*A History of the International Movement of Journalists* - Kaarle Nordenstreng 2016-01-26

This study presents a general history of how journalism as an emerging profession became internationally organized over the past one

hundred and twenty years, seen mainly through the associations founded to promote the interests of journalists around the world.

**Writing Democracy** - Karen Gammelgaard  
2014-10-01

The Norwegian Constitution is the oldest functioning constitution in Europe. Its bicentenary in 2014 has inspired the analyses in this volume, where contributors focus on the Constitution as a text to explore new ways of analyzing democratic development. This volume examines the framing of the Norwegian Constitution, its transformations, and its interpretations during the last two centuries. The textual focus enables new understandings of the framers' negotiations and decisions on a democratic micro level and opens new international and historical contexts to understanding the Norwegian Constitution. By synthesizing knowledge from different realms - law, social sciences, and the humanities - Writing Democracy provides a model for examining the distinct textual qualities of constitutional documents.

**Globalization and International Social Work**  
- Malcolm Payne 2016-04-22

Globalization challenges social work with constant social change, making a social worker's job and the task of social work education more complex and uncertain. Post-modern thinking suggests that social workers must learn to cope with complexity in ways that are in tension with the increasingly managerialist organization of the social services. The authors explore and question the concepts of 'postmodern', 'international' and 'global' in light of growing interest in international social work in the early 21st century. Emphasizing the importance of critical reflection, they argue that educational colonization can be challenged and effective anti-discriminatory and pro-equality practice and

education promoted. Each chapter provides direct examples of how students and academics can apply these ideas in practice and in their learning, and how they can respond to and influence the challenges and changes that are taking place. The authors also examine educational and practice issues arising from attempts to incorporate international understanding into national practice and education systems. The book is designed to be stimulating to academics interested in international social work while remaining accessible to practitioners and students without international experience.

The Nordic Model and Physical Culture - Mikkel B. Tin 2019-12-20

This book examines the relationships between the Nordic social democratic welfare system ('The Nordic Model') and physical culture, across the domains of sport, education, and public space. Presenting important new empirical research, it helps us to understand

how the paradoxical blend of social democracy and liberalism in the Nordic countries influences physical culture, which in turn contributes to a quality of life that ranks highest in the world. Drawing on perspectives from sociology, cultural studies, history, education, political science, outdoor studies, and urban studies, the book explores topics such as dance education for sport students, doping in cross-country skiing, outdoor education, the active body, and the ideology of public parks. It includes research material from across the region, including Norway, Sweden, Iceland, Finland, and Denmark. This is fascinating reading for anyone with an interest in physical culture, sport studies, leisure studies, or outdoor studies, as well as sociologists or political scientists with an interest in Nordic politics, culture, and society.

**The Brothers Karamazov** - Fyodor Dostoevsky 2015-01-01

Four brothers reunite in their hometown in Russia. The murder of their father forces the

brothers to question their beliefs about each other, religion, and morality.

*The Importance of Health Informatics in Public Health during a Pandemic* - J. Mantas

2020-07-24

The COVID-19 pandemic has increased the focus on health informatics and healthcare technology for policy makers and healthcare professionals worldwide. This book contains the 110 papers (from 160 submissions) accepted for the 18th annual International Conference on Informatics, Management, and Technology in Healthcare (ICIMTH 2020), held virtually in Athens, Greece, from 3 - 5 July 2020. The conference attracts scientists working in the field of Biomedical and Health Informatics from all continents, and this year it was held as a Virtual Conference, by means of teleconferencing, due to the COVID-19 pandemic and the consequent lockdown in many countries around the world. The call for papers for the conference started in December 2019, when signs of the new virus infection were not

yet evident, so early submissions were on the usual topics as announced. But papers submitted after mid-March were mostly focused on the first results of the pandemic analysis with respect to informatics in different countries and with different perspectives of the spread of the virus and its influence on public health across the world. This book therefore includes papers on the topic of the COVID-19 pandemic in relation to informatics reporting from hospitals and institutions from around the world, including South Korea, Europe, and the USA. The book encompasses the field of biomedical and health informatics in a very broad framework, and the timely inclusion of papers on the current pandemic will make it of particular interest to all those involved in the provision of healthcare everywhere.

