**Arab Cinema Travels** - Kay Dickinson 2019-07-25

Exploring the impact of travel on Arab cinema, Kay Dickinson reveals how the cinemas of Syria, Palestine and Dubai have been shaped by the history and politics of international circulation. This compelling book offers fresh insights into film, mobility and the Middle East.

*Low Carbon Energy in the Middle East and North Africa* - Robin Mills 2021-02-01

This book explores the evolving roles of energy stakeholders and geopolitical considerations, leveraging on the dizzying array of planned and actual projects for solar, wind, hydropower, waste-to-energy, and nuclear power in the region. Over the next few decades, favorable economics for low carbon energy sources combined with stagnant oil demand growth will facilitate a shift away from today's fossil fuel-based energy system. Will the countries of the Middle East and North Africa be losers or leaders in this energy transition? Will state-society relations undergo a change as a result? It suggests that ultimately, politics more so than economics or environmental pressure will determine the speed, scope, and effects of low carbon energy uptake in the region. This book is of interest to academics working in the fields of International Relations, International Political Economy, Comparative Political Economy, Energy Economics, and International Business. Consultants, practitioners,

policy-makers, and risk analysts will also find the insights helpful.

**Grandmother Power** - Paola Gianturco 2012-09-18

Whether fighting for the environment, human rights, education, health, or cultural preservation, a new generation of activist grandmothers across the world are using their strength, wisdom, and hearts to make a difference. An unheralded grandmothers' movement is changing the world. Insurgent grandmothers are using their power to fight for a better future for grandchildren everywhere. And they are succeeding.

Grandmother Power profiles activist grandmothers in fifteen countries on five continents who tell their compelling stories in their own words.

Grandmothers in Canada, Swaziland, and South Africa collaborate to care for AIDS orphans. Grandmothers in Senegal convince communities to abandon female genital mutilation. Grandmothers in India become solar engineers and bring light to their villages while those in Peru, Thailand, and Laos sustain weaving traditions. Grandmothers in Argentina teach children to love books and reading. Other Argentine grandmothers continue their 40-year search for grandchildren who were kidnapped during the nation's military dictatorship. Irish grandmothers teach children to sow seeds and cook with fresh, local ingredients.

Filipino grandmothers demand justice for having been forced into sex slavery during World War II. Guatemalan grandmothers operate a hotline

and teach parenting. In the Middle East, Israeli grandmothers monitor checkpoints to prevent abuse and the UAE's most popular television show stars four animated grandmothers who are surprised by contemporary life. Indigenous grandmothers from thirteen countries conduct healing rituals to bring peace to the world. Gianturco's full-color images and her heroines' amazing tales make Grandmother Power an inspiration for everyone, and it cements the power of grandmothers worldwide. Please visit <http://globalgrandmotherpower.com/> for additional information. All author royalties will be donated to the Stephen Lewis Foundation's Grandmothers to Grandmothers campaign, which provides grants to African grandmothers who are raising AIDS orphans.

**Art and Cultural Production in the Gulf Cooperation Council** - Suzi Mirgani 2019-10-31

State-driven investments in art and cultural production in the states of the Gulf Cooperation Council (GCC) are an important part of the search for longer-term alternatives to the longer-term unsustainability of the hydrocarbon-based economic development model. They also are an element in the search for soft power and status, and intersect with the nation-building project. The long-term planned--and unplanned--effects of such cultural initiatives include a necessary opening up to a future of unexpected and often undesired cultural encounters, whether in the classroom, the art gallery, the sports stadium, or the labor office. As states driven by a desire to raise both their regional and international status, but needing to satisfy their domestic conservative constituencies, their greatest test will be their judicious negotiating of the conflicting sociocultural elements of an increasingly globalized world. This volume offers a comprehensive multi-disciplinary analysis of this complex arena and the state of art and cultural production in these Gulf societies, through original studies on identity formation and an emerging museology; the aesthetics of censorship; the question of authenticity; cultural projects as state-driven soft power efforts; the phenomenon of public art; and artistic engagements with migrant labor communities. The chapters originally published as a special issue in the *Journal of*

Arabian Studies.

*The Origins of the United Arab Emirates* - Rosemarie Said Zahlan  
2016-03-22

The creation of the United Arab Emirates in 1971 ended a century and a half of the existence of the Trucial States in special treaty relations with Britain. This book, first published in 1978, describes the evolution of tribes and their rulers' authority over time, and the tribes' treaties with Britain as it sought to exercise imperial control over its trade routes. Analysing changes to society as well as the politics of the region, this book analyses the formation of the United Arab Emirates.

