**A Complicated Legacy** - Robert H. Stucky 2014-05-23

If movies and books like *Belle*, *Twelve Years a Slave*, *The Butler*, *The Help*, *A Time to Kill*, and *Amistad* have moved you, you'll love *A Complicated Legacy*, a novel by Baltimore writer Robert H. Stucky based on the true story of Elijah Willis, a white South Carolina planter, and Amy— the love of his life, the mother of his children, and his slave. Taking place in the decade leading up to the Civil War, it is written with a cinematic eye for atmosphere and setting, a linguist's ear for dialogue, and a historian's grasp of the powerful social forces and momentous events of the time. It is a riveting tale of personal transformation in facing the tide of sweeping social change. Elijah Willis fought family opposition, public opinion, and the law to free his family of choice and leave them his entire inheritance. In so doing, his and Amy's story becomes a microcosm of the human struggles that made the Civil War and the Abolition of Slavery both necessary and inevitable. Set in rural South Carolina, Baltimore, and Cincinnati, this vivid saga weaves history and humanity in a compelling testimony to the power of relationships to shape our destinies, even a century and a half later.

**Biomagnetic Healing with Your Hands** - Johanna Arnold 2013-05

Magnetic fields are the link between different dimensions and planes of creation, on both a large and a small scale. How all of the knowledge that is presented here in such an easily understandable fashion can be applied in practice even by absolute beginners is detailed in this book very impressively, using a very

practical approach to the topic. She writes how the ethereal bodies are interwoven with the material one and how therapeutic magnetism works in practice. By following precise directions for exercises in this book you will learn how to return the magnetic fields of a human being to their natural balance simply by laying on of hands. The techniques described will enable the self-regulating forces in your organism to be able to take effect again.

**Living Intelligence Or the Art of Becoming** - Ray Rimaletta, Ph.d. 2015-03-06

"Living Intelligence or the Art of Becoming" By Dr. Rimaletta Ray and Xenia Gazarkh "The highest system of learning is how we live our lives, and the hardest Job in the world is to create oneself!"(Dalai Lama) The

work on self-formation is the art of making each life have more sense in terms of intellectual self-realization that each and every one of us is striving hard to accomplish. Revolutionizing our knowledge in the coming more electronically-charged years is the first stage of the process of rationalization of our lives. "There is only one good - knowledge and one evil - ignorance" (Socrates) The book "Living Intelligence or the Art of Becoming" is an attempt to pinpoint the Modus Operandi of a personal evolution through expanding one's intelligence and raising the consciousness. Unfortunately, it is downright impossible unless we uplift ourselves in all the five main dimensions of life: physical, emotional, mental, spiritual, and universal holistically by practicing what we preach, by developing intuition that is our "adult barometer," and by turning our bad life habits into transformative Living Intelligence skills. At the new electronically-advanced times holistic, integral, and conscious self-development becomes a priority At the time of rapid evolution of Electronic Intelligence, we need people that are well-rounded holistically, on all the above mentioned levels. And if our education system does not provide that, the mission of every intelligent person is to obtain the education that makes one's unique personality shine against all odds. We need to help it happen so any one could become his own cheer-leader in life, cut his mechanical living, and start living consciously The book is an attempt to present a simple blueprint of self-development and self-realization as our main mission in life. Thesis 9)"If you are not headed to a destination with a map to guide you, then your intelligence and ambition are going to waste." (Dr. Phil) We are mapping out the ten stages of Living Intelligence ( Introduction, Thesis 9) that, in our understanding, are to be followed as our intellectual quest on the basis of the specifically developed talents and the intelligence that we might be granted by God. It is a holistic picture of the most critical intelligences that comprise living intelligence and sculpture a person on his way to attaining "spiritualized intelligence" (John Baines) and Living Consciousness. It is a new, much more reasoned out self-awareness, guided by rational thinking, speaking and acting that a human mind needs to master on five philosophical levels: Mini, Mata. Mezzo. Macro, and Super, and in five main dimensions: physical, emotional, mental spiritual, and universal. We are developing the super conscious mind on these levels holistically. This being said, self- modification and self-regulation need to be consciously practiced in the following direction: Unconscious Conscious Superconscious Mini Level - (Physical dimension) - General Intelligence (Physical Intelligence +, Cognitive Intelligence + Digital Intelligence) + Language Intelligence - We personalize ourselves mentally, verbally, and psychologically. Meta Level - (Emotional dimension) - Emotional Intelligence + Psychological Intelligence - We intellectualize our emotions and become better masters of ourselves psychologically Mezzo Level - (Mental dimension) - Professional Intelligence (Creative Intelligence +, Financial Intelligence) - We individualize and self-realize ourselves professionally! Macro -Level - (Mental Dimension)- Cultural and Social Intelligences We acculturate and socialize yourself! Super Level - (Spiritual and Universal Dimensions), Spiritual and Universal Intelligences We spiritualize ourselves by transcending our religious differences, committing to the Universal Intelligence that we all call God holistically, servicing God and life at large on the interpersonal level and extra-terrestrial levels. Each of the intelligences, outlined above, makes up a strategic plan of action for self- creation. They are all interrelated by the principle of the Russian dolls, when the top doll encompasses all the rest into one dependable structure.( Introduction, Thesis 9) The outline of the direction for the self-quest that we present in this book as the know-how of a self-training program had been verified by the author for the life time of academic teaching young people from all over the world.. They have all learned to defy the gravity of common thought and fly in their mind, no matter what! Finally, the book is also promoting self- suggestive psychology based on the premises that if you want to be inspired, you need to be self-inspiring! We believe that besides obtaining a more rationalized attitude to life, the mind of each person on earth needs to be inspired and enthused for such a holistic mission statement willfully. Inspiring oneself is the process of forcing one's resisting mental, emotional, and psychological make-ups to do the self-transformation of the whole body system. The book is disarmingly simple to grasp for everyone, an adult or a teenager, just stepping on the path of self-formation. Simplicity, as the primary component of the book, prompted that its extremely broad topic be presented in small, very digestible Chunks of information that can always be enriched through numerous sources on the Internet With a clear-cut idea about what they are seeking and where they are channeling themselves with the book as a compass in self-quest and self-

