Understanding Service Consumers is the first volume in the Winning in Service Markets Series by services marketing expert Jochen Wirtz. Scientifically grounded, accessible and practical, the Winning in Service Markets Series bridges the gap between cutting-edge academic research and industry practitioners, and features best practices and latest trends on services marketing and management from around the world. Services Marketing; Marketing; Consumer Behavior; Positioning Services; Service Process; Service Environment; Service Advantages; Customer Relationships; Managing Relationship and Building Loyalty; Complaint Handling; Service Recovery; Service Excellence; Service Quality and Productivity; Service Leadership Key Features: There are many books on service management in the market, but most are narrowly focused and/or based on anecdotal evidence. Lilien, Distinguished Research Professor of Management Science, Penn State University 'Product and Services Management (PSM) is a welcome, up to date summary of the key issues facing firms in developing and refreshing their portfolios. Delivering Quality Service - Valarie A.

Zeithaml 2010-05-11

Excellence in customer service is the hallmark of success in service industries and among manufacturers of products that require reliable service. But what exactly is excellent service? It is the ability to deliver what you promise, say the authors, but first you must determine what you can promise. Building on seven years of research on service quality, they construct a model that, by balancing a customer's perceptions of the value of a particular service with the customer's need for that service, provides brilliant theoretical insight into customer expectations and service delivery. For example, Florida Power & Light has developed a sophisticated, computer-based lightning tracking system to anticipate where weather-related service interruptions might occur and strategically position crews at these locations to quicken recovery response time. Offering a service that customers expect to be available at all times and that they will miss only when the lights go out, FPL focuses its energies on matching customer perceptions with potential need. Deluxe Corporation, America's highly successful check printer, regularly exceeds its customers'

expectations by shipping nearly 95% of all orders by the day after the orders were received. Deluxe even put U.S. Postal Service stations inside its plants to speed up delivery time. Customer expectations change over time. To anticipate these changes, Metropolitan Life Insurance Company regularly monitors the expectations and perceptions of their customers, using focus group interviews and the authors' 22-item generic SERVQUAL questionnaire, which is customized by adding questions covering specific aspects of service they wish to track. The authors' groundbreaking model, which tracks the five attributes of quality service -- reliability, empathy, assurance, responsiveness, and tangibles -- goes right to the heart of the tendency to overpromise. By comparing customer perceptions with expectations, the model provides marketing managers with a two-part measure of perceived quality that, for the first time, enables them to segment a market into groups with different service expectations.

Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers.
