Stories, Senses and the Charismatic Relation - Jamie Barnes 2020-10-13

Stories, Senses and the Charismatic Relation offers a uniquely intimate and auto-ethnographic exploration of Christian experience, rendering a deep, phenomenological account of how devotional worlds become real - how they are experienced, shaped, constituted and performed by those who live them. The book starts from a reflexive exploration of the author's own experiences of the divine, considers the spiritual journeys of family members and the 'spiritual community' of which he was a part, and draws on ethnographic fieldwork in the southern Balkans where that community was based. Jamie Barnes considers three main elements: firstly, the role that sensory aspects of experience play in constituting one's lived world and one's ideas about the kinds of beings inhabiting it; secondly, how stories and metaphors are tactically employed, not only in the process of expressing aspects of past experience, but also in shaping

and forming both desired worlds and future pathways; thirdly, how such sensed, narrated and lived worlds are tentatively held together - in hope, trust and love - through charismatic relationships of devotion with a divine Other. This unusual and innovative ethnography offers a unique and reflexive view from within the world of Christian experience.

Warrior Rising - MaryAnne Howland 2020-01-28

An eye-opening look at one mother's determination to provide positive male role models for her son, and the power of great mentoring to change lives. When MaryAnne Howland's son was turning thirteen she organized a "Black Mitzvah" rite of passage celebration for him. Max is one of the one-in-three children in America being raised without a father in the home. Among African-Americans, that number is reported to be as high as 72 percent. To help fill the father-shaped hole in Max's life as he transitioned from boyhood to manhood, MaryAnne invited four men from different corners of her life --an engineer, a philanthropist, a publisher, and a financial planner--to become Max's mentors. Max has faced many challenges. As a boy without a consistent father figure in his life, as an African-American male in a time when race relations in this country continue to be fraught, and also because Max was born premature and as a result has cerebral palsy, he has had to be a true warrior. On the brink of manhood, his mother wanted to give him the benefit of men who could answer some of the questions she felt that she, as a woman, might not be able to answer. Through his adolescence, Max's mentors have shared valuable insights with him about what it means to be a good man in the face of life's challenges. These lessons, recounted in this book, will serve as a powerful roadmap for anyone wishing to support boys as they approach manhood.

Sensory Theatre - Tim Webb 2022-08-30

Sensory Theatre: How to Make Interactive, Inclusive, Immersive Theatre for Diverse Audiences by a Founder of Oily Cart is an accessible step-by-step guide to creating theatre for inclusive audiences, such as young people on the autism spectrum or affected by other neuro-divergent conditions and children under two. Conventional theatre relies on seeing and hearing to involve its audience; sensory theatre harnesses the power

of five or more senses to address its participants who have different ways of relating to the world around them. This book is an insightful history of Oily Cart and its pioneering development of work for the very young, including Baby Theatre, and for neuro-divergent audiences including those on the autism spectrum. It gives a clear introduction to the fundamental concepts of this theatre, suggests a host of practical techniques drawn from over forty years of experience, and describes some of Oily Cart's most radical innovations, including theatre on trampolines, in hydrotherapy pools, and with flying audiences in the company of aerial artists. The book also includes copious photos from the Oily Cart's archives and links to videos examples of the company's work. Readers will learn how to: Research the intended audience while not being led astray by labels. Create a welcoming, immersive sensory space in classrooms, nurseries, school halls, and playgrounds. Devise sensory stories that can be adapted to suit different audiences. Recruit, audition, cast, and run rehearsals. Ensure that the production is truly sensory and interactive. Written for Theatre for Young Audiences, Drama in Education, and specialized Applied Theatre courses, as well as educators and theatre practitioners interested in creating inclusive, interactive productions, Sensory Theatre offers a goldmine of ideas for making work that connects with audiences who can be the hardest to reach.

During the months during which Max's condition slowly worsens Marcia seeks relief from stress by deciding to learn Beethoven's Appassionata piano sonata, a piece that her mother recorded but that Marcia had not been able to master in the past. When she was a teenager Marcia visited southern California and came to love it. When Michael is offered a promotion and partnership in the law firm, if he returns to the New York office, their marriage is further stressed by Michael's resistance to Marcia being a donor, by his controlling nature, and by Marcia's reluctance to leave Los Angeles and her close friends.

Hello, My Name Is Max and I Have Autism - Max Miller 2014-07-02

Max Miller is a 12 year old high functioning autistic. Max was diagnosed with autism at age 5. His original prognosis was that he would never learn and was deemed "unteachable." It was recommended to his parents that he be institutionalized as he would never thrive. His parents defied this assertion and pressed forward with a blend of traditional and non-traditional therapeutic methods. The blend of methods worked and Max began to communicate. Max was non-verbal until age 6. He did not learn to read and write until age 10. He is now integrated in the classroom and reads at grade level. Due to his disability, Max encountered many forms of discrimination, mostly due to ignorance. He was denied access to the many things allotted to children—sports, education, scouting, birthday parties, even playdates. Despite these harms, Max chose not to be bitter. He embraced his autism and became an advocate for himself and for other children on the spectrum. When words were difficult to come by, Max would use art to communicate his feelings to his mother. He now uses art and essays as a tool to educate others about what it is like to have autism. An aspiring artist, his art has been displayed at the Denver Art Museum and 40 West Gallery. His art show, *Insight into the Autistic Mind*, is on constant display as part of Max's in-services for groups interested in autism. He was profiled in the local media for his advocacy. Max has his own Facebook page for his art show and at present has 200 likes and growing. Max lives in Denver,

Colorado with his mom and dad and four cats. He has a love of skateboarding, his PS3, writing, art and music. He wants to be a DJ and play in a jazz band when he grows up.

The Out-of-Sync Child - Carol Stock Kranowitz 2006-04-04

The groundbreaking book that explains Sensory Processing Disorder (SPD)--and presents a drug-free approach that offers hope for parents--now revised and updated. Does your child exhibit... Over-responsivity--or under-responsivity--to touch or movement? A child with SPD may be a "sensory avoider," withdrawing from touch, refusing to wear certain clothing, avoiding active games--or he may be a "sensory disregarder," needing a jump start to get moving. Over-responsivity--or under-responsivity--to sounds, sights taste, or smell? She may cover her ears or eyes, be a picky eater, or seem oblivious to sensory cues. Cravings for sensation? The "sensory craver" never gets enough of certain sensations, e.g., messy play, spicy food, noisy action, and perpetual movement. Poor sensory discrimination? She may not sense the difference between objects or experiences--unaware of what she's holding unless she looks, and unable to sense when she's falling or how to catch herself. Unusually high or low activity level? The child may be constantly on the go--wearing out everyone around him--or move slowly and tire easily, showing little interest in the world. Problems with posture or motor coordination? He may slouch, move awkwardly, seem careless or accident-prone. These are often the first clues to Sensory Processing Disorder--a common but frequently misdiagnosed problem in which the central nervous system misinterprets messages from the senses. The Out-of-Sync Child offers comprehensive, clear information for parents and professionals--and a drug-free treatment approach for children. This revised edition includes new sections on vision and hearing, picky eaters, and disorders such as autism, among other topics.
