The Great Gamble - Gregory Feifer 2009-01-06
The Soviet war in Afghanistan was a grueling debacle that has striking lessons for the twenty-first century. In The Great Gamble, Gregory Feifer examines the conflict from the perspective of the soldiers on the ground. During the last years of the Cold War, the Soviet Union sent some of its most elite troops to unfamiliar lands in Central Asia to fight a vaguely defined enemy, which eventually defeated their superior numbers with unconventional tactics. Although the Soviet leadership initially saw the invasion as a victory, many Russian soldiers came to view the war as a demoralizing and devastating defeat, the consequences of which had a substantial impact on the Soviet Union and its collapse. Feifer's extensive research includes eye-opening interviews with participants from both sides of the conflict. In gripping detail, he vividly depicts the invasion of a volatile country that no power has ever successfully conquered. Parallels between the Soviet invasion of Afghanistan and the U.S. invasions of Afghanistan and Iraq are impossible to ignore—both conflicts were waged amid vague ideological rhetoric about freedom. Both were roundly condemned by the outside world for trying to impose their favored forms of government on countries with very different ways of life. And both seem destined to end on

uncertain terms. A groundbreaking account seen through the eyes of the men who fought it, The Great Gamble tells an unforgettable story full of drama, action, and political intrigue whose relevance in our own time is greater than ever. A Brief History of Afghanistan - Shaista Wahab 2007

Located along the busy trade routes between Asia and Europe, Afghanistan was for centuries a place where a diverse set of cultures met and exchanged goods and ideas.

Mindstorms - Seymour A. Papert 2020-10-06
In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like debugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and

between students and teachers. Technology changes every day, but the basic ways that computers can help us learn remain. For thousands of teachers and parents who have sought creative ways to help children learn with computers, *Mindstorms* is their bible.

The Global HIV Epidemics among Sex Workers - Deanna Kerrigan 2012-12-01

A global economic analysis of HIV infection amongst sex workers, finding that evidence based and rights affirming interventions are not implemented to the level that their efficacy warrants, and that doing so at scale would be cost effective and deliver significant returns on investment.

Becoming a Student-Ready College - Tia Brown McNair 2016-07-25

Boost student success by reversing your perspective on college readiness The national conversation asking "Are students college-ready?" concentrates on numerous factors that are beyond higher education's control. *Becoming a Student-Ready College* flips the college readiness conversation to provide a new perspective on creating institutional value and facilitating student success. Instead of focusing on student preparedness for college (or lack thereof), this book asks the more pragmatic question of what are colleges and universities doing to prepare for the students who are entering their institutions? What must change in an institution's policies, practices, and culture in order to be student-ready? Clear and concise, this book is packed with insightful discussion and practical strategies for achieving your ambitious student success goals. These ideas for redesigning practices and policies provide more

than food for thought—they offer a real-world framework for real institutional change. You'll learn: How educators can acknowledge their own biases and assumptions about underserved students in order to allow for change New ways to advance student learning and success How to develop and value student assets and social capital Strategies and approaches for creating a new student-focused culture of leadership at every level To truly become student-ready, educators must make difficult decisions, face the pressures of accountability, and address their preconceived notions about student success head-on. *Becoming a Student-Ready College* provides a reality check based on today's higher education environment.

Godlike - Dennis Detwiller 2015-05-05

"You are larger than life, but the war is larger than you." *Godlike* is a tabletop superhero roleplaying game like no other. No bright spandex, no pulp machismo. In the face of a world on fire, ordinary men and women emerge who possess the Talents their times demand -- but who are still as vulnerable, and ultimately as expendable, as ordinary troops in the foxholes. Backed by a deep alternate history, players take the roles of Talents fighting in the greatest conflict of the Twentieth Century. This is an expanded and edited edition of the classic roleplaying game by Dennis Detwiller and Greg Stolze.

Inside Central Asia - Dilip Hiro 2011-11-01

"For those who still get their '-stans' mixed up, Hiro's book provides a detailed and nuanced overview of the region." —Financial Times (Best

Books of the Year) The nations of Uzbekistan, Turkmenistan, Kazakhstan, Kyrgyzstan, Tajikistan, Turkey, and Iran—the majority of them former Soviet republics—remain little understood in the West even in the post-Cold War era. This book delves into these Central Asian countries: their histories, cultures, economics, politics, militaries, and relationships with regional neighbors, Russia in particular. Ultimately, *Inside Central Asia* is an outstanding, in-depth introduction to this part of the world, “full of dependable history-telling and analysis” (The Economist). Praise for the work of Dilip Hiro “The writing is clear and informative.” —The New York Times “Hiro’s mix of lively writing and serious detail should draw in readers.” —Choice “Intriguing analysis.” —Publishers Weekly “[An] eminent historian.” —Kirkus Reviews

The Ideologies of Japanese Tea - Tim Cross
2009-09-01

This provoking study of the Japanese tea ceremony (chanoyu) examines the ideological foundation of its place in history and the broader context of Japanese cultural values where it has emerged as a so-called ‘quintessential’ component of the culture. Sen Soshitsu XI argued that tea be viewed as the expression of the moral universe of the nation.