**The Regulation of Decommissioning, Abandonment and Reuse Initiatives in the Oil and Gas Industry** - André Pereira da Fonseca, 2020-08-10

In the process of resolving disputes, it is not uncommon for parties to justify actions otherwise in breach of their obligations by invoking the need to protect some aspect of the elusive concept of public order. Until this thoroughly researched book, the criteria and factors against which international dispute bodies assess such claims have remained unclear. Now, by providing an in-depth comparative analysis of relevant jurisprudence under four distinct international dispute resolution systems – trade, investment, human rights and international commercial arbitration – the author of this invaluable book identifies common core benchmarks for the application of the public order exception. To achieve the broadest possible scope for her analysis, the author examines the public order exception’s function, role and application within the following international dispute resolution systems: relevant World Trade Organization (WTO) agreements as enforced by the

organization’s Dispute Settlement Body and Appellate Body; international investment agreements as enforced by competent Arbitral Tribunals and Annulment Committees under the International Center for Settlement of Investment Disputes; provisions under the Inter-American Convention of Human Rights and the European Convention of Human Rights as enforced by the Inter-American Court of Human Rights and the European Court of Human Rights, respectively; and the New York Convention as enforced by national tribunals across the world. Controversies, tensions and pitfalls inherent in invoking the public order exception are elucidated, along with clear guidelines on how arguments may be crafted in order to enhance prospects of success. Throughout, tables and graphs systematize key aspects of the relevant jurisprudence under each of the dispute resolution systems analysed. As an immediate practical resource for lawyers on any side of a dispute who wish to invoke or

strengthen a public order exception claim, the book's systematic analysis will be welcomed by lawyers active in WTO disputes, international investment arbitration, human rights law or enforcement of foreign arbitral awards. Academics and policymakers will find a signal contribution to the ongoing debate on the existence, legal basis, content and functions of the transnational public order.

*Mesozoic Resource Potential in the Southern Permian Basin* - B. Kilhams 2018-08-31

The Southern Permian Basin, as its name suggests, is a historical heartland for hydrocarbon production from the Palaeozoic Rotliegend interval. However, in this mature basin the Mesozoic presents further possibilities to offer resource security to NW Europe. Such opportunities include increasing efficiency in the production of discovered hydrocarbons, exploration for further hydrocarbons (both conventional and unconventional) and efficient exploration for, and production of, geothermal

energy. All these potential resources require a grounding in technically sound geoscience, via traditional scientific observation and the application of new technologies, to unlock their value. The main aim of this volume is to bring together the work of academics and industry workers to consider cross-border geoscience including contributions on Poland, Germany, The Netherlands, the United Kingdom and adjacent areas. The work presented intends to contribute to the development and discovery of further Mesozoic energy resources across the basin.

*Comparative Renewables Policy* - Elin Lerum Boasson 2020-10-29

Challenging one-eyed technology-focused accounts of renewables policy, this book provides a ground-breaking, deep-diving and genre-crossing longitudinal study of policy development. The book develops a multi-field explanatory approach, capturing inter-relationships between actors often analyzed in isolation. It provides empirically rich and

systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries. While France, Germany, Poland and the United Kingdom opted for 'technology-specific' renewables support mixes, Norway and Sweden embarked on 'technology-neutral' support mixes. Differences between the two groups result from variations in domestic political and organizational fields, but developments over time in the European environment also spurred variation. These findings challenge more simplistic and static accounts of Europeanization. This volume will be of key interest to scholars and students of energy transitions, comparative climate politics, policy theory, Europeanization, European integration and comparative European politics more broadly, as well practitioners with an interest in renewable energy and climate transition. [London, Europe and the Olympic Games](#) - Thierry Terret 2015-10-14

London hosted the Olympic Games for the third time in 2012, a mega-event where the political, economic and social expectations could hardly be compared with the previous London Games of 1908 and 1948. In addition, the Olympic Games went back to Europe in 2012 after a long period where (apart from Athens in 2004) they were held by cities in other continents. In London, the world watched the Games. Continental Europe, however, generated a particular attitude based on the special relations it had developed historically with England. At the crossing point of history, cultural studies and geopolitics, this book provides new insights on the significance of the Olympic Games. It considers that the Games are the right window to look at both the past and the current relations between England and its

closest continental neighbours. It will be ideal for students and academics working in sport sciences, cultural history, political science and European studies; amateur and professional sports historians; Olympic followers and experts in Olympic studies. This book was published as a special issue of the International Journal of the History of Sport.

