His cohorts have always been—and still are—some of the best in the business: Jack Kirby, John Romita, Sr., Neal Adams, Gil Kane, Mike Deodato, Jr., Frank Cho, and Jonathan Lau, and many others, Stan includes their work here and discusses what exactly makes it so great. He touches on all the important stuff: anatomy, foreshortening, perspective, action, penciling, inking, hand lettering vs. digital lettering, color, character and costume design, panel flow, materials and tools, computers, file formats, and software. He includes an overview of the history and development of the comic book industry, and there's an extensive section on various types of covers—the super important element that makes the reader want to pick up that comic! In a world where good battles evil at every turn and the hero fights valiantly to get the girl, no stone is left unturned! Here you'll also find info on all the small details—that really aren't so small: word balloons, thought

balloons, whisper balloons, bursts, sound effect lettering, and splash pages! And KA-BLAMMM! . . . once you've created your art, then what? Lest you think Stan would turn you out into the wilderness without a road map, fellow traveler, there's also information on preparing and submitting your portfolio, on getting work, and on suggested reading and schools. Stan Lee's *How to Draw Comics* features a cover that reunites long time collaborator John Romita Sr. and original cover artist of *How to Draw Comics the Marvel Way*. John Romita Sr. was most famous for his collaboration on *The Amazing Spider-Man* with Stan Lee! It's time for a new approach . . . “a cornucopia of cutting-edge, techno-savvy instructions to lead you down the freshly laid yellow brick road of creativity.” It's time for a book that takes you on the new journey of creating comic books for the 21st century and beyond! Excelsior!

The idiosyncratic curriculum from the Professor of Interdisciplinary Creativity will teach you how to draw and write your story Hello students, meet Professor Skeletor. Be on time, don't miss class, and turn off your phones. No time for introductions, we start drawing right away. The goal is more rock, less talk, and we communicate only through images. For more than five years the cartoonist Lynda Barry has been an associate professor in the University of Wisconsin-Madison art department and at the Wisconsin Institute for Discovery, teaching students from all majors, both graduate and undergraduate, how to make comics, how to be creative, how to not think. There is no academic lecture in this classroom. Doodling is enthusiastically encouraged. Making Comics is the follow-up to Barry's bestselling Syllabus, and this time she shares all her comics-making exercises. In a new hand-drawn syllabus detailing her creative curriculum, Barry has students

drawing themselves as monsters and superheroes, convincing students who think they can't draw that they can, and, most important, encouraging them to understand that a daily journal can be anything so long as it is hand drawn. Barry teaches all students and believes everyone and anyone can be creative. At the core of Making Comics is her certainty that creativity is vital to processing the world around us.

### **Let's Make Comics!** - Jess

Smart Smiley 2018-06-05

A light-hearted interactive guide to comics and cartoon-making that uses an activity book format and creatively stimulating prompts to teach the fundamentals of cartooning in a fun and easy-to-follow fashion. From a working cartoonist and comic book making instructor, this all-ages activity book uses humorous and informative one-page comics and exercise prompts to guide young readers (and readers who are young at heart) through easy-to-master lessons on the skills needed to make comics. The activities cover a range of essential comics-making tasks from creating expressions for characters to filling in blank panels to creating original characters and placing them in adventures of their own. Each exercise can stand on its own or work together with others in the book to stimulate creativity via the comics medium. In the end, readers who complete the activities inside the book itself

will have created several comics of their own, and will have generated many ideas for more sequential art creations. Praise for Let's Make Comics! "At once playful and complex, this book is a perfect introduction to cartooning, as well as a lovely (and lovingly crafted) tribute to the comics form and a timely reminder that artmaking can be fun."—Roman Muradov, creator of *Vanishing Act* and *On Doing Nothing* "Let's Make Comics is a book I wish I had when I was 9, but 29 works too! It's so fun and brilliant and packed with oodles of awesome activities. Great book for learning to make comics or for a seasoned cartoonist to find some new inspiration."—Ben Clanton, creator of the *Narwhal* and *Jelly* books "It's fantastic! This book will make you a better writer and a better artist and show you how to think like a comic star."—Charise Harper, creator of the *Fashion Kitty* and *Crafty Cat* books "Warning! This book will make you make comics, and it will be fun!"—Greg
