**Strategy and Management of Industrial Brands** - Philippe Malaval  
2012-12-06

Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

**Electrical Power Cable Engineering** - William A. Thue 2003-06-20  
Electrical Power Cable Engineering, Second Edition remains the foremost reference on low- and medium-voltage electrical power cables, cataloging technical characteristics and assuring success for cable manufacture, installation, operation, and maintenance. While segments on electrical cable insulation and field assessment have been revamped to reflect industry transformations, new chapters tackle distinctive topics like the location of underground system faults and the thermal resistivity of concrete, proving that this expanded edition lays a sound foundation for engineering decisions. It deconstructs the external variables affecting conductor, insulation, and shielding design.

**Twelve Years a Slave** - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Electric Cables Handbook** - BICC Cables Ltd 1997-12-08  
Electric Cables Handbook provides a comprehensive and substantial coverage of all types of energy cables—from wiring and flexible cables for general use, to distribution, transmission and submarine cables. It includes information on materials, design principles, installation, operating experience and standards, and several appendices contain extensive data tables on commonly used cable types and their properties. Electric Cables Handbook is an extensive source of up-to-date and

essential information for electrical engineers, contractors, supply authorities and cable manufacturers.

**The Pluto System After New Horizons** - S. Alan Stern 2021-08-10  
Once perceived as distant, cold, dark, and seemingly unknowable, Pluto had long been marked as the farthest and most unreachable frontier for solar system exploration. The Pluto System After New Horizons is the benchmark research compendium for synthesizing our understanding of the Pluto system. This volume reviews the work of researchers who have spent the last five years assimilating the data returned from New Horizons and the first full scientific synthesis of this fascinating system.

**On the Macroeconomic Consequences of Over-Optimism** - Paul Beaudry 2018-05-30

Is over-optimism about a country's future growth perspective good for an economy, or does over-optimism also come with costs? In this paper we provide evidence that recessions, fiscal problems, as well as Balance of Payment-difficulties are more likely to arise in countries where past growth expectations have been overly optimistic. To examine this question, we look at the medium-run effects of instances of over-optimism or caution in IMF forecasts. To isolate the causal effect of over-optimism we take an instrumental variables approach, where we exploit variation provided by the allocation of IMF Mission Chiefs across countries. As a necessary first step, we document that IMF Mission Chiefs tend to systematically differ in their individual degrees of forecast-optimism or caution. The mechanism that transforms over-optimism into a later recession seems to run through higher debt accumulation, both public and private. Our findings illustrate the potency of unjustified optimism and underline the importance of basing economic forecasts upon realistic medium-term prospects.

**The Future of Lifelong Learning and Work** - D. W. Livingstone 2008  
Concern with learning throughout life has become pervasive in market-driven societies. Will most workers need to become more continuous learners in a new knowledge-based economy or will much of their learning be ignored or devalued in relation to their work? These papers critically assess dominant views of learning and work. The book is unique in examining changing relations between learning and work in terms of unpaid work and informal learning as well as paid employment and formal education. The book is organized in terms of five basic themes. GENERAL PERSPECTIVES assesses learning and work relations in the "new economy" in terms of different concepts of learning and work and

contending theories of education-employment relations. SOCIAL JUSTICE looks at uneven dislocating effects of globalization on gender discrimination in information technology work, working conditions in the public sector, student transitions to work, and disability in work and learning. PRECARIOUS EMPLOYMENT analyzes the general working conditions and learning constraints of temporary, part-time workers, with a particular focus on call centre and garment workers.

APPRENTICESHIPS offers an international review of the nature and future trajectory of apprenticeship systems and a case study of the challenges of a high school trades preparation program. MULTIPLE LITERACIES identifies needed abilities including coping with diverse cultures, languages and environmental change, as well as use of information technologies. The material in this volume emerges from the conference on "The Future of Lifelong Learning and Work" held at the University of Toronto in June, 2005. This conference was one of the clarifying efforts of the Work and Lifelong Learning international research network based in Canada. The contributions were produced by members of this network as well as associates of the Centre for the Study of Education and Work at OISE/UT, and are complemented by the work of selected, leading international voices in the field of learning and work. *New Orleans and the Global South: Caribbean, Creolization, Carnival* - Ottmar Ette 2016-12-01