**Institutional Ethnography in the Nordic Region** - Rebecca W. B. Lund 2019-11-26

Developed in response to the theoretically driven mainstream sociology, institutional ethnography starts from people's everyday experiences, and works from there to discover how the social is organized. Starting from experience is a central step in challenging taken-for-granted assumptions and relations of power, whilst responding critically to the neoliberal cost-benefit ideology that has come to permeate welfare institutions and the research sector. This book explicates the Nordic response to institutional ethnography, showing how it has

been adapted and interpreted within the theoretical and methodological landscape of social scientific research in the region, as well as the institutional particularities of the Nordic welfare state. Addressing the main topics of concern in the Nordic context, together with the way in which research is undertaken, the authors show how institutional ethnography is combined with different theories and methodologies in order to address particular problematics, as well as examining its standing in relation to contemporary research policy and university reforms. With both theoretical and empirical chapters, this book will appeal to scholars and students of sociology, professional studies and anthropology with interests in research methods and the Nordic region.

**Fred er ei det beste. Fra innsiden av den norske ammunisjonsindustrien** - Dag Hoel 2017-11-06

Ammunisjon fra Raufoss brukes over hele verden. Den anvendes til å «ta ut mål», eller

drepe fienden, som det het før. Verdens mest presise ammunisjon er produsert av godlynte totninger. Det er politisk enighet i Norge om at våpenindustrien er et fornuftig satsingsområde. Den genererer gode inntekter. Våre våpen fremmer fred. Hvor kommer den forestillingen fra? Dag Hoel vokste opp på Raufoss. Som ungdom spurte han, «Hvordan kan vi tro på arbeid for fred, når vi lever av krig?» Det var et uforskammet spørsmål, fulgt av rungende stillhet. Snart førti år senere svarer han selv med denne boka. Fred er ei det beste er en kjærlig innsidefortelling om hvordan vi usynliggjør at vi er krigsprofitører. Dag Hoel (f. 1962) er filmprodusent. Han har bakgrunn som fotograf og har særlig jobbet med fattigdomsspørsmål og flyktninger i utviklingsland. Han har også arbeidet med menneskerettigheter i Mellom-Amerika og med utfordringer knyttet til brytninger mellom ulike kulturer.

[English in Nordic Universities](#) - Anna Kristina

Hultgren 2014-10-15

This volume brings together theoretical perspectives and empirical studies on the ongoing Englishization of Nordic universities. A core objective is to contrast and address the gap between ideological representations of this phenomenon and the ways in which it unfolds in the practices on the ground. The book provides perspectives from five Nordic countries: Iceland, Norway, Denmark, Sweden and Finland, with one chapter from each country focusing on ideologies and another on practices. The book is intended to provide an up-to-date resource on the internationalization and Englishization of Nordic universities for scholars, policy makers and anyone wishing to gain an overview of current issues in the field.

**The Mutual Construction of Statistics and Society** - Ann Rudinow Saetnan 2010-09-13

Statistics are often seen as simple, straightforward, and objective descriptions of society. However, what we choose to count,

what we choose not to count, who does the counting, and the categories and values we choose to apply when counting, matter. This volume addresses the ways in which statistics and numbers are gathered and applied in social science research. The contributors argue that we must become more aware of the power and the limitations of statistics. Learning statistics needs to be about more than simply mastering the techniques of using the tool; it needs to also be about learning the dangers of that tool and learning to control it within social and ethical bounds. These dangers lie in the routines through which statistics are applied; the discourses from which they emerge and into which they are deployed; the power relations created by those discourses; and the assumptions, meanings, and categories statistics carry with them in those discourses. This volume will be necessary reading for students and scholars using quantitative data within the social sciences.