Security Force Assistance in Afghanistan - Terrence K. Kelly 2011-08-08

Security force assistance (SFA) is a central pillar of the counterinsurgency campaign being waged by U.S. and coalition forces in Afghanistan. This monograph analyzes SFA efforts in Afghanistan over time, documents U.S. and international approaches to building the Afghan force from 2001 to 2009, and provides observations and recommendations that emerged from extensive fieldwork in Afghanistan in 2009 and their implications for the U.S. Army.

Divided Responsibility: Lessons from U. S. Security Sector Assistance Efforts in Afghanistan

- Department of Defense
2019-07-25

After 17 years of U.S. involvement in Afghanistan and security-related U.S. appropriations totaling \$83.3 billion (approximately 63 percent of the nearly \$133 billion of U.S. reconstruction funding), there is not one person, agency, country, or military service that has had sole responsibility for overseeing security sector assistance (SSA).¹ Instead, the responsibility for security sector assistance was divided among multiple U.S. and international entities. This report examines how these divides had unintended consequences and created challenges to the effectiveness of the mission, as well as some benefits. While the dual-hatted U.S.-NATO commander is largely responsible for reconstructing the Afghan National Defense and Security Forces (ANDSF), the Ministry of Defense (MOD), and the Ministry of Interior (MOI), the commander has no direct authority over civilian actors operating within embassies, the European Union, and other international organizations. Moreover, the commander does not have absolute authority to dictate the exact methods and activities NATO countries use to train and advise the ANDSF in different parts of Afghanistan. Rather the commander provides overarching guidance and coordinates the countries' various activities. This has created asymmetries in ANDSF development and has impeded the standardization of security sector assistance programs. This report also highlights how the unity of command and effort was strained because no U.S. executive branch department or military service had full ownership of key components of the mission, responsibility for assessing progress toward meeting U.S. strategic objectives, or accountability for vetting and deploying experts to accomplish mission tasks. Within the NATO-led coalition, the United States implemented a patchwork of SSA activities and programs involving dozens of U.S. government entities and

international partner nations.

Emerging Issues for Small Island Developing States - United Nations

Environment Programme 2015-12-07
The 2012 UNEP Foresight Process on Emerging Global Environmental Issues primarily identified emerging environmental issues and possible solutions on a global scale and perspective. In 2013, UNEP carried out a similar exercise to identify priority emerging environmental issues that are of concern to the Small Island Developing States (SIDS). The social and economic emerging issues were also identified using the same set of criteria. At the core of the process was a SIDS Foresight Panel consisting of 11 SIDS experts (for the UNEP Panel) and 12 experts (for the UN DESA Panel) from the three SIDS regions, representing the global SIDS community and a wide range of disciplines. The process was designed to open the discussion on emerging environmental issues to a broad range of views both from the Foresight Panel and a wider community of relevant experts from across the globe. Through the Foresight Process, separate lists of 20 environmental and 15 socioeconomic emerging issues were identified and discussed in this report.

Code - Lawrence Lessig 2009-07-09

Since its original publication in 1999, this foundational book has become a classic in its field. This second edition, Code Version 2.0, updates the work and was prepared in part through a wiki, a web site allowing readers to edit the text, making this the first reader-edited revision of a popular book. Code counters the common belief that cyberspace cannot be controlled or censored. To the contrary, under

the influence of commerce, cyberspace is becoming a highly regulable world where behavior will be much more tightly controlled than in real space. We can - we must - choose what kind of cyberspace we want and what freedoms it will guarantee. These choices are all about architecture: what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law and it is up to lawyers, policymakers, and especially average citizens to decide what values that code embodies. Publisher: Basic Books/Perseus.

Free Culture - Lawrence Lessig 2016-07-30
Lawrence Lessig, "the most important thinker on intellectual property in the Internet era", masterfully argues that never before in human history has the power to control creative progress been so concentrated in the hands of the powerful few, the so-called Big Media. Never before have the cultural powers- that-be been able to exert such control over what we can and can't do with the culture around us. Our society defends free markets and free speech; why then does it permit such top-down control? To lose our long tradition of free culture, Lawrence Lessig shows us, is to lose our freedom to create, our freedom to build, and, ultimately, our freedom to imagine.

