A Deadly Art: European Crossbows, 1250-1850 - Breiding, Dirk H. 2013

"The advent of the crossbow more than 2,500 years ago effected dramatic changes for hunters and warriors. For centuries, it was among the most powerful and widely used handheld weapons, and its popularity endures to this day. *A Deadly Art* presents a lively, accessible survey of the crossbow's "golden age," along with detailed descriptions of twenty-four remarkable examples. Beginning in the middle ages, the European aristocracy's enthusiasm for the crossbow heralded shooting competitions and pageants that featured elaborately decorated weapons bearing elegant embellishments of rare materials and prized artistry. In addition to being highly functional, these weapons were magnificent works of art. *A Deadly Art* includes fascinating descriptions of crossbows used by Margaret of Savoy and Holy Roman Emperors Maximilian I and Charles V, among others."--

The Deeds of Frederick Barbarossa - Otto I (Bishop of Freising) 2004

"The Deeds of Frederick Barbarossa" is the "official biography" of German king and Holy Roman Emperor Frederick I. This historical firsthand account was begun by his maternal uncle, Bishop Otto of Freising, the leading medieval church figure and notable historian, and continued by a less well known cleric, Rahewin. This chronicle is the single most important source for the early reign of Frederick Barbarossa and the most valuable biographical study to come out of the twelfth century. In a letter written to his uncle, Frederick recounted his life and the principal events of his reign. The first of the four books that constitute this account were written by Otto and cover events from 1075 to 1152, from the reign of Henry IV through that of Conrad III. The second book draws heavily on the letter, providing invaluable insight into Frederick's attempts to establish and consolidate the Hohenstaufen empire. The final two books, written by Rahewin, follow the emperor's reign through 1160, during which time Frederick restored order at home, recovered imperial control of Burgundy, and re-created an imperial party in Italy

Reckonings - Stephen Chrisomalis 2020-12-15
Insights from the history of numerical notation suggest that how humans write numbers is an active choice involving cognitive and social factors. Over the past 5,000 years, more than 100 methods of numerical notation--distinct ways of writing numbers--have been developed and used by specific communities. Most of these are barely known today; where they are known, they are often derided as cognitively cumbersome and outdated. In Reckonings, Stephen Chrisomalis considers how humans past and present use numerals, reinterpreting

historical and archaeological representations of numerical notation and exploring the implications of why we write numbers with figures rather than words.