**The Routledge Handbook of Urban Ecology** - Ian Douglas 2020-11-20

This second edition covers recent developments around the world with contributors from 33 different countries. It widens the handbook's scope by including ecological design; consideration of cultural dimensions of the use and conservation of urban nature; the roles of government and civil society; and the continuing issues of equity and fairness in access to urban greenspaces. New features include an emphasis on the biophilic design of homes and workplaces, demonstrating the value of nature, in order to counter the still prevalent attitude among many developers that nature is a constraint rather than a value. The volume explores great practical achievements have occurred since the first edition, with many governments increasingly recognising and legislating on urban nature and green infrastructure matters, since cities play a major role in adapting to change, particularly to climate crisis. New topics such as the ecological role of light at night and human microbiota in the urban ecosystem are introduced. Additional attention is given to food production in cities, particularly the multiple roles of urban agriculture and household gardens in different contexts from wealthy communities to the poorest informal settlements in deprived communities. The emphasis is on demonstrating what can be achieved, and what is already being done. The book will help scholars and graduate students by providing an invaluable and up-to-date guide to current urban ecological thinking across the range of disciplines, such as geography, ecology, environmental science/studies, planning, urban studies, that converge in

the study of towns and cities and urban design and living. It will also assist practitioners and civil society members in discovering the ways different specialists and thinkers approach urban nature.

*Global Downtowns* - Marina Peterson 2012-06-29

*Global Downtowns* reconsiders one of the defining features of urban life—the energy and exuberance that characterize downtown areas—within a framework of contemporary globalization and change. It analyzes the iconic centers of global cities through individual case studies from Europe, Asia, Africa, Latin America, and the United States, considering issues of function, population, imagery, and growth. Contributors to the volume use ethnographic and cultural analysis to identify downtowns as products of the activities of planners, power elites, and consumers and as zones of conflict and competition. Whether claiming space on a world stage through architecture, media events, or historical tourism or facing the claims of different social groups for a place at the center, downtowns embody the heritage of the modern city and its future. Essays draw on extensive fieldwork and archival study in Beijing, Barcelona, New York, Los Angeles, Chicago, Dar es Salaam, Dubai, Nashville, Lima, Philadelphia, Mumbai, Havana, Beirut, and Paris, among other cities. They examine the visions of planners and developers, cultural producers, governments, theoreticians, immigrants, and outcasts. Through these perspectives, the book explores questions of space and place, consumption, mediation, and images as well as the processes by which urban elites learn from each other as well as contest local hegemony. *Global Downtowns* raises important questions for those who work with issues of urban centrality in governance, planning, investment, preservation, and social reform. The volume insists that however important the narratives of individual spaces—theories of American downtowns, images of global souks, or diasporic formations of ethnic enclaves as interconnected nodes—they also must be situated within a larger, dynamic framework of downtowns as centers of modern urban imagination.

*A History of Future Cities* - Daniel Brook 2013-02-12

An exploration of four cities that reflect a blend of Eastern and Western

cultures traces the historical threads connecting St. Petersburg, Shanghai, Mumbai, and Dubai while discussing their conflicted embrace of modernity.

**Jurisdictional Exceptionalisms** - Anver M. Emon 2021-08-12

Examines a complex global legal problem to demonstrate a compelling method for comparative legal, cultural, and social understanding.

*The Poetics of Arabian Sūqs* - Jasmine Shahin 2022-11-18

This book investigates the history of Arabian sūqs from their pre-Islamic beginnings to the present. Collecting evidence from archaeological ruins, Islamic towns, modern cities, Arabic poetry, philosophical debates, political conflicts, puppet shows and the insights of modern-day market-goers, the book presents new and unforeseen interpretations of the Arabian sūq's meaning and its transformation through time and place. The finding that such meaning is tied to ancient trade rituals, where temple and market presented a holistic socio-urban unit, re-questions some instrumental assumptions regarding the value of sūq-ness in Arabia's everyday practices. Such a finding, which locates the fadaā/tareeq duality as a central theme in Arabia's socio-urban discourse, emphasizes the importance of lived experiences and poetics as key sources for understanding socio-urban phenomena.

