Manufacturing Technology - Rajesh Kumar R
2020-01-01

The fundamental idea of manufacturing or production is to create, (or produce), something that has a useful form. There are four basic production processes for producing desired shape of a product. These are casting, machining, joining (welding, mechanical fasteners, etc.), and forming processes. Casting process exploit the fluidity of a metal in liquid state as it takes shape and solidifies in a mould. Machining processes provide desired shape with good accuracy and precision but tend to waste

material in the generation of removed portions. Joining processes permit complex shapes to be constructed from simpler components and have a wide domain of applications. Forming processes exploit a remarkable property of metals, which is their ability to flow plastically in the solid state without deterioration of their properties. With the application of suitable pressures, the material is moved to obtain the desired shape with almost no wastage. This book on Manufacturing Technology will give you a detailed understanding of manufacturing processes such as casting, joining, and forming.

INCOME TAX LAW & ACCOUNTS

(Assessment Year 2020-21) - Sojan Joseph
2020-08-11

Taxation The word tax is based on the Latin world 'Taxo' which means to estimate. Tax means to impose a financial charge or other levy upon a taxpayer on an individual or legal entity by a state or the functional equivalent of a state such that failure to pay is punishable by law. It is imposition of compulsory levies on individuals or entities by government. Taxes are levied in almost every country of the world, primarily to raise revenue for government expenditures, although they also serve other purposes as well.

In modern economies taxes are the most important source of government revenue. Taxes differ from other sources of revenue in that they are compulsory levies and are unrequited—i.e., they are generally not paid in exchange for some specific thing, such as a particular public service, the sale of public property, or the issuance of public debt. While taxes are presumably collected for the welfare of taxpayers as a whole, the individual taxpayer's liability is independent of any specific benefit received.

Quality Management in Higher Education - Marmar Mukhopadhyay 2016-07-18

A timely intervention as higher education in India begins to pay equal importance to Quality, alongside Access and Equity. Indian higher education is the third largest in the world. It is undergoing unprecedented expansion and reforms. Yet, no Indian university figures among the World's Top 100! The problem lies primarily

with the quality of higher education. This book serves as a quality management guide for the heads of colleges and universities, focusing on issues, techniques and improvement at the institutional level. In building up a sound framework, it effectively combines generic methods and techniques with specific mechanisms of quality assurance for in-campus activities such as curriculum planning, teaching learning processes, human resource management, infrastructure management and information and communication technologies. The author's expertise as a management scientist, trainer of heads of higher education institutes and experience of institution building gives the book an extra edge.
