BIM for Construction

Health and Safety - Stefan Mordue 2019-08-13

What is BIM and how does it affect the health and safety professional? How are BIM technologies used on a practical level? What opportunities are there for the use of BIM in the health and safety arena? This concise and practical guide aims to answer all these questions and more. The health and safety role is evolving towards collaboration, structured data and sharing of information as BIM - the incarnation of these sensibilities - increasingly underpins construction practice. As the industry begins to see how these two topics can

and should intersect this guide provides context and practical advice by explaining the basic principles of BIM, how it will shape the health and safety professional's role and what tools and processes will need to be embedded in the future. It also highlights the wealth of opportunities that BIM provides to improve health and safety standards and effective coordination - the means to exploit the potential of BIM. *Self Build and Renovation For Dummies* - Nicholas Walliman 2011-02-14

Understanding Housing Defects - Duncan Marshall
2008-09-24

This new edition of Understanding Housing Defects has been extensively revised and includes new and revised graphics, many more photographs, and an extended text. The book is a natural companion to The Construction of Houses (first published in 1990 and now in its 3rd revision). Understanding Housing Defects provides a concise, coherent and comprehensive introduction to the causes, investigation and diagnosis of housing defects. It is aimed at all those students

and practitioners who require a broad understanding of housing defects as part of a wider sphere of academic or professional activity. The book has three specific objectives, to explain why, and how, defects occur. To enable the reader to recognise and identify building defects and to provide, where appropriate, guidance on their correct diagnosis. The authors have worked in both public and private sectors and have, between them over 75 years' experience in dealing with housing and general building defects. Currently, they are all lecturers at the University of the West England, where they teach on a variety of undergraduate and post-graduate courses. They are also actively involved in carrying out research and consultancy for a number of property owning organisations throughout the UK.
