Financial Management - Eugene F. Brigham 2011

This textbook emphasizes the actions that a manager can and should take to increase the intrinsic value of the firm, by combining theory and practical applications. The collapse of the sub-prime mortgage market, the financial crisis, and the global economic crisis make it more important than ever for students and managers to understand the role that finance plays in a global economy, in their own companies, and in their own lives.

Valuation - Sheridan Titman 2008

Valuation: The Art and Science of Corporate Investment Decisions is the first textbook to offer an integrated approach to both project and enterprise valuation. The text goes beyond standard DCF analysis by

including additional valuation methods commonly used in practice, such as comparables, simulations (including Crystal Ball®), and real options. In addition, discussions are considered against the backdrop of other quantitative and qualitative corporate issues that affect valuation, including: Organizational structure and incentives: The text examines how the corporate decision-making process as well as the incentive system can positively or negatively affect valuation. Strategic analysis and real options: Real options are presented as a tool to complement executive intuition and provide a more disciplined evaluation process that focuses on creating value. Risk management and hedging: Risks associated with interest rate fluctuations, variable foreign exchange rates, and fluctuating commodity prices can create hedging and risk management opportunities that affect value. Financing: The ability to secure attractive financing terms is an important source of value, and readers should understand how financing opportunities influence the value of an investment opportunity. Irrational behavior: The text examines how limitations in cognitive abilities and biases in assessing abilities of key players can affect valuation.

Principles of Finance - Scott Besley 2005-10

The first course in finance for finance and business majors has traditionally focused solely on managerial (or corporate) finance. Now, many schools are indicating a need to introduce these students - particularly the non-finance business majors - to the other two major components of finance - institutions and investments - in this first course but at the same level of rigor as traditional financial management texts. With PRINCIPLES OF FINANCE, Scott Besley and Gene Brigham begin with a discussion of the principles of financial systems and business organizations, and move on to valuation concepts and corporate decision making (managerial finance). They conclude with coverage of investment fundamentals. Key chapters may be covered in a one-term course or supplemented with cases and outside readings for a two-term course. Chapters are written in a flexible, modular format, allowing instructors to cover the material in their favorite sequence.