Innerhalb der USA gilt New Orleans seit jeher als die „unamerikanischste“ Stadt, als exotisch und anders, gar als „sozio-geographischer Unfall“. Hier überkreuzen sich nicht nur die Einflüsse verschiedener Kolonialkulturen, sondern auch die Routen des atlantischen Sklavenhandels und der asiatischen Arbeitsmigration und nicht zuletzt die ideellen wie materiellen Transferbewegungen zwischen den beiden Amerikas. Der vorliegende Band macht es sich zur Aufgabe, diese vielfältigen transarealen Zirkulationsprozesse zu analysieren und das Potential New Orleans' zur paradigmatischen Metropole des Globalen Südens auszuloten. Im Fokus stehen verschiedene Formen der kulturellen Kreolisierung, wie sie sich in der Sprache, der Literatur, der Musik, aber auch in Alltagsphänomenen wie dem Karneval oder Computerspielen manifestieren. Within the USA, New Orleans has long been considered the 'un-American' city, seen as exotic and different, even as a 'socio-geographical accident'. It is a crossroads not only for the influences of different colonial cultures but also for the routes of the Atlantic slave trade and immigration of Asian workers, and not least for material and non-material transfer between the two Americas. This volume seeks to analyse these manifold transareal circulation processes and to explore New Orleans's potential as a paradigmatic metropolis of the Global South. The focus is on different forms of creolisation as manifested in language, literature and music, but also in everyday phenomena such as Carnival or computer games.

*The Lonely Nightshades* - Lea Malot 2016-01-06

Welcome to St. Mary's, Woodborough's biggest mental institution. Meet Klaudia and her friends, all determined to get better to get out of here... Or to escape by other ways. They're nightshades- these flowers that evolve from being pale to a deep shade of purple, those plants that evocate dark thoughts and moments, they are born innocent, until all of them grow into something so dark and twisted it's almost unrecognisable. And, in the same manner, life would be taken away from them, much... Much too soon.

*Social Professional Activities and the State* - Peter Herrmann 2007

The guiding question of this work is the following: In which way, if at all, can we define a framework that allows a comparative view on social professional activity in an international perspective? Going beyond positivist research usually means to look for qualitative standards, however remaining caught by taking individual professions in a national setting from one country for granted and looking from what we know for 'counterparts' and/or 'partners' in other countries. To avoid the subsequent shortcoming of an underlying 'professional rigidity' we face the need of developing a functional perspective, focusing on the societies in which Social Professional Activities (SPA) emerge in their respective particular national patterns. This means, however, to start by defining 'the social' as determining societies in general, looking from there at different national patterns -- pragmatically but as well structurally the nation state will be taken as point of reference. In such a perspective, several current concepts have to be fundamentally questioned as far as the mainstream consensus is concerned. Terms in question are in particular: the social, professions and social problems - this is especially necessary when it comes to developing an international perspective. Despite the need of looking for a general definition of the social, there is in particular a more specific need for debating the understanding of

different strands of activities that are - in the widest sense - captured as social professions, for example social work, community/youth work, nursing and care professions, but as well social management and social action (especially the latter pointing on the problematique of professionalisation in strictu sensu). International comparative research of social professional activities does not fail (primarily) because of the huge variety of national regimes and regulations. The actual reason is the fundamentally different point of departure, expressing various national traditions of the reasoning on the state - a reasoning being at the end a practical reasoning. In other words, we have to recur on the different national understanding of 'social contracts'. This approach allows taking a dialectical perspective in order to revisit the actual character of social professional activities. It is the practical confrontation of the individual with his/her environment that constitutes processes of socialisation.

*Montreal's Expo 67* - Bill Cotter 2020-02-03

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

*The Dissemination of News and the Emergence of Contemporaneity in Early Modern Europe* - Brendan Dooley 2016-12-05

Modern communications allow the instant dissemination of information and images, creating a sensation of virtual presence at events that occur far away. This sensation gives meaning to the notions of 'real time' and of a 'present' that is shared within and among societies" in other words, a sensation of contemporaneity. But how were time and space conceived before modernity? When did this begin to change in Europe? To help answer such questions, this volume looks at the exchange of information and the development of communications networks at the dawn of journalism, when widespread public and private networks first emerged for the transmission of political news. What happened in Prague quickly reached Venice, and what happened in Naples was soon the talk of Hamburg. Gradually, enough became known about daily affairs around Europe for people to begin to think in terms of a 'shared present'. An analysis of contemporaneity adds a new dimension to the study of the origins of news and media history, as well as to the origins of a European identity. For whilst our understanding of the circulation of manuscript newsletters and printed reports has increased in recent years, much less is known about the impact of this burgeoning journalism on a pan-European scale. Each essay in this volume explores the ways in which this international impact helped foster a developing sense of contemporaneity that encompassed not just single countries, but Europe as a whole. Taken together the collection offers the first panoramic view of the way stories were born, grew and matured during their transmission from source to source, from country to country. The results published here suggest that a continent-wide network, including manuscript and print, for the transmission of stories from place to place, existed and was effective.

*Festivals and the French Revolution* - Mona Ozouf 1991

Festivals and the French Revolution--the subject conjures up visions of goddesses of Liberty, strange celebrations of Reason, and the oddly pretentious cult of the Supreme Being. Every history of the period includes some mention of festivals; Ozouf shows us that they were much more than bizarre marginalia to the revolutionary process.

