Alvar Aalto and the International Style - Paul David Pearson 1978

Alvar Aalto - Göran Schildt 1998

One of the masters of modern architecture, Finland's Alvar Aalto (1898-1976) was a prolific and influential architect and a gifted designer. His unique contribution to modernism embraced context and the natural environment. Drawing on sources as diverse as the Finnish landscape, the Bauhaus, and Classicism, Aalto

forged an organic design vocabulary that juxtaposed concrete and wood, copper and brick, volume and form in an original synthesis. His respect for function and use contributes to the lasting popularity of his buildings and furniture. Featured in this book are thirty-three of Aalto's most important pieces, including the Villa Mairea, the Town Hall at Säynätsalo, Baker Dormitory at MIT, and the Aalto vase, selected and analyzed in detail by Aalto scholar Göran Schildt, with an introduction by

Professor Michael Trencher of Pratt Institute. Profusely illustrated with full-color photographs, as well as drawings and plans, this book surveys Aalto's career, from his Neoclassical works of the 1920s to his more organic designs of the 1940s and 1950s, from furniture and glass design to buildings completed posthumously. Works from Scandinavia, Europe, and the United States are represented. A chronological list of Aalto's major works and an index of their locations complete the volume.

Aalto and America - Alvar Aalto
2012

The internationally renowned Finnish architect and designer Alvar Aalto (1898-1976) created several landmarks of modern design in the United

States. The first, the Finland Pavilion at the New York World's Fair in 1939, introduced his pioneering style to the country and established his reputation among his American peers. Subsequent designs produced in the United States marked major turning points in his evolving position as an architect. His commissioned project for the Massachusetts Institute of Technology's Baker House dormitory (completed 1949) features an undulating facade of red brick, a material that references the building's Boston surroundings. Aalto's fan-shaped plan for the Mount Angel Abbey Library (completed 1970) in St. Benedict, Oregon, his consummate exploration of the library type, capitalizes on the local terrain and the use of natural light. Aalto's designs had a lasting impact on American modernism, but his experiences in America also profoundly influenced his own stylistic development. *Aalto and America* is a detailed survey of this beneficial

Alvar Aalto and The Art of Landscape - Teija Isohautala
2022-03-15

Alvar Aalto and The Art of Landscape captures the essence of the Finnish architect's landscape concept, emphasising culture and tradition, which characterised his approach to and understanding of architecture as part of the wider environment. From the forests of his youth to sights from his travels, Alvar Aalto (1898-1976) was influenced by outdoor landscapes.

Throughout his career, he felt the need to shape the terrain and this became a signature of his architecture. Divided into five chapters, this book traces Aalto's relationship with landscape, starting with an analysis of his definitions and descriptions of landscape

language, which ranged from natural references and biological terms, to synonyms and comparisons. It includes beautifully illustrated case study projects from the 1950s and 1960s, discussing Aalto's transformation of different landscapes through topography, terracing and tiers, ruins and natural elements, horizon outlines, landmarks, and the repetition of form. Featuring archival sketches, garden drawings, and plans, the book also contains Aalto's text 'Architecture in the Landscape of Central Finland' from 1925 in the appendix. This book provides fascinating, untold insights into Aalto's relationship with landscape and how this developed during his lifetime, for scholars, researchers, and students interested in architecture and landscape history, landscape art, and cultural studies.

Alvar Aalto in Seven Buildings - Alvar Aalto 1998

This book uses seven of Alvar Aalto's most notable buildings to illustrate his working methods, his skills and his theories. When I picked it up I was a bit worried: How do you sum up fifty years of steady practice in seven buildings? Well, I got my answer. This is not a summary. Rather than a page or two on the hundreds of buildings & projects Aalto did, this book is an in depth study of a few major works. The essays are wonderful, the photos & sketches are great. A fine look at one of the true masters of the craft.

Alvar Aalto - Alvar Aalto

2014-10-01

Described by the architectural

critic Sigfried Giedion as the "Magus of the North," Alvar Aalto (1898-1976) is the best-known Finnish architect of his generation and a leading proponent of a more human modernism. His buildings such as the Paimio Sanatorium (1933), the legendary Villa Mairea (1939) and the church of the Three Crosses in Vuoksenniska (1958), embody a masterful interplay of organic volumes, forms and materials. From door handles and lighting fixtures to built-in furniture, Aalto frequently designed complete interiors down to the smallest detail. With his plywood chairs, the master builder additionally became one of the most significant designers of the twentieth century. His Savoy Vase represents the quintessential qualities of Finnish and organic design. This richly illustrated book is the first in many years to offer a comprehensive and current overview of Aalto's oeuvre as an architect, designer and urban planner. Ten authors, including the renowned architectural

historians Eeva-Liisa Pelkonen and Akos Moravanszky, and MoMA curator Pedro Gadanho, address central aspects of Aalto's work. Particular attention is paid to Aalto's dialogue with important artists of his day, including Laszlo Moholy-Nagy, Jean Arp, Alexander Calder and Fernand Leger, as well as his interest in film, cinema and photography, whose influences on his work are examined here for the first time. The catalogue section presents numerous never-before-seen original drawings and architectural models from the archive of the Alvar Aalto Foundation. This perspective on Aalto is complemented with photographs by Armin Linke, who documented a number of Aalto's buildings anew especially for this publication. As these images demonstrate, Aalto's work is as current and inspiring today as it was at the time of its creation.

