Bold Ventures - Raizen 2012-12-06

This book presents comprehensive results from case studies of three innovations in mathematics education that have much to offer toward understanding current reforms in this field. Each chapter tells the story of a case in rich detail, with extensive documentation, and in the voices of many of the participants-the innovators, the teachers, the students. Similarly, Volume 2 of Bold Ventures pre sents the results from case studies of five innovations in science education. Volume 1 provides a cross-case analysis of all eight innovations. Many U.S. readers certainly will be very familiar with the name of at least one if not all of the mathematics innovations discussed in this volume-for example, the NCTM Standards-and probably with their general substance. Much of the education community's familiarity with these arises from the projects' own dissemination efforts. The research reported in this volume, however, is one of the few detailed studies of these innovations undertaken by researchers outside the projects themselves.

Formula for Fortune - Ann Uhry Abrams 2012-03-09

Asa Candler rose from a rural background to reap a fortune. His windfall came from purchasing the Coca-Cola formula in 1888 and establishing the company that became a national phenomenon in less than a decade. In Formula for Fortune, author Ann Uhry Abrams narrates the life and

times of Candler from his ancestral background to the death of the last of his five children. Formula for Fortune not only shows how he turned his entrepreneurial genius into an empire, but also relates his status in Atlanta, Georgia, as a prominent banker, realtor, philanthropist, civil servant, and mayor. Painting a lively portrait of the past, this biography tells a fascinating American story that covers a century of American and Southern life as seen through the eyes of a middle-class family elevated to prominence by their patriarchs incredible success. It not only provides a peek into the horse-and-buggy days of one of the nations major corporations, but also follows Coca-Colas fascinating transformation from patent-medicine to international phenomenon. Family dynamics weave through this drama of love, disappointments, and disaster played out against the background of four wars, a race riot, technological revolutions, and numerous courtroom dramas.

The Freedom Formula - David Finkel 2019-09-03

Building a successful company and career doesn't mean sacrificing your family, health, or life. You check email the moment you lift your head off the pillow in the morning. You bring work with you on vacation, sneak glances at your smart phone during family dinners, and take business calls and texts at your kid's sports games. It's as if you've been forced to make a choice between your company or your life, sacrificing time for yourself and family for the sake of career success. But it doesn't have to be that way. The most successful business leaders have learned to bust through the direct one-to-one relationship between hours worked and value created by refocusing their company, department, or team's best talent and attention on their highest value activities—generating hundreds, even thousands, of hours of value in the process. In *The Freedom Formula*, Wall Street Journal bestselling author and successful entrepreneur David Finkel will help you operationalize working smarter. No fluff, no theory, Finkel shares the detailed blueprint to create maximum value for your company without working nights, weekends, or while on "vacation." You'll learn:

- Why working longer and harder doesn't pay off (and what actually does)
- Why the 80-20 principle doesn't go far enough (and how to take it to its most productive extreme)
- How to escape the Time and Effort Economy
- How to structure your day and week so that you reclaim five or more hours each week in usable blocks of your best time
- How to leverage the five Freedom Accelerators to get your life back faster

And much more! Whether you're a business owner, top executive, key manager—or aspire to be one—*The Freedom Formula* offers a radical new approach to structuring your time and priorities (and your team's) in order to reclaim hours of your day—and the freedom to live your life, not just your job.

Open Dating of Foods - Theodore P. Labuza 2008-02-28

Open dating plays a vital role in the distribution of the food products from the farm or place of manufacturing to the consumer's home. One principle is that the shelf life is a function of the distribution conditions and can be looked at as the percentage of consumers a manufacturer is willing to displease. Thus, one purpose of an open date is to give consumers enough time to purchase a food product and store it at home for a reasonable period of time before the product reaches the end of shelf-life in terms of some degree of quality change that is still acceptable. If products are not stored or rotated properly in distribution, then older products or those of lesser quality and perhaps compromised safety because of abuse during distribution chain and causing loss of confidence in the food category. Presently, the lack of uniformity among manufacturers and across state borders has made the practice of open

dating confusing and misleading for consumers, retailers and the government. This book addresses these issues, and provides scientific and legal background to both evaluate and influence federally-regulated open-dating legislation in this country

Soulcraft - Bill Plotkin 2010-10-05

Since 1980, depth psychologist Bill Plotkin has been guiding women and men into the wilderness — the redrock canyons and snow-crested mountains of the American West — but also into the wilds of the soul. He calls this work soulcraft. There's a great longing in all people to uncover the secrets and mysteries of our individual lives, to find the unique gift we were born to bring to our communities, and to experience our full membership in the more-than-human world. This journey to soul is a descent into layers of the self much deeper than personality, a journey meant for each one of us, not just for the heroes and heroines of mythology. A modern handbook for the journey, Soulcraft is not an imitation of indigenous ways, but a contemporary nature-based approach born from wilderness experience, the traditions of Western culture, and the cross-cultural heritage of all humanity. Filled with stories, poems, and guidelines, Soulcraft introduces over 40 practices that facilitate the descent to soul, including dreamwork, wilderness vision fasts, talking across the species boundaries, council, self-designed ceremony, nature-based shadow work, and the arts of romance, being lost, and storytelling.

