The Oxford Handbook of the Italian Economy Since Unification - Gianni Toniolo 2013-03-07

The Oxford Handbook of the Italian Economy Since Unification provides, for the first time, a comprehensive, quantitative "new economic history" of Italy.

The Determinants of Entrepreneurship - Jose L Garcia-Ruiz 2015-10-06

This study looks at entrepreneurial history from three angles: Entrepreneurial Typologies; Business Leaders; and Culture vs Institutions. The previous scarcity of material makes this collection of eight papers an invaluable resource and should encourage further analysis.

European Yearbook of Business History - Terry Gourvish 2019-05-23

First published in 1998, The European Yearbook of Business History publishes research and review articles in English on the history of private enterprises based in individual European countries as well as studies of transnational corporations. It also includes work on public and state corporations. Its scope is all of Europe, not merely the countries of the European Union, and its prime, but not exclusive, period of interest is the 19th and 20th centuries. The first issue includes reviews of the present state and future prospects of business history in most European countries, together with articles summarising current Japanese and American perspectives on the history of European industrial and commercial enterprises.

Labour History in the Semi-periphery - Leda Papastefanaki 2020-11-23

This collective volume aims at studying a variety of labour history themes in Southern Europe, and investigating the transformations of labour and labour relations that these areas underwent in the 19th and the 20th centuries. The subjects studied include industrial labour relations in Southern Europe; labour on the sea and in the shipyards of the Mediterranean; small enterprises and small land ownership in relation to labour; formal and informal labour; the tendency towards independent work and the role of culture; forms of labour management (from paternalistic policies to the provision of welfare capitalism); the importance of the institutional framework and the wider political context; and women's labour and gender relations.

Rethinking the History of Italian Fascism - Giulia Albanese 2022-03-11

In the last years, the discussion around what is fascism, if this concept can be applied to present forms of politics and if its seeds are still present today, became central in the political debate. This discussion led to a vast reconsideration of the meaning and the experience of fascism in Europe and is changing the ways in which scholars of different generations look at this political ideology and come back to it and it is also changing the ways in which we consider the experience of Italian fascism in the European and global context. The aim of the book is building a general history of Fascism and its historiography through the analysis of 13 different fundamental aspects, which were at the core of Fascist project or of Fascist practices during the regime. Each essay considers a specific and meaningful aspect of the history of Italian fascism, reflecting on it from the vantage point of a case study. The essays thus reinterrogates the history of Fascism to understand in which way Fascism was able to mould the historical context in which it was born, how and if it transformed political, cultural, social elements that were already present in Italy. The themes considered are violence, empire, war, politics, economy, religion, culture, but also antifascism and the impact of Fascism abroad, especially in the Twenties and at the beginnings of the Thirties. The book could be both used for a general public interested in the history of Europe in the interwar period and for an academic and scholarly public, since the essays aim to develop a provocative reflection on their own area of research.

La correspondencia en la historia. Modelos y prácticas de la escritura epistolar - Carlos Sáez, Antonio Castillo Gómez (eds.) 2002-01-01

Afirma Salinas en su "Defensa de la carta misiva y de la correspondencia epistolar", uno de los ensayos que componen El defensor (1948), que el invento de la carta es, por lo menos, tan valioso como la rueda en el curso de la humanidad. Desde los correos divinos de la antigua Mesopotamia hasta las modalidades contemporáneas de la epistolografía popular, las cartas y el oficio de su escritura constituyen una excelente azotea desde la que asomarse a la historia de las sociedades. La conveniencia de analizar las cartas en cuanto prácticas sociales sujetas a la dialéctica que todo ejercicio de escritura establece entre la norma que trata de regularlo y la libertad que desarrolla cada persona en el momento de escribir, así como la necesidad de abundar en la historia de los usos de una manifestación escrita que hasta hace poco había interesado casi exclusivamente en cuanto fuente de información, vertebran las páginas de este primer volumen de las Actas del VI Congreso Internacional de Historia de la Cultura Escrita (Alcalá de Henares, julio de 2001). De manera más amplia, el interés por la correspondencia como práctica social debe ponerse en relación con otros dos aspectos que también han marcado la reciente trayectoria de los estudios sobre cultura escrita: por un lado, la atención dispensada a la actividad manuscrita incluso en el período de la imprenta, sacando a flote un mundo historiográficamente oculto por el sol cegador del arte tipográfico; y por otro, la búsqueda de nuevos dominios del escribir que no fueran los habituales de la actividad oficial y

