The Psychology of Reasoning - Alfred Binet 1899

The Psychology of Attention - Théodule Ribot 1890

"Psychologists have given much study to the effects of attention, but very little to its mechanism. The latter point is the only one that I propose to investigate in the following work. Yet even within these limits the question is important, for it is, as we shall later see, the counterpart, the necessary complement of the theory of association. If the present treatise contributes, be it ever so little, to point out clearly this want of contemporaneous psychology, and to induce others to supply it, it will have accomplished its purpose. The purpose of this series of essays is to establish and prove the following propositions: There are two well-defined forms of attention: the one spontaneous, natural; the other voluntary, artificial. The former--neglected by most psychologists--is the true, primitive, and fundamental form of attention. The second--the only one studied by most psychologists--is but an imitation, a result of education, of training, and of impulsion. Precarious and vacillating in nature, it derives its whole being from spontaneous attention, and finds only in the latter a point of support. It is merely an apparatus formed by cultivation, and a product of civilization. Attention, in these two forms, is not an indeterminate activity, a kind of "pure act" of spirit, acting by mysterious and undiscoverable means. Its mechanism is

essentially motor, that is, it always acts upon the muscles, and through the muscles, mainly under the form of inhibition; and as epigraph of this study we might choose the words of Maudsley, that "the person who is unable to control his own muscles, is incapable of attention." Attention, under these two forms, is an exceptional, abnormal state, which cannot last a long time, for the reason that it is in contradiction to the basic condition of psychic life; namely, change. Attention is a state that is fixed. If it is prolonged beyond a reasonable time, particularly under unfavorable conditions, everybody knows from individual experience, that there results a constantly increasing cloudiness of the mind, finally a kind of intellectual vacuity, frequently accompanied by vertigo. These light, transient perturbations denote the radical antagonism of attention and the normal psychical life. The progress toward unity of consciousness, which is the very basis of attention, manifests itself still better in clearly morbid cases, which we shall study later under their chronic form, namely, the 'fixed idea, ' and in their acute form, which is ecstasy"--Introduction. Il Viaggio Della Maturita' Ed Altri Racconti - Laura Capaccioli 2017-03-19

Questi racconti parlano di storie che ognuno di noi puo' ritrovarsi a vivere e intendono essere uno stimolo a riflettere per migliorare e per crescere. IL VIAGGIO DELLA MATURITA' parla dell'amore e dell'abbandono: come un sentimento bellissimo possa portare a tristi accettazioni. RINCORRENDO I SOGNI: sogni, desideri ed aspettative aiutano ad andare avanti. Anche se non siamo quasi mai contenti della vita, non dobbiamo mai smettere di sognare. GIOCHIAMO INSIEME? La tecnologia porta a vivere in un mondo sempre piu' distaccato dalla realta'. Tutto quanto porta facilito' di comunicazione virtuale distrugge infatti il contatto umano. Parlare accanto ad un amico o giocare a nascondino diventeranno un ricordo.

Faster Than The Speed Of Light - Joao Magueijo 2011-12-31

The idea that the speed of light is a constant - at 186,000 miles per second - is one of the few

scientific facts that almost everyone knows. That constant - c - also appears in the most famous of all scientific equations: $E=mc^2$. Yet over the last few years, a small group of highly reputable young physicists have suggested that the central dogma of modern physics may not be an absolute truth - light may have moved faster in the earlier life of the universe, it may still be moving at different speeds elsewhere today. In telling the story of this heresy, and its gradual

journey towards acceptance, Joao Magueijo writes as one of the three central figures in the story, introducing the reader to modern cosmology, to the implications of VSL (variable speed of light) and to the world of physicists. The initial rejection of Magueijo's ideas is beginning to give way to a reluctant acceptance that the young men may have a point - only the next few years will tell the final fate of this 'dangerous' idea.