*The European Handbook of Media*

*Accountability* - Tobias Eberwein 2017-11-08

In recent years, the Leveson Inquiry in Great Britain, as well as the EU High-Level Group on Media Freedom and Pluralism, have stirred heated debates about media accountability and media self-regulation across Europe. How responsible are journalists? How well-developed are infrastructures of media self-regulation in the different European countries? How much commitment to media accountability is there in the media industry – and how actively do media users become involved in the process of media criticism via social media? With contributions from leading scholars in the field of journalism and mass communication, this handbook brings together reports on the status quo of media accountability in all EU members states as well as key countries close to Europe, such as Turkey and Israel. Each chapter provides an up-to-date overview of media accountability structures as well as a synopsis of relevant research, exploring

the role of media accountability instruments in each national setting, including both media self-regulation (such as codes of ethics, press councils, ombudspersons) and new instruments that involve audiences and stakeholder groups (such as media blogs and user comment systems). A theoretically informed, cross-national comparative analysis of the state of media accountability in contemporary Europe, this handbook constitutes an invaluable basis for further research and policy-making and will appeal to students and scholars of media studies and journalism, as well as policy-makers and practitioners.

Varieties of Capitalism - Peter A. Hall 2001  
Applying the new economics of organisation and relational theories of the firm to the problem of understanding cross-national variation in the political economy, this volume elaborates a new understanding of the institutional differences that characterise the 'varieties of capitalism' worldwide.

Routledge Handbook of Arctic Security - Gunhild Hoogensen Gjørsv 2020-01-09

The Routledge Handbook of Arctic Security offers a comprehensive examination of security in the region, encompassing both state-based and militarized notions of security, as well as broader security perspectives reflecting debates about changes in climate, environment, economies, and societies. Since the turn of the century, the Arctic has increasingly been in the global spotlight, resulting in the often invoked idea of "Arctic exceptionalism" being questioned. At the same time, the unconventional political power which the Arctic's Indigenous peoples hold calls into question conventional ideas about geopolitics and security. This handbook examines security in this region, revealing contestations and complementarities between narrower, state-based and/or militarized notions of security and broader security perspectives reflecting concerns and debates about changes in climate,

environment, economies, and societies. The volume is split into five thematic parts: • Theorizing Arctic Security • The Arctic Powers • Security in the Arctic through Governance • Non-Arctic States, Regional and International Organizations • People, States, and Security. This book will be of great interest to students of Arctic politics, global governance, geography, security studies, and International Relations.

**Ritual Landscapes and Borders within Rock Art Research** - Heidrun Stebergløkken

2015-10-31

Ritual landscapes and borders are recurring themes running through Professor Kalle Sognnes' long research career. This anthology contains 13 articles written by colleagues from his broad network in appreciation of his many contributions to the field of rock art research.

**Mitt klimaregnskap** - Anja Bakken Riise

2021-09-13

Det er mulig å leve bærekraftig. Men hva skal til? Kan du spise kjøtt, handle nye klær eller fly

til Syden? En gjennomsnittlig nordmann slipper ut 11 tonn CO<sub>2</sub> i året. For å nå klimamålene i Parisavtalen må hver og en av oss slippe ut mindre enn 2,5 tonn CO<sub>2</sub> innen 2030. Hvordan klarer vi det? Anja Bakken Riise ville finne ut hva det vil si å leve miljøvennlig, og ga seg selv et klimabudsjett. I et halvt år førte hun regnskap over hva hun spiste, hva hun handlet og hvor mye hun reiste - og regnet om alt til CO<sub>2</sub>-utslipp. Hennes erfaringer er både inspirerende og tankevekkende. I boka får du vite de viktigste tingene du selv kan gjøre for å leve miljøvennlig, og hvordan vi må endre politikken som skaper overforbruk og klimakrise. Anja Bakken Riise (f. 1987) er leder for Framtiden i våre hender. Hun har studert utviklingsstudier, vært leder av Studentenes og Akademikernes Internasjonale Hjelpfond, og byrådssekretær for miljø og samferdsel i Oslo. Mitt klimaregnskap er hennes første bok.