**Governance and Domestic Policy-Making in Saudi Arabia** - Mark C. Thompson 2022-03-24

Saudi Vision 2030 and the National Transformation Plan 2020 are governmental initiatives to diversify Saudi Arabia's economy and implement nationwide social changes. Media and scholarly attention often describe the success or failure of these ambitious visions. This book shifts the focus to instead examine and evaluate the actual processes of domestic policymaking and governance that are being mapped out to achieve them. The book is unique in its breadth, with case studies from across different sectors including labour markets, defence, health, youth, energy and the environment. Each analyses the challenges that the country's leading institutions face in making, shaping and implementing the tailored policies that are being designed to change the country's future. In doing so, they reveal the factors that either currently facilitate

or constrain effective and viable domestic policymaking and governance in the Kingdom. The study offers new and ground-breaking research based on the first-hand experiences of academics, researchers, policy-makers and practitioners who have privileged access to Saudi Arabia. At a time when analysis and reportage on Saudi Arabia usually highlights the 'high politics' of foreign policy, this book sheds light on the 'low politics' to show the extent to which Saudi policy, society, economics and culture is changing.

*Energy Kingdoms* - Jim Krane 2019-01-08

After the discovery of oil in the 1930s, the Gulf monarchies—Saudi Arabia, Kuwait, Qatar, the United Arab Emirates, Oman, and Bahrain—went from being among the world's poorest and most isolated places to some of its most ostentatiously wealthy. To maintain support, the ruling sheikhs provide their subjects with boundless cheap energy, unwittingly leading to some of the highest consumption rates on earth. Today, as summertime temperatures set new records, the Gulf's rulers find themselves caught in a dilemma: can they curb their profligacy without jeopardizing the survival of some of the world's last absolute monarchies? In *Energy Kingdoms*, Jim Krane takes readers inside these monarchies to consider their conundrum. He traces the history of the Gulf states' energy use and policies, looking in particular at how energy subsidies have distorted demand. Oil exports are the lifeblood of their political-economic systems—and the basis of their strategic importance—but domestic consumption has begun eating into exports while climate change threatens to render their desert region uninhabitable. At risk are the sheikhdoms' way of life, their relations with their Western protectors, and their political stability in a chaotic region. Backed by rich fieldwork and deep knowledge of the region, Krane expertly lays out the hard choices that Gulf leaders face to keep their states viable.

*Aerotropolis* - John D. Kasarda 2011-03-01

This brilliant and eye-opening look at the new phenomenon called the aerotropolis gives us a glimpse of the way we will live in the near future—and the way we will do business too. Not so long ago, airports

were built near cities, and roads connected the one to the other. This pattern—the city in the center, the airport on the periphery—shaped life in the twentieth century, from the central city to exurban sprawl. Today, the ubiquity of jet travel, round-the-clock workdays, overnight shipping, and global business networks has turned the pattern inside out. Soon the airport will be at the center and the city will be built around it, the better to keep workers, suppliers, executives, and goods in touch with the global market. This is the aerotropolis: a combination of giant airport, planned city, shipping facility, and business hub. The aerotropolis approach to urban living is now reshaping life in Seoul and Amsterdam, in China and India, in Dallas and Washington, D.C. The aerotropolis is the frontier of the next phase of globalization, whether we like it or not. John D. Kasarda defined the term "aerotropolis," and he is now sought after worldwide as an adviser. Working with Kasarda's ideas and research, the gifted journalist Greg Lindsay gives us a vivid, at times disquieting look at these instant cities in the making, the challenges they present to our environment and our usual ways of life, and the opportunities they offer to those who can exploit them creatively. Aerotropolis is news from the near future—news we urgently need if we are to understand the changing world and our place in it.

*City of Gold* - Jim Krane 2009-09-15

Award-winning journalist Jim Krane charts the history of Dubai from its earliest days, considers the influence of the family who has ruled it since the nineteenth century, and looks at the effect of the global economic downturn on a place that many tout as a blueprint for a more stable Middle East. The city of Dubai, one of the seven United Arab Emirates, is everything the Arab world isn't: a freewheeling capitalist oasis where the market rules and history is swept aside. Until the credit crunch knocked it flat, Dubai was the fastest-growing city in the world, with a roaring economy that outpaced China's while luring more tourists than all of India. It's one of the world's safest places, a stone's throw from its most dangerous. In *City of Gold*, Jim Krane, who reported for the AP from Dubai, brings us a boots-on-the-ground look at this fascinating place by walking its streets, talking to its business titans, its prostitutes, and the

