**Turkey in Africa** - Federico Donelli 2021-04-08  
Africa is increasingly becoming an arena for geopolitical competition over its resources and, in the last two decades, has seen many emerging powers such as China, India, Russia, Japan and Brazil attempting to strengthen their ties with the continent. Turkey's involvement has been much less discussed, despite the fact that Turkey's strategic involvement with several sub-Saharan African states has been deepening since its active engagement in the Somali crisis of 2011. Federico Donelli brings to light the extent of Turkey's involvement in Africa and analyses the unique characteristics, benefits, challenges and limits of Turkish policy in the region. The book examines the Turkish diplomatic programme as well as its domestic reception,

which includes humanitarian aid, religious links such as the OIC (Organisation of Islamic Cooperation), as well as private business links. Crucially, Donelli examines what makes Turkish involvement different from that of other international actors in the region – its historic ties with North Africa under the Ottoman Empire.

**Studies on Ottoman Social and Political History** - Kemal H. Karpat 2002

Annotation The 19th century prevails in this anthology on the transformation of the late Ottoman state into modern Turkey. Thirty-three articles are arranged in three categories: the Ottoman socio-political transformation, the population movements of immigration and migration, and the formation of nation-states with politico-religious identities. Karpat (history, U. of Wisconsin) has a central aim: to counteract what would become bureaucratic Republican attempts by the Turkish Historical Society (formerly, the Ottoman Historical Society) to cut

off Turkish history from its Ottoman past. The THS was able to do this by instead connecting the Republic with its earlier Central Asian roots, and by relying too heavily on European versions of Ottoman/Turkish history more unfavorable to things Ottoman. Topics include the social and economic transformation of Istanbul in the 19th century, Jewish population movements in the Ottoman Empire, Ottoman relations with the Balkan nations after 1683, and Romanian independence and the Ottoman state. Religion and Place - Peter Hopkins 2012-09-14  
This unique collection highlights the importance of landscape, politics and piety to our understandings of religion and place. The geographies of religion have developed rapidly in the last couple of decades and this book provides both a conceptual framing of the key issues and debates involved, and rich illustrations through empirical case studies. The

chapters span the discipline of human geography and cover contexts as diverse as veiling in Turkey, religious landscapes in rural Peru, and refugees and faith in South Africa. A number of prominent scholars and emerging researchers examine topical themes in each engaging chapter with significant foci being: religious transnationalism and religious landscapes; gendering of religious identities and contexts; fashion, faith and the body; identity, resistance and belief; immigrant identities, citizenship and spaces of belief; alternative spiritualities and places of retreat and enchantment. Together they make a series of important contributions that illuminate the central role of geography to the meaning and implications of lived religion, public piety and religious embodiment. As such, this collection will be of much interest to researchers and students working on topics relating to religion and place, including human geographers, sociologists, religious studies and religious

education scholars.

*Trials of Europeanization* - Ioannis N.

Grigoriadis 2009-01-12

This book examines the impact of improving EU-Turkey relations on Turkish political culture since Turkey became a candidate for EU membership in 1999. While a multi-party political system was introduced in Turkey in 1946, political liberalism was the missing part of Turkey's democratic consolidation. Turkish political culture valued submissiveness toward state authority and did not favor citizen participation. This study evaluates the impact that Turkey's EU-motivated political reform had on civil society, state-society relations, the role of religion in politics and national identity. This leads to an assessment of whether Turkish

political culture has become more participant and democratic.

**The New Turkey and Its Discontents** - Simon A. Waldman 2017

The Turkey of today little resembles that of recent decades. Its economy has expanded hugely, new political elites have emerged, and the once powerful Kemalist military is no longer a potent and dominant political player.

Meanwhile, new prosperity has had many unexpected social and political repercussions, pre-eminent among which is the advent of the

Justice and Development Party (AKP), which first came to power in 2002 by downplaying its Islamist leanings and marketing itself as a center-right party. After several terms in office, and amid unprecedented popularity, the conduct of the AKP and its leading cadres has faced growing criticism. Turkey has yet to solve its Kurdish question, and its foreign policy is increasingly under threat as it balances relations with Iran, Israel, Iraq and Russia, to name only a few of its more demanding interlocutors. Widespread domestic protests gripped the country in 2013. The government is now perceived by many to be corrupt, unaccountable, intimidating of the press and intolerant of alternative political views and criticism. Has this once promising democracy descended into a tyranny of the majority led by a charismatic leader, Recep Tayyip Erdogan? Is Turkey more polarized now than ever in its recent history? These are among the questions posed in this timely primer on a rising economic power.

**An Introduction to the Modern Middle East, Student Economy Edition** - David S. Sorenson 2015-11

An overview of the history, religion, economy, and politics of the Middle East

*The Origins of the Ottoman Empire* - Mehmet Fuat Köprülü 1992-01-01

In *The Origins of the Ottoman Empire*, Köprülü criticized as unscientific the prevailing Western explanations of the origins of the Ottoman Empire. Leiser's translation from the Turkish reveals Köprülü's modern historiographic method, and his unique contribution in describing the nature of the relevant Muslim sources. Using these and other references, Köprülü gave the first broad comprehensive account--political, religious, social, and economic--of the Turkish history of Anatolia in the thirteenth and fourteenth centuries, and outlined the major factors that led to the rise of the Ottomans.