**Library and Information Studies for Arctic Social Sciences and Humanities** - Spencer

Acadia 2020-11-26

Library and Information Studies for Arctic Social Sciences and Humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues, trends, and projects in library, archival, and information sciences within shared Arctic frameworks and geographies. Including contributions from professionals and academics working across and on the Arctic, the book presents recent research, theoretical inquiry, and applied professional endeavours at academic and public libraries, as well as archives, museums, government institutions, and other organisations. Focusing on efforts that further Arctic knowledge and research, papers present local, regional, and institutional case studies to conceptually and empirically describe real-life research in which the authors are engaged. Topics covered include the complexities of developing and managing multilingual resources; working in

geographically isolated areas; curating combinations of local, regional, national, and international content collections; and understanding historical and contemporary colonial-industrial influences in indigenous knowledge. Library and Information Studies for Arctic Social Sciences and Humanities will be essential reading for academics, researchers, and students working the fields of library, archival, and information or data science, as well as those working in the humanities and social sciences more generally. It should also be of great interest to librarians, archivists, curators, and information or data professionals around the globe.

**Minerals Yearbook** - Geological Survey  
2019-01-31

This volume, covering metals and minerals, contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals

**Handbook for Online Learning Contexts: Digital, Mobile and Open** - Ann Marcus-Quinn  
2021-05-29

This book addresses the gap in the literature concerned with global case studies of successful Digital, Mobile and Open Education. The book shares experiences from international teaching and learning projects at all levels of Education, and provides advice for future policy and investment in digital teaching and learning and Open Education projects. It also provides an expectation on the future capacity and sustainability of Open Education.

**WHO Guidelines for Indoor Air Quality** - World Health Organization 2010

This book presents WHO guidelines for the protection of public health from risks due to a number of chemicals commonly present in indoor air. The substances considered in this review, i.e. benzene, carbon monoxide, formaldehyde, naphthalene, nitrogen dioxide,

polycyclic aromatic hydrocarbons (especially benzo[a]pyrene), radon, trichloroethylene and tetrachloroethylene, have indoor sources, are known in respect of their hazardousness to health and are often found indoors in concentrations of health concern. The guidelines are targeted at public health professionals involved in preventing health risks of environmental exposures, as well as specialists and authorities involved in the design and use of buildings, indoor materials and products. They provide a scientific basis for legally enforceable standards.

Engineering Ethics - W. Richard Bowen  
2014-03-15

Engineering Ethics: Challenges and Opportunities aims to set a new agenda for the engineering profession by developing a key challenge: can the great technical innovation of engineering be matched by a corresponding innovation in the acceptance and expression of ethical responsibility? Central features of this

stimulating text include: · An analysis of engineering as a technical and ethical practice providing great opportunities for promoting the wellbeing and agency of individuals and communities. · Elucidation of the ethical opportunities of engineering in three key areas: Engineering for Peace, emphasising practical amelioration of the root causes of conflict rather than military solutions. Engineering for Health, focusing on close collaboration with healthcare professionals for both the promotion and restoration of health. Engineering for Development, providing effective solutions for the reduction of extreme poverty. · Innovative strategies for implementing these ethical opportunities are described: Emphasis on the personal responsibility of every engineer and on the benefits of supporting social structures. Use of language and concepts that are appealing to business managers and political decision makers. · Future prospects for increasing the acceptance and expression of ethical

responsibility by engineers are envisaged. · Engineering Ethics: Challenges and Opportunities provides engineers, decision makers and the wider public with new understanding of the potential of engineering for the promotion of human flourishing.

