- Top MBA Students 2012-03-02

Everyone's got an opinion on applying to bschool. A Google search returns 400 THOUSAND results for "how to get into hbs". Most of them are free blogs and forums. You've probably come across dozens of admissions "experts" who charge \$500/hour to help you "craft" that perfect story and "fine tune" those all-important essays. We wanted to provide the definitive insider's guide to bschool admissions. We found 9 students from the best bschools including: * HBS * GSB * Wharton * Northwestern * UChicago * A Stanford dual degree (GSB & Stanford Law) * A Harvard 2+2 In 243 PACKED pages and for only \$25 bucks, they share exactly how they got in - from selecting the right people to write their recommendations, to brainstorming and writing their essays, to deciding on round 1 vs 2 vs 3.

Reading Actively in Middle Grade Science - Don K. Philpot 2020-09-15

Middle grade students can learn a great deal about themselves and their world by reading informative texts in science courses. These texts will focus on important topics in earth science, life science, and physical science and shape students' understandings about scientific inquiry, science-related processes and phenomenon, engineering and design, and technological innovations. But reading is a complex act, and most students need specific reading-related support to understand assigned texts in middle grade science courses. This book focuses on the cyclical nature of reading, the actions proficient readers engage in to understand science textbooks and other informational texts, and the instructional support that teachers can provide to enhance middle grade students' learning of science content through reading. Three associated questions will be addressed in this book: •What actions do proficient readers engage in to understand assigned course texts? •What do these actions entail, and how do they relate to each other? • What teacher-mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?

Science Teachers' Learning - National Academies of Sciences, Engineering, and Medicine 2016-01-15

Currently, many states are adopting the Next Generation Science Standards (NGSS) or are revising their own state standards in ways that reflect the NGSS. For students and schools, the implementation of any science standards rests with teachers. For those teachers, an evolving understanding about how best to teach science represents a significant transition in the way science is currently taught in most classrooms and it will require most science teachers to change how they teach. That change will require learning opportunities for teachers that reinforce and expand their knowledge of the

major ideas and concepts in science, their familiarity with a range of instructional strategies, and the skills to implement those strategies in the classroom. Providing these kinds of learning opportunities in turn will require profound changes to current approaches to supporting teachers' learning across their careers, from their initial training to continuing professional development. A teacher's capability to improve students' scientific understanding is heavily influenced by the school and district in which they work, the community in which the school is located, and the larger professional communities to which they belong. Science Teachers' Learning provides guidance for schools and districts on how best to support teachers' learning and how to implement successful programs for professional development. This report makes actionable recommendations for science teachers' learning that take a broad view of what is known about science education, how and when teachers learn, and education policies that directly and indirectly shape what teachers are able to learn and teach. The challenge of developing the expertise teachers need to implement the NGSS presents an opportunity to rethink professional learning for science teachers. Science Teachers' Learning will be a valuable resource for classrooms, departments, schools, districts, and professional organizations as they move to new ways to teach science.