U.S. Marines in Afghanistan, 2001-2009 - U S Marine Corps History Division 2017-02-05
This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest

ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the "three-block war." Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' "surge strategy" in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story "How We Lost the War We Won." In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift

prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

Microeconomics in Context - Neva Goodwin
2015-12-07

Microeconomics in Context lays out the principles of microeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Macroeconomics in Context, the book is uniquely attuned to economic realities. The "in Context" books offer affordability, accessible presentation, and engaging coverage of current policy issues from economic inequality and global climate change to taxes. Key features include: --Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; --Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; --A powerful graphical presentation of various measures of well-being in the United States, from income inequality and educational attainment to home prices; --Broad definition of well-being using both traditional economic metrics and factors such as environmental quality, health, equity, and political inclusion; --New chapters on the economics of the environment, taxes and tax policy, common property and public goods, and welfare analysis; --Expanded coverage of high-interest topics such as behavioral economics, labor markets, and healthcare; --Full complement of instructor and student support materials online, including test banks and grading through Canvas.

Institutional Management in Higher Education - Centre for Educational Research and Innovation 1972

The Russian Military in Contemporary Perspective - Stephen J. Blank 2019

"The chapters included in this volume all come from an international conference on the Russian

military that aimed to examine the Russian military establishment as much as possible, including its domestic developments, the ability of Russia's economy, and in particular, its science and technology sectors. Given the ongoing aggressiveness of the Russian military, this effort to present an all-encompassing look at it is not only essential reading but also quite unique in the existing literature" -- Publisher's web site.

Leadership and Learning - Jan Robertson
2011-03-14

Bringing together internationally recognised scholars this book focuses on the relationship between leadership and learning for the education community. It draws together a wealth of knowledge and research in the field across a variety of contexts, such as system leadership, professional learning communities and leading different cultures. Themes covered include: - exploring models for leadership and improvement - challenges in developing learning-focused leadership - broadening ideas of learning and knowledge work. This book will be of interest to educational leaders at all levels and in all sectors, as well as consultants, academics and those who wish to extend their knowledge in educational leadership whether engaging in further academic study or in reflective practice around the ideas presented. This book is essential for anyone taking advanced programmes in educational leadership and management.

Principles of Economics in Context - Neva Goodwin 2015-03-04

Principles of Economics in Context lays out the principles of micro- and macroeconomics in a manner that is thorough, up to date, and relevant to students, attuned to the economic realities of the world around them. It offers engaging treatment of important current topics such as new thinking in behavioral economics, financial instability and market bubbles, debt and deficits, and policy responses to the problems of unemployment, inequality, and environmental sustainability. This new, affordable edition combines the just-released new editions of Microeconomics in Context and Macroeconomics in Context to provide an integrated full-year text covering all aspects of both micro and macro analysis and application,

with many up-to-date examples and extensive supporting web resources for instructors and students. Key features include: An eye-opening statistical portrait of the United States; Clear explanation of basic concepts and analytical tools, with advanced models presented in optional chapter appendices; Presentation of policy issues in historical, institutional, social, political, and ethical context--an approach that fosters critical evaluation of the standard microeconomic models, such as welfare analysis, labor markets, and market competition; Issues of human well-being, both domestic and global, are given central importance, enriching the topics and analytical tools to which students are introduced; The theme of sustainability--financial, social, and ecological--is thoroughly integrated in the book, with chapters on alternatives to standard GDP measurement, the environment, common property, public goods, and growth and sustainability in the twenty-first century; Full complement of instructor and student support materials online, including test banks and grading through Canvas.

Mathematics & Mathematics Education: Searching for Common Ground - Michael N. Fried 2013-11-29

This book is the fruit of a symposium in honor of Ted Eisenberg concerning the growing divide between the mathematics community and the mathematics education community, a divide that is clearly unhealthy for both. The work confronts this disturbing gap by considering the nature of the relationship between mathematics education and mathematics, and by examining areas of commonality as well as disagreement. It seeks to provide insight into the mutual benefit both stand to gain by building bridges based on the natural bonds between them.

Coastal Wetlands Restoration - Hiromi

Yamashita 2021-07-30

This book examines a wide range of innovative approaches for coastal wetlands restoration and explains how we should use both academic research and practitioners' findings to influence learning, practice, policy and social change. For conservationists, tidal flats and coastal wetlands are regarded as among the most important areas to conserve for the health of the entire oceanic environment. As the number of restoration projects all over the world increases, this book provides a unique assessment of coastal wetland restorations by examining existing community perceptions and by drawing on the knowledge and expertise of both academics and practitioners. Based on a four-year sociological study across three different cultural settings - England, Japan and Malaysia - the book investigates how citizens perceive the existing environment; how they discuss the risks and benefits of restoration projects; how perceptions change over time; and how governmental and non-governmental organisations work with the various community perceptions on the ground. By comparing and contrasting the results from these three countries, the book offers guidance for future conservation and restoration activities, with a specific view to working with local citizens to avoid conflict and obtain long-term investment. This book will be of great interest to students and scholars of coastal restoration, wetland conservation and citizen science, as well as environmental sociology and environmental management more broadly. It will also be of use to practitioners and policymakers involved in environmental restoration projects.

