**Inscribing Sorrow** - Christos Tsagalis 2008-12-10

Fourth-century Attic grave epigrams reflect a transitional phase in the evolution of the genre of epigram. They testify to a shift of interest towards social issues such as the family, the deceased's age and profession. In a turbulent period of restlessness and uncertainty that followed the devastating Peloponnesian war, the commemoration of the departed in private monuments became an effective mechanism of displaying publicly a new set of social concerns. This book explores this decisive phase in the evolution of the epigram by reconstructing as many ancient contexts as possible on the one hand, and studying sepulchral epigrams as a poetic art on the other.

**Deliver Us** - Luigi Meneghello 2011-05-27

Originally published in 1963, and today considered a landmark in twentieth century Italian literature, Luigi Meneghello's *Deliver Us* is the memoir, not of an extraordinary childhood, but of the very ordinary one the author shared with most of his generation, when Italy was a rural country under the twin authorities of Church and Fascism. His boyhood begins in 1922, the year of Mussolini's March on Rome, and ends when Meneghello, 21, goes up into the hills to join the partisans. Called a *romanzo*—a story, although not a novel, as that term usually suggests—the book is a genre all of its own that mixes personal and collective memory, amateur ethnography, and reflections on language. Meneghello's sharp insights and narrative skill come together in an original meditation on how words, people, places, and things shape thought itself. Only loosely chronological, *Deliver Us* proceeds by themes—childhood games, Fascist symbols, religious precepts, and the rites of poverty, of death, of eros, and of love. Meneghello's ironic musings and profoundly honest recollections make an utterly unsentimental human comedy of that was the whole world to his dawning consciousness.

**The Greeks** - Paul Cartledge 2002-10-10

This book provides an original and challenging answer to the question: 'Who were the Classical Greeks?' Paul Cartledge - 'one of the most theoretically alert, widely read and prolific of contemporary ancient historians' (TLS) - here examines the Greeks and their achievements in terms of their own self-image, mainly as it was presented by the supposedly objective historians: Herodotus, Thucydides, and Xenophon. Many of our modern concepts as we understand them were invented by the Greeks: for example, democracy, theatre, philosophy, and history. Yet despite being our cultural ancestors in many ways, their legacy remains rooted in myth and the mental and material contexts of many of their achievements are deeply alien to our own ways of thinking and acting. *The Greeks* aims to explore in depth how the dominant group (adult, male, citizen) attempted, with limited success, to define themselves unambiguously in polar opposition to a whole series of 'Others' - non-Greeks, women, non-citizens, slaves and gods. This new edition contains an updated bibliography, a new chapter entitled 'Entr'acte: Others in Images and Images of Others', and a new afterword.

**Cognitive Linguistics: Basic Readings** - Dirk Geeraerts 2006-01-01

Over the past decade, Cognitive Linguistics has grown to be one of the most broadly appealing and dynamic frameworks for the study of natural language. Essentially, this new school of linguistics focuses on the meaning side of language: linguistic form is analysed as an expression of meaning. And meaning itself is not something that exists in isolation, but it is integrated with the full spectrum of human experience: the fact that we are embodied beings just as much as the fact that we are cultural beings. *Cognitive Linguistics: Basic Readings* brings together twelve foundational articles, each of which introduces one of the basic concepts of Cognitive Linguistics, like conceptual metaphor, image schemas, mental spaces, construction grammar, prototypicality and radial sets. The collection features the founding fathers of Cognitive Linguistics: George Lakoff, Ron Langacker, Len Talmy, Gilles Fauconnier, and Charles Fillmore, together with some of the most influential younger scholars. By its choice of seminal papers and leading authors, *Basic Readings* is specifically suited for an introductory course in Cognitive Linguistics. This is further supported by a general introduction to the theory and, specifically, the practice of Cognitive Linguistics and by trajectories for further reading that start out from the individual chapters.