administrativa, sino los más próximos a la gente: las escrituras cotidianas y personales. Ambos giros han traído sabia nueva a este ámbito de la investigación y están contribuyendo a una comprensión más plena del papel desempeñado por la escritura en las respectivas sociedades históricas.

The Growth of the Italian Economy, 1820-1960 - Jon Cohen 2001-09-06

A brief, up-to-date account of Italy's transformation from an agrarian state to an industrial powerhouse.

Towards and Beyond the Italian Republic - Davide Cadeddu 2021-07-12

This book examines the historical process that led to the foundation of the Italian Republic and its constitution, viewed through the personal experiences and political reflections of Adriano Olivetti (between 1919 and 1960), general manager and president of the well-known typewriter manufacturer "Ing. C. Olivetti & C." An unbroken line of reasoning linked his maturing political reflections during the two post-war periods. The historical context of the 1950s did not prove to be very propitious, but the guidelines dispersed throughout the Italian cultural and political world from the movement that Olivetti founded were certainly seminal - generating a legacy of ideas that has only in part been recognized. What makes this study distinctive is the original approach to reading the history of Italy through Adriano Olivetti's eyes and thoughts, far from the more common Christian Democratic or Communist perspective of those years. It is simply another view of what the Italian Republic could be and was not.

L'industria come continuazione della politica - Paolo Fragiaco 2012

Aircraft Carrier Impero - Davide F. Jabes 2018-06-30

From 1941, Italy had been developing a top-secret project to install guided rocket weapons aboard aircraft carriers. Campini Caproni's revolutionary guided rocket weapon, the DAAC, which would later become Hitler's Henschel HS-117 Schmetterling (Butterfly), was the selected projectile. Classified intelligence on the V-1 flying bomb and other aircraft projects were acquired and then discarded when Ansaldo's naval architect, Lino Campagnoli (1911-1975), issued plans for the Impero battleship to be transformed into a modern fleet carrier. Previously unpublished documentation reveals how the last of the four state-of-the-art Littorio-class battleships, which was in advanced completion (hull components and engines installed), was destined for conversion into a modern aircraft carrier. This is an exhaustive historical review of the Impero and Regia Marina's (Royal Navy) developments as well as the dramatic story of the lack of co-operation and strategic insight with Regia Aeronautica before and during the war (1922-1943). Also, a final evaluation of the revolutionary Pugliese anti-torpedo system, based on unpublished German and Russian documentation, is assessed.

Evolution of Italian Enterprises in the 20th Century - Renato Giannetti 2009-06-10

During the first two-thirds of the 20th century the themes of sectorial structure and compared performance prevail in Italian economic historiography. In contrast, in the last part of the century attention is focused on the behavior of single economic actors and their micro-economic strategies. This book intends to act as a bridge between the two approaches, and reconstructs the secular journey of Italian industrial enterprise through an original study.