realization, readers can get oriented in the intelligence that they need to develop. It will also inspire them to stay on the path of self- creation with the help of suggestive inspirational boosters that preview every stage of intelligence, on the one hand, and a wide choice of auto-suggestive mind-sets that rhyme to boost the will-power, on the other.. In sum, the aim of the book "Living Intelligence or the Art of Becoming" is to expand on the circumference of being to becoming, systematizing the living skills, or rather the mix of living skills to attain basic intelligences for self-regeneration and self-creation to a better full- realization in life. It's the first book on the market of this overwhelmingly holistic value, and it has undoubtedly a great potential to be read and studied by everyone who feels a void inside for self- realization to finally accomplish the "excessive happiness" that everyone is striving for. Living intelligence becomes consciousness in action, the consciousness that cultivates a new culture of thinking and living. "We must make sense with our lives, each and every one of us!"(Leo Vygotsky) "Someday is Now!"

**Baby Bumps** - Amy Sprenger 2012-06-29

From the author of the award-winning blog Snarky Mommy comes a book that will make every woman who has ever been pregnant pee with laughter (not that that's hard). Wearing her highest heels and hottest pregnancy jeans, Amy Sprenger marches into her doctor's office, beverage in hand, ready to finally see whether her baby is a boy or a girl. Sure, sure, this appointment is supposed to be about checking the health of the baby, but everyone who's ever been there knows it's really about looking for what lays, or doesn't lay, between the legs. So when the doctor tells her she has an incompetent cervix, Amy becomes immediately offended on behalf of her reproductive organs. Is that just a politically correct way of saying her cervix sucks? Unfortunately, as she's soon to learn, it's a lot more than that. The only way to keep that baby from falling out on the sidewalk (probably in front of Starbucks) is for her doctor to stitch her cervix closed and for Amy to stay in bed for the next four months. Four months that are carefully detailed in this "memoir." A memoir that, while basically true, has been embellished with Amy's signature brand of humor and hilarity. With more time off than a castoff contestant on "The Bachelor," Amy takes pen to paper and settles in for the ride. But instead of sitting around eating bonbons, she's popping hypertension drugs to stave off preterm labor. And complications? Oh, she's got your complications. She's gut-rehabbing her house. Her mother moves in to care for her. Her husband takes a "mancation" while she's stuck in the hospital. And every time she has a contraction, she's convinced it's The Big One. Living by the adage that laughter is the best medicine, Amy fumbles her way through a series of sometimes serious and usually embarrassing situations. And just to be clear, using a bedpan qualifies as both serious and embarrassing. "Amy Sprenger's foray into factual fiction is a hilarious (and sometimes poignant) look at high-risk pregnancy from her view at the end of the bed. Sprenger offers a fresh and funny voice that readers will love!" --

**Natural Birth** - Kristina Turner 2014-05-09

In our society childbirth is often viewed as something to be feared and even to be avoided, through elective caesarian or extreme pain suppression. In this uplifting book Kristina Turner applies esoteric knowledge to show practical ways of transforming a difficult experience into a positive and deeply spiritual one. Kristina looks closely at the physical processes that take place in the body during pregnancy and childbirth, as well at explaining the facts behind hospital procedures and options for home birth -- providing readers with the necessary knowledge to make their own choices. She feels that birthing should be viewed as a unified process, from the nine months of pregnancy through labour to the many months of breastfeeding; all three stages contribute to developing the bond between mother and child and the child's emotional function. Kristina writes beautifully about the sacred mystery inherent in conception and pregnancy, and guides the new mother towards being a conscious participant in the spiritual process of bringing life into this world. This book is both very practical and hugely inspiring.

