Atomic and Molecular Processes - D.R. Bates 2016-06-03

Atomic and Molecular Processes focuses on radiative and collisional processes involving atoms or molecules, including photoionization, elastic and inelastic scattering of electrons, energy loss by slow electrons, excitation, ionization, detachment, charge transfer, elastic scattering, and chemical reactions. The selection first offers information on forbidden and allowed transitions, including forbidden transitions in diatomic molecular spectra; forbidden transitions in crystals; calculations of atomic line strengths; and measurements of atomic transition probabilities. The book also ponders on photoionization processes, photodetachment, and high temperature shock waves. The manuscript elaborates on electronic and ionic recombination, elastic scattering of electrons, and the motions of slow electrons in gases. The book also evaluates the theory of excitation and ionization by electron impact; measurement of collisional excitation and ionization cross sections; and spectral line broadening in plasmas. The selection is a dependable reference for readers interested in atomic and molecular processes.

The Sociology of Food - Jean-Pierre Poulain 2017-02-09

A classic text about the social study of food, this is the first English language edition of Jean-Pierre Poulain's seminal work. Tracing the history of food scholarship, *The Sociology of Food* provides an overview of sociological theory and its relevance to the field of food. Divided into two parts, Poulain begins by exploring the continuities and changes in the modern diet. From the effect of globalization on food production and supply, to evolving cultural responses to food - including cooking and eating practices, the management of consumer anxieties, and concerns over obesity and the medicalization of food - the first part examines how changing food practices have shaped and are shaped by wider social trends. The second part provides an overview of the emergence of food as an academic focus for sociologists and anthropologists. Revealing the obstacles that lay in the way of this new field of study, Poulain shows how the discipline was first established and explains its development over the last forty years. Destined to become a key text for students and scholars, *The Sociology of Food* makes a major contribution to food studies and sociology. This edition features a brand new chapter focusing on the development of food studies in the English-speaking world and a preface, specifically written for the edition.

Light of the Northern Dancers - Robin F. Gainey 2017-11-07

Fiery aristocrat, Eden Rose has tended a foundering marriage and failing ranch at the corner of Crazy Woman Creek and the Powder River for a decade. Abandoned by her husband during the height of Wyoming Territory's worst drought in history, Eden depends on her inept brother, Aiden, to see her through the coming winter. But then Aiden disappears.

100 Ways to Simplify Your Life - Joyce Meyer 2008-11-27

Many want a simple life, but find it difficult to actually live that way. They fight a constant battle to balance work, family, friends, and other demands on schedules stretched too thin. Joyce Meyer breaks it down to the simple principle of exercising faith rather than doubt and confidence rather than people-pleasing. She writes from her experience of struggling to balance work, family, friends, and all the other demands on limited time to show readers the simple answer to a simpler life. Joyce gives these and other practical and

easy to implement ideas for finding real joy: · Live to glorify God · Let go of what lies behind · Choose your battles · Don't be afraid of what people think · Trust God to change other people · Live with margin · Don't be so hard on yourself · Stop doing things you don't do well · Remember that God is for you. Joyce reminds readers that the Bible is full of examples of God's provision and His instruction to focus on one day at a time. She encourages readers to set themselves free by realizing they don't have to do, fix, or manage everything. By embracing the fact that God is on their side they will be encouraged that he will help find a way to live a simple life.

Potential Impacts of Climate Change on Tropical Forest Ecosystems - Adam Markham 2013-11-11

Climate change represents one of the most alarming long-term threats to ecosystems the world over. This new collection of papers provides, for the first time, an overview of the potentially serious impact that climate change may have on tropical forests. The authors, a multi-disciplinary group of leading experts in climatology, forestry, ecology and conservation biology, present a state-of-knowledge snapshot of how tropical forests are likely to react to the changes being wrought on our planet's atmosphere and climate. Tropical forests represent extraordinary harbours for biological diversity, and yet as deforestation and degradation continue apace, they are under greater pressure from human impacts than ever before. Climate change adds yet another threat to these valuable ecosystems, and this volume demonstrates just how significant a problem this may really be. The authors identify certain types of forest, including tropical montane cloud forest that may be particularly vulnerable. They also show the strong likelihood of global warming aggravating problems in already fragmented forest areas.