Alvar Aalto in His Own

Words - Alvar Aalto

1997-01-01

"These fascinating texts illustrate important aspects of

Aalto's outlook and career. They begin with a charming piece, dictated by Aalto near the end of his life, about growing up beneath his father's two-tiered white table where the surveyor's apprentices worked, and his gradual ascent to the top tier. From Aalto's early writings (which he signed with the pseudonym 'Ping') there is a satirical sketch about Christmas festivities at Benvenuto Cellini's place, attended by an unlikely mix of characters including Eliel Saarinen, André Le Nôtre, and Katshusika Hokusai. Aalto's often-idealistic reform projects - his Renaissance revival, his rationalistic utopia - his writings as a propagandist during the war years; his comments on his own crucial travels to Italy, the 1939 New York World's Fair, and the 'decadence of public buildings'; critiques of building and furniture design - all reveal the progression of ideas and convictions that grew and changed throughout Aalto's life, both reflecting and

influencing the course of architecture in the twentieth century. Other influences are also revealed in Aalto's contact with the Bauhaus in Germany, De Stijl in the Netherlands, Le Corbusier in France, and such important friends as Sven Markelius, Gunnar Asplund, Laszlo Moholy-Nagy, Siegfried Giedion, Lewis Mumford, Walter Gropius, and Frank Lloyd Wright, some of whom Aalto eulogizes in the chapter 'In Memoriam'. Annotated by Aalto's official biographer, Göran Schildt, [this book] is the essential, official guidebook to his philosophies and works. For architects, students, theorists, and admirers of Aalto's renowned architecture and design, this personal collection reveals the brilliant mind of the master. ... [This book] presents, for the first time, an illuminating collection of over 75 of his visionary lectures, speeches, articles, and other writings, and 100 archival illustrations"--Bookjacket.

Art as We Don't Know it - 2020

What worlds are revealed when we listen to alpacas, make photographs with yeast or use biosignals to generate autonomous virtual organisms? Bioart invites us to explore artistic practices at the intersection of art, science and society. This rapidly evolving field utilises the tools of life sciences to examine the materiality of life; the collision of human and nonhuman. Microbiology, virtual reality and robotics cross disciplinary boundaries to engage with arts as artists and scientists work together to challenge the ways in which we understand and observe the world. This book offers a stimulating and provocative exploration into worlds emerging, seen through art as we don't know it ?

yet.00'Art as We Don't Know It' showcases art and research that has grown and flourished within the wider network of both the Bioart Society and Biofilia during the previous decade. The book features a foreword by curator and art historian Mónica Bello, and a selection of peer-reviewed articles, personal accounts and interviews, artistic contributions and collaborative projects which illustrate the breadth and diversity of bioart. The resulting book is a tantalising and invaluable indicator of trends, visions and impulses in the field.

Architecture of the Essential - Pirkko Tuukkanen 1994

"In the personality of Alvar Aalto, idealism and realism combined like the poles of a dynamo whose opposing forces form the source of its energy. He was a creative artist and idealist for whom social and technical issues were also at the very core of his architectural oeuvre. A significant, but less known phase of Aalto's life work occurred during and

immediately after the 2nd World War, the subsequent reconstruction period of Finnish society. The nation was in a state of crisis, material and technical resources down to a minimum, but Aalto reacted to this situation energetically, realistically and with a great deal of optimism, developing innumerable projects from simple standard housetypes to large-scale reconstruction and planning strategies. The extreme circumstances following the aftermath of war forced people to re-evaluate what was essential and necessary and to eliminate all excess. An inventive mind might manage to create more from less. The present state of the world is also in a situation which requires serious evaluation and balancing of values and resources. This year's symposium is held in a climate of economic and social upheaval. In rich, industrial countries, the 'consumer fling' is over and the global balance is precarious to say the least. We have chosen the title of the symposium to stress the need

to discuss what should be the essence of the art and technique of building when all that one can afford are the basic essentials. This discussion does not revolve around questions of architectural style but rather on the fundamental material and spiritual living conditions vital for our culture to survive and prosper. Alvar Aalto's partner, Elissa Aalto, was a central figure in the organisation of all the symposiums since 1976. She took part actively also in the planning of this year's symposium until her death in Spring 1994"--Foreword.

1920. The few buildings he was able to design during the 1920s, when he also spent much of his time painting and writing, brought him to the forefront of modern architecture, though it wasn't until after World War II that his epoch-making buildings were constructed, such as the Unité d'Habitation in Marseilles and the Church of Notre Dame du Haut in Ronchamp. Introductory essays explore the architect's life and work, touching on family and background as well as collaborations with other architects. The book presents the most important works in chronological order, with descriptions of client and/or architect wishes, construction problems, and resolutions.

