne was national news when its water turned green. The girls have come of age watching their mother's endless fight for justice. But just when it seems life might go on the same forever, the first moving truck anyone's seen in years pulls up and unloads new residents and old secrets. Soon, the Mitchell sisters are taking on a system stacked against them and uncovering mysteries buried longer than they've

been alive. Because it's hard to let go of the past when the past won't let go of you. Three unforgettable narrators join together here to tell a spellbinding story with wit, wonder, and deep affection. As she did in *This Is How It Always Is*, Laurie Frankel has written a laugh-out-loud-on-one-page-grab-a-tissue-the-next novel, as only she can, about how expanding our notions of normal makes the world a better place for everyone and how when days are darkest, it's our daughters who will save us all.

Management of Off-Highway Plant and Equipment - D.J. Edwards 2003-09-02
Management of Off-highway Plant and Equipment provides a working knowledge of plant management for today's engineers, managers and students, and explains concisely and clearly the factors to be considered during investment in, and management of, construction equipment. It compares the cost of leasing with those of purchase, discusses ways of achieving optimum economic usage of plant, and covers

issues of health and safety, licensing and the logistics of maintenance.

Operating Techniques for the Tractor-loader-backhoe - Gary J. Ober 1999

The modern Tractor-Loader_backhoe has become the most useful machine in general construction, and it has gained that reputation since its introduction in the late 1950's. This reputation as the most useful is due to the wide-ranging tasks that the machine is capable of performing. These wide-ranging jobs, in turn, demand that operators have the knowledge, skills, and experience required for safety and productivity. The first edition of this book, *Operating Techniques for the Tractor-Loader-Backhoe*, published in 1983, was written simply as an information source covering standard machine operations and procedures. Over the

years, training programs sought it out for its practical and detailed information for operators and training programs, such as: guidelines, safety considerations, and preventing damage to existing utilities.

Human-Automation Interaction - Vincent G. Duffy 2022-09-30

This book provides practical guidance and awareness for a growing body of knowledge

developing across a variety of disciplines and many countries. This book is a celebration of the Gavriel Salvendy International Symposium (GSIS) and provides a survey of topics and emerging areas of interest in human-automation interaction. This book for the GSIS emphasizes main thematic areas: manufacturing, services and user experience. Main areas of coverage include Section A: Advanced Production Management and Production Control; Section B: Healthcare Automation; Section C: Measuring and Modeling Human Performance; Section D: Usability and User Experience; Section E: Safety Management and Occupational Ergonomics; Section F: Manufacturing and Services; Section G: Data and Probabilistic Information; Section H: Training and Collaboration Technologies. Contributions from especially early career researchers were featured as part of this (virtual) symposium and celebration. Gavriel Salvendy initiated the conferences that run annually as Human-Computer Interaction

International and Applied Human Factors and Ergonomics International (AHFE), both within the Lecture Notes in Springer. The book is inclusive of human-computer interaction and human factors and ergonomics principles, yet it is intended to serve a much wider audience that has interest in automation and human modeling. The emerging need for human-automation interaction expertise has developed from an ever-growing availability and presence of automation in our everyday lives.
