[Business Performance and Financial Institutions in Europe](#) - Alexandra Horobet 2020-10-24

This book examines the business models, performance, and decision-making approaches employed by financial institutions in Central and Southeast Europe. The respective contributions cover a wide range of industries, including banking, pharmaceuticals, and airline business services, and present both theoretical and empirical studies that highlight economy-wide risks and opportunities for European companies. The book is divided into four parts, the first of which provides a critical assessment of the competitiveness and performance of European companies, while the second examines decision-making approaches at financial institutions; the third and fourth parts address the macroeconomic risks and opportunities for business development in Europe. Intended for scholars, political decision-makers, and practitioners, the book offers new perspectives on Central and Southeast European financial and business research.

Problem Loans and Cost Efficiency in Commercial Banks - Allen N. Berger 1995

A Framework for a Palestinian National Security Doctrine - Hussein Agha 2006

The Palestinians face a unique challenge to their national security as a people under occupation and in exile across the Middle East and beyond. This volume is the first of its kind to address security issues from a Palestinian perspective, with or without a two-state solution to the conflict with Israel. The authors break new ground in focusing on Palestinian national needs as well as the means to defend the Palestinian people wherever they may be. The book's ultimate objective is to lay the foundations for a formal non-offensive Palestinian national security doctrine. It will be essential reading for policymakers, experts, and the media in the Middle East as well as interested parties in the international community. Contents Overview Components of Palestinian National Security Some Doctrinal Elements The Changing Strategic Environment Tables and Maps

Development Under Adversity - Ishac Diwan 1999-01-01

"War, border closures, violence, and unemployment have hampered the Palestinian economy for over a decade. Despite these obstacles and setbacks, the future outlook is optimistic." Based on the research of the

Palestine Economic Policy Research Institute (MAS), the World Bank, and other organizations, 'Development Under Adversity' reviews the development of the Palestinian economy since the 1993 Declaration of Principles. The Palestinian economy has enormous potential. Its general development indicators, including life expectancy, literacy, and child mortality rates, are among the best in the Middle East and North Africa. The book identifies the conditions under which the Palestinian economy can grow. They include trade channels that reduce the economy's reliance on Israel; the creation of a more efficient civil service; more investment-oriented public expenditure; and more resourceful support from NGOs in the delivery of health, education, welfare, and infrastructure services. 'Development Under Adversity' provides historical background, an objective examination of recent economic and political developments, and a comprehensive analysis of the contribution that the donor community can make toward alleviating poverty. Throughout its analysis, the book focuses on the human consequences of economic uncertainty. It studies the social and household costs of border closures, and includes complete chapters about the education and health sectors. The result is a book that will be relevant to a wide range of institutional and private lenders, as well as to anyone with a general interest in the well-being and future of the Palestinian economy.

Global Issues in Banking and Finance - Nesrin Ozatac 2019-10-17

This volume presents current developments in the fields of banking and finance from an international perspective. Featuring contributions from the 4th International Conference on Banking and Finance Perspectives (ICBFP), this volume serves as a valuable forum for discussing current issues and trends in the banking and financial sectors, especially in light of the global economic challenges triggered by financial institutions. Using the latest theoretical models, new perspectives are brought to topics such as international banking and finance, Islamic banking, fintech, and corporate finance. Offering an opportunity to explore the challenges of a rapidly changing industry, this volume will be of interest to academics, policy makers, and scholars in the fields of banking, insurance, and finance.

The Summer My Father Died - dit Kiss 2012-09-03

dit Kiss grew up a communist in Budapest, soaking up her father's ideology unquestioningly. As a child she is puzzled when others refer to her as Jewish; she only knows that her family doesn't believe in God. How can they? As her father lies dying, dit tries to understand the enigma surrounding his life. Where does his unshakeable communist conviction come from? Why doesn't he have relatives? As she digs deeper into his tragic history, dit is forced to confront the contradictions and lies woven into the life of her family - and her country - through the dramatic twists of twentieth century Hungary. 'Lyrical and poetic The Summer My Father Died is a powerful memoir. In this remarkable memoir, dit Kiss uncovers the paternal history that shaped her own, even while she was unaware of it ... the journey is riveting.' Lisa Appignanesi 'It shook me profoundly ... not only the richness of the relationship between father and daughter, but the internal development of the narrator also had a deep impact on me.' István Szabó, director of Mephisto and Being Julia.

Economic Development in Saudi Arabia - Rodney Wilson 2004

The changing political situation in the Middle East poses challenges for the economies of the region, and some see none more vulnerable to collapse than Saudi Arabia's. Yet as this study demonstrates, the fundamentals of the kingdom's economy are relatively robust, as over two thirds of GDP is accounted for by the non-oil sector, and impressive modern industries have been established notably in petrochemicals. The financial system functions well, and despite substantial government debts, there is low inflation and currency stability. The private sector increasingly drives the economy, although job creation has been insufficient to prevent rising youth unemployment. The development challenges Saudi Arabia faces are similar to those of other middle-income countries, and three decades of diversification have made the economy less unique than it was in the oil boom years of the 1970s.

