Master Ebrahim: the Forgotten Ace Clarinetist - Surjit Singh 2021-04

Master Ebrahim (1915-1980) was an Indian clarinetist. He was trained in Hindustani classical music. He performed ragas as a solo artist many times a month on All India Radio, Bombay from 1936 to 1974. He also gave instrumental support to many All India Radio Programs such as songs, plays, special programs in Hindi, Gujarati and Marathi. He was a staff artist at HMV (now Saregama) from 1942 onward. He played instruments for thousands of Hindi film songs with famous singers such as Lata and Rafi, and, with many composers such as Naushad and Shankar Jaikishan. While at HMV, he also produced instrumental versions of famous Hindi film songs on the clarinet. His tunes were regularly used by Radio Ceylon (now Sri Lanka Broadcasting Corporation) in their daily programs such as Saaz Aur Awaaz. Hundreds of his recordings were issued on 78 rpms, audio cassettes, audio CDs, two EPs and one LP. He is probably the only Indian clarinetist on whose work a doctoral dissertation was produced at an American university. His legacy is being carried forward by his three sons, Salim Ajmeri, Farooq Ajmeri and Iqbal Ajmeri. They have continued working with all the major singers and composers providing instrumental support for their compositions, filmi and non-filmi. This book traces the journey of Master Ebrahim from his home town Ajmer to his life and work in Bombay in great detail. The book is based on interviews with his son Iqbal Ajmeri and a huge amount

Music and Arts in Hyderabad Deccan - Kamalakar Pasupuleti 2017-04-30
Over a thousand people visit the historic city every week, hiking through the ruins of Golconda fort, or gazing at the spectacular Chowmohalla palace. Enthusiastic tour guides deliver tales about the two famous courtesans of that era: Taramati and Premamati, little knowing that the city had a number of courtesans who migrated from different parts of the country, made this city their home, and sang and danced for years. During the times, courtesans were the entertainers for the masses; they were the celebrities in functions, small and big; but with the advent of the talkie, they went into oblivion. The book uncovers details about the courtesans of the era, their mujras, their life style, and about musicians who existed until the fall of Hyderabad in 1948. It also gives an account

of singers and dancers who visited the city and gave memorable performances during the time. Further, the book covers various other forms of stage entertainment such as folklore and drama, and cinema. Indian Book Industry - 1987

Electromagnetics for Electrical Machines - Saurabh Kumar Mukerji 2018-10-08

Electromagnetics for Electrical Machines offers a comprehensive yet accessible treatment of the linear theory of electromagnetics and its application to the design of electrical machines. Leveraging valuable

classroom insight gained by the authors during their impressive and ongoing teaching careers, this text emphasizes concepts rather than numerical methods, providing presentation/project problems at the end of each chapter to enhance subject knowledge. Highlighting the essence of electromagnetic field (EMF) theory and its correlation with electrical machines, this book: Reviews Maxwell's equations and scalar and vector potentials Describes the special cases leading to the Laplace, Poisson's, eddy current, and wave equations Explores the utility of the uniqueness, generalized Poynting, Helmholtz, and approximation theorems Discusses the Schwarz-Christoffel transformation, as well as the determination of airgap permeance Addresses the skin effects in circular conductors and eddy currents in solid and laminated iron cores Contains examples relating to the slot leakage inductance of rotating electrical machines, transformer leakage inductance, and theory of hysteresis machines Presents analyses of EMFs in laminated-rotor induction machines, three-dimensional field analyses for three-phase solid rotor induction machines, and more Electromagnetics for Electrical Machines makes an ideal text for postgraduate-level students of electrical engineering, as well as of physics and electronics and communication engineering. It is also a useful reference for research scholars concerned with problems involving electromagnetics.