*Holistic Thinking* - Joseph E. Kasser, Dr. 2015-08-12

While the skills to identify and solve problems are becoming recognised as being increasingly important, there are not many good ways to help you acquire those skills. This book is designed to help you help you acquire those skills so as to be able to deal with undesirable situations, identify the right problem and provide the optimal acceptable solution from the range of prospective solutions. The needed skill for providing acceptable solutions is the ability to think differently to that of your contemporaries. You need to go beyond systems thinking and apply holistic thinking to the matter at hand. This book helps you develop that skill, building on the works of W. Edwards Deming (Quality), Peter Senge (systems thinking), Tom Peters, Peter Drucker and Michael Hammer and James Champy (management) to tell you what to do, how to do it, when to do it, and provide you with the understanding of why it must be done. While systems thinking can help you to understand relationships in situations and think systemically and systematically, systems thinking alone cannot help you provide innovative solutions to complex problems. This is because understanding situations is only the first step on the journey that provides those innovative solutions. This book provides you with frameworks and classifications systemically and systematically starting by discussing thinking, then taking you through thinking about undesirable situations and problems and how to convert them to acceptable solutions. The book is split into three parts: Part I. Thinking and ideas. Part II. Using the ideas in problem-solving. Part III. Innovative solutions to complex problems. Part I provides the thinking and communications tools which are used to create and communicate innovative solutions to complex problems. Chapter 2 introduces you to thinking and introduces some of the tools you can use to assist your creative thinking. Chapter 3 discusses ways to communicate ideas because there is little point in generating ideas if you are not going to do anything with them. Chapter 4 introduces nine Holistic Thinking Perspectives (HTP) as anchor points on the perspectives perimeter and more. Chapter 5: Introduces and provides an overview of critical thinking. Part II covers the problem-solving aspect of creating innovative

solutions to complex problems. Chapter 6 introduces Active Brainstorming as a way to increase the numbers of ideas generated by brainstorming using the HTPs coupled with the Kipling questions "who, what, where, when, why and how." Chapter 7 discusses the nature of systems and complex systems. Chapter 8 discusses decision-making because decision-making is at the heart of problem-solving. Chapter 9 discusses problems and solutions, the assumptions behind problem-solving, ways to remedy problems and introduces a holistic approach to managing problems and solutions. Part III provides examples of innovative solutions to complex problems showing how the progressive perspectives went beyond systems thinking and contributed to the innovative solutions and concludes by suggesting things you can do to start to become an innovator. Chapter 10 provides a range of examples of holistic thinking. Each example not only illustrates how the problem-solving process was tailored but provides examples of other aspects of finding innovative solutions to complex problems such as where things went correctly and where and how things can and did go wrong. Chapter 11 provides macro and micro examples of perceiving several issues/systems from various points on the perspectives perimeter for different purposes, the insights obtained and the resulting innovative solutions. Chapter 12 provides suggestions for how you can go about creating your own innovative solutions to complex problems. This book also provides a definitive answer to the question, "what came first, the chicken or the egg?"

**The Holistic Artist** - Heath Hollensbe 2018-04-09

Calling all artists and creatives! The time to create is now and you are the person to do it! Sadly, much of the art we see today is not worthy of holding the title of "art." The reason? We see examples that reveal constraints imposed by the creator rather than art embodying the

freedom of design; much of what we view is regurgitated self-expression rather than actual art. In "The Holistic Artist," Hollensbe and Hyndman spin 40 angles of the purpose of art, and argue that a more holistic "you" is the only way to produce awe-inspiring and world-changing art. Give art your strength, not your need... then step back, buckle up and watch what explodes.

**The Intentional Spinner** - Judith MacKenzie McCuin 2009-03-01

The rich, historic traditions of plant and animal fibers are fascinatingly juxtaposed with recent advances in synthesized fiber and mankind's use of fibers in the past, present, and future, while detailed, image-laden instructions for four intermediate projects demonstrate the range of possibilities, from sturdy, plied yarns to playful, novelty yarns. Spinners are also offered guidance on planning a project from start to finish, as well as how to care for and store completed projects.