The Economic History of Italy 1860-1990 - Vera Zamagni 1993-10-28

This book gives a full account of the economic and social history of Italy since unification (1860), with an introduction covering the previous period since the Middle Ages. The Economic History of Italy represents a scholarly and authoritative account of Italy's progress from a rural economy to an industrialized nation. The book makes a broad division of the period into three parts: the take-off (1860-1913), the consolidation in the midst of two wars and a world depression (1914-47), and the great expansion (1948-1990). Professor Zamagni traces the growth of industrialization, and argues that despite several advanced areas Italy only became an industrialized nation after the Second World War, and that during the 1980s the South was still clearly behind the rest of the country. Zamagni analyses data both from a macroeconomic position, in looking at the growth of the finance sector, or the role of the State, and from a microeconomic position

when she draws conclusions from the changing population structure, or from the actions of individual businesses. Professor Zamagni reveals that even though the population more than doubled during this time the level of national income rose 19-fold, to move Italy from a peripheral status in Europe to a central position as a prosperous country. A central theme of the book is Professor Zamagni's argument that the Italian economy has been successful not by any great individuality of its own but by being flexible enough to incorporate the successes of other countries: Japan's integrated business network, for example, or Germany's financial structure. She places the industrialization of Italy in the international context by comparing Italy's GDP and other measures of prosperity at different times to the USA, Japan, the UK, France, and Germany. The book is based on original field-work by the author, and the many detailed but small-scale studies existing in Italian. Quantitative trends are described in more than 70 tables of data, while the book provides appendices containing chronologies of main events in various sectors and biographies.

Private Bankers in the Italian 19th Century - Luciano Maffi 2020-12-14

The book analyses the role of private bankers who were pivotal in modernizing the economic and financial system of Italy in the XIX century. To achieve this they needed to interact with the international haute banque to organize and place the public loans and the large investments associated with the joint-stock companies. The theme of reputation, which is currently at the centre of the historiographical debate, is fundamental for the study of the private banker figures, whose professional success is linked to the limitless trust accorded to them by their circle of personal contacts. Historiography has studied the role of Italian bankers in the trade, credit and international finance during the modern age (XVI-XVIII centuries), but it has not analysed the banking system in the XIX century and its national and international relations. The case study of Banca Parodi of Genova fills the historiographical gap concerning the role of private bankers and banking institutions in Italy, highlighting the network between the Parodi family and the international haute banque; one of the most emblematic cases is the Rothschild family. The book presents a re-elaborated series of unpublished data, placing them at the disposal of the scientific community and analyses the role of private bankers in the development of Italian banking institutions in the XIX century to launch a scientific debate.

Enterprise in the Period of Fascism in Europe - Harold James 2017-07-05

The essays in this volume consider the involvement of business corporations and of individual businessmen in the politics of the 1930s and 1940s: in the move away from the market and also from democracy, towards state control and authoritarianism, including the massive intervention of the state in property rights. How far did businesses attempt to guide this intervention for their own purposes, and to what extent did they succeed? This debate deals, centrally, with the role of German business, of banks, of industrial corporations, and of small tradesmen in the Nazi regime. An older discussion of how they may have facilitated the Nazi takeover has been supplemented here by an investigation into how they made the regime's policies possible, and the extent to which the profit motive drove them to participate - with sometimes more, sometimes less enthusiasm - in the politics of inhumanity. Such discussion has been given further impetus by legal action, initially in the United States, in the form of class action suits on behalf of the victims of Nazism. What do such legal and political debates mean for business history? What are the current responsibilities of business facing the consequences of historical action? And what lessons should be learned concerning the ethics of business behaviour? The contributions to this volume were originally presented as papers at a conference organised by the Society for European Business History in Paris in November 1998.

New Directions in Mediterranean Maritime History - Gelina Harlaftis 2017-10-18

This study seeks to correct the underrepresentation of Mediterranean maritime history in academic publications, in attempt to understand the multi-cultural and multi-ethnic environment in which maritime activity takes place, by compiling ten essays from maritime historians concerning Spain, France, Italy, Malta, Slovenia, Greece, Turkey, and Israel. The aim of the collection is to provide an insight into Mediterranean maritime history to those who could not previously access such information due to language barriers or difficulty securing non-English publications; some of the essays have translated into English specifically for this publication. The majority of the essays concern the Early Modern period, and the remainder concern the contemporary.