About Time - Tim Aldrich 2017-09-08

Where does all the time go? Despite the burgeoning army of machines designed to save us time - from cars and aeroplanes to dishwashers and microwaves - we don't seem to have any more of it on our hands. We simply fill the space we clear with more things to do - consuming more, spending more - and then look around for new ways of saving time. And

so we spiral onwards, upwards, ever faster. Being busy has become a habit, and a habit that gives us high status - busy people are important people. The business of business is busy-ness. We are moving from a world in which the big eats the small, to a world where the fast eats the slow. But the fallout from a society hooked on speed is everywhere. It's affecting our health: 60 per cent of the adult population in the UK report that they suffer from stress, and more than half of these say that this has worsened over the last 12 months. It's affecting our family life, with a quarter of British families sharing a meal together only once a month. And it affects our environment too: air travel is a major source of carbon dioxide emissions, accelerating climate change as we speed around the world. And the faster we live, the faster we consume, the faster we waste energy and the faster we pollute the planet. The faster we seem to be running out of time. Is there something fundamentally wrong with the structure and values of this high-speed society? What are we running from and what are we running towards? Sustainable development is all about time. It's about trying to safeguard the health of the planet, and the people it supports, indefinitely, unconstrained by time. The idea of time offers a novel perspective on what sustainable development is all about. Looking at issues affecting society and the environment through the prism of time conveys the urgency of the challenge and leads us to solutions we might not have thought of before. About Time, edited by the think-tank Forum for the Future, brings together ten of the world's leading thinkers and writers, including Will Hutton, Baroness Mary Warnock, Sir Martin Rees, Ghilleen Prance, Jay Griffiths (the author of the bestselling Pip Pip) and Jonathon Porritt, from disciplines including biology, business, sociology, ethnography, astronomy, philosophy, politics, history and sustainability in a collection of intriguing essays exploring the issue of time and how it relates to the environment, economy and society. The first half of this collection looks at different dimensions of time - from the history of time as a social phenomenon and cultural notions of time, to cosmological time and the difference between human and machine time. These "think-pieces" are followed by a series of more practical, solutions-oriented contributions, looking at how we

deal with time in different contexts - from the slow food movement and time banks to long-term thinking in politics and what we can individually do to cope with the speed society. Contributions are liberally interspersed with boxes and brief pieces offering bite-sized facts, figures and insights relating to time and our everyday lives. About Time is a high-profile collection aimed at creating debate about where the values of our contemporary society are taking us. It will foster reflective thinking about different aspects of time, using the concept of time to communicate and illuminate the idea of sustainable development and question our idolatry of speed. In doing so, it aims to inspire and help decision-makers in business, government and elsewhere to appreciate the challenges of sustainable development, and inspire individuals to create change in their own lives. For readers of No Logo and Longitude, this book provides a thought-provoking twist, bringing together time and sustainability in a refreshing, provocative and accessible way.

A Bold New Foundation for Christianity - Charles R. Bond 2016-06-24

MODERN EVENTS CHALLENGE RELIGIOUS WORLD

UNDERSTANDINGS Mr. Bond, as a scientist outside the religious establishment, and not subject to its conforming pressures, dares to address today's several internet collections of supernatural experiences. His startling conclusion is that a transcendent God has been working in our world! However, he begins the book by addressing traditional Christians' unfounded beliefs in many literal Bible understandings declared as timeless truths, as derived from oral histories, allegorical writing styles, and beliefs in the Old Testament God. The liberal church is observed as working to constructively de-mythologize many such traditional beliefs, but only responding with various new understandings and beliefs in the God Jesus called his metaphorical father. Two modern internet sites are shown as revealing a transcendent God making supernatural mind interventions in deathbed visions, near-death experiences, and God-originated personal directives. By analyzing the many reported directive experiences, Mr. Bond believes such God-initiated mind interventions are also found in several important New Testament stories. Thus, long regarded as mythological like many others, these stories instead establish God was actually intervening in the life of Jesus, and later many of his apostles, in what can be called the beginning of Christianity. The author's understandings thus provide a distinctive new foundation for the Christian religion, that displace the few specific mythological beliefs now forming the foundation of traditional Christianity. The author thus leads to belief in a supernatural God, a Jesus even more firmly understood as inspired directly by God, and a God still working with mind interventions in individual lives and deaths. This Christianity thus is conceived with a distinctive new God-centered foundation, derived from analysis of real world experiences that should inspire modern minds in supporting Christianity. A CELESTIAL GOD IS RECOGNIZED AS WORKING IN OUR WORLD

Smarter - Dan Hurley 2014-12-30

"A riveting look at the birth of a new science." —Daniel H. Pink, author of *Drive* When he was eight years old, Dan Hurley was labeled a "slow learner" because he still couldn't read. Three years later, he had become a straight A student. Until the publication of a major study in 2008, psychologists believed that intelligence is fixed at birth, that IQ is like a number tattooed on the soul. The new study showed that people can increase their "fluid" intelligence through training. Hurley, who grew up to become an award-winning science journalist, first explored the topic in *The New York Times Magazine*. In *Smarter*, he digs deeper by meeting with the field's leading researchers—and becoming a human guinea pig. After just three months of playing computer brain-training games, joining a boot-camp exercise program, learning to play the Renaissance lute, practicing mindfulness meditation and even getting his brain zapped in the name of science, Hurley improved his fluid intelligence by sixteen percent. With humor and heart, *Smarter* chronicles the roiling field of intelligence research and delivers practical findings to sharpen the minds of children, young adults, seniors, and those with cognitive challenges.
