**Behind the Green Card** - Donald S. Dobkin 2013

Behind the Green Card explodes the innumerable myths and bogeymen that obscure the reality of US immigration policy. Blinded by

misguided 'national security interests, ' the United States has codified a series of unworkable and irresponsible laws which make this country weaker, poorer and less secure than ever. Through the elimination of both a huge marketplace and enormous supply of labor, the US struggles to regain economic growth while other developed nations, through sensible immigration policies, forge ahead

### **An Introduction to Marriage and Family**

**Therapy** - Joseph L. Wetchler 2014-08-27

Now in its second edition, this text introduces readers to the rich history and practice of Marriage and Family Therapy, with 32 professionals from across the US presenting their knowledge in their areas of expertise. This blend of approaches and styles gives this text a unique voice and makes it a comprehensive resource for graduate students taking their first course in Marriage and Family Therapy. The book is divided into three sections: Part 1 focuses on the components on which 21st

century family therapy is based and summarizes the most recent changes made to not only therapeutic interventions, but to the very concept of "family." Part 2 presents an overview of the 7 major theoretical models of the field: structural, strategic, Milan, social constructionist, experiential, transgenerational, and cognitive-behavioral family therapy. Each chapter in this section • Focuses on the founder of the theory, its theoretical tenants, and its key techniques • Shows how the model focuses on diversity • Presents the research that supports the approach Part 3 addresses specific treatment areas that are common to marriage and family therapists, such as sex therapy, pre-marital therapy, research, and ethics and legal issues. As an introduction to the field of Marriage and Family Therapy, this volume stands above the rest. Not only will readers gain an understanding of the rich history of the field and its techniques, but they will also see a complete picture of the context in which families

are embedded, such as gender, culture, spirituality, and sexual orientation. This knowledge is the key to understanding what differentiates Marriage and Family Therapy from individual psychotherapy. Glossaries, case studies, tables, figures, and appendices appear generously throughout the text to present this information and give students a thorough overview to prepare them for their professional lives.

**Policy Paradigms, Transnationalism, and Domestic Politics** - Grace Darlene Skogstad 2011-01-01

Policy Paradigms, Transnationalism, and Domestic Politics offers a variety of perspectives

on the development of policy paradigms -- the ideas that structure thinking about what can and should be done in a policy domain. In this collection, international experts examine how both transnational actors and domestic politics affect the structuring of these paradigms. As well as theoretical chapters, this volume includes six case studies showing ideas at work in a diverse range of policy domains from the recognition of same-sex unions to risk regulation of genetically modified organisms. These qualitative analyses show how transnational activities shape policy paradigms by building consensus on ideas about feasible and desirable public policies across authoritative decision-makers. Expertly researched and assembled, *Policy Paradigms, Transnationalism, and Domestic Politics* provides insight into the conditions under which different transnational actors can bring about changes in the core ideas that affect public policy development. -- Book Description from Website.

### **The Dysfunctional Politics of the Affordable Care Act** - Greg M. Shaw 2017-05-24

While analyzing the contentious debate over health care reform, this much-needed study also challenges the argument that treating medical patients like shoppers can significantly reduce health expenditures. • Explains why the two political parties have staked out such different positions on health care reform • Documents what the public knows about the Affordable Care Act and how individuals' party identification

significantly affects their knowledge • Challenges the arguments for consumer-driven health care plans by gathering evidence from numerous studies of consumer behavior under various kinds of insurance plans • Offers a well-informed critique of the political arguments surrounding the expansion of Medicaid, showing how this policy diffusion leverages the weak arguments and evidence for consumer-driven health care plans

*Towards an Increased Security* - Elena G.

