Best Friends, Worst Enemies - Michael Thompson, PhD 2002-07-30
"With uncommon sensitivity and intelligence... [this] book offers parents a window into their kids' often tumultuous relationships with classmates." - Time Friends broaden our children's horizons, share their joys and secrets, and accompany them on their journeys into ever wider worlds. But friends can also gossip and betray, tease and exclude. Children can cause untold suffering, not only for their peers but for parents as well. In this wise and insightful book, psychologist Michael Thompson, Ph.D., and children's book author Catherine O'Neill Grace, illuminate the crucial and often hidden role that friendship plays in the lives of children from birth through adolescence. Drawing on fascinating new research as well as their own extensive experience in schools, Thompson and Grace demonstrate that children's friendships begin early—in infancy—and run exceptionally deep in intensity and loyalty. As children grow, their friendships become more complex and layered but also more emotionally fraught, marked by both extraordinary intimacy and bewildering cruelty. As parents, we watch, and often live through vicariously, the tumult that our children experience as they encounter the "cool" crowd, shifting alliances, bullies, and disloyal best friends. *Best Friends, Worst Enemies* brings to life the drama of childhood relationships, guiding parents to a deeper understanding of the motives and meanings of social behavior. Here you will find penetrating discussions of the difference between friendship and popularity, how boys and girls deal in unique ways with intimacy and commitment, whether all kids need a best friend, why cliques form and what you can

do about them. Filled with anecdotes that ring amazingly true to life, *Best Friends, Worst Enemies* probes the magic and the heartbreak that all children experience with their friends. Parents, teachers, counselors—indeed anyone who cares about children—will find this an eye-opening and wonderfully affirming book. "Relevant and compelling... Parents will be wiser for reading." - The Boston Globe "The stories in this book come from many perspectives - those of therapists, educators, and parents. The wise, kind authors give us a fresh and cogent analysis of this critically important issue." - Mary Pipher, Ph.D., author of *Reviving Ophelia*

Everyone Can Learn to Ride a Bicycle - Chris Raschka 2013-04-09
"[Raschka's] marvelous sequences, fluid style, and emotional intelligence capture all of the momentum and exhilaration of this glorious accomplishment," raves School Library Journal in a starred review. Learning to ride a bike is one of the most important milestones of childhood, and no one captures the emotional ups and downs of the experience better than Chris Raschka, who won the 2012 Caldecott Medal for *A Ball for Daisy*. In this simple yet emotionally rich "guide," a father takes his daughter through all the steps in the process—from choosing the perfect bicycle to that triumphant first successful ride. Using very few words and lots of expressive pictures, here is a picture book that not only shows kids how to learn to ride, but captures what it feels like to fall . . . get up . . . fall again . . . and finally "by luck, grace, and determination" ride a bicycle!

When Sophie Thinks She Can't... - Molly Bang 2018-01-02
Three-time Caldecott Honor illustrator Molly Bang helps children solve

problems by showing a different -- and highly effective -- approach: "I can't do it" becomes "I can't do it... yet." When Sophie can't solve a math puzzle, she feels upset and inadequate. "I CAN'T DO IT!" she shouts, expressing the frustration all of us feel when we try and fail. Will she ever be "smart" like her sister? Maybe she isn't smart at all. Luckily Sophie's teacher steps in. What does it mean to be smart? Using current, popular "mindset" techniques, Sophie's class is taught that we get smarter when we exercise our brains, such as when we work harder at solving a puzzle. Struggling to solve a problem doesn't mean "I can't do it!" Sophie and her classmates just can't do it... yet! Readers will cheer when Sophie finally prevails, and at the end of the day, she's confident and optimistic. At home, Sophie uses her new technique to help her dad solve a carpentry puzzle. In this third book about Sophie, Molly Bang again helps children deal with a challenging everyday issue, providing an opening to ask: What do you do when you think, "I can't!"?

