Calendar: - David Ewing Duncan 1998-07-01
The adventure spans the world from Stonehenge to astronomically aligned pyramids at Giza, from Mayan observatories at Chichen Itza to the atomic clock in Washington, the world's official timekeeper since the 1960s. We visit cultures from Vedic India and Cleopatra's Egypt to Byzantium and the Elizabethan court; and meet an impressive cast of historic personages from Julius Caesar to Omar Khayyam, and giants of science from Galileo and Copernicus to Stephen Hawking. Our present calendar system predates the invention of the telescope, the mechanical clock, and the concept of zero and its development is one of the great untold stories of science and history. How did Pope Gregory set right a calendar which was in error by at least ten lull days? What did time mean to a farmer on the Rhine in 800 A.D.? What was daily life like in the Middle Ages, when the general population reckoned births and marriages by seasons, wars, kings' reigns, and saints' days? In short, how did the world

Rescuing Human Rights - Hurst Hannum 2019-02-14

The development of human rights norms is one of the most significant achievements in international relations and law since 1945, but the continuing influence of human rights is increasingly being questioned by authoritarian governments, nationalists, and pundits. Unfortunately, the proliferation of new rights, linking rights to other issues such as international crimes or the activities of business, and attempting to address every social problem from a human rights perspective risk undermining their credibility. Rescuing Human Rights calls for understanding 'human rights' as international human rights law and maintaining the distinctions between binding legal obligations on governments and broader issues of ethics, politics, and social change. Resolving complex social problems requires more than simplistic appeals to rights, and adopting a 'radically moderate' approach that recognizes both the potential and the limits of international human rights law, offers the best hope of preserving the principle that we all have rights, simply because we are human.

The Consumer Cruise Missile - Cooper
2013-05-10

The scandalous events described in this book occurred in the 1970s. You haven't heard of them because they were covered up by the U. S. government a cover-up almost as scandalous as the events themselves. Even now, nearly forty years later, the incidents are still classified, and it is with considerable risk to me and my informants that I reveal the truth to the public. Government spokesmen will attack this account and smear me for publishing it, but I believe that the American people, with their healthy skepticism, will refuse to be deceived by government distortions and denials.

The Blue Book - A.L. Kennedy 2012-08-08
Elizabeth Barber is crossing the Atlantic by liner with her perfectly adequate boyfriend, Derek, who might be planning to propose. In fleeing the UK — temporarily — Elizabeth may also be in flight from her past and the charismatic Arthur, once her partner in what she came to see as a series of crimes. Together they acted as fake mediums, perfecting the arcane skills practiced by effective frauds. Elizabeth finally rejected what once seemed an intoxicating game. Arthur continued his search for the right way to do wrong. He now subsidizes free closure for the traumatized and dispossessed by preying on the

super-rich. The pair still meet occasionally, for weekends of sexual oblivion, but their affection lacerates as much as it consoles. Elizabeth hadn't, however, expected the other man on the boat. As her voyage progresses, Elizabeth's past is revealed, and codes slowly form and break as communication deepens. It's time for her to discover who are the true deceivers and who are the truly deceived. But is the book itself — a fiction which may not always be lying — deceiving the reader? Offering illusions and false trails, magical numbers and redemptive humour, this is a novel about what happens when we are misled and when we are true: an extraordinarily intricate and intimate journey into our minds and hearts undertaken by a writer of great gifts — a maker of wonders.

UNEP Year Book 2009 - United Nations
2009-02

UNEP Year Book 2009: New Science and Developments in our Changing Environment presents work in progress on scientific understanding of global environmental change, as well as foresight about possible issues on the horizon. The aim is to raise awareness of the interlinkages among environmental issues that can accelerate the rates of change and threaten human wellbeing. The chapters of the Year Book track the same trajectory as our awareness of environmental change. Transformations are inherent to this trajectory and are taking place on many fronts: from industrial agriculture to eco-agriculture; from a wasteful society towards a resource efficient one; and from a triad of competing interests among civil society, the private sector, and governments to a more cooperative model based on mutual benefits.

Going Clear - Lawrence Wright 2013-01-17
National Book Award Finalist A clear-sighted revelation, a deep penetration into the world of Scientology by the Pulitzer Prize-winning author of *The Looming Tower*, the now-classic study of al-Qaeda's 9/11 attack. Based on more than two hundred personal interviews with current and former Scientologists—both famous and less well known—and years of archival research, Lawrence Wright uses his extraordinary investigative ability to uncover for us the inner workings of the Church of Scientology. At the book's center, two men whom Wright brings vividly to life, showing how they have made Scientology what it is today: The darkly brilliant science-fiction writer L. Ron Hubbard, whose restless, expansive mind invented a new religion. And his successor, David Miscavige—tough and driven, with the unenviable task of preserving the church after the death of Hubbard. We learn about Scientology's complicated cosmology and special language. We see the ways in which the church pursues celebrities, such as Tom Cruise and John Travolta, and how such stars are used to advance the church's goals. And we meet the young idealists who have joined the Sea Org, the church's clergy, signing up with a billion-year contract. In *Going Clear*, Wright examines what fundamentally makes a religion a religion, and whether Scientology is, in fact, deserving of this constitutional protection. Employing all his exceptional journalistic skills of observation, understanding, and shaping a story into a compelling narrative, Lawrence Wright has given us an evenhanded yet keenly incisive book that reveals the very essence of what makes Scientology the institution it is.

The Sea Is Not Full - Charles J. Doane 2017-04-01

Giants of the Seas - Aaron Saunders 2013-10-01

The cruise ship market is a 30 billion-dollar industry, and in 2013 it is estimated that it will carry more than 20 million passengers; nor is there any sign of a slow down in the seven percent annual growth. What keeps the passengers coming in such huge numbers isn't the food, the ports or the entertainment. They come for the magnificent floating palaces themselves, the giants of the sea. In this new book, the author showcases the most influential cruise ships of the last three decades beginning with Royal Caribbean's ground-breaking Sovereign of the Seas. When she was launched in 1988 she was the largest passenger ship constructed since Cunard's Queen Mary entered service some 48 years earlier, and her entry into service sparked a fiercely competitive building boom that continues to this day. The reader is taken aboard thirty of the most spectacular ships to reveal how their innovative designs changed the landscape of modern cruising. By employing original and archival photographs, deck plans, cruise programmes, as well as the author's intimate knowledge of many of these vessels, a unique picture is built up of these great ships and it becomes clear that the true Golden Age of Cruising is not in some distant past but exists right now, and that its origins can be traced back to one ship, launched in 1988. A truly sumptuous and fascinating book for all those drawn to the world of the modern cruise ship. As seen in Ships Monthly Magazine *Choices for America in a Turbulent World* - James Dobbins 2015-07-23

Exploring the elements of a national strategy for U.S. foreign policy, the book examines critical global, regional, and other policy issues and decisions likely to confront the next president and senior U.S. officials in 2017 and beyond.