**Questioning Experts and Expertise** - Maria Baghramian 2022-09-29

The role of experts and their expertise, in our personal and social lives, has taken centre stage in the debates about our post-COVID 19 world. Scientific disinformation is rife, and expertise is badly needed to tackle highly complex social problems. This book brings together philosophers, sociologist and policy experts to discuss the nature, scope and limitations of expert advice in policy decisions. The chapters collected here address some of the most fundamental questions in the debate on the role of experts. They explore, among others, the definitions of expertise, the role of experts in modern democracies, the dilemma of choosing

between equally competent and qualified experts who cannot agree, the objectivity of expert judgements, the relationship between experts and novices in polarised social settings, and the conditions on the trustworthiness of experts. These explorations, by some of the best-known academics working in the field, highlight the complexities of the questions they address but also lay down a road map for addressing them. The chapters in this book were originally published in *Social Epistemology: A Journal of Knowledge, Culture and Policy*.

**Norsk på 1-2-3** - Elisabeth Ellingsen 2017

[Debunking Utopia](#) - Nima Sanandaji 2021-02-23  
Left-leaning academics, liberal pop stars such as Bruce Springsteen, and Democrat politicians from Bernie Sanders to Bill and Hillary Clinton to Barack Obama all have one thing in common: they are avid admirers of Nordic-style social democracy. The reason is simple. At first glance, Nordic countries seem to have everything

liberals want to see in America: equal income distribution, good health, low levels of poverty, and thriving economies, all co-existing with big welfare states. By copying Nordic policies, many in the American left hope to transform America to a similar socialist "utopia." In *Debunking Utopia*, Swedish author Nima Sanandaji explains why this is all wishful thinking. Certainly, some aspects of Nordic welfare states, such as childcare provision, merit the admiration of liberals. But overall, it is a unique culture based on hard work, healthy diets, social cohesion and high levels of trust that have made Nordic countries successful. Sanandaji explains how the Nordic people adopted this culture of success in order to survive in the unforgiving Scandinavian climate. He systematically proves that the high levels of income equality, high lifespans and other signs of social success in the Nordics all predate the expansion of the welfare state. If anything, the Nordic countries reached their peak during the mid-twentieth century, when

they had low taxes and small welfare states. Perhaps most astonishing are his findings that Nordic-Americans consistently outperform their cousins who live across the ocean. People of Nordic descent who live under the American capitalist system not only enjoy higher levels of income, but also a lower level of poverty than the citizens of the Nordic countries themselves. Sanandaji's previous writings on the roots of Nordic success have gained media attention around the world and been translated into many languages. *Debunking Utopia*, which expands on this work, should be read by all—liberals and conservatives alike—who follow the debate over the future of American welfare. As Sanandaji shows, there is much Americans can learn from both the successes and failures of Nordic-style social democracy.

### **Managing Resource Abundance and Wealth**

- Jonathon Wayne Moses 2017

Describes how Norway has successfully managed its petroleum resources and the variety

of policy tools that are available to states rich in natural resources, and how these tools can be adjusted to changing (domestic and international) contexts.

**Partnerships in Education** - Kathrin Otrrel-Cass 2022-05-30

This book contains a series of unique international contributions that explore risk in partnerships involving education. Presenting a range of theoretical, methodological and practical perspectives, the book discusses aspects such as the role of motivation, leadership, process and context in such partnerships and provides examples of research methods for examining them. It illuminates the different histories and disciplinary backgrounds of partners, showing that risk can reside in the different expectations, understandings and interpretations that each partner brings to educational partnerships. The eighteen chapters discuss critical examinations of educational partnerships from very different perspectives,

including formal learning institutions and community partners, and include the voices from children, students, teachers and policy makers. The book provides insights for everyone who is considering the challenges that can arise in partnerships and will be useful for researchers at different levels and those who are planning to forge new partnerships or think about what may present itself to be a challenge, and how to address and overcome such challenges.

**Arctic Governance: Volume 3** - Geir Hønneland 2019-12-04

The Polar North is known to be home to large gas and oil reserves and its position holds significant trading and military advantages, yet the maritime boundaries of the region remain ill-defined. In the twenty-first century the Arctic is undergoing profound change. As the sea ice melts, a result of accelerating climate change, global governance has become vital. In this, the third of three volumes, the latest research and analysis from the world's leading Arctic research

body - the Fridtjof Nansen Institute - is brought together for the first time. Arctic Governance: Norway, Russia and Asia investigates the foreign policy discourses of Arctic governance, specifically as regarding international relations and competing interests between Norway, Russia and various Asian states.