**The Curious Incident of the Dog in the Night-Time** - Mark Haddon 2009-02-24

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by

a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

[The Translingual Imagination](#) - Steven G. Kellman 2000-01-01

It is difficult to write well even in one language. Yet a rich body of translingual literature -- by authors who write in more than one language or in a language other than their primary one -- exists. The Translingual Imagination is a pioneering study of the phenomenon, which is as ancient as the use of Arabic, Latin, Mandarin, Persian, and Sanskrit as *linguae francae*. Colonialism, war, mobility, and the aesthetics of alienation have combined to create a modern translingual canon. Opening with an overview of this vast subject, Steven G. Kellman then looks at the differences between ambilinguals -- those who write authoritatively in more than one language -- and monolingual translinguals -- those who write in only one language but not their native one. Kellman offers compelling analyses of the translingual situations of African and Jewish authors and of achievements by authors as varied as Mary Antin, Samuel Beckett, Louis Begley, J. M. Coetzee, Joseph Conrad, Eva Hoffman, Vladimir Nabokov, and John Sayles. While separate studies of individual translingual authors have long been available, this is the first in-depth study of the general phenomenon of translingual literature.

[The Evolution of Calpurnia Tate](#) - Jacqueline Kelly 2011-01-04

Calpurnia Virginia Tate is eleven years old in 1899 when she wonders why the yellow grasshoppers in her Texas backyard are so much bigger than the green ones. With a little help from her notoriously cantankerous grandfather, an avid naturalist, she figures out that the green grasshoppers are easier to see against the yellow grass, so they are eaten before they can get any larger. As Callie explores the natural world around her, she develops a close relationship with her grandfather, navigates the dangers of living with six brothers, and comes up against just what it means to be a girl at the turn of the century. Debut author Jacqueline Kelly deftly brings Callie and her family to life, capturing a year of growing up with unique sensitivity and a wry wit. The Evolution of Calpurnia Tate is a 2010 Newbery Honor Book and the winner of the 2010 Bank Street - Josette Frank Award.

**Translating Writings of Early Scholars in the Ancient Near East, Egypt, Greece and Rome** - Annette Imhausen 2016-11-21

Ancient cultures have left written evidence of a variety of scientific texts. But how can/should they be translated? Is it possible to use modern concepts (and terminology) in their translation and which consequences result from this practice? Scholars of various disciplines discuss the practice of translating ancient scientific texts and present examples of these texts and their translations.

**Ludwig Wittgenstein** - T. De Mauro 2013-03-09

Various students of general linguistics and semantics quote and discuss Wittgenstein, among others, OGDEN and RICHARDS (1960), ULLMANN (1951, 1962), PAGLIARO (1952, 1957), WELLS (1960), REGNELL (1960) and 1 ZIFF (1960). For the most part however they quote the Tractatus and not 2 the Philosophical Investigations ; not all of them consider the most important ideas in the Tractatus but often discuss marginal points; above all they often make the discussion of Wittgenstein's ideas secondary to the development of their own thought. It should be added, moreover, that these students are exceptions. The large majority of language theorists, especially those with a philological background, have almost no knowledge of Wittgenstein's ideas. One scholar thinks that Wittgenstein's linguistic philosophy rests upon a grotesque misunderstanding of the workings of language (HERDAN, 1962, Chapter 24). The present book seeks to draw the attention of students of general linguistics and semantics to the thought of both the early and the later Wittgenstein: not only the Philosophical Investigations but also the Tractatus is concerned with everyday language: Wittgenstein was thinking of the propositions of everyday language, when he affirmed that the proposition is a picture of reality (Chapter 1). This conception is very old, it is in fact found in Aristotle and it dominated ancient, mediaeval and modern rationalistic thought; only Locke, Vico and Leibniz criticized it strongly (Chapter 2).