The Effect of the Internal Auditing on Financial Performance -

Shakir Al-ghalayini 2015-04-15

Bachelor Thesis from the year 2013 in the subject Business economics - Investment and Finance, , course: Faculty of Commerce - Department of

Accounting, language: English, abstract: It was clear from the recent financial scandals and fraud law suits in the international and regional firms that the internal control in general isn't as strong as should and that there are some weaknesses that led to this outcome and that why we are interested to investigate the internal control and the internal observation systems in the listed Palestinian corporations to put the lights on the real reasons and causes for such problem. Many researchers and observers believe that one of the main reasons for such problem is the insufficient reliance on the function of the internal auditor and not assigning this function with its real importance in the companies, especially if we consider how significant is this function becomes as the companies are getting larger and the operations are extending to be more in terms of the volume and the complexity and more importantly the competition is getting tougher among the companies. The internal audit is consider to be a type of the observational procedures that can be used to assess the effectiveness of the other observational and audit procedures and that is why many researchers consider it as the core of concentration in the audit hierarchy that supplement the other tools in ensuring these tools ability to safeguard the companies' assets, make sure about the fairness of the financial data and encourage the commitment in the managerial policies. The Road to Results - Linda G. Morra-Imas 2009

'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized

throughout the text. Next, the authors take the reader down 'the road to results, ' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

Europe's Advantage - Francesca Carnevali 2005-09-15

This is the first book to explore the causes of the decline of British manufacturing in the 20th century by focusing on the troubled relationship between banks and small firms in a comparative historical perspective. Since the mid-1970s, the 'rediscovery' of small firms and of the important role they have played in the economies of continental Europe have occupied a substantial part of the literature on the sources of economic competitiveness. In Britain, the relationship between banks and industry has been the object of intense speculation since before the First World War. Since then banks have been accused by the business community, academics and politicians of neglecting industrial finance and by doing so of reducing the competitiveness of British firms. By comparing the rise of small firms in France, Germany and Italy and their decline in Britain this book analyses how the structure of these countries' banking systems has affected small firms' growth. This analysis is placed in the historical context of the political economy of these four countries, to show how banking and industrial structures developed over the century as a consequence of the state's need to mediate between different social and economic groups. This approach allows the author to show why British banking came to be so concentrated and the negative impact that this had on the supply of finance to small firms. The experiences of France, Germany and Italy show alternative structures

and policy responses towards small firms.

Financial Distress and Corporate Turnaround - Martin Schmuck
2013-11-18

The work of Martin Schmuck empirically investigates the phenomenon of financial distress and corporate turnaround in the automotive supplier industry. Based on a sample of 194 publicly listed automotive suppliers, the effectiveness of managerial, operational, financial, and asset restructuring activities is analyzed in a multivariate research setting. Archetypes for successful turnarounds are identified and matched with strategies of non-distressed companies.

Islamic Banking - Mr.Luca Errico 1998-03-01

This paper analyzes the implications of Islamic precepts on banks' structure and activities, focusing on banking supervision issues. It points out and discusses these issues in the context of a paradigm version of Islamic banking, as well as in frameworks that fall between the paradigm version and conventional banking. The case of Islamic banks operating in a conventional system is also examined.

Islamic Finance and the New Financial System - Tariq Alrifai
2015-03-18

Can Islamic finance save the global system? *Islamic Finance and the New Financial System* describes how the adoption of Islamic finance principles in future regulatory decisions could help prevent future shocks in the global financial system. Using illustrations and examples to highlight key points in recent history, this book discusses the causes of financial crises, why they are becoming more frequent and increasingly severe, and how the new financial system will incorporate elements of Islamic finance - whether deliberately or not. With an introspective look at the system and an examination of the misconceptions and deficiencies in

theory vs. practice, readers will learn why Islamic finance has not been as influential as it should be on the larger global system. Solutions to these crises are thoroughly detailed, and the author puts forth a compelling argument about what can be expected in the future. Despite international intervention and global policy changes, the financial system remains in a fragile state. There is an argument to be made about integrating Islamic finance into the new system to facilitate stronger resilience, and this book explains the nuts and bolts of the idea while providing the reader with a general understanding of Islamic finance. Understand the key principles of Islamic finance Examine the history of the current financial system Discover how Islamic finance can help build a new debt-free economy Learn how Islamic finance theory doesn't always dictate practice Although Islamic finance is a growing market, it is still a foreign concept to many. Those within the Islamic finance circles wonder why the system has yet to gain broader appeal despite its ability to create a strong and well-balanced economy. Islamic Finance and the New Financial System provides clever analysis and historical background to put the issues into perspective.

