Guns Up! - Johnnie Clark 2011-02-02

THIS GUT-WRENCHING FIRSTHAND ACCOUNT OF THE WAR IS A CLASSIC IN THE ANNALS OF VIETNAM LITERATURE. "Guns up!" was the battle cry that sent machine gunners racing forward with their M60s to mow down the enemy, hoping that this wasn't the day they would meet their deaths. Marine Johnnie Clark heard that the life expectancy of a machine gunner in Vietnam was seven to ten seconds after a firefight began. Johnnie was only eighteen when he got there, at the height of the bloody Tet Offensive at Hue, and he quickly realized the grim statistic held a chilling truth. The Marines who fought and bled and died were ordinary men, many still teenagers, but the selfless bravery they showed day after day in a nightmarish jungle war made them true heroes. This new edition of Guns Up!, filled with photographs and updated information about those harrowing battles, also contains the real names of these extraordinary warriors and

details of their lives after the war. The book's continuing success is a tribute to the raw courage and sacrifice of the United States Marines.

**Machine-Guns and the Great War** - Paul Cornish 2009-09-19

An in-depth study of how these direct fire weapons were actually employed on the battlefields and their true place in the armory of World War I. The machine-gun is one of the iconic weapons of the Great War—indeed of the twentieth century. Yet it is also one of the most misunderstood. During a four-year war that generated unprecedented casualties, the machine-gun stood out as a key weapon. In the process it took on an almost legendary status that persists to the present day. It shaped the tactics of the trenches, while simultaneously evolving in response to the tactical imperatives thrown up by this new form of warfare. Paul Cornish, in this authoritative and carefully considered study, reconsiders the history of automatic firepower, and he describes in vivid detail its development during the First World

War and the far-reaching consequences thereof. He dispels many myths and misconceptions that have grown up around automatic firearms, but also explores their potency as symbols and icons. His clear-sighted reassessment of the phenomenon of the machine-gun will be fascinating reading for students of military history and of the Great War in particular. “For those wanting a little more in-depth information about the role and development of machine guns during the war, this book offers an excellent, well written and easily accessible account of what became the iconic weapon of the war, mainly due to the massive casualties it was able to inflict . . . This really is well worth reading.”

**The M60 Machine Gun** - Kevin Dockery

2012-11-20

The US M60 General Purpose Machine Gun, known as “the Pig,” was developed in the years after World War II from two revolutionary German designs. Adopted in 1957, the M60 came into its own in the jungles, hamlets, and city streets of Southeast Asia during the Vietnam War. “Humping the Pig” became common in US military squads, with at least one soldier equipped with an M60 and every squad member carrying ammunition for it. The M60 design transformed infantry tactics as squads took advantage of the immediate volume of fire

offered by the design. Although it has now been replaced by the M240 series of weapons in US infantry and mechanized units, the M60 is still in common use with the US armed forces.

Meanwhile, its iconic status has been assured by its frequent appearance in many popular films and television shows, from Full Metal Jacket to The A Team. Featuring specially commissioned full-color artwork, this is the full story of the M60, the innovative squad base-of-fire weapon that has equipped the US military from the jungles of Vietnam to the deserts of Iraq.

2013-11-28

In 1914 there were only two machine guns supporting a British infantry battalion of 800 men, and in the light of the effectiveness of German and French machine guns the Machine Gun Corps was formed in October 1915. This remarkable book, compiled and edited by C E Crutchley, is a collection of the personal accounts of officers and men who served in the

front lines with their machine guns in one of the most ghastly wars, spread over three continents. The strength of the book lies in the fact that these are the actual words of the soldiers themselves, complete with characteristic modes of expression and oddities of emphasis and spelling. All theatres of war are covered from the defence of the Suez Canal, Gallipoli and Mesopotamia in the east to France and Flanders, the German offensive of March 1918 and the final act on the Western Front that brought the war to an end. October 2006 is the 90th anniversary of the formation of the Machine Gun Corps.

**The Fall of France** - Julian Jackson 2004-04-22  
On 16 May 1940 an emergency meeting of the French High Command was called at the Quai d'Orsay in Paris. The German army had broken

through the French lines on the River Meuse at Sedan and elsewhere, only five days after launching their attack. Churchill, who had been telephoned by Prime Minister Reynaud the previous evening to be told that the French were beaten, rushed to Paris to meet the French leaders. The mood in the meeting was one of panic and despair; there was talk of evacuating Paris. Churchill asked Gamelin, the French Commander in Chief, 'Where is the strategic reserve?' 'There is none,' replied Gamelin. This exciting book by Julian Jackson, a leading historian of twentieth-century France, charts the breathtakingly rapid events that led to the defeat and surrender of one of the greatest bastions of the Western Allies, and thus to a dramatic new phase of the Second World War. The search for scapegoats for the most humiliating military disaster in French history began almost at once: were miscalculations by military leaders to blame, or was this an indictment of an entire nation? Using eyewitness

accounts, memoirs, and diaries, Julian Jackson recreates, in gripping detail, the intense atmosphere and dramatic events of these six weeks in 1940, unravelling the historical evidence to produce a fresh answer to the perennial question of whether the fall of France was inevitable.