**HOW TO LEARN SPANISH IN 30 DAYS** - Giovanni Sordelli

2021-10-19

This book will allow you to learn Spanish in only 30 days, starting from scratch. And this is more than a simple promise. Let me explain... The method is very simple: this book is divided in 30 chapters, one for each day, to let you learn the basics of this language in just one month. To make the most of this course, you just need to follow one rule: reading one chapter every day, no more, no less. If you follow this rule and the guidelines included in this book, the result is guaranteed. Forget about the usual boring grammar courses, with their impersonal style. "How to learn Spanish in 30 days" has been created with all the trappings of self-help, as a practical manual, with a personal, fun and motivational touch. It is full of many curious anecdotes and useful pieces of advice not only to speak in Spanish, but also to help you while travelling. If you are still not convinced, keep reading... FROM THE PREFACE... (...) You are going to tell me: "so, in 30 days I will be able to learn an entire language?!". The answer is YES! First of all, as any valuable product, it has brilliantly passed the quality check: friends and relatives have tested this manual and the following month they did pretty well with grammar and vocabulary, trust me. Of course, in 30 days no one becomes a native speaker: but you can build a strong foundation on which to build a beautiful house. Do you get what I mean? Studying a little bit every day is a secret as simple as it is effective to make the learning easier and quicker. I will give you the opportunity to analyse in depth every little secret about grammar and vocabulary, and you must really promise me that you will do everything you can to complete this rich training: consult online newspapers, watch films or TV series with subtitles, read a good book with a dictionary next to you, in short take every little opportunity to be in contact with Spanish as much as possible. Then there will be space for real dialogues in Spanish, the testing ground for your theoretical skills. When you go on holiday to a Spanish-speaking country or you will have to use Spanish in any other situation, you will just want to do your best. Think about this: one month. 30 days of studying will help you learning a new language, improving your curriculum, immersing yourself in a new and different world. It will be a special month, and you will be satisfied.

[Language Typology and Language Universals / Sprachtypologie und sprachliche Universalien / La typologie des langues et les universaux linguistiques. 2. Halbband](#) - Martin Haspelmath 2001-01-01

This handbook provides a comprehensive and thorough survey of our current insights into the diversity and unity found across the 6000 languages of this planet. The 125 articles include inter alia chapters on the patterns and limits of variation manifested by analogous structures, constructions and linguistic devices across languages (e.g. word order, tense and aspect, inflection, color terms and syllable structure). Other chapters cover the history, methodology and the theory of typology, as well as the relationship between language typology and other disciplines. The authors of the individual sections and chapters are for the most part internationally known experts on the relevant topics. The vast majority of the articles are written in English, some in French or German. The handbook is not only intended for the expert in the fields of typology and language universals, but for all of those interested in linguistics. It is specifically addressed to all those who specialize in individual languages, providing basic orientation for their analysis and placing each language within the space of what is possible and common in the languages of the world.

How to Learn German in 30 Days - Giovanni Sordelli 2020

This book will make you learn German in just 30 days, starting from scratch. And this is more than just a promise. Let me explain it to you... The method is very simple: this book is divided into 30 chapters, one per day. This, will allow you to learn the basics of this language in just one month. To get the most out of this course, you just have to respect one, simple rule. You must read one chapter per day, no more, no less. If you respect this rule, and follow the instructions you find in this book, the result is guaranteed. Forget the usual boring grammar courses with an anonymous and depersonalized profile. "How to learn German in 30 days" has been realized with all the trimmings of self-help. It looks like a practical manual, with a personal, fun and motivating cut. It is rich of several curious anecdotes and useful tips not only to speak German, but also to get by on the road. If you are still not convinced, keep reading... From the author's introduction... German, trust me, will open you a lot of doors: and, not of secondary importance, you'll face far less competition than you would with Spanish or French, for example, since German is less widespread studied in schools and universities. Thus, in short, this manual will give you, within a month, all the grammatical skills you need to juggle the meanders of a language that is really useful and usable for those who have in mind career ambitions, tourism goals, or simply personal curiosity interests. Finally, please, don't worry, I will also provide you with many other useful tools, like online channels, readings and suitable movies, in order that the course and your learning will continue even beyond this month. You'll like it, you'll see, and you'll be abundantly satisfied, even if at the beginning, as is normal, you are doubtful and still convinced that the good old traditional courses, with their long structure and depersonalising attitude, are yet the state of the art, the best the market can offer.

**A New Republic of Letters** - Jerome McGann 2014-03-17

Jerome McGann's manifesto argues that the history of texts and how they are preserved and accessed for interpretation are the overriding subjects of humanist study in the digital age. Theory and philosophy no longer suffice as an intellectual framework. But philology--out of fashion for decades--models these concerns with surprising fidelity.

**English Medium Instruction** - Ernesto Macaro, 2018-02-19

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at [www.oup.com/elt/teacher/emi](http://www.oup.com/elt/teacher/emi) Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university.