hard-bitten men who built its fanciful skyline. He delves into the city's history, paints an intimate portrait of the ruling Maktoum family, and ponders where the city is headed. Dubai literally came out of nowhere. It was a poor and dusty village in the 1960s. Now it's been transformed into the quintessential metropolis of the future through the vision of clever sheikhs, Western capitalists, and a river of investor money that poured in from around the globe. What has emerged is a tolerant and cosmopolitan city awash in architectural landmarks, luxury resorts, and Disneyfied kitsch. It's at once home to America's most prestigious companies and universities and a magnet for the Middle East's intelligentsia. Dubai's dream of capitalism has also created a deeply stratified city that is one of the world's worst polluters. Wild growth has clogged its streets and left its citizens a tiny minority in a sea of foreigners. Jim Krane considers all of this and casts a critical eye on the toll that the global economic downturn has taken. While many think Dubai's glory days have passed, insiders like Jim Krane who got to know the city and its creators firsthand realize there's much more to come in the City of Gold, a place that, in just a few years, has made itself known to nearly every person on earth.

**The End of Empire in the Gulf** - Tancred Bradshaw 2019-10-31

With the end of the British Raj in 1947, the Foreign Office replaced the Government of India as the department responsible for the Persian Gulf, and would proceed to manage relations with the Trucial States (now the United Arab Emirates, UAE) until British withdrawal in 1971. This work is a comprehensive history of British policy in the region during that period, situated for the first time in its broad historical and political context. Tancred Bradshaw - an academic historian with extensive experience in the region - sheds light onto the discovery of oil in Abu Dhabi in the 1950s, Foreign Office attempts to instigate a long-term development policy in the region, the slow end of the British Empire, the origins of the UAE and - most importantly - the British legacy in this geopolitically crucial region today. The book relies on 40,000 pages of archival material, much of it previously unused, and will be of interest to Imperial historians, as well as anyone working on the history and politics

of the Middle East and the Persian Gulf.

**The Political Economy of Energy, Finance and Security in the United Arab Emirates** - Karen E. Young 2014-07-08

This book explores the process of policymaking and implementation in the finance, energy and security sectors in the United Arab Emirates. It looks at the role of informal advisory networks in a nascent private sector, federal politics, and historical ties in foreign relations.

**Multilingual Global Cities** - Peter Siemund 2020-11-29

This volume sets out to investigate the linguistic ecologies of Singapore, Hong Kong, and Dubai, with chapters that combine empirical and theoretical approaches to the sociolinguistics of multilingualism. One important feature of this publication is that the five parts of the collection deal with such key issues as the historical dimension, language policies and language planning, contemporary societal multilingualism, multilingual language acquisition, and the localized Englishes of global cities. The first four sections of the volume provide a multi-levelled and finely-detailed description of multilingual diversity of three global cities, while the final section discusses postcolonial Englishes in the context of multilingual language acquisition and language contact.

**Emerging Global Cities** - Alejandro Portes 2022-12-27

Certain cities—most famously New York, London, and Tokyo—have been identified as “global cities,” whose function in the world economy transcends national borders. Without the same fanfare, formerly peripheral and secondary cities have been growing in importance, emerging as global cities in their own right. The striking similarity of the skylines of Dubai, Miami, and Singapore is no coincidence: despite following different historical paths, all three have achieved newfound prominence through parallel trends. In this groundbreaking book, Alejandro Portes and Ariel C. Armony demonstrate how the rapid and unexpected rise of these three cities recasts global urban studies. They identify the constellation of factors that allow certain urban places to become “emerging global cities”—centers of commerce, finance, art, and culture for entire regions. The book traces the transformations of Dubai, Miami, and Singapore, identifying key features common to these

emerging global cities. It contrasts them with “global hopefuls,” cities that, at one point or another, aspired to become global, and analyzes how Hong Kong is threatened with the loss of this status. Portes and Armony highlight the importance of climate change to the prospects of emerging global cities, showing how the same economic system that propelled their rise now imperils their future. *Emerging Global Cities* provides a powerful new framework for understanding the role of peripheral cities in the world economy and how they compete for and sometimes achieve global standing.

**Handbook of Cities and the Environment** - Kevin Archer 2016-12-30  
With an ever-growing majority of the world's human population living in city spaces, the relationship between cities and nature will be one of the key environmental issues of the 21st Century. This book brings together a diverse set of authors to explore the various aspects of this relationship both theoretically and empirically. Rather than considering cities as wholly separate from nature, a running theme throughout the book is that cities, and city dwellers, should be characterized as intrinsic in the creation of specifically urban-generated ‘socio-natures’.

