The Librarian's Facility Management Handbook -

Carmine J. Trotta 2001
New technology and aging buildings are making library facility management more complex and difficult than ever before. Many librarians have inherited buildings that not only need to be retrofitted for today's technology, but also require repair and replacement of basic systems. The handbook was written by a Director and a professional facilities manager to provide the practical advice, techniques, and solutions library managers need to ensure that their facilities can function for their intended purposes. Chapters cover planning and evaluating,

security and safety, lighting, climate control, parking, access, costs and finances, preventive maintenance and repairs, record-keeping, contracts, bidding, specifications, and much more. An extensive glossary of terms provides the language needed to communicate with facilities staff and contractors.

The Complete Project Management Methodology and Toolkit - Gerard M. Hill 2009-10-15

In the past, an organization's technical methodologies were expected to fulfill project management process needs. However, they sometimes fell short of applying what is known today as "professional project management" concepts and practices. Written by one of the nation's most highly regarded project management mentors, *The Complete Project Management Methodology and Toolkit* delineates a "business-relevant" methodology that can be introduced across different industries and business environments. The book describes the ProjectPRISMTM Project Management Methodology, an innovative, matrix-based approach to conducting project management that introduces relevant concepts, practices, and tools in an effective project management solution. Aligned

with common business practices, Gerard Hill's method demonstrates how to develop project plans, keep on schedule, manage budgets, maintain areas of responsibility, and evaluate a project's progress from concept to completion. The text also offers insight for customizing the methodology to meet the unique needs of individual organizations.

Project management has emerged as a professional discipline and is coming into the mainstream just when it appears to be most needed in the business environment. Demonstrating that project management, in many ways, is business management, the author provides an exceptional foundation for creating a fine-tuned project management practice and a relevant business solution for every organization.

Planning Guide for Maintaining School Facilities - Tom Szuba 2003

This title is no longer available in print. However, please visit the NCES website at <http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2003347> to view an electronic version of the text. As America's school buildings age, we face the growing challenge of maintaining the nation's

education facilities at a level that enables our teachers to meet the needs of the 21st century learners. This tool has been developed to help readers better understand why and how to develop, implement, and evaluate a facilities maintenance plan. It focuses on: maintenance as a vital task in the responsible management of an education organization, the needs of an education audience, strategies and procedures for planning, implementing, and evaluating maintenance programs, a process to be followed, rather than a canned set of "one size fits all" solutions, and recommendations based on "best practices", rather than mandates. The document offers recommendations on the following important issues, which serve as chapter headings: Introduction to School Facilities Maintenance Planning Planning for School Facilities Maintenance Facilities Audits (Knowing What You Have) Providing a Safe Environment for Learning Maintaining School Facilities

Facilities Management -

Peter Barrett 2009-02-18

Facilities management has been one of the fastest growing professional disciplines for some years, both in terms of volume and diversity of commercial activity. However, a widely accepted and implemented body of knowledge is still lacking. This book contributes to that knowledge building by taking models and ideas from a wide range of sources and linking them to extensive case study material drawn from practising facilities managers. The text is divided into three parts: ·

Current practice is illustrated, with a second chapter looking at enhancing services · Key facilities management issues are considered: user needs evaluation, outsourcing and computer-based information systems · Extensive advice is provided on managing people through change and on decision making The Second Edition features new material on user needs, briefing and procurement strategy, together with new public sector case

studies. 'This high quality book provides a comprehensive approach to the range of issues [and] the combination of case studies with theoretical perspectives and research has a strong practical emphasis' Chartered Surveyor Monthly 'A thorough and very well researched book...as a student text it is first class'