**Gunner's Glory** - Johnnie Clark 2007-12-18  
They were warriors, trained to fight, dedicated to their country, and determined to win. At Guadalcanal, the Marine Corps' machine gunners took everything the Japanese could throw at them in one of the bloodiest battles of World War II; their position was so hopeless that at one point they were given the go-ahead to surrender. Near the Chosin Reservoir in Korea, as the mercury dropped to twenty below, the 1st Marine Division found itself surrounded and cut

off by the enemy. The outlook seemed so bleak that many in Washington had privately written off the men. But surrender is not part of a Marine's vocabulary. Gunner's Glory contains true stories of these and other tough battles in the Pacific, in Korea, and in Vietnam, recounted by the machine gunners who fought them.

Bloody, wounded, sometimes barely alive, they stayed with their guns, delivering a stream of firepower that often turned defeat into victory—and always made them the enemy's first target.

**Blitzcat** - Robert Westall 2012-12-13

She made her way down the cliff, and on to the beach. At the edge of the waves, she stopped, shaking her wet paws. She knew that somewhere ahead was her person, but far, far away. She miaowed plaintively; stood staring at the moving blur of uncrossable sea. She led the way to safety, out of the blazing hell of blitzed Coventry. People touched her for luck; feared her as an omen of disaster. Wherever she went,

she changed lives . . . From her beginning to her end she never wavered. She was the Blitzcat. Blitzcat by Robert Westall is the Smarties Prize-winning book about one brave cat's experiences during World War Two. Now with a brilliant new cover look and including an extended author biography.

*The Unwomanly Face of War* - Svetlana Alexievich 2018-04-03

A long-awaited English translation of the groundbreaking oral history of women in World War II across Europe and Russia—from the winner of the Nobel Prize in Literature NAMED ONE OF THE BEST BOOKS OF THE YEAR BY

The Washington Post • The Guardian • NPR • The Economist • Milwaukee Journal Sentinel • Kirkus Reviews For more than three decades, Svetlana Alexievich has been the memory and conscience of the twentieth century. When the Swedish Academy awarded her the Nobel Prize, it cited her invention of “a new kind of literary genre,” describing her work as “a history of emotions . . . a history of the soul.” In *The Unwomanly Face of War*, Alexievich chronicles the experiences of the Soviet women who fought on the front lines, on the home front, and in the occupied territories. These women—more than a million in total—were nurses and doctors, pilots, tank drivers, machine-gunners, and snipers. They battled alongside men, and yet, after the victory, their efforts and sacrifices were forgotten. Alexievich traveled thousands of miles and visited more than a hundred towns to record these women’s stories. Together, this symphony of voices reveals a different aspect of the war—the everyday details of life in combat left

out of the official histories. Translated by the renowned Richard Pevear and Larissa Volokhonsky, *The Unwomanly Face of War* is a powerful and poignant account of the central conflict of the twentieth century, a kaleidoscopic portrait of the human side of war. THE WINNER OF THE NOBEL PRIZE IN LITERATURE “for her polyphonic writings, a monument to suffering and courage in our time.” “A landmark.”—Timothy Snyder, author of *On Tyranny: Twenty Lessons from the Twentieth Century* “An astonishing book, harrowing and life-affirming . . . It deserves the widest possible readership.”—Paula Hawkins, author of *The Girl on the Train* “Alexievich has gained probably the world’s deepest, most eloquent understanding of the post-Soviet condition. . . . [She] has consistently chronicled that which has been intentionally forgotten.”—Masha Gessen, National Book Award-winning author of *The Future Is History*

*Machine Gunners on the Western Front* -

Herbert W. McBride 2014-04

Machine Gunners in the trenches The First World War was waged on an industrial scale, utilising every conceivable advantage of invention and technology. Fought on land, in the skies and on and beneath the sea it was the first true conflict of the modern age. In the land war infantry soldiers were introduced to efficient artillery, poison gas, the flame thrower, the tank and the devastatingly simple killer that was the barbed wire entanglement. Development in firearms had advanced, by comparison, quite slowly and soldiers were still mostly armed with single round firing weapons. However, the invention of the Maxim gun fundamentally changed the nature of war as infantrymen knew it. First proven by the British army against the Matabele warriors and then decisively against the Mahdists at Omdurman in the 1890s, here was the new monarch of close contact conflict. Men would no longer need to be aimed at to

be shot, but would be scythed down in numbers by rapidly fired streams of bullets and every army immediately adopted the machine gun of necessity. This book contains two outstanding accounts of the Canadian army's machine gun corps on the Western Front. Known as the 'Emma Gees' (MG-the initials of machine guns) these men not only dispensed death but due to their tactical importance were the focus of enemy assault. The first book in this special Leonaur two-books-in-one edition is a very personal account by a serving gunner at the sharp end of conflict; the second book, written by another machine gunner, also provides for the reader historical context in the form of an invaluable unit history. Leonaur editions are newly typeset and are not facsimiles; each title is available in softcover and hardback with dustjacket; our hardbacks are cloth bound and feature gold foil lettering on their spines and fabric head and tail bands.