**Climate Change** - Brian Black 2013  
A reference guide that contains alphabetically arranged entries, from the Tambora Eruption and Global Climate Emergency of 1815-1818 to World Mayors' Organizations, about the science and history of global climate change.

**The New Arab Urban** - Harvey Molotch 2019-02-05  
Cities of the Arabian Peninsula reveal contradictions of contemporary urbanization. The fast-growing cities of the Persian Gulf are, whatever else they may be, indisputably sensational. The world’s tallest building is in Dubai; the 2022 World Cup in soccer will be played in fantastic Qatar facilities; Saudi Arabia is building five new cities from scratch; the Louvre, the Guggenheim and the Sorbonne, as well as many American and European universities, all have handsome outposts and campuses in the region. Such initiatives bespeak strategies to diversify economies and pursue grand ambitions across the Earth. Shining special light on Dubai, Abu Dhabi, and Doha—where the dynamics of extreme urbanization are

so strongly evident—the authors of *The New Arab Urban* trace what happens when money is plentiful, regulation weak, and labor conditions severe. Just how do authorities in such settings reconcile goals of oft-claimed civic betterment with hyper-segregation and radical inequality? How do they align cosmopolitan sensibilities with authoritarian rule? How do these elite custodians arrange tactical alliances to protect particular forms of social stratification and political control? What sense can be made of their massive investment for environmental breakthrough in the midst of world-class ecological mayhem? To address such questions, this book’s contributors place the new Arab urban in wider contexts of trade, technology, and design. Drawn from across disciplines and diverse home countries, they investigate how these cities import projects, plans and structures from the outside, but also how, increasingly, Gulf-originated initiatives disseminate to cities far afield. Brought together by noted scholars, sociologist Harvey Molotch and urban analyst Davide Ponzini, this timely volume adds to our understanding of the modern Arab metropolis—as well as of cities more generally. Gulf cities display development patterns that, however unanticipated in the standard paradigms of urban scholarship, now impact the world.

*The UAE* - William Gueraiche 2016-08-10  
The seven emirates that make up the United Arab Emirates were little known until the spectacular success of Dubai. The branding of the city not only raised awareness of Dubai, and brought Emiratis one of the highest standards of living in the world, it also spread positive representations of the UAE to the world at large, in striking contrast to more familiar representations of the Middle East. Advertising campaigns built a near-perfect image. The city's bold architecture, such as Burj al Arab, and futuristic projects such as the Palm Islands, helped create an image of modernity, and themes like luxury, personal safety, and excellent service were successfully used to alter western perceptions of the Arab world. Yet how does the image compare with the reality? William Gueraiche's work is the first scholarly study of the UAE's campaign to establish itself on the international stage and to explore the

impact that its economic transformation has had on the country. In particular the author compares the image - a country that is an icon of modernity open to globalization and dialogue with the western world - and the reality - a society that nonetheless seeks to maintain a closely guarded Islamic ethos. Emirati society remains at core conservative and the preservation of Arab-Islamic identity remains important, yet the UAE has the highest proportion of foreigners of any country in the world. What does this mean for the identity of Emiratis living there and what are the implications for foreigners working there? In this engaging and deeply researched book the author also explores the environmental costs of the Dubai lifestyle - manifest in the world's highest electricity and water consumption per capita - its 'Look East' policy and increasing volume of trade with eastern Asia, and the ways in which the UAE has sought to challenge the traditional hegemony of Saudi Arabia in the region. In a final chapter the author examines the impact of the economic depression that called the whole representation of Dubai into question. Offering a fresh perspective that goes beyond the usual polarisation of either denigrating the country or commending it unreservedly, William Gueraiche's important book will be welcomed by all those with an interest in the UAE, modernity and the wider Middle East.