**Turkey** - İhsan D. Dağlı 2008

**Political Opposition in the Early Turkish Republic** - Erik Jan Zürcher 1991

The founding of the Progressive Republican Party in November 1924 marked the end of a power struggle within the Turkish nationalist movement. This struggle had been going on ever since the start of that movement in 1919 and had become acute after the establishment of the Turkish Republic in October 1923. The suppression of the party in 1925 marked the beginning of the period of one-party dictatorship which lasted until after the Second World War. This book describes the power struggles within the nationalist movement which gave birth to the party, its history, organization, power base, and ideological significance. A large number of important political documents from the period are presented in translation.

**The Routledge Handbook on Informal Urbanization** - Roberto Rocco 2019-01-02

The Routledge Handbook on Informal Urbanization investigates the mutual relationship between the struggle for political inclusion and processes of informal urbanization

in different socio-political and cultural settings. It seeks a middle ground between two opposing perspectives on the political meaning of urban informality. The first, the 'emancipatory perspective', frames urban informality as a practice that fosters autonomy, entrepreneurship and social mobility. The other perspective, more critical, sees informality predominantly as a result of political exclusion, inequality, and poverty. Do we see urban informality as a fertile breeding ground for bottom-up democracy and more political participation? Or is urban informality indeed merely the result of a democratic deficit caused by governing autocratic elites and ineffective bureaucracies? This book displays a wide variety of political practices and narratives around these positions based on narratives conceived upon specific case cities. It investigates how processes of urbanization are politicized in countries in the Global South and in transition economies. The handbook explores 24 cities in the Global South,

as well as examples from Eastern Europe and East Asia, with contributions written by a global group of scholars familiar with the cases (often local scholars working in the cities analyzed) who offer unique insight on how informal urbanization can be interpreted in different contexts. These contributions engage the extreme urban environments under scrutiny which are likely to be the new laboratories of 21st-century democracy. It is vital reading for scholars, practitioners, and activists engaged in informal urbanization.

### **Natural Products of Silk Road Plants -**

Demystifying Shariah - Sumbul Ali-Karamali 2020-08-11

A direct counterpoint to fear mongering headlines about shariah law—a Muslim American legal expert tells the real story, eliminating stereotypes and assumptions with compassion, irony, and humor Through scare tactics and deliberate misinformation campaigns, anti-Muslim propagandists insist wrongly that shariah is a draconian and oppressive Islamic law that all Muslims must abide by. They circulate horror stories, encouraging Americans to fear the “takeover of

shariah” law in America and even mounting “anti-shariah protests” . . . with zero evidence that shariah has taken over any part of our country. (That’s because it hasn’t.) It would be almost funny if it weren’t so terrifyingly wrong—as puzzling as if Americans suddenly began protesting the Martian occupation of Earth. Demystifying Shariah explains that shariah is not one set of punitive rules or even law the way we think of law—rigid and enforceable—but religious rules and recommendations that provide Muslims with guidance in various aspects of life. Sumbul Ali-Karamali draws on scholarship and her degree in Islamic law to explain shariah in an accessible, engaging narrative style—its various meanings, how it developed, and how the shariah-based legal system operated for over a thousand years. She explains what shariah means not only in the abstract but in the daily lives of Muslims. She discusses modern calls for shariah, what they mean, and whether shariah is

the law of the land anywhere in the world. She also describes the key lies and misunderstandings about shariah circulating in our public discourse, and why so many of them are nonsensical. This engaging guide is intended to introduce you to the basic principles, goals, and general development of shariah and to answer questions like: How do Muslims engage with shariah? What does shariah have to do with our Constitution? What does shariah have to do with the way the world looks like today? And why do we all—Muslims or not—need to care? *Turkey* - Christopher Panico 1999

### **Nostalgia for the Empire - M. Hakan Yavuz**

2020-07-23

Making a country great again is a theme for nationalist authoritarians. Across countries with past experience as great powers, nationalist politicians typically harken back to a golden age. In Nostalgia for Empire, Hakan Yavuz focuses on how this trend is playing out in Turkey, a nation that lost its empire a century ago and which is now ruled by a nationalist authoritarian who invokes nostalgia for the Ottoman era to buttress

his power. Yavuz delves into the social and political origins of expressions of nostalgia for the Ottoman Empire among various groups in Turkey. Exploring why and how certain segments of Turkish society has selectively brought the Ottoman Empire back into public consciousness, Yavuz traces how memory of the Ottoman period has changed. He draws from Turkish literature, mainstream history books, and other cultural products from the 1940s to the twenty-first century to illustrate the transformation. He finds that two key aspects of Turkish literature are, on the one hand, its criticism of the Jacobin modernization of Turkey under Ataturk, and on the other a desire to search the Ottoman past for an alternative political language. Yavuz goes onto to explain how major political actors, including President Erdogan, utilize the concept of empire to craft distinctive conceptualizations of nationalism, Islam, and Ottomanism that exploit national nostalgia. As remembered today, the Ottoman

past seems to be grounded in contemporary conservative Islamic values. The combination of these memories and values generates a portrait of Turkey as a victim of major powers, besieged by imagined enemies both internal and external. In mapping out how nostalgia is crafted and spread, this book not only sheds light on Turkey's unique case but also deepens our understanding of nationalism, religion, and modernity.
