Leonardo DaVinci advised artists to "Look at walls" for artistic inspiration and to help defeat creativity blocks. "Look at walls splashed with a number of stains, or stones of various mixed colors. If you have to invent some scene, you can see there resemblances to a number of landscapes, adorned with mountains, rivers, rocks, trees, great plains, valleys and hills, in various ways. Also you can see various battles, and lively postures of strange figures, expressions on faces, costumes and an infinite number of things which you can reduce to good integrated form. This happens on such walls and varicolored stones, (which act) like the sound of bells, in whose pealing you may find every name and word you that you can imagine." Use the shapes on the following pages to help unlock your creativity. The shapes become a bit more complex as you progress. Lines, dots, and suggestions of dimensions in the later shapes help open your mind to even more artistic possibilities. These are fun exercises meant to

boost creativity so keep it light and fun! Try to allow your imagination to guide you and don't be critical of the outcome. For even more fun you can add color, collage, or stickers. For best results, we recommend using dry media.

Suitable for artists of any level and age!

In an irresistible invitation to lighten up, look around, and live an unscripted life, a master of the art of improvisation explains how to adopt the attitudes and techniques used by generations of musicians and actors. The Education of Millionaires - Michael Ellsberg 2012-09-25

Some of the smartest, most successful people in the country didn't finish college. None of them learned their most critical skills at an institution of higher education. And like them, most of what you'll need to learn to be successful you'll have to learn on your own, outside of school. Michael Ellsberg set out to fill in the missing pieces by

interviewing a wide range of millionaires and billionaires who don't have college degrees, including fashion magnate Russell Simmons and Facebook founding president Sean Parker. This book is your guide to developing practical success skills in the real world: how to find great mentors, build a world-class network, make your work meaningful (and your meaning work), build the brand of you, and more. Learning these skills is a necessary addition to any education, whether you're a high school dropout or graduate of Harvard Law School.

[The Creative Curve](#) - Allen Gannett 2018-06-12
Big data entrepreneur Allen Gannett overturns the mythology around creative genius, and reveals the science and secrets behind achieving breakout commercial success in any field. We have been spoon-fed the notion that creativity is the province of genius -- of those favored, brilliant few whose moments of insight arrive in unpredictable flashes of divine inspiration. And if we are not a genius, we might as well pack it

in and give up. Either we have that gift, or we don't. But Allen shows that simply isn't true. Recent research has shown that there is a predictable science behind achieving commercial success in any creative endeavor, from writing a popular novel to starting up a successful company to creating an effective marketing campaign. As the world's most creative people have discovered, we are enticed by the novel and the familiar. By understanding the mechanics of what Gannett calls "the creative curve" - the point of optimal tension between the novel and the familiar - everyone can better engineer mainstream success. In a thoroughly entertaining book that describes the stories and insights of everyone from the Broadway team behind Dear Evan Hansen, to the founder of Reddit, from the Chief Content Officer of Netflix to Michelin star chefs, Gannett reveals the four laws of creative success and identifies the common patterns behind their achievement.

Show Your Work! - Austin Kleon 2014-03-06
In his New York Times bestseller *Steal Like an Artist*, Austin Kleon showed readers how to

unlock their creativity by “stealing” from the community of other movers and shakers. Now, in an even more forward-thinking and necessary book, he shows how to take that critical next step on a creative journey—getting known. Show Your Work! is about why generosity trumps genius. It’s about getting findable, about using the network instead of wasting time “networking.” It’s not self-promotion, it’s self-discovery—let others into your process, then let them steal from you. Filled with illustrations, quotes, stories, and examples, Show Your Work! offers ten transformative rules for being open, generous, brave, productive. In chapters such as You Don’t Have to Be a Genius; Share Something Small Every Day; and Stick Around, Kleon creates a user’s manual for embracing the communal nature of creativity— what he calls the “ecology of talent.” From broader life lessons about work (you can’t find your voice if you don’t use it) to the etiquette of sharing—and the dangers of oversharing—to the practicalities of

Internet life (build a good domain name; give credit when credit is due), it’s an inspiring manifesto for succeeding as any kind of artist or entrepreneur in the digital age.

