**The Innovator's DNA** - Jeff Dyer 2011-07-12

A new classic, cited by leaders and media around the globe as a highly recommended read for anyone interested in innovation. In *The Innovator's DNA*, authors Jeffrey Dyer, Hal Gregersen, and bestselling author Clayton Christensen (*The Innovator's Dilemma*, *The Innovator's Solution*, *How Will You Measure Your Life?*) build on what we know about disruptive innovation to show how individuals can develop the skills necessary to move progressively from idea to impact. By identifying behaviors of the world's best innovators—from leaders at Amazon and Apple to those at Google, Skype, and Virgin Group—the authors outline five discovery skills that distinguish innovative entrepreneurs and executives from ordinary managers: Associating, Questioning, Observing, Networking, and Experimenting. Once you master these competencies (the authors provide a self-assessment for rating your own innovator's DNA), the authors explain how to generate ideas, collaborate to implement them, and build innovation skills throughout the organization to result in a competitive edge. This innovation advantage will translate into a premium in your company's stock price—an innovation premium—which is possible only by building the code for innovation right into your organization's people, processes, and guiding philosophies. Practical and provocative, *The Innovator's DNA* is an essential resource for individuals and teams who want to strengthen their innovative prowess.

**How Will You Measure Your Life? (Harvard Business Review Classics)** - Clayton M. Christensen 2017-01-17

In the spring of 2010, Harvard Business School's graduating class asked HBS professor Clay Christensen to address them—but not on how to apply his principles and thinking to their post-HBS careers. The students wanted to know how to apply his wisdom to their personal lives. He shared with them a set of guidelines that have helped him find meaning in his own life, which led to this now-classic article. Although Christensen's thinking is rooted in his deep religious faith, these are strategies anyone can use. Since 1922, Harvard Business Review has been a leading source of breakthrough ideas in management practice. The Harvard Business Review Classics series now offers you the opportunity to make these seminal pieces a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world.

**How to Die** - Seneca 2018-02-27

Timeless wisdom on death and dying from the celebrated Stoic philosopher Seneca "It takes an entire lifetime to learn how to die," wrote the Roman Stoic philosopher Seneca (c. 4 BC–65 AD). He counseled readers to "study death always," and took his own advice, returning to the subject again and again in all his writings, yet he never treated it in a complete work. How to Die gathers in one volume, for the first time, Seneca's remarkable meditations on death and dying. Edited and translated by James S. Romm, How to Die reveals a provocative thinker and dazzling writer who speaks with a startling frankness about the need to accept death or even, under certain conditions, to seek it out. Seneca believed that life is only a journey toward death and that one must rehearse for death throughout life. Here, he tells us how to practice for death, how to die well, and how to understand the role of a good death in a good life. He stresses the universality of death, its importance as life's final rite of passage, and its ability to liberate us from pain, slavery, or political oppression. Featuring beautifully rendered new translations, How to Die also includes an enlightening introduction, notes, the original Latin texts, and an epilogue presenting Tacitus's description of Seneca's grim suicide.

Leading Transformation - Nathan Furr 2018-10-16

New Tools to Overcome the Human Barriers to Change Leaders know that their job is to transform their organizations to keep pace with technology and an ever-changing business environment. They also know that they are bound to fail in doing so. But this discouraging prospect is not because they won't be able to solve a technological or strategic problem. Leaders will fail because of intractable human responses associated with change--responses such as fear, ingrained habits, politics, incrementalism, and lack of imagination. These stumbling blocks always arise when we humans are faced with change, but what if we had a way to transcend them? This book reveals a radical new method for doing just that. Written by the executive who designed and implemented it, the neuroscientist who helped make it work, and the academic who explains why it works and how to do it, *Leading Transformation* introduces an innovative yet proven process for creating breakthrough change. Divided into three steps--envisioning the possible, breaking down resistance, and prototyping the future--this process uses cutting-edge tools such as science fiction, cartoons, rap music, artifact trails, and neuroprototypes to overcome people's inability to imagine or react to what doesn't yet exist, override powerful habits and routines that prevent them from changing, and create compelling narratives about the organization's future and how to get there. Showing how these tools have been used successfully by companies such as Lowe's, Walmart, Pepsi, IKEA, Google, Microsoft, and others, the process revealed in this book gives leaders the means to transcend the human barriers that block change and lead their organizations confidently into the future.