**The Financial Markets of the Arab Gulf** - Jean Francois Seznec  
2018-11-13

Financial markets across the Arabian Peninsula have gone from being small, quasi-medieval structures in the 1960s to large world-class groupings of financial institutions. This evolution has been fueled by vast increases in income from oil and natural gas. The Financial Markets of the Arab Gulf presents and analyzes the banks, stock markets, investment companies, money changers and sovereign wealth funds that

have grown from this oil wealth and how this income has acted as a buffer between Gulf society at large and the newfound cash reserves of Gulf Cooperation Council states (Saudi Arabia, the United Arab Emirates, Qatar, Kuwait, Oman and Bahrain) over the last fifty years. By assessing the development of institutions like the Abu Dhabi Investment Authority, the Saudi Arabian Monetary Authority, the Public Investment Fund and the National Bank of Kuwait, The Financial Markets of the Arab Gulf evaluates the growth of the markets and provides a detailed, critical, snapshot of the current form and function of the Gulf's financial markets. It argues that the markets have been controlled by various state institutions for socio-political reasons. In particular, the Saudi state has used its sophisticated regulatory regime to push for industrialization and diversification, which culminated in the Vision 2030 plan. The UAE, Qatar, Kuwait, Bahrain and Oman have also been strongly involved in establishing modern markets for similar purposes but have done so through different means, with varying results, and each in line with what has been considered their respective comparative advantages. Along with critically surveying these institutions and their role in global finance, the book also presents case studies depicting transactions typical to the region, including the highly profitable documentary credits of commercial banks, the financial scandal of certain financiers and their regulatory arbitrage between Bahrain and Saudi Arabia, a review of the Dubai's trade miracle, and an assessment of the value and importance of the privatization of Saudi Aramco.

*Examining the Relationship Between Economics and Philosophy* - Akansel, Ilkben 2019-10-25

In today's data-driven world, certain infrastructures of society have begun to lose their anthropological traits. Economics, specifically, has started placing importance on quantity over quality, excluding its philosophical perspective. Scientists and associates of economics need to be reacquainted with the psychological aspect of commerce and its significance to humanity. *Examining the Relationship Between Economics and Philosophy* is an essential reference source that discusses the psychological view of economics as well as its philosophical

background. Featuring research on topics such as cognitive science, neoliberalism, and neuroeconomics, this book is ideally designed for scientists, economists, managers, executives, academicians, researchers, and students seeking coverage on the philosophy of the financial system and its impact on competitive markets.

**Contemporary World Narrative Fiction and the Spaces of Neoliberalism** - Michael K. Walonen 2016-04-26

This book is a transnational study of how contemporary fiction writers from the United States and Canada to Nigeria to India to Dubai have conceptualized the emergent social spaces of the diverse corners of the neoliberal world system. Over the span of the past three to four decades, free market economic policies have been sold to or pushed upon every society on the globe in some way, shape, or form. The upshot of this has been a world system structured in terms of a vast shift of power and resources from government to private enterprise, dwindling civic life replaced by rising consumerism, an emerging oligarchic rentier class, large segments of population faced with meager material conditions of existence and few prospects of socio-economic mobility, and a looming sense of a near future dominated by further economic collapses and mounting social strife. This book analyses a wide cultural array of some of the most poignant narrative engagements with neoliberalism in its various localized manifestations throughout the world.

*Chinese in Dubai* - Yuting Wang 2020-09-07

*Chinese in Dubai* tells the fascinating story of the Chinese in the most prominent global city of the Arabian Gulf—their history, struggles and contributions—against the backdrop of a shifting global political economic order with the rise of China.

**Deeper City** - Joe Ravetz 2020-05-19

*Deeper City* is the first major application of new thinking on 'deeper complexity', applied to grand challenges such as runaway urbanization, climate change and rising inequality. The author provides a new framework for the collective intelligence - the capacity for learning and synergy - in many-layered cities, technologies, economies, ecologies and political systems. The key is in synergistic mapping and design, which can move beyond smart 'winner-takes-all' competition, towards wiser

human systems of cooperation where 'winners-are-all'. Forty distinct pathways 'from smart to wise' are mapped in *Deeper City* and presented for strategic action, ranging from local neighbourhoods to global finance. As an atlas of the future, and resource library of pathway mappings, this book expands on the author's previous work, *City-Region 2020*. From a decade of development and testing, *Deeper City* combines visual thinking with a narrative style and practical guidance. This book will be indispensable for those seeking a sustainable future - students, politicians, planners, systems designers, activists, engineers and researchers. A new postscript looks at how these methods can work with respect to the 2020 pandemic, and asks, 'How can we turn crisis towards transformation?'

**India Migration Report 2016** - S. Irudaya Rajan 2016-10-04

*India Migration Report 2016* discusses migration to the Persian Gulf region. This volume: looks at contemporary labour recruitment and policy, both in India and in the Gulf Cooperation Council (GCC) countries; explores gender issues in migration to Gulf countries; and brings together the latest field data on migrants across states in India. Part of the prestigious annual series, this volume will interest scholars and researchers of economics, development studies, migration and diaspora studies, labour studies, and sociology. It will also be useful to policymakers and government institutions working in the area.