Brain Lab for Kids - Eric H. Chudler 2018-03-06

Brain Lab for Kids offers 52 family-friendly activities, science experiments, and models to help you understand how the brain accomplishes all that it does. Riding a bicycle, learning a new language, catching a ball, reading a book: these activities and everything else we see, hear, feel, and do are made possible by the soft, whitish-pink substance inside our heads called the brain. These hands-on projects will give you a new appreciation for your brain and the many amazing things it does for you. Have fun learning: how cerebrospinal fluid works by dropping eggs held in containers, with and without water. about touch receptors by making a touch maze with glue and cardboard. how people filter out unneeded sound by conducting a listening experiment. how vision interacts with taste and smell by tasting colored drinks. The labs are organized by unit themes: The Neuron, The Brain, Reflexes, Taste, Smell, Vision, Touch, Hearing, Sleep and Body Rhythms, and Memory. The "What's Going On" section for each lab explains the science behind the fun. "Brain Facts" are interesting, and perhaps surprising, bits of trivia related to each lab. Finally, "Thinking Deeper" has suggestions for taking the lab further. The expanding field of brain science, also called

neuroscience, offers the opportunity for all of us to learn about ourselves and others, and how we can better communicate, motivate, inspire, and just plain collaborate together. The popular Lab for Kids series features a growing list of books that share hands-on activities and projects on a wide host of topics, including art, astronomy, clay, geology, math, and even how to create your own circus—all authored by established experts in their fields. Each lab contains a complete materials list, clear step-by-step photographs of the process, as well as finished samples. The labs can be used as singular projects or as part of a yearlong curriculum of experiential learning. The activities are open-ended, designed to be explored over and over, often with different results. Geared toward being taught or guided by adults, they are enriching for a range of ages and skill levels. Gain firsthand knowledge on your favorite topic with Lab for Kids.

Creepy Pair of Underwear! - Aaron Reynolds 2017-08-15

From the celebrated team behind Creepy Carrots!, Aaron Reynolds and Caldecott Honor winner Peter Brown, comes a hilarious (and just a little creepy) story of a brave rabbit and a very weird pair of underwear. Jasper Rabbit is NOT a little bunny anymore. He's not afraid of the dark, and he's definitely not afraid of something as silly as underwear. But when the lights go out, suddenly his new big rabbit underwear glows in the dark. A ghoulish, greenish glow. If Jasper didn't know any better he'd say his undies were a little, well, creepy. Jasper's not scared obviously, he's just done with creepy underwear. But after trying everything to get rid of them, they keep coming back!

From the author-illustrator team behind *The Invisible Boy* comes a bright and lively picture book that captures the social dynamics of a busy classroom while delivering a gentle message about the importance of listening.

A Walk in the Rain with a Brain - Edward Hallowell 2004-09-28

Each brain finds its own special way -- that's the message in this delightful, colorful story by America's foremost expert on learning and childhood development. Edward Hallowell, M.D., is a noted psychiatrist and teacher and a leading authority on attention deficit/hyperactivity disorder. At many of his lectures worldwide he has read a story he wrote for children about how each person's brain is unique -- and it has resonated among the thousands of parents, teachers, and others who have heard it. *A Walk in the Rain with a Brain* is the illustrated version of that story. In it, a little girl named Lucy is making her way down a rainy sidewalk when she spies, of all things, a brain -- Manfred, called Fred -- sitting forlornly in a puddle. The courtly cerebrum asks Lucy for help getting home, and as they walk along she worries that she's not smart enough. "Everyone's smart!" explains Fred. "You just need to find out at what!" Fred reassures her that each child learns and thinks differently -- and that every child has special talents. Charming illustrations and a funny, whimsical story teach children to play and learn in order to find the strengths they have -- and a discussion guide at the end gives parents and educators the background support they need in order to help children understand and discover the sparkling individuality of their minds.

Y Is for Yet - Shannon Anderson 2021-01-18

Kids learn how to adopt a growth mindset through the familiar structure of the ABCs. Mistakes aren't just mistakes. They're growth spurts. Developing a growth mindset—a belief that learning is a process that requires dedication and hard work, not just talent—helps kids learn from their mistakes, build resilience, and strive to be a little better every day. Not your typical alphabet book, *Y Is for Yet* uses the ABCs as an

accessible framework to introduce growth mindset and all its possibilities. From A to Z, or Ability to Zany, kids learn new vocabulary that expands their view of themselves learners. Readers can open to any page and find useful information. Younger children learn new vocabulary, while older kids can increase their knowledge of the brain's neuroplasticity and the many ways growth mindset can be put into action. A section at the back of the book provides a kid-friendly glossary of terms and activities adults can use to help kids build resilience and foster a growth mindset. With an uplifting and positive tone, *Y Is for Yet* empowers kids to persevere and encourages them to view learning as a journey with limitless possibilities.