European Banking - John A. Goddard 2001-07-10

The retail banking sector has undergone immense change over the last decade, such that the industry is barely recognisable. The creation of the European Single Market has of necessity initiated deregulation, whilst the increase in telephone and internet banking has impacted on economies of scale. Financial services organisations are now able to compete in previously uncharted territory, to considerable effect. Taking the reader on a journey of discovery through the economic theory behind the practice and the consequences that follow, the authors have created a fascinating insight into the current state of European retail banking. The authors use their extensive research to display the rationale behind the increasing trend towards consolidation and efficiency. Well argued and well researched, this is a must read for all people with an interest in the European Banking market, from investors to bankers and students alike. "This outstanding contribution has everything a banking practitioner, academic or regulator would need to know about European

banking, complete from theory to practice to data to background references. This is a must-have reference guide for anyone who wants or needs to know about our financial system." - Allen N. Berger, Senior Economist, Federal Reserve Board

Risk Management in Credit Portfolios - Martin Hibbeln 2010-09-30

Risk concentrations play a crucial role for the survival of individual banks and for the stability of the whole banking system. Thus, it is important from an economical and a regulatory perspective to properly measure and manage these concentrations. In this book, the impact of credit concentrations on portfolio risk is analyzed for different portfolio types and it is determined, in which cases the influence of concentration risk has to be taken into account. Furthermore, some models for the measurement of concentration risk are modified to be consistent with Basel II and their performance is compared. Beyond that, this book integrates economical and regulatory aspects of concentration risk and seeks to provide a systematic way to get familiar with the topic of concentration risk from the basics of credit risk modeling to present research in the measurement and management of credit risk concentrations.

UNRWA and Palestinian Refugees - Sari Hanafi 2014-04-24

Exploring the evolution of the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), this book fills a lacuna in literature on the agency. UNRWA and Palestinian Refugees employs recent fieldwork in order to analyse challenges in programmes and service delivery, protection, camp governance, community participation, and camp improvement and reconstruction. The chapters examine the way UNRWA is adapting to a changing social, political and economic context, mostly within urban settings – a paradigmatic shift from understanding the Agency’s role as simply a provider of relief and services to one comprehensively supporting the human development of Palestinian refugees. Examining the refugee debate using new disciplines and research frameworks, this collection aims to emphasise the centrality of the Palestinian refugee issue for Middle East peace-making and to contribute a better understanding of a unique agency. This book will be a useful aid for students and researchers with an interest in Middle East Studies, Politics, and the Israeli-Palestinian conflict.

Transforming Microfinance Institutions - Joanna Ledgerwood 2006-08-30
In response to a clear need by low-income people to gain access to the full range of financial services including savings, a growing number of microfinance NGOs are seeking guidelines to transform from credit-focused microfinance organizations to regulated deposit-taking financial intermediaries. In response to this trend, this book presents a practical 'how-to' manual for MFIs to develop the capacity to become licensed and regulated to mobilize deposits from the public. 'Transforming Microfinance Institutions' provides guidelines for regulators to license and regulate microfinance providers, and for transforming MFIs to meet the demands of two major new stakeholders regulators and shareholders. As such, it focuses on developing the capacity of NGO MFIs to mobilize and intermediate voluntary savings. Drawing from worldwide experience, it outlines how to manage the transformation process and address major strategic and operational issues inherent in transformation including competitive positioning, business planning, accessing capital and shareholders, and how to 'transform' the MFI's human resources,

financial management, MIS, internal controls, and branch operations. Case studies then provide examples of developing a new regulatory tier for microfinance, and how a Ugandan NGO transformed to become a licensed financial intermediary. This book will be invaluable to regulators and microfinance NGOs contemplating institutional transformation and will be of tremendous use to donors and technical support agencies supporting MFIs in their transformation.

Innovative Strategies for Implementing FinTech in Banking - Albastaki, Yousif Abdullatif 2020-08-28
FinTech is encouraging various new practices, such as diminishing the use of cash in different countries, increasing rate of mobile payments,

and introducing new algorithms for high-frequency trading across national boundaries. It is paving the way for new technologies emerging in the information technology scene that allow financial service firms to automate existing business processes and offer new products, including crowdfunding or peer-to-peer insurance. These new products cater to hybrid client interaction and customer self-services, changing the ecosystem by increasing outsourcing for focused specialization by resizing and leading to new ecosystems and new regulations for encouraging FinTech. However, such new ecosystems are also accompanied by new challenges. *Innovative Strategies for Implementing FinTech in Banking* provides emerging research exploring the theoretical and practical aspects of technology inclusion in the financial sector and

applications within global financing. It provides a clear direction for the effective implementation of FinTech initiatives/programs for improving banking financial processes, financial organizational learning, and performance excellence. Featuring coverage on a broad range of topics such as artificial intelligence, social financing, and customer satisfaction, this book encourages the management of the financial industry to take a proactive attitude toward FinTech, resulting in a better decision-making capability that will support financial organizations in their journey towards becoming FinTech-based organizations. As such, this book is ideally designed for financial analysts, finance managers, finance administrators, banking professionals, IT consultants, researchers, academics, students, and practitio
