**We Are the Weather** - Jonathan Safran Foer  
2019-09-17

In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in

the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.

*The Warren Buffett Way* - Robert G. Hagstrom

2013-09-13

Warren Buffett is the most famous investor of all time and one of today's most admired business

leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of *The Warren Buffett Way* gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor - just like Buffett Why "loss aversion", the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge

to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

**The Green New Deal** - Jeremy Rifkin  
2019-09-10

An urgent plan to confront climate change, transform the American economy, and create a green post-fossil fuel culture. A new vision for America's future is quickly gaining momentum. Facing a global emergency, a younger generation is spearheading a national conversation around a Green New Deal and setting the agenda for a bold political movement with the potential to revolutionize society. Millennials, the largest voting bloc in the country, are now leading on the issue of climate change. While the Green New Deal has become a lightning rod in the political sphere, there is a parallel movement emerging within the business community that will shake the very foundation of the global economy in coming years. Key sectors of the economy are fast-decoupling from fossil fuels in favor of ever cheaper solar and wind energies and the new business opportunities and employment that accompany them. New studies are sounding the alarm that trillions of dollars in stranded fossil fuel assets could create a carbon

bubble likely to burst by 2028, causing the collapse of the fossil fuel civilization. The marketplace is speaking, and governments will need to adapt if they are to survive and prosper. In *The Green New Deal*, New York Times bestselling author and renowned economic theorist Jeremy Rifkin delivers the political narrative and economic plan for the Green New Deal that we need at this critical moment in history. The concurrence of a stranded fossil fuel assets bubble and a green political vision opens up the possibility of a massive shift to a post-carbon ecological era, in time to prevent a temperature rise that will tip us over the edge into runaway climate change. With twenty-five years of experience implementing Green New Deal-style transitions for both the European Union and the People's Republic of China, Rifkin offers his vision for how to transform the global economy and save life on Earth.

Why wait when even quite small lifestyle changes can make a big difference now? *Green Housekeeping* is full of advice and information to help you take a more sustainable

path. Recycling, reusing and shopping at farmers’ markets are a good start, but cutting down on the use of poisonous chemicals is just as important – it’s perfectly possible to clean a house using nothing more than lemons, bicarbonate of soda, vinegar and plain water. Here old-fashioned methods are complemented by newer ideas and innovations, and applied not only to cleaning but also to caring for clothes, furniture, and even silver and glassware. Growing some of your own vegetables, fruit and herbs can be very satisfying, and you can use any extras to make jams, oils and chutneys using the handy tips and delicious recipes. Make beauty preparations and bath oils, too, for soothing, effective treatments to enhance everyday health and wellbeing. To become eco-friendly doesn’t require self-sacrifice – just some readjustment; and by following the advice in this invaluable guide you will find yourself living a calmer, greener life.

*The Plastics Paradox* - Chris Dearmitt 2020-03

The Plastics Paradox is the first and only book to reveal the truth about plastics and the environment. Based on over 400 scientific articles, it dispels the myths that the public believe today. We are told that plastics are not green when in fact, they are usually the greenest choice according to lifecycle analysis (LCA) We are told that plastics create a waste problem when they are proven to dramatically reduce waste, for example replacing 1lb of plastic requires 3-4lb of the replacement material We are told that plastics take 1000 years to degrade when in fact a plastic bag disintegrates in just

one year outdoors We are led to believe that plastic bags and straws are an issue when in fact they barely register in the statistics The list goes on... Everything you believe now is untrue and we are making policies that harm the environment based on bad information. After reading The Plastics Paradox you will be able to make wise choices that help create a brighter future for us and for our children.

**Eco-famiglie** - elisa artuso 2013-05-24

L'ecologia oggi va di moda: non si fa che parlare di pannolini lavabili, borsette biodegradabili, raccolta differenziata e cibo biologico. A volte sembra persino una cosa da ricchi o per persone che hanno molto tempo. Ma un vero cambiamento che ci permetta di consegnare alle generazioni future un ambiente più salubre e pulito è necessario e improcrastinabile, e può avvenire soprattutto grazie alla costruzione di relazioni virtuose tra famiglie; relazioni che ci aiutino a cambiare gradualmente le nostre abitudini nel segno di un consumo critico e

responsabile, di una mobilità più sostenibile, di un nuovo modo di vedere la pulizia e la cura della persona, di costruire la nostra casa e di gestire il denaro. In questo libro troverete idee e proposte concrete per essere più ecologici senza spendere una follia, per ridurre i consumi, per insegnare ai vostri bambini la sostenibilità e per viverla assieme ad altre famiglie: troverete consigli pratici per organizzare gli acquisti, ricette di autoproduzione, proposte creative per giocare, andare in vacanza, gestire i rifiuti. When Trash Becomes Art - Lea Vergine 2007

The result of painstaking research by Lea Vergine, this volume explores the meaning of the "trash" phenomenon in contemporary art from the early 20th century (Boccioni, Carrà, Depero,

Picabia, Schwitters), through the Sixties and Seventies (Burri, Kounellis, Fontana, Vautier, Rotella, César, Arman, Manzoni, Pistoletto, Beuys, Spoerri), and up to the present (Cragg, Parmiggiani, Boltanski, Sherman, Bourgeois, Serrano, Cattelan). It examines the challenge launched by these artists, who use waste as a material for creating art. In an era marked by great concern about the environment, the artistic use of the discarded object expresses the alienation and distress that appear to be eroding the wantonly consumeristic social model represented by the West. Recovering and preserving refuse is a means of trying to hold on to it, of making it survive by saving it from a void, from being nothing, from the dissolution to which it is destined; it is about the desire to leave a mark, a trace, a clue for those who remain, hence touching a dimension that is psychological as well as political.

**Life Without Plastic** - Jay Sinha 2017-12-12  
After the birth of their son, Jay Sinha and

Chantal Plamondon set out on a journey to eliminate plastic baby bottles as the Canadian government banned BPA. When they found it was difficult to procure glass baby bottles, Jay and Chantal made it their mission to not only find glass and metal replacements for plastic, but to make those products accessible to the public as well. Printed on wood-free FSC (sustainable certified) paper and with BPA-free ink, Life Without Plastic strives to create more awareness on the issue of BPA, polycarbonates and other single-use plastics, and provides readers with safe, reusable and affordable alternatives. While plastic has its uses in technology, medical and some products around the home, certain single-use plastics release chemicals when put in contact with food and water. These disposable plastics are also found in produce and cleaning products. Jay and Chantal show readers how to analyze their personal plastic use, find alternatives and create easy replacements in this step-by-step guide. Get

your family healthier, spread consciousness and create positive reflection on you for helping the environment by taking action.

**Dawn of the Solar Age** - Prem Shankar Jha  
2017-11-20

Our planet is growing hotter, which is mainly due to the burning of fossil fuels. Yet, most of us remain chained to the belief that there is no alternative source of energy sufficiently plentiful and cheap. Dawn of the Solar Age provides a blueprint for shifting the energy base of human civilisation out of fossil fuels and successfully reducing the concentration of greenhouse gases in the atmosphere. The author shows how the commercialisation of fully proven technologies—that can provide limitless amounts of renewable energy and entirely replace all fossil fuels—is being delayed to serve the purposes of dominant corporations and nations.

He studies the economic viability of these technologies and tells us how we can avert the imminent disaster that we face today. He concludes that the transition out of fossil fuels, though difficult, need not be too slow to prevent irreparable damage.