Eurasian Disunion - Janusz Bugajski 2016-08-30

Eurasian Disunion: Russia's Vulnerable Flanks examines the impact of Moscow's neo-imperial project on the security of several regions bordering the Russian Federation, analyses the geopolitical aspects of Kremlin ambitions, and makes recommendations for the future role of NATO, the EU, and the United States in the Wider Europe. Russia's attack on Ukraine and the dismemberment of its territory is not an isolated operation. It constitutes one component of a broader strategic agenda to rebuild a Moscow-centered bloc designed to compete with the West. The acceleration of President Vladimir Putin's neo-imperial project has challenged the

security of several regions that border the Russian Federation and focused attention on the geopolitical aspects of Kremlin ambitions. This book is intended to generate a more informed policy debate on the dangers stemming from the restoration of a Russian-centered "pole of power" or "sphere of influence" in Eurasia. It focuses on five vulnerable flanks bordering the Russian Federation--the Baltic and Nordic zones, East Central Europe, Southeast Europe, South Caucasus, and Central Asia. It examines several pivotal questions, including the strategic objectives of Moscow's expansionist ambitions; Kremlin tactics and capabilities; the impact of Russia's assertiveness on the national security of neighbors; the responses of vulnerable states to Russia's geopolitical ambitions; the impact of prolonged regional turmoil on the stability of the Russian Federation and the survival of the Putinist regime; and the repercussions of heightened regional tensions for U.S., NATO, and EU policy toward Russia and toward unstable regions bordering the Russian Federation.

Expanding Curriculum Theory - William M. Reynolds 2016-04-28

Expanding Curriculum Theory, Second Edition carries through the major focus of the original volume--to reflect on the influence of Deleuze and Guattari's concept of "lines of flight" and its application to curriculum theorizing. What is different is that the lines of flight have since shifted and produced expanded understandings of this concept for curriculum theory and for education in general. This edition reflects the impact of events that have contributed to this shift, in particular the (il)logic of school policy changes and reforms in the past decade, and the continued explosion of social media and its effect on the collective understanding of how both "knowledge" and "education" work as forms of repression. The introduction updates the text and puts it into current debates in the field and in the larger socio-economic milieu. New dis/positions are presented that explore central questions circulating within and outside curriculum studies. Exciting scholarship on a range of topics includes notions of desire and commodities, youth culture and violence, new directions in curriculum theory, Eco-Ethical consciousness, new Deleuzian views of

normality, the diffusion of technology and lines of flight in transnational curriculum inquiry. *Governing by Design* - Aggregate 2012-04-29
Governing by Design offers a unique perspective on twentieth-century architectural history. It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics, culture, economics, and globalization to uncover the roots of how our built environment evolves. In these chapters, historians offer their analysis on design as a vehicle for power and as a mediator of social currents. Power is defined through a variety of forms: modernization, obsolescence, technology, capital, ergonomics, biopolitics, and others. The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct, action, identity, and design. They follow design as it functions through the body, in the home, and at the state and international level. Overall, Aggregate views the intersection of architecture with the human need for what Foucault termed "governmentality"--societal rules, structures, repetition, and protocols--as a way to provide security and tame risk. Here, the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era.

Macroeconomics in Context - Neva Goodwin 2015-03-12

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, *Microeconomics in Context*, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Storming the City - Alec Wahlman 2015-10-15

In an increasingly urbanized world, urban terrain has become a greater factor in military operations. Simultaneously, advances in military

technology have given military forces sharply increased capabilities. The conflict comes from how urban terrain can negate or degrade many of those increased capabilities. What happens when advanced weapons are used in a close-range urban fight with an abundance of cover? *Storming the City* explores these issues by analyzing the performance of the US Army and US Marine Corps in urban combat in four major urban battles of the mid-twentieth century (Aachen 1944, Manila 1945, Seoul 1950, and Hue 1968). Alec Wahlman assesses each battle using a similar framework of capability

categories, and separate chapters address urban warfare in American military thought. In the four battles, across a wide range of conditions, American forces were ultimately successful in capturing each city because of two factors: transferable competence and battlefield adaptation. The preparations US forces made for warfare writ large proved generally applicable to urban warfare. Battlefield adaptation, a strong suit of American forces, filled in where those overall preparations for combat needed fine tuning. From World War Two to Vietnam, however, there was a gradual reduction in tactical performance in the four battles.