Biomedical Engineering Systems and Technologies - Ana Fred 2008-11-27

This book contains the best papers of the First International Joint Conference on Biomedical Engineering Systems and Technologies (BIOSTEC 2008), organized by the Institute for Systems and Technologies of Information Control and Communication (INSTICC), technically co-sponsored by the IEEE Engineering in Medicine and Biology Society (EMBS), ACM SIGART and the Workflow Management Coalition (WfMC), in cooperation with AAMI. The purpose of the International Joint Conference on Biomedical Engineering Systems and Technologies is to bring together

researchers and practitioners, including engineers, biologists, health professionals and informatics/computer scientists, interested in both theoretical advances and applications of information systems, artificial intelligence, signal processing, electronics and other engineering tools in knowledge areas related to biology and medicine. BIOSTEC is composed of three co-located conferences; each specializes in one of the aforementioned main knowledge areas, namely: • BIODEVICES (International Conference on Biomedical Electronics and - vices) focuses on aspects related to electronics and mechanical engineering, - pecially equipment and materials inspired from biological systems and/or - dressing biological requirements. Monitoring devices, instrumentation sensors and systems, biorobotics, micro-nanotechnologies and biomaterials are some of the technologies addressed at this conference.

## **National Pathways to Low Carbon Emission Economies** - Kurt Hübner 2018-08-22

The science is clear: climate change is a fact and the probability is extremely high that it has been caused by humans. At the same time, policy responses are hesitant, rather lukewarm and differ substantially between nation-states. The question is, what drives and what blocks radical action? This book makes the case that institutional settings, path dependence and emerging change coalitions are critical in explaining climate policies across the global political economy. Technological and social-political innovations are key drivers for dealing with climate change. This class of innovation is very much guided, or suppressed, by a national economy's established institutional settings. By anchoring national case studies in a version of the well established 'varieties of capitalism' approach, the chapters of this book show why some economies are policy leaders and others become policy followers, or even policy

interlockers. Moreover, the case studies demonstrate the extent to which external events and institutional constraints from the international polity influence national innovation strategies. Taking a unique analytical approach, which combines insights from innovation policies and a variety of capitalism literature, the authors provide genuine comprehension of the interplay between institutional settings, political actors and climate policies. National Pathways to Low Carbon Emission Economies offers a valuable examination of these issues on climate change that will be of interest to academics and postgraduates researching climate policy, economic policy and social movements. Furthermore, it is relevant for policy analysts and policy makers who are interested in learning from climate policies in the context of innovation strategies for a range of countries.

**The Routledge International Handbook of the Place of Religion in Early Childhood Education and Care** - Arniika Kuusisto  
2022-05-30

Understanding the place of religion in Early Childhood Education and Care is of critical importance for the development of cultural literacy and plays a key role in societal coherence and inclusion. This international handbook provides a comprehensive overview of the place of religion in the societal educational arenas of the very youngest children across the globe. Drawing together contributions from leading international experts across disciplinary backgrounds, it offers a critical view of how to approach the complexities around the place of religion in Early Childhood Education and Care. Through its four parts, the book examines the theoretical, methodological, policy and practice perspectives and explores the complex intersections of transmission of "cultural heritage" and "national values" with the diverse,

changing societal contexts. Each chapter contributes to an increased understanding of how the place of religion in Early Childhood Education and Care can be understood across continents, countries and educational systems. The Routledge International Handbook of the Place of Religion in Early Childhood Education and Care is an essential resource for academics, researchers, students and practitioners working in Early Childhood Education, Sociology of Childhood, Religious Education and other related fields