Mind to Matter - Dawson Church 2019-08-06
Best Health Book of 2018 - American Book Fest.
Best Science Books of 2018 - Bookbub. Every creation begins as a thought, from a symphony to a marriage to an ice cream cone to a rocket launch. When we have an intention, a complex chain of events begins in our brains. Thoughts travel as electrical impulses along neural pathways. When neurons fire together they wire together, creating electromagnetic fields. These fields are invisible energy, yet they influence the molecules of matter around us the way a magnet organizes iron filings. In *Mind to Matter*, award-winning researcher Dawson Church explains the

science showing how our minds create matter. Different intentions produce different fields and different material creations. The thoughts and energy fields we cultivate in our minds condition the atoms and molecules around us. We can now trace the science behind each link in chain from thought to thing, showing the surprising ways in which our intentions create the material world. The science in the book is illustrated by many authentic case histories of people who harnessed the extraordinary power of the mind to create. They include: Adeline, whose Stage 4 cancer disappeared after she imagined "healing stars" Raymond Aaron and two of his clients, each of whom manifested \$1 million in the same week Elon Musk, who bounced back from devastating tragedy to found Tesla and SpaceX Graham Phillips, who grew the emotional regulation part of his brain by 22.8% in two months Jennifer Graf, whose grandfather's long-dead radio came to life to play love songs the day of her wedding Harold, whose 80% hearing loss reversed in an

hour Joe Marana, whose deceased sister comforted him from beyond the grave Rick Geggie, whose clogged arteries cleared up the night before cardiac surgery Matthias Rust, a teen whose "airplane flight for peace" changed the fate of superpowers Wanda Burch, whose dream about cancer told the surgeon exactly where to look for it An MIT freshman student who can precipitate sodium crystals with his mind John, who found himself floating out of his body and returned to find his AIDS healed Dean, whose cortisol levels dropped by 48% in a single hour In *Mind to Matter*, Dawson Church shows that these outcomes aren't a lucky accident only a few people experience. Neuroscientists have measured a specific brain wave formula that is linked to manifestation. This "flow state" can be learned and applied by anyone. New discoveries in epigenetics, neuroscience, electromagnetism, psychology, vibration, and quantum physics connect each step in the process by which mind creates matter. They show that the whole

universe is self-organizing, and when our minds are in a state of flow, they coordinate with nature's emergent intelligence to produce synchronous outcomes. The book contained over 150 photos and illustrations that explain the process, while an "Extended Play" section at the end of each chapter provides additional resources. As *Mind to Matter* drops each piece of the scientific puzzle into place, it leaves us with a profound understanding of the enormous creative potential of our minds. It also gives us a road map to cultivating these remarkable brain states in our daily lives.

Nobody Knows What They're Doing - Lee Crutchley 2021-02-16

Everything no one will tell you about being an

artist Nobody Knows What They're Doing is an honest guide to the creative life for artists of all kinds. Lee Crutchley, author of How to Be Happy (Or At Least Less Sad), skips the platitudes, positive affirmations, and guarantees of success; he'll never ever tell you to just Do What You Love. Instead, Crutchley discusses the things nobody else is talking about—that, frankly, your work sucks (but that's ok because everyone else's does too), that making bad art is worth it, and so much more. In a world desperate for a glimpse of authenticity, Nobody Knows What They're Doing is a breath of fresh air that reveals the truths hiding between the lines of Instagram-friendly aphorisms and behind the words of the most inspirational TED talks. An honest look at the reality of creativity and the joy and difficulty of crafting good (and bad) art, this book belongs in the hands of every exhausted creative, every starry-eyed dreamer, and every artist who is trying to make their way in the world—and keep a roof over their head while

they do it.

Steal Like an Artist - Austin Kleon 2012-02-28
You don't need to be a genius, you just need to be yourself. That's the message from Austin Kleon, a young writer and artist who knows that creativity is everywhere, creativity is for everyone. A manifesto for the digital age, Steal Like an Artist is a guide whose positive message, graphic look and illustrations, exercises, and examples will put readers directly in touch with their artistic side. When Mr. Kleon was asked to address college students in upstate New York, he shaped his speech around the ten things he wished someone had told him when he was starting out. The talk went viral, and its author dug deeper into his own ideas to create Steal Like an Artist, the book. The result is inspiring, hip, original, practical, and entertaining. And filled with new truths about creativity: Nothing is original, so embrace influence, collect ideas, and remix and re-imagine to discover your own path. Follow your interests wherever they take

you. Stay smart, stay out of debt, and risk being

boring—the creative you will need to make room to be wild and daring in your imagination.
