**Rogue Economics** - Loretta Napoleoni  
2011-01-04

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-

farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like World of Warcraft spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

Knowledge and the Study of Education - Geoff Whitty 2017-05-08

In the English-speaking world, university Schools of Education are usually heavily involved in the professional preparation of teachers. Yet, in England and the USA in particular, the role of universities in teacher

education has increasingly seemed under threat as alternative providers of training have come on the scene, often with the overt encouragement of governments. This book, which is based on a project that explored how the study of Education is configured in different countries, makes visible the different knowledge traditions that inform university teaching and research in Education around the world. The extent to which these are related to the training of teachers is shown to vary historically and comparatively. The book consists of a substantial introduction by the editors, which identifies 12 major knowledge traditions in the study of education, and classifies these as Academic Knowledge Traditions (such as Sciences de l'Éducation), Practical Knowledge Traditions (like that practised in Normal Colleges) and Integrated Knowledge Traditions (including the currently fashionable concept of Research-informed Clinical Practice). This introduction is followed by contributions on the nature of Education as a

field of study in six countries - Australia, China, France, Germany, Latvia and the USA - authored by established experts from each of those jurisdictions. There are also chapters that provide useful conceptual frameworks for understanding the dimensions on which the various traditions in the study of Education differ, as well as those that compare the nature of Education along specific dimensions in different countries. The book concludes with a discussion, in the light of these contributions, of future prospects for the field of Education. The book will appeal to students, teachers and researchers in Education and is intended to encourage less parochial thinking about the nature of Education as a field of international study.

**Death and western thought** - Jacques Choron  
1973

Alone in the World? - Van Huyssteen 2006-04-12  
In Alone in the World? J. Wentzel van Huyssteen develops further his earlier proposal for interdisciplinary dialogue set out in The Shaping of Rationality, and applies this methodology to the uncharted waters between theological anthropology and paleoanthropology. First delivered as the 2004 Gifford Lectures at the University of Edinburgh van Huyssteen here argues that scientific notions of human uniqueness may actually help us to ground theological notions of human distinctiveness in flesh-and-blood, real-life, embodied experiences and protect theological reflection from abstractions when trying to rethink the image of God. Van Huyssteen focuses on the

interdisciplinary problem of human origins and human distinctiveness and finds a unique access point to the origin of the remarkable human mind in the spectacular prehistoric cave paintings of Western Europe. Fifteen of the most important paintings are reproduced in this book, and van Huyssteen explores the theological relevance and deeper religious meaning of a number of them. Connecting two widely separated fields through careful interdisciplinary reflection, Alone in the World? will encourage sustained investigation into the question of human uniqueness.

G. M. Trevelyan - David Cannadine 1992

cultural and intellectual life of Britain in the ages of Asquith, Baldwin and Churchill.

**Global Tax Fairness** - Thomas Pogge  
2016-02-04

This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also

protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

Riddle Child - Annelie Botes 2012-10-03

Alexander is autistic. When he is nine years old he is found dead in a bath of water. The only other person in the house at the time is his mother Ingrid. The circumstances arouse suspicion and the police take Ingrid into custody. Did she murder her child? And who could blame her if she did? She has had nine years of hell with her uncontrollable child, all those she cares about have deserted her, and not even the church has come to her assistance. Her efforts to find help for Alexander have left her bankrupt and she is emotionally and physically depleted. If it were not for Miriam and Gunter, she would surely never have endured the nine years... In this haunting novel Annelie Botes exposes the

tragedy of autism and its devastating effect on families. Searingly honest, it brings home the inescapable truth that society can be cruelly indifferent to whatever it perceives to be aberrant.

**Works on Paper** - Michael Holroyd 2003

Michael Holroyd opens with a startling attack on biography, which is answered by two essays on the ethics and values of non-fiction writing. The book then examines the work of several contemporary biographers, the place of biography in fiction and of fiction in biography, and the revelations of some extravagant autobiographers, from Osbert Sitwell to Quentin Crisp - to which he adds some adventures of his

own, in particular an important and unpublished piece THE MAKING OF GBS, a riveting story of deadly literary warfare. The book ends with a series of satires, celebrations, apologies and polemics which throw light not only on Michael Holroyd's progress as a biographer, but also his record as an embattled campaigner in the field of present-day literary politics.

*Eating the Sun* - Oliver Morton 2009-11-17  
Wherever there is greenery, photosynthesis is working to make oxygen, release energy, and create living matter from the raw material of sunlight, water, and carbon dioxide. Without photosynthesis, there would be an empty world, an empty sky, and a sun that does nothing more than warm the rocks and reflect off the sea. *Eating the Sun* is the story of a world in crisis; an appreciation of the importance of plants; a history of the earth and the feuds and fantasies of warring scientists; a celebration of how the smallest things, enzymes and pigments, influence the largest things, the oceans, the rainforests, and the fossil fuel economy. Oliver

Morton offers a fascinating, lively, profound look at nature's greatest miracle and sounds a much-needed call to arms—illuminating a potential crisis of climatic chaos and explaining how we can change our situation, for better or for worse.

*Comparative Science* - 2015-05-07

Examining various social science phenomena and comparative studies fields allows for a holistic approach to understanding rather than trying to achieve understanding as a conglomeration of isolated phenomena.