Popkova 2022

This book aims to show that modern socio-economic and entrepreneurial systems are on the path to the increase of security and to determine the obstacles they face on this path, as well as determine the opportunities for overcoming these obstacles. The purpose of this book is to study new achievements in the sphere of the provision of security. The originality of this book consists in the development of the fundamental basis of the provision of modern socio-economic systems' security through development and application of the new classification of the directions of provision of security--food and ecological, information and technological, and personnel and intellectual--and their systemic consideration. Five parts of this book elaborate on progressive green innovations in agriculture and the modern experience of food security provision; legal regulation of sustainable development and environmental security; economic security of

regions and green innovations in natural resources management; technological security in the digital environment, data protection and information security; and security and the priority for personnel management and intellectual property protection. The target audience of this book are scholars, who will find in it the fundamental inventions and empirical studies of the international experience of security provision; representatives of public authorities, who will find in the book the recommendations on monitoring and regulation of food and ecological, information and technological, and personnel and intellectual security; and subjects of entrepreneurship, who will find in the book the applied solutions for corporate management of security.

**The Green Tiger** - Barbara Goldoftas  
2005-12-22

The Philippines was once famous for the beauty of its reef-ringed islands, white beaches, and lush forests. In less than a half-century, its forests were felled, its oceans over-fished, and its coral reefs destroyed. The rapid harvest of once-abundant resources has brought droughts, deadly flash floods, and the collapse of vital fisheries. As the rural economy weakened and millions migrated to cities, they overwhelmed the urban infrastructure. Today, the Philippines stands as an example of the profound and sweeping consequences of ecological decline. In *The Green Tiger*, Barbara Goldoftas documents this tragic trajectory. But hers is not a story of hopelessness and inevitable defeat. In lyrical, unflinching prose, she traces the struggle for conservation in the Philippines, from isolated villages to large cities, and in the process illustrates the surprising ways in which conservation and economic growth can

effectively co-exist.

*Gender, Intersections, and Institutions* - Louise K Davidson-Schmich 2017-09-28

Germany serves as a case study of when and how members of intersectional groups—individuals belonging to two or more disadvantaged social categories—capture the attention of policymakers, and what happens when they do. This edited volume identifies three venues through which intersectional groups are able to form alliances and generate policy discussions regarding their concerns. Original empirical case studies focus on a wide range of timely subjects, including the intersexed, gender and disability rights, lesbian parenting, women working in STEM fields, workers' rights in feminized sectors, women in combat, and Muslim women and girls.

### **The 48 Laws Of Power** - Robert Greene

2010-09-03

THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power.

\_\_\_\_\_ (From the Playboy interview with Jay-Z, April 2003)

PLAYBOY: Rap careers are usually over fast: one

or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In *The 48 Laws of Power*, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

*LGBTQ Family Building* - Abbie E. Goldberg

2022-04-26

From surrogacy and adoption, to transgender pregnancy and finding child care, parenting as an LGBTQ person is complex. This book is an authoritative, comprehensive, and easy-to-read guide to parenthood and family building for LGBTQ people. The path to becoming a parent is

complicated for LGBTQ people. Some LGBTQ people don't consider parenthood because of stereotypes and barriers, while others are interested in parenthood but unsure about the first steps or overwhelmed by the path to take. Still others are discouraged by the attitudes of their family, community, or religion. This book provides LGBTQ parents and prospective parents with the detailed, evidence-based knowledge they need to navigate the transition to parenthood, and help their children thrive. Dr. Abbie E. Goldberg, psychologist and researcher, uses the results of her LGBTQ Family Building Project to help challenge traditional beliefs that have often been weaponized against LGBTQ people to prevent or discourage them from becoming parents. Dr Goldberg walks readers through the various steps and decision points in becoming a parent, describes key research findings on family building, and offers key questions and reader-friendly checklists to easily enable readers to evaluate the LGBTQ

friendliness and overall “fit” of adoption agencies, health care providers, day cares, and other institutions.

*Analysing Families* - Alan Carling 2005-07-05

While the family and its role continues to be a key topic in social and government policy, much of the literature is concerned with describing the dramatic changes that are taking place. By contrast, *Analysing Families* directly addresses the social processes responsible for these changes - how social policy interacts with what families actually do. Topics covered include: \* the relationship between morality and rationality in the family context \* the variety of contemporary family forms \* the purposes and assumptions of government interventions in family life \* the relationship between different welfare states and different ideas about motherhood \* 'Third Way' thinking on families \*

divorce and post-divorce arrangements \* lone parenthood and step-parenting \* the decision to have children \* the economic approach to understanding family process \* the legitimacy of state intervention in family life. With contributions from the UK, and North America, *Analysing Families* provides the framework within which to understand an increasingly important element in social policy.