*The Rejection of Consequentialism* - Samuel Scheffler 1994-08-11

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that

there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

*Encyclopedia of Social Theory* - Austin Harrington 2006

"The Encyclopedia of Social Theory provides a reference source for students and academics, embracing all major aspects of the field. Written by more than 200 internationally distinguished scholars, almost 500 entries cover core contemporary topics, concepts, schools, debates, and personalities in the history of the discipline. Special attention is paid to leading schools and debates, with shorter entries reserved for biographies of key theorists and definitions of key terms. Entries are fully cross-referenced and contain concise listings for further reading. A comprehensive index guides the reader to further divisions of contents."--BOOK JACKET.

**Die Schule Des Aristoteles** - Fritz Wehrli

**Electrical Installation Guide** - Commission électrotechnique internationale 2008

**Victorian Glassworlds** - Isobel Armstrong 2008-04-24

Isobel Armstrong's startlingly original and beautifully illustrated book tells the stories that spring from the mass-production of glass in nineteenth-century England. Moving across technology, industry, local history, architecture, literature, print culture, the visual arts, optics, and philosophy, it will transform our understanding of the Victorian period. The mass production of glass in the nineteenth century transformed an ancient material into a modern one, at the same time transforming the environment and the nineteenth-century imagination. It created a new glass culture hitherto inconceivable. Glass culture constituted Victorian modernity. It was made from infinite variations of the prefabricated glass panel, and the lens. The mirror and the window became its formative elements, both the texts and constituents of glass culture. The glassworlds of the century are heterogeneous. They manifest themselves in the technologies of the factory furnace, in the myths of Cinderella and her glass slipper circulated in print media, in the ideologies of the conservatory as building type, in the fantasia of the shopfront, in the production of chandeliers, in the Crystal Palace, and the lens-made images of the magic lantern and microscope. But they were nevertheless governed by two inescapable conditions. First, to look through glass was to look through the residues of the breath of an unknown artisan, because glass was mass produced by incorporating glassblowing into the division of labour. Second, literally a new medium, glass brought the ambiguity of transparency and the problems of mediation into the everyday. It intervened between seer and seen, incorporating a modern philosophical problem into bodily experience. Thus for poets and novelists glass took on material and ontological, political, and aesthetic

meanings. Reading glass forwards into Bauhaus modernism, Walter Benjamin overlooked an early phase of glass culture where the languages of glass are different. The book charts this phase in three parts. Factory archives, trade union records, and periodicals document the individual manufacturers and artisans who founded glass culture, the industrial tourists who described it, and the systematic politics of window-breaking. Part Two, culminating in glass under glass at the Crystal Palace, reads the glassing of the environment, including the mirror, the window, and controversy round the conservatory, and their inscription in poems and novels. Part Three explores the lens, from optical toys to 'philosophical' instruments as the telescope and microscope were known. A meditation on its history and phenomenology, *Victorian Glassworlds* is a poetics of glass for nineteenth-century modernity.

**European Strategy on Invasive Alien Species** - Piero Genovesi

**Circles & Boundaries** - Kate Tarlow Morgan 2011

Literary Nonfiction. Cultural Studies. "Although the prevailing winds of thought continually warn and admonish us about the unreliability of narratives and narrators and the need to distrust them, all of the texts collected here are stories, in one form or another. But, very importantly, they are also stories about stories that never give up this very basic and ancient rite of passage, in which any story is, at the very least, also a commentary about itself. What had been a very deep conflict ('if the poetry comes out in a variety of forms, there is always certain punishment for the betrayal of one form by another,' as Morgan once wrote) finds resolution in the range and variety of the writing gathered here: stories, fable like pieces, fieldwork, anthropological investigation, literary criticism, scholarly research, reportage, and poetry"--from the afterword by Ammiel Alcalay.

**Approaches to the Construction of School Infrastructure in South Africa** - Donald C. Taylor 1992

*Cultural Studies and Education* - Rubén A. Gaztambide-Fernandez 2004  
*Cultural Studies and Education* is a timely introduction to cultural studies and the ways in which it can enrich both education scholarship and practice. An extensive field that in the last few decades has transformed many academic disciplines, cultural studies has yet to be fully considered by educators and education scholars. *Cultural Studies and Education* redresses this great shortcoming, bringing cultural studies and its implications for education to the fore. The book aims to serve three main purposes. First, it is an introduction for educators and education researchers to some of the most important theoretical debates and analytic frameworks that have shaped the field of cultural studies. Second, it offers an introduction to and examples of three important areas of inquiry in which education and cultural studies overlap: gender and queer studies; postcolonial and ethnic studies; and popular culture and youth studies. Third, it illustrates how education scholars have dealt with the conceptual challenges of cultural studies and how education offers unique perspectives and contributions to the broader debates in the field."

**Sissy Dreams: From Boyfriend to Girlfriend** - Paul Zante

Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.
