**How to Trade Online as a Beginner** - R. Rond

It is huge step when you make the decision to become a financial market

trader. Most brand new traders are getting into this business because they think they can make quick money and become rich beyond their dreams and while that could happen and may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. New people most of the time have not done their research and have no idea they are entering a business where there are people in the live market who will walk over dead bodies to make money. They are entering a business where the smart money in the business are looking to drain your trading account on a daily basis and most of the time they do because new people come into the business unprepared or at best under prepared as well as underfunded, don't be that trader! To drive your own money train takes a lot of training and education. This short book will give you a basic start on getting your money train driver's license. There is a bonus section at the end of this book where there are some great tips to help you get started trading on demo. There are some great extra links to more free learning information. When you are done reading this book you will have an excellent basic explanation of what and what not to do before you even study anything or do any kind of education. The information in this book will put you on the fast track to becoming a successful self-directed currency investor and trader.

*Beginners Guide on How to Make Money Online* - Billy Fradys  
2017-11-09

This book is all about how to make money online and how to earn a full time or a part time income while working from the comfort of your home in your pajamas. This book is great for the beginner, for the intermediate and also for the advanced person that is already working from home. We will show you step-by-step some secret tactics that you can use in 24-48 hours to help start your online journey. Earning an income from home is

not as difficult as some might claim it is. Many people are earning a part-time or a full-time income while working from their home. As a bonus to you today I will tell you this - that once you start your online journey, you have to be PERSISTENT to start seeing results/ sales. A lot of us, especially when we first start out online, we might start promoting different things online, and when we don't see results right away, we quit. A lot of times, when people start their online/internet business, they start setting their website up or whatever it is that they are doing, it might seem to them that they are taking action in their online business, but they're actually not taking the action that they need to take in order to get the sales to happen. You need to also start driving traffic to that website or to that affiliate website/affiliate link. You need to start taking the action that needs to be taken in order to see the results. You need to start providing VALUE to people because it all comes down to how much value you provide to people out there - to your followers or maybe to your list that you started to build. Because the more value you provide to people, the more money you're going to make. If you're not providing any value, if you're not sharing anything with people, sharing the things that you're learning, if you're not helping people out, don't expect a lot of sales to happen for you. You need to focus on providing that VALUE and that's one thing obviously that you need to do to see some sales happening. And just remember to be PERSISTENT. Maybe it takes you a month or two to set everything up, to go through the training and to actually start getting some traffic to your site. Don't think that just because it might take you a month longer and you're not seeing results yet that you're just gonna quit. A lot of newbies do that because they haven't seen any results yet within a month, or within a couple of months, and they just think that it doesn't work for them so they quit. But the fact is that you need to be persistent, you need to be consistently promoting it, driving traffic consistently, daily to your website, in order to start seeing some results in the future days or weeks ahead or even in months. For some people it takes shorter, for some people it takes longer, it all comes down to a lot of things, it really depends on a lot of things. For me, it took about 2-3 months to get my first sale, my first online sale

on autopilot to happen. It's different for everyone. You just need to stay persistent in whatever you're doing and you will see that sale happen. Your first sale and your second sale. Just be persistent. Make sure you're doing the things that you need to do in order to see the sales because if you are being not being persistent than don't expect the sales to happen. Another bonus I have for you in starting out with your online journey is to find a MENTOR. Someone who will actually take you step-by-step and who will show you how it's done because someone who has achieved the results that you want to achieve is going to show you exactly what to do to succeed in your online journey. Don't try to figure it out all by yourself because it could take years for you to figure it out on your own. If you try to figure it out on your own, you might get stuck in one place, so you need a mentor, someone who will show you how to get to the next level and how it's done. So persistence is number one to start getting those sales happen & having a mentor is number 2.

Bolder - Carl Honoré 2019-03-05

Carl Honoré captured the zeitgeist with his international bestseller, *In Praise of Slow*. Now he tackles another rising global movement: our revolutionary new approach to a human inevitability--ageing. A revolution in how we age is on its way. Yes, ageing is inevitable: one year from now we will all be a year older; that will never change. What can and will change is how we age--and how we can all take a much bolder approach to doing it with vigour and joy. The time has come to cast off prejudices and to blur the lines of what is possible and permissible at every stage of life. In other words: we need to learn to re-imagine our approach to later life. Emboldening ourselves in older age demands big structural changes. For a start, we will have to tear up the old script that locks us into devoting the early part of our life to education, the middle chunk to working and raising kids, and whatever is left over at the end to leisure. In an age-inappropriate world, these silos will dissolve. We'll embrace the idea that we can carry on learning from start to finish; that we can work less and devote more time to family, leisure, and giving back to our communities in our middle years; and that we can remain active and engaged in our later years. Carl Honoré has travelled the globe speaking to influential figures who are bucking preconceived notions of age, whether at work or in their personal lives. He looks at the cultural, medical, and technological developments that are opening new possibilities for us all. *Bolder* is a radical re-think of our approach to everything from education, healthcare and work, to design, relationships

and politics. An essential and inspiring read for everyone interested in our collective future.