**Law, Religion and the Family in Africa** - Dr M Christian Green 2021-12-31

The family is a crucial site for the interaction of law and religion the world over, including Africa. In many African societies, the family is governed by a range of sources of law, including civil, constitutional, customary and religious law.

International law and human rights principles have been domesticated into African legal systems, particularly to protect the rights of women and children. Religious rites and rituals govern sexuality, marriage, divorce, child-rearing, inheritance, intergenerational relations and more in Christianity, Islam and indigenous African custom. This book examines the African family with attention to tradition and change, comparative law, the relation of parents and children to the state, indigenous religion and customary law, child marriage and child labour and migration, diaspora and displacement. Psychological and Behavioral Decision Making of Green Consumption - Ruyin Long 2022-11-11

*Green Carrot - America's Work Visa Crisis* - Rajiv Dabhadkar

The book is dedicated to the real life issues in the process of human migration. It discusses people movement that is tied to immigration and trade policy, where workers are treated as a

commodity and is not just about selling a product or a service. It is about finding the future. It explores the future of the workers, the corporations and the society at large. The primary objective however is in finding the future. Not just a future in general, but specific futures for the individuals under the care of policies that govern people movement. The focus is the future in the sense that it makes a prediction about where the future lies and then takes specific steps to make that future happen. That is where the subject of human migration comes in. The globalized political and economic system creates illegality by displacing people and then denying the workers rights and equality as they have to do what they have to do in order to survive. Globalization forces people into migration into countries where the ideas of divide and rule have been codified as a legal justification for the injustices. Inequality therefore is re-created and re introduced by a global economic system. In the realm of social

reality - this social inequality creates a caste system, where one class of workers is pitted against the other for personal gain. Where when one side of the coin gets tainted, the other side shines brightly, putting the society at large in a conundrum. This book examines the function of social inequality in a modern world of high-tech guest workers and India's increasing dependence on exporting people to the labor pool in the global North. This book is titled Green Carrot - America's Work Visa Crisis in recognition of this reality. While Indian workers serving with employers in the United States has been used as a case study, it aims to drive home a point - Should the human migration exports rest only on the economic needs or should they be more focused on the human rights of its workers? Through the book an attempt is made to explore the politics of the debate over immigration and trade policies between India and the United States. The book examines closely the cultural factors associated with the

brokerage of intellectual capital and rights to intellectual property - two distinct yet, vulnerable areas in the political debate on immigration reform. The book examines body shopping as a business model that promotes the brokerage of intellectual capital and ends with the need for innovation, bringing focus on generating intellectual property. The book begins with examining what it means to be an indentured guest worker in labor bondage with a foreign employer - how immigration status is used to keep people vulnerable, to criminalize them and punish them when they try to improve their conditions. The narrative travels to examine how the visa status is used to control the movement of its foreign employee and how the brokerage of intellectual capital allows subjugation for personal gain and its consequences on family life. The book traces back in history to explore America's dependence on foreign labor and examines how the present day system of body shopping in fact creates an

economic system that benefit from the changes causing displacement, and also benefits from the labor displacement produces, especially those on the foreign work visas. It traces the development of the employer lobby set up to win expansion of the work visa programs. How the immigration policies have all but been about low salaries for foreign workers, excluding the local workers from competing for jobs thus dividing the work forces Finally the book suggests some alternatives, always the hardest part in the immigration debate. It concentrates on some of the most progressive ideas, which have been put forward by immigration and human rights activists.

**Climate Change-Resilient Agriculture and Agroforestry** - Paula Castro 2019-01-24

This book collects wide-ranging contributions such as case studies, reviews, reports on technological developments, outputs of research/studies, and examples of successful projects, presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change. It brings the topic of ecosystem services closer to education and learning, as targeted by the Framework Convention on Climate Change and the Paris Agreement, the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020. Climate change and its impacts on agriculture and agroforestry

have been observed across the world during the last 50 years. Increasing temperatures, droughts, biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems' resilience to the effects of climate change. As such, there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever-changing climate conditions, and to preserve habitats and ecosystems services.
