Finding the truth means risking everything. While trying to track down her brother, Sam discovers she isn't through with Marin quite yet. An attack proves that a traitor sympathetic to Marin remains active in the city, but training prevents Sam from finding answers. With the Thelns once more in the city, Elaine doesn't believe Sam should be involved in the search, which means she has to go off on her own. Doing so risks her position at the palace, but any other choice puts her brother in danger. Alec continues his studies and realizes how much he still has to learn at the university. Now that he knows some of the master physickers are also Scribes, he wants answers, but his search places him at odds with someone far more powerful than him. When Sam asks for his help with her quest to find the traitor, Alec has to make a dangerous decision and the fallout will change their lives in the city. Failure means more than another Theln attack upon the city-it means they might lose everything they have discovered about themselves.

Hippocrates Volume II #148 - Hippocrates 1923

Of the roughly seventy treatises in the Hippocratic Collection, many are not by Hippocrates (said to have been born in Cos in or before 460 BCE), but they are essential sources of information about the practice of medicine in antiquity and about Greek theories concerning the human body, and he was undeniably the Father of Medicine.

[Poisoned](#) - D. K. Holmberg 2018-03-27

Betrayed. Broken. Poisoned. No longer alone, Sam and Alec struggle to find time to continue their studies together. Sam knows that she is more than the lowborn she'd long believed, now living and training in the palace, but still doesn't feel as if she quite fits in. Worse, it seems as if Alec has moved on without her, preferring his new life in the university. Alec has quickly risen in rank, but that only draws attention to him. Learning from master physickers has its benefits, but there are dangers and he's not certain whether he can trust the new friends he's made. Evidence continues to mount of a conspiracy within the university, and it's one he'll need Sam's help in understanding. While Alec tries to reach out to Sam, she searches for Marin and answers that might unlock her full potential. What she finds instead is a threat to the safety in the city, protections that have long prevented the Thelns from reaching Verdholm, if they haven't already breached them. Together, they are the key to stopping Marin, but can they master their new places in the city in time?