Post-Digital, Post-Internet Art and Education - Kevin

Tavin 2021-06-28

This open access edited volume provides theoretical, practical,

and historical perspectives on art and education in a post-digital, post-internet era. Recently, these terms have been attached to artworks, artists, exhibitions, and educational practices that deal with the relationships between online and offline, digital and physical, and material and immaterial. By taking the current socio-technological conditions of the post-digital and the post-internet seriously, contributors challenge fixed narratives and field-specific ownership of these terms, as well as explore their potential and possible shortcomings when discussing art and education. Chapters also recognize historical forebears of digital art and education while critically assessing art, media, and other realms of engagement. This book encourages readers to explore what kind of educational futures might a post-digital, post-internet era engender.

It offers a suite of case studies that are linked by elective affinities, an immediate and intuitive accordance between both the activists and the authors despite their differences. All actors tend to reflect a similar concern for their direct environment in proposing and documenting utopian forms which are also dealing with the past and present with a form of tenderness for the "here and there". This shared sympathetic interest explains why the book also corresponds to a form of engaged scholarship. Alvar Aalto - Patricia de Muga 2007

Alvar Aalto (1898-1976) is the most prestigious Finnish architect of the last century, and the father of Nordic Modernism. He once said, "God created paper for the purpose of drawing architecture on it. Everything else is at least for me an abuse of paper." In the U.S. Aalto's critical reception began with his design for the Finnish Pavilion at the 1939 World Fair in New York: Frank Lloyd Wright described it as a "work of genius." After World War II, Aalto also designed MIT's student dormitory. Prior to this, the architect's Paimio Sanatorium (1929) and Viipuri

Library (1935), both in Finland, had already attracted international praise. He was also an outstanding town planner, painter and sculptor. Aalto's Modernism entailed the use of natural materials, warm colors, and undulating lines, and he is considered an important early exponent of Organic Design as a result. Of his design work outside of architecture, Aalto's vases, lamps, glassware and laminated bent-plywood furniture (pioneered and produced through the design company he co-founded, Artek) are equally esteemed. Iconic pieces include the Savoy Vase, the Paimio Chair and the Beehive Lamp. This monograph on Aalto's highly collectible furniture designs expands our understanding of the diverse abilities of this influential architect/designer.

utilising the methodology of 'paradigm' (or 'in the manner of'). Roger Tyrrell explains how the approach of each architect is defined by the three sub-frames of the paradigm: that of the 'origin' (arche), that of 'revealing' (techne), and that of 'the poetic conjunction', in order to gain a holistic understanding of the experiential or phenomenological predisposition of the three architects. Using this method the author describes the commonalities and distinctive qualities of the architecture and design methods of Aalto, Utzon and Fehn. The final chapter projects the intellectual heritage of the three protagonists into the contemporary world, examining the work of practices from the UK, Norway and the USA that each extend this particular way of making place.

Alvar Aalto and the Future of Architecture - Robert Cody
2022-09-09

In the contemporary practice of architecture, digital design and

fabrication are emergent technologies in transforming how architects present a design and form a material strategy that is responsible, equitable, sustainable, resilient, and forward-looking. This book exposes dialogue between history, theory, design, construction, technology, and sensory experience by means of digital simulations that enhance the assessment and values of our material choices. It offers a critical look to the past to inspire the future. This new edition looks to Alvar Aalto as the primary protagonist for channeling discussions related to these topics. Architects like ALA, Shigeru Ban, 3XN, Peter Zumthor, and others also play the role of contemporary guides in this review. The work of Aalto and selected contemporary architects, along with computer modeling software, showcase the importance of comprehensive design. Organized by the five Ts of contemporary architectural discourse—Typology, Topology,

Tectonics, Technic, Thermodynamics—each chapter is used to connect history through Aalto and develop conversations concerning historical and contemporary models, digital simulations, ecological and passive/active material concerns, construction and fabrications, and healthy sensorial environments. Written for students and academics, this book bridges knowledge from academia into practice and vice versa to help architects become better stewards of the environment, make healthier and more accountable buildings, and find ways to introduce policy to make technology a critical component in thinking about and making architecture.

As the founding director of the Bauhaus, Gropius made inestimable contributions to his field, to the point that knowing his work is crucial to understanding Modernism. His early buildings, such as Fagus Boot-Last Factory and the Bauhaus Building in Dessau, with their use of glass and industrial

On the Philosophy of Central European Art - Max Rynnänen 2020-11-17

This book is an introduction to the history of the concept and

the institution of (fine) art, from its ancient Southern European roots to the establishment of the modern system of the arts in eighteenth century Central Europe. It highlights the way the concept and institution of (fine) art, through colonialism and diaspora, conquered the world. Rynnänen presents globally competing frameworks from India to Japan but also describes how the art system debased local European artistic cultures (by women, members of the working class, etc) and how art with the capital A appropriated not just non-Western but also Western alternatives to art (popular culture). The book discusses alternative art forms such as sport, kitsch, and rap music as pockets of resistance and resources for future concepts of art. Ultimately, the book introduces nobrow as an alternative to high and low, a new concept that sheds light on the democratic potentials of the field of art and invites reader to rethink the nature of art.
