Nonacademic Writing - Ann Hill Duin 2013-11-05

In this volume, methodological, cultural, technological, and political boundaries felt by writers are analyzed, translated, and challenged in a way that will appeal to researchers, theorists, graduate students, instructors, and managerial audiences. Instead of extracting rules from previous research, the contributors, working from multidisciplinary perspectives, describe and analyze the social and technological contexts surrounding nonacademic writing. Their essays present a formative rather than summative outlook toward future research on nonacademic writing. Collectively, these chapters articulate a unique perspective toward nonacademic writing that considers: * The centrality of emerging communications technologies in nonacademic writing research and the need for a socio-technological perspective. New technologies reshape the concept of text and significantly impact the writing process and written products in nonacademic settings. * The relationship between the academy and the workplace. A number of chapters challenge us -- sometimes from opposing perspectives -- to scrutinize our role as writing educators in preparing students for the workplace. Should we support the interests of corporate employers, or should we resist those interests? Should we enculturate students in workplace writing practices by placing them in these environments, or should we examine the tacit knowledge gained by workplace professionals and deliver this via classroom instruction? * New theory, new research agendas. Contributors from diverse fields offer new theoretical lenses or use established lenses in innovative ways, expanding the agenda for nonacademic writing research. This volume represents the vision the social landscape demands for research and pedagogy in nonacademic

writing.

Ontology Engineering - Elisa Kendall 2022-05-31

Ontologies have become increasingly important as the use of knowledge graphs, machine learning, natural language processing (NLP), and the amount of data generated on a daily basis has exploded. As of 2014, 90% of the data in the digital universe was generated in the two years prior, and the volume of data was projected to grow from 3.2 zettabytes to 40 zettabytes in the next six years. The very real issues that government, research, and commercial organizations are facing in order to sift through this amount of information to support decision-making alone mandate increasing automation. Yet, the data profiling, NLP, and learning algorithms that are ground-zero for data integration, manipulation, and search provide less than satisfactory results unless they utilize terms with unambiguous semantics, such as those found in ontologies and well-formed rule sets. Ontologies can provide a rich "schema" for the knowledge graphs underlying these technologies as well as the terminological and semantic basis for dramatic improvements in results. Many ontology projects fail, however, due at least in part to a lack of discipline in the development process. This book, motivated by the Ontology 101 tutorial given for many years at what was originally the Semantic Technology Conference (SemTech) and then later from a semester-long university class, is designed to provide the foundations for ontology engineering. The book can serve as a course textbook or a primer for all those interested in ontologies.

Human Resource Selection - Robert Gatewood 2010-10-11

Introduce future and current practitioners to the technical challenges, most recent research and today's most popular selection tools with Gatewood/Feild/Barrick's HUMAN RESOURCE SELECTION, 7E. This book's advanced coverage details the development and implementation of effective selection programs within today's organizations. A streamlined, yet thorough, approach and numerous current examples focus on today's most important legal, global and ethical concerns; psychometric measurement concepts; job analysis; predictors of job performance; and criteria measures. A new chapter on HR recruitment

and new coverage of staffing versus selection, external versus internal job candidates, and self-presentation beyond the structured interview equips readers for success in HR selection today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Basic Electrical and Instrumentation Engineering - P. Sivaraman
2021-01-13

Electrical and instrumentation engineering is changing rapidly, and it is important for the veteran engineer in the field not only to have a valuable and reliable reference work which he or she can consult for basic concepts, but also to be up to date on any changes to basic equipment or processes that might have occurred in the field. Covering all of the basic concepts, from three-phase power supply and its various types of connection and conversion, to power equation and discussions of the protection of power system, to transformers, voltage regulation, and many other concepts, this volume is the one-stop, "go to" for all of the engineer's questions on basic electrical and instrumentation engineering. There are chapters covering the construction and working principle of the DC machine, all varieties of motors, fundamental concepts and operating principles of measuring, and instrumentation, both from a "high end" point of view and the point of view of developing countries, emphasizing low-cost methods. A valuable reference for engineers, scientists, chemists, and students, this volume is applicable to many different fields, across many different industries, at all levels. It is a must-have for any library.

Life Cycle Analysis and Assessment in Civil Engineering: Towards an Integrated Vision - Robby Caspeele 2018-10-31

This volume contains the papers presented at IALCCE2018, the Sixth International Symposium on Life-Cycle Civil Engineering (IALCCE2018), held in Ghent, Belgium, October 28-31, 2018. It consists of a book of extended abstracts and a USB device with full papers including the Fazlur R. Khan lecture, 8 keynote lectures, and 390 technical papers from all over the world. Contributions relate to design, inspection, assessment, maintenance or optimization in the framework of life-cycle

analysis of civil engineering structures and infrastructure systems. Life-cycle aspects that are developed and discussed range from structural safety and durability to sustainability, serviceability, robustness and resilience. Applications relate to buildings, bridges and viaducts, highways and runways, tunnels and underground structures, off-shore and marine structures, dams and hydraulic structures, prefabricated design, infrastructure systems, etc. During the IALCCE2018 conference a particular focus is put on the cross-fertilization between different sub-areas of expertise and the development of an overall vision for life-cycle analysis in civil engineering. The aim of the editors is to provide a valuable source of cutting edge information for anyone interested in life-cycle analysis and assessment in civil engineering, including researchers, practising engineers, consultants, contractors, decision makers and representatives from local authorities.

ITI Draughtsman Mechanical - Manoj Dole

ITI Draughtsman Mechanical is a simple e-Book for ITI Draughtsman Mechanical JOB Interview & Apprentice Exam. It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about the latest & Important about geometrical figures using drawing instruments, freehand drawing of machine components in correct proportions, procedure to prepare a drawing sheet as per BIS standard, learning about projection methods, auxiliary views and section views. Lettering, tolerance.

Mechanical Technical Interview - Pranab Debnath 2016-12-10

All Important Mechanical Engineering Technical Interview Questions & Answers covering all the subjects, Important for Viva Exams & Job Interviews for Freshers and Experienced. Equipment Effectiveness (OEE). And many more terms and abbreviations!

Partnership and the High Performance Workplace - Andy Danford
2005-08-02

The promotion of workplace partnership in the high performance workplace has become central to policy debates on the 'modernization' of employment relations in British industry. This book provides critical insights into the dynamics of partnership by way of in-depth case studies of employee experience in an under-researched industry noted for its high concentrations of skilled workers and graduates. Drawing on rich interview and questionnaire data, the authors highlight considerable conflicts of interest in the development of partnership that derive from the competitive capitalist environment in which management strategies operate.