Explorations in the History of Machines and Mechanisms - Carlos López-Cajún 2016-05-15

This volume includes contributions presented at the Fifth IFToMM Symposium on the History of Machines and Mechanisms, held at Universidad Autonoma de Queretaro, Santiago de Queretaro, QRO, Mexico, in June 2016. It contains work on theories and facts concerning mechanisms and machines from antiquity to current times as viewed in the present day. Topics include modern reviews of past works; people, history, and their works; direct memories of the recent past; historic development theories; the history of the design of machines and mechanisms; developments of mechanical design and automation; the historic development of teaching; the history of schools of engineering and the education of engineers.

World of Possibilities - Charles F. Sabel 2002-05-16

This book retells the history of Western industrialization, revealing possibilities unexplored in the nineteenth century, variants of which have come to transform present day economies. It shows that economic actors have historically been more aware of the great strategic choices they faced than standard theory credits them with being, and this surprising acuity allows them to imagine and put into practice solutions which current theories of industrial organization have scarcely anticipated. The book is therefore at one and the same time a contribution to a substantive revision of the history of mechanized production and a propaedeutic in a form of explanation that approximates the knowledge of the actor to the knowledge of the theorist. The volume groups essays presented by a multinational team of historians and social scientists drawing on intensive primary research on a wide range of firms, regions, sectors and national economies in Western Europe and the United States from the eighteenth century to the 1990s.

Hitler and His Allies in World War Two - Jonathan Adelman 2020-03-25

In an area where in-depth studies of Hitler's relations with Nazi Germany's allies, and the failure of Nazi Germany to make more effective use of them during the war, are scant, this is a survey that looks at the Soviet Union, Japan, France, Italy, Spain, Romania and Hungary and their relationship to Nazi Germany. Using a comparative approach, seven case studies examine themes such as co-operation and resistance, military and economic aid, treatment of Jews, relations with the enemies and the popular sentiment towards Germany. Jonathan Adelman has provided students of the Second World War with a welcome mine of information and a unique perspective on a much-studied topic.

Iron Arm - John Joseph Timothy Sweet 2006-12

A detailed study of Italy's long-ignored tank force Explores the intersection of technology, war, and society in Mussolini's Italy Second only to Germany in number of tank divisions, first to create an armored corps Though overshadowed by Germany's more famous Afrika Korps, Italian tanks formed a large part of the Axis armored force that the Allies confronted--and ultimately defeated--in North Africa in the early years of World War II. Those tanks were the product of two decades of debate and development as the Italian military struggled to produce a modern, mechanized army in the aftermath of World War I. For a time, Italy stood near the front of the world's tank forces--but once war came, Mussolini's iron arm failed as an effective military force. This is the story of its rise and fall.

Resources and Infrastructures in the Maritime Economy, 1500-2000 - Gordon Boyce 2017-10-18

This book provides a study of both the physical and intangible frameworks that enabled maritime resources to flow and infrastructures to operate. The aim is to demonstrate the complexity and diversity of the legal, social, cultural, and institutional forces at work within maritime economics. Port development, planning, and policy-making constitute the physical frameworks, while agency structures and consular networks make up the non-physical factors under discussion. Both land and sea commodities are examined, including capital mobilised from other sectors, and a particularly pertinent maritime commodity, fish. Through case studies, theory-driven analysis, evidence from statistical data, and regional and national comparisons, it successfully illustrates the structure of resource flow and the shape of maritime economic activity on an international scale spanning the eighteenth, nineteenth, and twentieth centuries. Nations examined include Scotland, England, New Zealand, Italy, Denmark, plus several Nordic and Mediterranean states. The book consists of three sections: the first exploring intangible infrastructures and their components; the second, resource flow and economic development; and, finally, the physical infrastructures of the ports themselves.

Rulers, Guns, and Money - Jonathan A. Grant 2007-03-15

Challenging traditional views of arms dealers as agents of their own countries, Grant asserts that these firms pursued their own economic interests while convincing their home governments that weapon sales meant national prestige and influence. Grant tells how the resulting arms trade eventually led to an all-out arms race, and ultimately to war.
