The Princeton Handbook of Multicultural Poetries - Terry V.F. Brogan 1996-01-11

Drawn from the acclaimed New Princeton Encyclopedia of Poetry and Poetics, the articles in this concise new reference book provide a complete survey of the poetic history and practice in every major national literature or cultural tradition in the world. As with the parent volume, which has sold over 10,000 copies since it was first published in 1993, the intended audience is general readers, journalists, students, teachers, and researchers. The editor's principle of selection was balance, and his goal was to embrace in a structured and reasoned way the diversity of poetry as it is known across the globe today. In compiling material on 106 cultures in 92 national literatures, the book gives full coverage to Indo-European poetries (all the major Celtic, Slavic, Germanic, and Romance languages, as well as other obscure ones such as Hittite), the ancient middle Eastern poetries (Hebrew, Persian, Sumerian, and Assyro-Babylonian), subcontinental Indian poetries (the widest linguistic diversity), Asian and Pacific poetries (Chinese, Japanese, Korean, Vietnamese, Mongolian, and half a dozen others), continental American poetries (all the modern Western cultures and native Indian in North, Central, and South American regions), and African poetries (ancient and emergent, oral and written).

The Global Findex Database 2017 - Asli Demirci-Kunt 2018-04-19

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

A Survey of Word Accentual Patterns in the Languages of the World - Harry van der Hulst 2010

In part I of this volume, experts on various language areas provide surveys of word stress/accent systems of as many languages in 'their' part of the world as they could lay their hands on. No preconditions (theoretical or otherwise) were set, but the authors were encouraged to use the StressTyp data in their chapters. Australian Languages (Rob Goedemans), Austronesian Languages (Ellen van Zanten, Ruben Stoel and Bert Remijnsen), Papuan Languages (Ellen van Zanten and Philomena Dol), North American Languages (Keren Rice), South American Languages (Sergio Meira and Leo Wetzels), African Languages (Laura Downing), European Languages (Harry van der Hulst), Asian Languages (Harry van der Hulst and Ren Schiering), Middle Eastern Languages (Harry van der Hulst and Sam Hellmuth). There is an introductory chapter (Chapter 1) that will provide the reader with elementary terminology and theoretical tools to understand the variety of accentual systems that will be discussed in the subsequent chapters of this book. Chapter 2 has a double function. It presents an overview of stress patterns in Australian languages, but at the same time it is intended to (re-)familiarize readers with the coding, terminology and theoretical ideas of the StressTyp database. Chapter 11 presents statistical and typological information from the StressTyp database. Part II of this volume contains 'language profiles' which are, for each of the 511 languages contained in StressTyp (in 2009), extracts from the information that is contained in the database. This volume will be of interest to people in the field of theoretical phonology and language typology. It will function as a reference work for these groups of researchers, but also, more generally, for people working on syntax and other fields of linguistics, who might wish to know certain basic facts about the distribution of word accent systems

1967 Annual Supplement - John B. Simeone 2013-12-01

Black Wave - Kim Ghattas 2020-01-28

A New York Times Notable Book of 2020 "[A] sweeping and authoritative history" (The New York Times Book Review), Black Wave is an unprecedented and ambitious examination of how the modern Middle East unraveled and why it started with the pivotal year of 1979. Kim Ghattas seamlessly weaves together history, geopolitics, and culture to deliver a gripping read of the largely unexplored story of the rivalry between Saudi Arabia and Iran, born from the sparks of the 1979 Iranian revolution and fueled by American policy. With vivid story-telling, extensive historical research and on-the-ground reporting, Ghattas dispels accepted truths about a region she calls home. She explores how Sunni Saudi Arabia and Shia Iran, once allies and twin pillars of US strategy in the region, became mortal enemies after 1979. She shows how they used and distorted religion in a competition that went well beyond geopolitics. Feeding intolerance, suppressing cultural expression, and encouraging sectarian violence from Egypt to Pakistan, the war for cultural supremacy led to Iran's fatwa against author Salman Rushdie, the assassination of countless intellectuals, the birth of groups like Hezbollah in Lebanon, the September 11th terrorist attacks, and the rise of ISIS. Ghattas introduces us to a riveting cast of characters whose lives were upended by the geopolitical drama over four decades: from the Pakistani television anchor who defied her country's dictator, to the Egyptian novelist thrown in jail for indecent writings all the way to the murder of journalist Jamal Khashoggi in the Saudi consulate in Istanbul in 2018. Black Wave is both an intimate and sweeping history of the region and will significantly alter perceptions of the Middle East.

Nicomachean Ethics - Aristotle 2021-11-13

Nicomachean Ethics Aristotle - The *Nicomachean Ethics* is one of Aristotle's most widely read and influential works. Ideas central to ethics—that happiness is the end of human endeavor, that moral virtue is formed through action and habituation, and that good action requires prudence—found their most powerful proponent in the person medieval scholars simply called "the Philosopher." Drawing on their intimate knowledge of Aristotle's thought, Robert C. Bartlett and Susan D. Collins have produced here an English-language translation of the *Ethics* that is as remarkably faithful to the original as it is graceful in its rendering. Aristotle is well known for the precision with which he chooses his words, and in this elegant translation his work has found its ideal match. Bartlett and Collins provide copious notes and a glossary providing context and further explanation for students, as well as an introduction and a substantial interpretive essay that sketch central arguments of the work and the seminal place of Aristotle's *Ethics* in his political philosophy as a whole. The *Nicomachean Ethics* has engaged the serious interest of readers across centuries and civilizations—of peoples ancient, medieval, and modern; pagan, Christian, Muslim, and Jewish—and this new edition will take its place as the standard English-language translation.

Language Planning and Policy - Ashraf Abdelhay 2020-02-13

Language policy is heterogeneous and varies according to its object, levels of intervention, purpose, participants and institutions involved, underlying language ideologies, local contexts, power relations, and historical contexts. This volume offers unique cross-cultural perspectives on language planning and policy in diverse African and Middle Eastern contexts, including South Africa, Bahrain, Sudan, Saudi Arabia, Morocco, Zambia, and Algeria. The African diaspora is also considered, as is the case of Brazil. By bringing together diverse contexts in Africa and the Middle East, this volume encourages a dialogue in the burgeoning scholarship on language policies in different regions of Africa and the Middle East in order to inspect the intersection between language policy discourses and their social, political, and educational functions.

Experimental evidence on public good behavior across Pakistan's fractured educational system - Aftab, Zehra 2016-01-15

This paper adopts identity as a core concept. Following Akerlof and Kranton (2010), it demonstrates how our social identities, and not just economic incentives, influence our decisions. I acknowledge that identity is a multi-layered concept incorporating not only a social dimension (class and gender), but also has ideological (religious orientation) and linguistic dimensions. The paper argues that, even within the same respective identity group, context is important, in the sense that decisions vary based on who one interacts with, their identity, and their respective actions.