*Radicalisation, Extremism and Social Work*

*Practice* - Lena Robinson 2022-03-31

*Radicalisation, Extremism and Social Work Practice* is the first book to explore cultural identity, acculturation and perceived discrimination of Muslim youth across Western countries in relation to social work, as well as the radicalisation and extremist views and actions of a small number of Muslim youth. It draws on relevant theoretical frameworks and

research to examine the different approaches taken in social work practice. Some countries consider multi-agency approaches, particularly how public health practice can inform interventions and strategies. Others take a public health approach, looking for risk factors and seeking protective factors to develop suitable interventions within the communities through public engagement and partnership. As well as examining and discussing the above approaches, this book critically examines government and community-based approaches to radicalisation and extremism, and strategies for combating these. This volume will be a valuable resource for social work students, including other disciplines such as psychology, public health, psychiatry, sociology, political science and community development. It will also be of interest to policy makers, practitioners and researchers.

**Platform work in the Nordic models: Issues, cases and responses** - Jesnes, Kristin

2020-05-24

Online publication:

<https://pub.norden.org/temanord2020-513/>

Abstract [en] This report explores how the platform economy is evolving in the Nordic countries and how its evolution is influenced by the Nordic labour market models and vice-versa. Here, we include all the Nordic countries (Denmark, Finland, Norway and Sweden), except Iceland, where platform work is still very marginal. While remaining a marginal phenomenon in the Nordic countries, platform work can be seen as one important case in which many key aspects of the changing world of work coalesce. This report on platform work in the Nordic countries thus connects some of the themes explored in the other pillars of the NFoW project, such as digitalization, new forms of employment and the legal and regulatory challenges currently faced by the social partners, governments and Nordic labour market models.

*Fashion Crimes* - Joanne Turney 2019-07-25

Fashion is widely recognised as a site for social acceptance and rejection, and as a signifier of personal identity. What happens when people stray from 'appropriate' dress codes or associate garments with 'respectability' or deviance? How does fashion relate to criminality? In this interdisciplinary volume, leading scholars propose new ways of seeing everyday dress and the body in public space. Garments and individual or group wearers are used as case studies to explore the codification of clothing as criminal – hoodies, trench-coats, Norwegian Lustkoffe sweaters, low-slung trousers and Hip Hop styling are all untangled as garments with criminal significance. The book questions the point at which morality as a form of social control meets criminality, and suggests ways to renegotiate established dress codes and terms such as 'suitability' and 'glamour' through the study of what people wear in response to notions of criminality.

*1-2-3 Magic for Christian Parents* - Thomas Phelan 2011-10-01

Based on the bestselling parenting book 1-2-3 Magic and adapted for a Christian lifestyle! "1-2-3 Magic made parenting fun again." "I highly recommend this book to any parent who is spending more time yelling at or nagging their children than smiling at and laughing with them." "All I have to say is that the ideas in this book really WORK! It really is like magic!" "It's such a relief to not feel like I'm constantly yelling at someone! If you want to see a fast improvement in your child's behavior, check out 1-2-3 Magic." Complete with relevant Bible verses, explanations, and exercises, this guide builds on the enormously popular 1-2-3 Magic discipline system by addressing the concerns of a Christian parent. Dr. Thomas W. Phelan and pastor Chris Webb teach parents to take charge while refraining from any physical discipline or yelling, leading to better behaved children, happier parents, and a more peaceful home

environment. 1-2-3 Magic allows you to get back in charge of your home and enjoy your kids again by helping you set limits for your children, and by breaking down the complex task of parenting into three straightforward steps: 1. Controlling Obnoxious Behavior: Learn an amazingly simple technique to get the kids to STOP doing what you don't want them to do (whining, arguing, tantrums, sibling rivalry, etc.) 2. Encouraging Good Behavior: Learn several effective methods to get your kids to START doing what you want them to do (picking up, eating, going to bed--and staying there!, chores, etc.) 3. Strengthening Your Relationships: Learn powerful techniques that reinforce the bond between you and your children. You'll find tools to use in virtually every situation, including advice for common problems such as: • Whining • Sibling rivalry • Reluctance to do chores • Refusing to go to bed or getting up in the middle of the night • Talking back • Stubbornness For years, millions of parents from all over the world

have used the award-winning 1-2-3 Magic

program to help them raise happier, healthier families and put the fun back into parenting.