**Treading the Beaten Path** - Dr Fazal Ghafoor 2021-04-21

*Treading the Beaten Path* is a rereading of history through the review and critical analysis of fifty books. It is an in-depth analysis of major events that shaped the history of contemporary India. Amongst authors are B R Ambedkar, Rajdeep Sardesai, Jai Ram Ramesh, Ramachandra Guha, Kuldip Nayyar, Zoya Hassan and a host of others. Major epochs in history like the Mughal period, Partition of India, the Emergency, Operation Blue Star etc. are included. The biographies of Sheik Abdulla, Feroze Gandhi and critical studies on S C Bose, Nehru and Gandhi form a part. Epochs of history include the partition of Bengal and Andhra Pradesh. A look at the two-part defense of Hinduism by Shashi Tharoor is a highlight. An evaluation of the Communist, Hindutva and Mandal

movements is undertaken. On a lighter vein the biographies of Mohamed Rafi, Kishore Kumar and Sahir Ludhianvi are explored. The reviews have a personal touch as the author has thought out of the box to add his opinion to many a contentious issue at hand. In that sense it is not a review but a critical narrative with the book acting only as a template with the discussion many a time spilling beyond the confines of it.

Migrant Dubai - Laavanya Kathiravelu 2016-04-29

This book analyzes the everyday lives of labour migrants in a rapidly developing city-state. Using the emirate of Dubai as a case study, *Migrant Dubai* shows that even within highly restrictive mobility regimes, marginalized migrants find ways to cope with structural inequalities and quotidian modes of discrimination.

Dubai - Jim (Author) Krane 2018-04-03

**State Capitalism's Uncertain Future** - Scott B. MacDonald 2015-07-20

A provocative and timely look at the current state of global economics, particularly how the state-owned companies of Russia, China, Latin America, and other emerging markets are influencing how people work, how they consume, and how they prosper. The global economy is changing: experts are noting slow growth in the advanced economies, greater volatility in international markets, and the emergence of state-owned companies in the competitive marketplace. This forward-looking reference explores the role that state capitalism plays within the political structures of countries throughout the world. The text begins with an introduction to state capitalism, moves into an in-depth examination of several countries and regions, and concludes with a discussion on the future of state capitalism in the next decade. Coauthors Scott B. MacDonald and Jonathan Lemco examine the challenges that state-owned companies face in the global economy, including a weak legal and commercial infrastructure, a conflict of interest between politics and business, and massive corruption in local and regional governments. A close review of the perils of state capitalism based on meritocracy devolving into crony capitalism invites debate on the longevity of this economic system versus a free market economy. • Considers the factors

that will impede future economic growth in China, Russia, Argentina, and Venezuela • Defines the role of the state in the economy and the accompanying political system • Features chapters on the economic outlook of Egypt, the Middle East, Eurasia, and Latin America • Discusses the future of capitalism in the 21st century • Includes a look at alternative economic scenarios in the year 2025

*Political Handbook of the World 2020-2021* - Tom Lansford 2021-04-20

The *Political Handbook of the World* by Tom Lansford provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2020-2021 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Compiling in one place more than 200 entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. The *Political Handbook of the World 2020-2021* also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. And this update will aim to include coverage of current events, issues, crises, and controversies from the course of the last two years.

Culture, Health and Sexuality - Peter Aggleton 2015-04-24

The last twenty years have seen a growth in multi-disciplinary work in the area of sexuality, culture and health. What was once a set of specialist concerns has been steadily mainstreamed. Alongside this, a broader interest has developed in 'social' and 'cultural' factors relating to sexuality and sexual health, from family planning and STI management to gender and intimate partner violence and the technologisation of sex. This book offers a research-based overview of key topics relevant to social and cultural perspectives on sexuality and sexual health. Beginning with an extended introduction and divided into six sections, it looks at culture, sex and gender, sexual diversity, sex work, migration and sexual violence. Each section opens with an editorial discussion

which places the theme, and the chapters that follow, in a contemporary context. Six additional substantive chapters can be accessed online at [www.routledge.com/cw/aggleton](http://www.routledge.com/cw/aggleton). Including cutting-edge conceptual and empirical material from around the world, this is a key resource for students in, and across, a variety of academic disciplines in the social and health sciences. It is especially suitable for readers from sexuality studies, gender studies, development studies, anthropology and sociology as well as those with public health and social work backgrounds.

**World Right Side Up** - Christopher W. Mayer 2012-04-10

Invaluable insights into finding diverse investment opportunities in the emergent global economy From Brazilian farmlands to Colombian gold fields, from Chinese shopping malls to Indian hotels, from South African wine country to the boom/bust souks of Dubai, this around-the-world investing field trip explores the nooks and crannies for hidden investment opportunities. *World Right Side Up: Investing Across Six Continents* is packed with ideas to power your portfolio in the years ahead while teaching you a little fascinating history along the way. Fact is, the world's markets have changed in a big way. For the first time since before the Industrial Revolution, the emerging markets now contribute as much to the global economy as their more well-developed peers. Far from being an anomaly, this state of affairs is more in line with the bulk of human experience. For centuries, China and India were the world's largest economies. And so the world is turning...right side up. This change creates a wealth of opportunities for investors, in both the emerging markets and developed markets. *World Right Side Up* is your guide on how to take full advantage of this shift. Provides an entertaining view of various regions visited by the author, including South America, Asia, Africa, North America, and the Middle East Explores specific investment ideas and themes, including opportunities in agriculture, water, energy, infrastructure and much more Includes five key takeaways from each region, an invaluable feature, offering resources to consult for more information and guidance While some people fear the changes happening now, the reality is that for the forward-thinking investor, these sizable new markets will create extraordinary new

opportunities.

*Global Interdependence* - Akira Iriye 2014-01-14

*Global Interdependence* provides a new account of world history from the end of World War II to the present, an era when transnational communities began to challenge the long domination of the nation-state. In this single-volume survey, leading scholars elucidate the political, economic, cultural, and environmental forces that have shaped the planet in the past sixty years. Offering fresh insight into international politics since 1945, Wilfried Loth examines how miscalculations by both the United States and the Soviet Union brought about a Cold War conflict that was not necessarily inevitable. Thomas Zeiler explains how American free-market principles spurred the creation of an entirely new economic order--a global system in which goods and money flowed across national borders at an unprecedented rate, fueling growth for some nations while also creating inequalities in large parts of the Middle East, Latin America, and Africa. From an environmental viewpoint, J. R. McNeill and Peter Engelke contend that humanity has entered a new epoch, the Anthropocene era, in which massive industrialization and population growth have become the most powerful influences upon global ecology. Petra Goedde analyzes how globalization has impacted indigenous cultures and questions the extent to which a generic culture has erased distinctiveness and authenticity. She shows how, paradoxically, the more cultures blended, the more diversified they became as well. Combining these different perspectives, volume editor Akira Iriye presents a model of transnational historiography in which individuals and groups enter history not primarily as citizens of a country but as migrants, tourists, artists, and missionaries--actors who create networks that transcend traditional geopolitical boundaries.

**Faithfully Urban** - Petra Kuppinger 2015-06-01

In the southern German city of Stuttgart lives a pious Muslim population that has merged with the local population to create a meaningful shared existence. In this ethnographic account, the author introduces and examines the lives of ordinary residents, neighborhoods, and mosque communities to analyze moments and spaces where Muslims and non-

Muslims engage with each other and accommodate their respective needs. These accounts show that even in the face of resentment and discrimination, this pious population has indeed become an integral part of the urban community.

*Dubai* - Syed Ali 2010-05-28

This revealing portrait of the famously wealthy Persian Gulf city investigates the human cost of its miraculous rise to global prominence. In less than two decades, Dubai has transformed itself from an obscure territory of the United Arab Emirates into a global center for business, tourism, and luxury living. With astonishing skyscrapers and tax-free incomes, its rulers have made Dubai into a playground for the global elite while skillfully downplaying its systemic human rights abuses and

suppression of dissent. It is a fascinating case study in light-speed urban development, massive immigration, and vertiginous inequality. In *Dubai: Gilded Cage*, sociologist Syed Ali delves beneath the dazzling surface to analyze how—and at what cost—Dubai has achieved its success. Ali brings alive a society rigidly divided between expatriate Westerners enjoying opulent lifestyles on short-term work visas, native Emiratis who are largely passive observers, and workers from the developing world who provide the manual labor and domestic service needed to keep the emirate running, often at great personal cost. “At last, a comprehensive expose of the economic and sexual exploitation that erected this utopia of greed. Syed Ali has seen the future in Dubai and it doesn’t work.” —Mike Davis, author of *Planet of Slums*
